This report may be used, in whole or in part, as the basis for development of clinical practice guidelines and other quality enhancement tools, or a basis for reimbursement and coverage policies. AHRQ or U.S. Department of Health and Human Services endorsement of such derivative products may not be stated or implied.

AHRQ is the lead Federal agency charged with supporting research designed to improve the quality of health care, reduce its cost, address patient safety and medical errors, and broaden access to essential services. AHRQ sponsors and conducts research that provides evidence-based information on health care outcomes; quality; and cost, use, and access. The information helps health care decisionmakers—patients and clinicians, health system leaders, and policymakers—make more informed decisions and improve the quality of health care services.

Preface

The Agency for Healthcare Research and Quality (AHRQ), through its Evidence-Based Practice Centers (EPCs), sponsors the development of evidence reports and technology assessments to assist public- and private-sector organizations in their efforts to improve the quality of health care in the United States. The reports and assessments provide organizations with comprehensive, science-based information on common, costly medical conditions and new health care technologies. The EPCs systematically review the relevant scientific literature on topics assigned to them by AHRQ and conduct additional analyses when appropriate prior to developing their reports and assessments.

To bring the broadest range of experts into the development of evidence reports and health technology assessments, AHRQ encourages the EPCs to form partnerships and enter into collaborations with other medical and research organizations. The EPCs work with these partner organizations to ensure that the evidence reports and technology assessments they produce will become building blocks for health care quality improvement projects throughout the Nation. The reports undergo peer review prior to their release.

AHRQ expects that the EPC evidence reports and technology assessments will inform individual health plans, providers, and purchasers as well as the health care system as a whole by providing important information to help improve health care quality.

We welcome written comments on this technical review. They may be sent to: Director, Center for Outcomes and Evidence, Agency for Healthcare Research and Quality, 540 Gaither Road, Rockville, MD 20850.

Contents

Summary 1
Chapter 1. Introduction 11
Background 12
Expenditure Targets 13
Performance Adjustments 14
Updates and Conversion Factors 14
Other Physicians' Services 14
Chapter 2. Historical Trends in Medicare Expenditure Growth 21
Trends in Performance Targets and Updates 21
Updates and Conversion Factors 21
Historical Trends in Health Expenditures 23
Data and Methods 23
Expenditure Trends 24
Discussion 27
Chapter 3: Decomposing the Change in Medicare Expenditures for Physicians' Services 41
Policy Changes in Prices and Coverage Rules 41
Changes in the Volume and Intensity of Services Delivered 42
Methods 44
Results 47
RVU Use by Beneficiary Types 48
Site of Care Delivery 50
Changes in Clinical Technology and Productivity 51
Effect of Medicare Managed Care Enrollment 52
Other Physicians' Services 53
Discussion 54
Chapter 4. Limitations 67
Chapter 5. Conclusions 69
Implications 69
Future Research 70
References 73
Appendixes 75
