- Also on Thursday, the **Subcommittee on Energy and Mineral Resources** will hold an oversight hearing on "Unconventional Fuels, Part II: The Promise of Methane Hydrates." This is the second in a series of hearings examining the potential for various unconventional fuels to contribute to the United States' sustainable energy supply in the short- and long-term. Virtually unknown in nature just a few decades ago, methane hydrates – which are essentially natural gas trapped in ice – are now recognized as a potentially huge resource that could vastly increase natural gas production in the United States. The federal government and industry are currently researching whether this massive resource can be tapped economically. The Committee will receive testimony to examine the current status of these research efforts, and gain a better understanding of the promise of methane hydrates.

In Case You Missed It:

- One year after House Natural Resources Committee Chairman Nick J. Rahall (D-WV) and Subcommittee on National Parks, Forests and Public Lands Chairman Raúl M. Grijalva (D-AZ) initiated efforts to force the Bush-era Interior Department to withdraw lands surrounding the Grand Canyon National Park from new uranium mining - Interior Secretary Ken Salazar on July 20 moved to protect nearly one million acres from new uranium mining. Visit the Committee's Web site to view the [press release](#) with additional information.
- On July 22, the **Committee on Natural Resources** approved the following bill:
 - [H.R. 2499](#) (Pierluisi): To provide for a federally sanctioned self-determination process for the people of Puerto Rico. "*Puerto Rico Democracy Act of 2009*"

Quotable Quote:

"The spectacular Grand Canyon is far too precious to risk to contamination from new uranium mining, which is why I joined Subcommittee Chairman Grijalva in urging Secretary Salazar to issue this temporary withdrawal. We are grateful that he has heeded our Committee's emergency request, which will afford the Congress more time to pass legislation to permanently protect the families and resources of the Grand Canyon area from the threat of uranium contamination."
