INDEX TO THE LEGISLATIVE HISTORY  
OF THE CONGRESSIONAL BUDGET AND  
IMPOUNDMENT CONTROL ACT OF 1974

The Congress of the United States  
Congressional Budget Office

## PREFACE

---

This indexing of the legislative history of the Congressional Budget Control and Impoundment Act of 1974 (P.L. 93-344) was undertaken at the request of the House Budget Committee. Its purpose is to provide a single source document that provides concise references to the major concepts, terms, and actors that were important to the formulation of the Congressional budget process.

This index was prepared under contract by Barbara and Ken LePoer. The project was directed by Mitchell I. Mutnick of the Budget Process Staff of CBO's Budget Analysis Division. Computer support was provided by Charles Gialloreto, Jr., of the Senate Computer Center and Ronald L. Hicks of the Senate Committee on Rules and Administration.

## INTRODUCTION

---

The Index to the Legislative History of the Congressional Budget and Impoundment Control Act of 1974 covers ten volumes of hearings and reports totaling 4,660 pages. The legislative history begins with the opening of hearings by the Joint Study Committee on Budget Control on January 18, 1973. The first nine volumes of Congressional hearings and reports trace the development of the law until the passage of the Conference Report by the Senate on June 21, 1974. The tenth volume, a Congressional Research Service history and analysis report, compiled by Allen Schick, summarizes the legislative history of the law. The ten volumes are listed below together with the reference number assigned to each volume for the purpose of this index.

#### CONTENTS OF THE VOLUME

This index contains two interfiled lists--a "name" list and a "term" list. The name list includes all persons or organizations that testified, submitted testimony, or were quoted in the testimony of others. The term list includes the major concepts and terms that were important in the development of the Congressional budget process. Each name is associated with subheadings comprising a list of terms discussed by that person, and each term is associated with subheadings comprising a list of

persons who discussed that term. The index refers the reader to the appropriate location in one of the ten volumes listed above in both printed version and microfilm version. The name and term lists are provided at the end of the index to aid the user in locating referenced terms.

In addition to names and budgetary terms, several other types of entries are included: bills, amendments, reports, Congressional committees, agencies, sections of the law, and various versions of the House (H.R. 7130) and Senate (S. 1541) bills. Certain types of entries--such as amendments, bills, and reports--are indexed both as names and as terms.

#### Versions of H.R. 7130 and S. 1541

The text of each version of these bills is identified and indexed separately--for example, Text of S. 1541 as Reported by the Senate Committee on Government Operations, November 20, 1973. Under this entry are found all the pertinent terms covered in the bill. Sponsors and cosponsors are cross-referenced to the particular version of the bill sponsored by them--for example, Griffin, Robert P.: See also Text of S. 1541 as Reported by the Senate Committee on Government Operations and the Senate Committee on Rules and Administration, February 21, 1974.

#### Other Bills

House and Senate bills that contributed to the final version of the law are indexed both as terms and as names, thus providing an index to persons who

discussed the bill and to pertinent terms within the text of the bill. The term "Text of" under each bill refers the reader to the pages where the text occurs. Sponsors and cosponsors are cross-referenced to the text of the bill they introduced.

### Amendments

Amendments are also indexed both as terms and as names. Under each amendment is found an index to pertinent terms in the text of the amendment and to all persons who discussed the amendment. In addition, under each amendment is found the term "Text of," which identifies the page reference where the text of the amendment is found. Each amendment also has as a subheading labeling the amendment as either accepted, rejected, withdrawn, or tabled, together with the page number where the particular action occurred. Sponsors and cosponsors of amendments are cross-referenced to the text of the amendment sponsored by them--for example, Long, Russell B.: See also Amendment 1044 to S. 1541, Text of.

### Roll Call Votes

The term "Roll Call Vote" under an amendment, bill, or the Conference Report identifies the pages where the recorded vote on each can be found.

### Reports

Reports that accompany the various versions of H.R. 7130 and S. 1541 are found under the name of

the issuing committee--for example, House Rules Committee Report on H.R. 7130 - House Report 93-658. The Interim and Final Reports of the Joint Study Committee on Budget Control can be found under the name of that committee. There are also reports by the Democratic Study Group and the Republican Policy Committee. As with bills and amendments, reports are indexed both as names and as terms, providing an index to terms contained in the report and to persons discussing the report.

### Tables

Eight tables, representing in concise form various types of information related to the development of the law, are indexed under the title of each table--for example, Comparison of S. 1541 and Joint Study Committee Recommendations. The tables are also brought together in a single list under the entry "Tables, Selected."

### Sections of the Law

For many users of the index, references to the various sections of the law will be of greatest interest. In the index, the terms that will be most useful as guides to each section are listed as cross-references under the section headings--for example, Section 101: See House Budget Committee, Composition of. For convenience, the cross-references for the sections of the law are also listed below.

## INTERPRETING THE INDEX

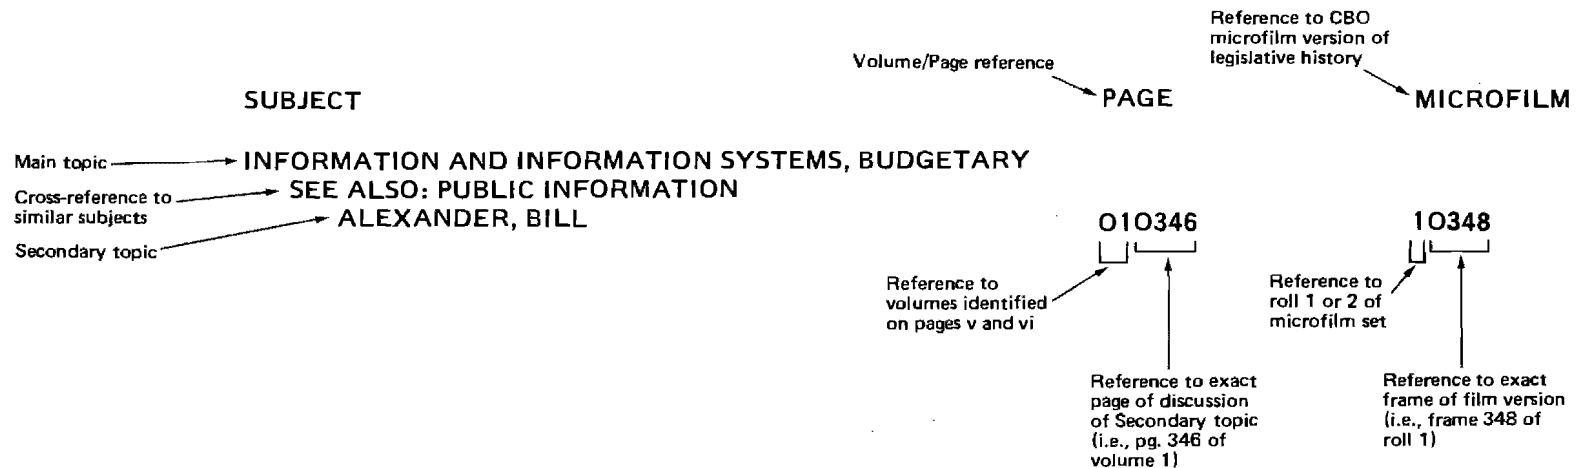

The figure below illustrates how to use the index to locate a specific name or term. To locate the names or terms associated with the topic of information systems, you would first find where that topic is listed as a main topic. In this case, it is Information and Information Systems, Budgetary. You will see that:

- o there is a cross-reference to other terms in the index
- o Bill Alexander spoke on the subject.

The reference citation is divided into two parts. The first two digits indicate the document cited according to the volume number assigned to it in this index. The next four digits indicate the actual page of the document on which the statement of Mr. Alexander will be found.

If you are using the microfilm version of the index, the search method is similar. The first digit of the reference is to roll 1 or 2 of the film version. The next four digits indicate the frame of the roll on which the statement will be found.
