It is my understanding that the funding will be used to allow the Secretary of the Interior to conduct a feasibility study to enlarge the Arthur V. Watkins Dam. The structure of the dam needs to be updated and enlargement is needed to maximize water storage so the Weber Basin Project can continue to meet water supply needs along the Wasatch Front in Utah. *I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of me or my spouse.*

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Sincerely,

Dear Chairman Visclosky and Ranking Member Frelinghuysen,

I am requesting funding in the FY10 Energy and Water Development Appropriations bill, U.S. Army Corps of Engineers, Investigations account for the Arkansas River Levee Certification in Fort Smith, Arkansas. This request was recommended as part of the Inspection of Completed Works, AR project in the Corps, MRT-O&M account based on information provided by the Corps. The entity to receive funding for this project is the City of Fort Smith, located at 623 Garrison Avenue, Suite 315, Fort Smith, Arkansas, 72902. It is my understanding that the funding would be used to perform an Engineering assessment on the Arkansas River levee system, which is necessary to ensure FEMA accredits the levees. *I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of me or my spouse.* I hereby certify that this request will be made publicly available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress [OR: was named after Representative John Doe in 1983]; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Sincerely,

John Boozman
Member of Congress

Dear Chairman Visclosky and Ranking Member Frelinghuysen:

I am requesting funding for the Philadelphia Shipyard in fiscal year 2010.

The entity to receive funding for this project is the Philadelphia Industrial Development Corporation, located at 2600 Centre Square West, 1500 Market Street, Philadelphia, PA 19102-2126.

The funding would be used for reconstruction of the Philadelphia Shipyard seawall. The seawall extends approximately 7,000 feet along the Delaware River. Most portions of the structure are more than 100 years old. Severe deterioration threatens existing property in this National Register Historic District. The seawall protects adjacent buildings and associated infrastructure, including the U.S. Navy's Billion-dollar power research facility. The poor condition of the protective seawall severely limits the future redevelopment opportunities at The Navy Yard.

These repairs are needed to protect the adjacent buildings and associated infrastructure that include US Navy research facilities. Additionally, the repairs are required prior to the implementation of a proposed riverfront greenway trail along the Delaware River waterfront. Current public access and recreational opportunities along the Delaware River waterfront are very scarce. The project would provide community and economic development by expanding urban greenway and recreational opportunities for the region.

I certify that neither I nor my spouse has any financial interest in this project.

Robert A. Brady

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY10 Energy and Water Development Appropriations bill from the Energy Efficiency and Renewable Energy Account. The entity to receive funding for this project is the Town of Brookston and Chalmers, located at 205 East 3rd Street, Brookston, Indiana, 47923. It is my understanding that the funding will be used by the towns of Brookston and Chalmers to conduct a study to determine where wind turbines may be placed to generate 6 megawatts of power to replace what they currently use from coal fired power plants. The study will include not only technical requirements, but also regulatory and administrative requirements and needed backup power to insure uninterrupted power supply to the town. I certify that neither I nor my spouse has any direct financial interest in this project and I have posted my request information online in compliance with Chairman Obey's new rules.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program named or will be named after a sitting Member of Congress (2) is not intended for a "front" or "pass through" entity; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the Congressional Record describing how the funds will be spent and justifying the use of federal taxpayer funds.

Dear Chair Obey and Ranking Member Lewis:

I am requesting funding for "Long Island Sound Dredged Material Management Plan" as part of the Fiscal Year 2010 appropriations process. The proposed recipient of funding for this project is:

CT Department of Environmental Protection
79 Elm Street
Hartford, CT 06106

Requested funding would be used for development of a Dredged Material Management Plan (DMMP) for Long Island Sound. Failure to complete the EIS by the EPA for the eastern sites by 2011 will impact the viability of dredging projects in eastern Long Island Sound. This is of particular relevance to the long term operational viability of water-dependent uses in the New London Harbor area, including critical US Navy and Coast Guards bases, marine based commerce, marine transport of petroleum products and other cargo, and the extensive recreational boating industry in Connecticut.

I certify that neither I nor my spouse has any financial interest in this project. Thank you for your consideration of this request.

I am requesting funding for "Improving Fuel Cell Durability and Reliability to Speed Market Adoption" as part of the Fiscal Year 2010 appropriations process. The proposed recipient of funding for this project is:

University of Connecticut
352 Mansfield Rd., Unit 2048
Storrs, CT 06269

Funding would be used to accelerate ongoing research focused on enhancing fuel cell durability and reliability in advance of developing devices for transportation and stationary power applications. The Department of Energy (DOE) had identified increased durability of fuel cells, including the need for improved internal catalyst materials that can survive at high temperature operations to allow vehicle systems operate more efficiently at higher temperatures as a one of the most critical technical barriers to the use and commercialization of this technology.

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY10 Energy and Water Development Appropriations bill, Construction General account for the US Army Corp of Engineers. The entity to receive funding for this project is the US Army Corps of Engineers, Savannah District. It is my understanding that the funding would be used to deepen the Savannah River Federal navigation channel from -42 feet MLW to as much as -48 feet MLW, allowing the GPA to more efficiently serve the demands of U.S. Commerce; remain a valuable asset to the marine transportation system; and handle the currently constrained vessels calling the port, as well as the larger vessels expected to call the port following the Panama Canal expansion. Funding of \$33,725,000 is necessary to begin construction of the SHEP. While the Record of Decision will not be signed until mid-2010, these funds can be used for final pre-construction monitoring and engineering design of the channel and mitigation components for the project. Additionally, these funds will be needed immediately after project approval for negotiation of the Project Partnership Agreement. Construction contracts cannot be awarded prior to the completion of this agreement.

I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me. I hereby certify that this request will be made publicly available on my Official Website as required by the Committee, that only posted requests will be considered.

Dear Chairman Obey and Ranking Member Lewis:

I am requesting funding for the **Innovations for Low-Cost Gasification Systems** project in fiscal year 2010. The entity to receive funding for this project is Air Products and Chemicals, Inc., located at 7201 Hamilton Boulevard, Allentown, PA 18195. The funding would be used to advance the development of Green Energy ITM Ceramic Membranes, which can be integrated into a state-of-the-art gasification system to produce synthesis gas for the generation of advanced electric, hydrogen, or other clean fuels power. This versatile technology also enables the capture of greenhouse gases such as carbon dioxide and can be applied in a cost-effective and environmentally responsible manner to a broad list of energy sources, including coal, natural gas, liquid hydrocarbons, biomaterials, and waste materials. I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of me or my spouse.

Dear Chairman Obey and Ranking Member Lewis:

I write to respectfully request funding in the Fiscal Year 2010 Energy and Water Development Appropriations bill, Department of Energy, Science BER account. The entity to receive funding for this project is Barry University, located at 11300 NE 2nd Avenue, Miami Shores, FL 33161.

It is my understanding that the funding would be used to fund Phase II of the Institute for Collaborative Sciences Research which is intended to create a state-of-the-art research infrastructure through new laboratory and teaching space in health care and physical sciences programs. The focus of the Institute will be to prepare minority leaders for future work in healthcare professions while facilitating important research that has a direct benefit on minority populations in my South Florida community.

Barry University is one of the largest independent universities in Florida. The university boasts a student body that is more than 60% minority and 42% are the first in their family to attend college.

I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of me or my spouse.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. Dear Chairman Obey and Ranking Member Lewis:

I write to respectfully request funding in the Fiscal Year 2010 Energy and Water Development Appropriations bill, Office of Science, BER account. The entity to receive funding for this project is Miami-Dade College Hialeah Campus, located at 1780 W 49th Street, Hialeah, FL 33012.

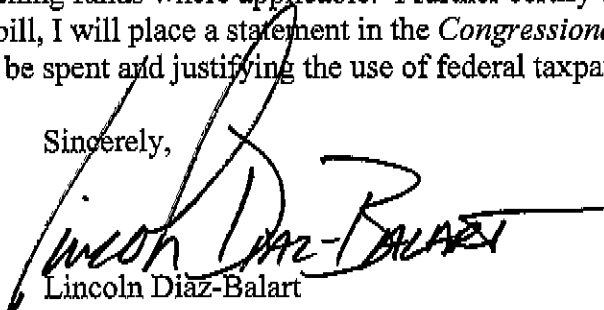

The funding would be used to implement a Physical and Biological Sciences Laboratory Learning Center at Miami Dade College's Hialeah Campus. Funding will develop both face-to-face and virtual Physical and Biological Science labs, and technology-enhanced learning systems to support student recruitment, retention and graduation rates in Science career fields. Having these options will allow students to use technology to conduct experiments and test hypotheses in class under the direct supervision of an instructor or in the traditional wet lab setting. The Physical and Biological Sciences Laboratory Learning Center at MDC-Hialeah Campus will promote graduation rates in degree programs in the sciences fields. The national need for college educated workers in STEM fields is well documented.

The Hialeah Campus is a new, growing campus of Miami Dade College, established as a comprehensive branch campus to serve the northwest portion of Miami-Dade County, a rapidly growing area with nearly 500,000 residents in the municipalities of Hialeah, Miami Lakes, Hialeah Gardens, and Medley. MDC-Hialeah Campus (MDC-HIA) currently enrolls nearly 11,000 low-income (58%), predominantly Hispanic (93%) students in credit and non-credit classes annually.

I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of me or my spouse.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. Dear Chairman Obey and Ranking Member Lewis:

I write to respectfully request funding in the Fiscal Year 2010 Energy and Water Development Appropriations bill, Army Corps of Engineers, Construction account. The entity to receive funding for this project is Miami-Dade County, located at 111 NW 1st Street, Suite 1032, Miami, FL 33128.

It is my understanding that the funding would be used for dredging of the Miami Harbor at the Port of Miami which includes the design, preparation of plans and specifications for bidding. The Chief of Engineers has recommended the deepening project to 50 – 52 feet and Congress has authorized the project (Title I, Water Resources Development Act of 2007).

It is essential that the Planning, Engineering, and Design (PED) begin in FY09. Extended delay in the proposed dredging improvements could be detrimental to the economy of South Florida and the nation. Cargo growth at the Port of Miami has been phenomenally strong. However, the industry standard container ship is becoming larger, and the Port cannot handle the newer ships without deeper channels. In addition, the Port has been facing increasing competition from foreign ports with existing significantly deeper channels and faces lost business to foreign ports (such as Freeport).

I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of me or my spouse.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY10 Energy and Water Appropriations bill, Department of Energy, Science account for State-of-the-Art Large-Scale Testing for Wind to Enhance Infrastructure Resiliency and Develop Energy-Efficient Buildings. The entity to receive funding for this project is Florida International University located at 11200 SW 8th St, Miami, FL 33199. It is my understanding that the funding would be used for (FIU) that has developed a *one-of-a-kind* large-scale Wall of Wind (WoW) facility simulating atmospheric turbulent flows and hurricane force winds. Currently the focus of WoW research is mitigation of damage to residential buildings. However, the WoW design allows its use for multiple testing of other infrastructural and life-line elements. Unfortunately such variety of testing is not feasible owing to the lack of the instrumentation for measuring aerodynamic, aeroelastic, and thermal effects. For this reason this large, expensive, and unique facility is severely under-used. The proposed funding would allow such WoW instrumentation to achieve a transformative testing capability not available anywhere else in the world. I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I hereby certify that this request will be made publically available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request: (1) is not directed to an entity or program that will be named after a sitting Member of Congress (2) is not intended to be used by an entity too secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable, I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Sincerely,

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY10 Energy and Water Appropriations bill, Department of Energy, Energy Efficiency and Renewable Energy Building Technologies account for City Hall Leadership in Energy and Environmental Design (LEED) Certification. The entity to receive funding for this project is City of Homestead, FL located at 790 N. Homestead Blvd., Homestead, Florida, 33030. It is my understanding that the funding would be used in replacing its aging and inadequate City Hall building with a new structurally hardened, energy efficient, low carbon emission, and environmentally friendly building. This new building, in addition to housing all City departments, will also encompass Homestead's new Emergency Operations Center. The City has requested that the designers include features in the design that will result in a LEED Silver Certificate. I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I hereby certify that this request will be made publically available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY2010 Energy and Water Appropriations bill for Appomattox River Dredging Project. The entity to receive funding for this project is the City of Hopewell at 300 North Main Street, Hopewell, Virginia, 23860. It is my understanding that the funding would be used to obtain funding for the maintenance dredge of the Appomattox River. The dredging of the Appomattox River will be of benefit to the region in that it will: (1) restore the Appomattox River to the free-flowing, fully navigable river that it was until the late 1970's; (2) reconnect the City to the navigable portions of the Appomattox River; (3) serve as a catalyst for the commercial and residential revitalization; (4) enhance local and regional tourism and recreational opportunities; and (5) improve the environmental condition of the Appomattox River.

I hereby certify that to the best of my knowledge, this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I also hereby certify that this request will be made publicly available on my official website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request: (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Dear Chairman Obey and Ranking Member Lewis,

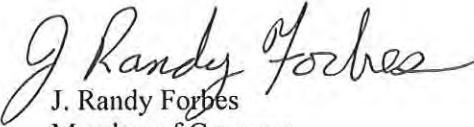

I am requesting funding in the FY2010 Energy and Water Appropriations bill for the Green Buildings and Retrofitting Program. The entity to receive funding for this project is the City of Hopewell at 300 North Main Street, Hopewell, Virginia, 23860. It is my understanding that the funding would be used to support the City's Green Building and Retrofitting Program. Building green requires the wise use of available materials and resources through energy and water efficiency strategies, the recycling of waste, and the use of recycled materials. Energy use is reduced through strategies such as low-e glazing, thicker insulation, energy recovery, demand-controlled ventilation, efficient mechanical equipment, and the use of renewable energy. The focus on indoor air quality that is characteristic of green buildings and better health, increases productivity, and, among students, higher test scores.

I hereby certify that to the best of my knowledge, this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I also hereby certify that this request will be made publicly available on my official website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request: (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Sincerely,

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY2010 Energy and Water Appropriations bill for Atlantic Intracoastal Waterway Bridge Replacement at Deep Creek. The entity to receive funding for this project is the City of Chesapeake at 306 Cedar Road, Chesapeake, Virginia, 23322. It is my understanding that the funding would be used to to replace the existing 2-lane Deep Creek AIW Bridge with a 5-lane, dual bascule bridge, thus providing a new structurally sound bridge and reducing traffic congestion along the corridor. AIW Deep Creek Bridge (owned and operated by the Army Corps of Engineers) was built in 1934 and is functionally obsolete. The City and State (along with FHWA) have made improvements on either side of the bridge and now replacement of the bridge is critical to the movement of people and goods along U.S. Rt. 17 as well as the Atlantic Intracoastal Waterway.

I hereby certify that to the best of my knowledge, this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I also hereby certify that this request will be made publicly available on my official website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Dear Chairman Obey and Ranking Member Lewis,

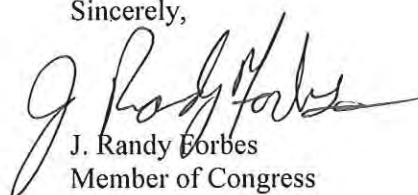

I am requesting funding in the FY2010 Energy and Water Appropriations bill for the Chowan River Basin Reconnaissance Study. The entity to receive funding for this project is the Army Corps of Engineers at 803 Front Street, Norfolk, Virginia, 23510. It is my understanding that the funding would be used to investigate federal flood control projects in the Chowan River Basin. In many locations within the basin, six of the top 10 historical high water marks have occurred from 1998 forward, including the flood of record (Hurricane Floyd in 1999), October 2006 cold core upper level low (second highest), and Hurricane Isabel in 2003 (5th highest). Damages from these storm events have ranged from \$10M to over \$100M (February 2008 dollars). The reconnaissance study will evaluate the Federal interest in ways to protect the water resources of this highly productive basin with particular emphasis on restoring wetlands and forested buffers lost from erosion and flooding, reducing flood damages throughout the basin, and improving navigation and to determine the Federal interest in conducting a more detailed feasibility study.

I hereby certify that to the best of my knowledge, this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I also hereby certify that this request will be made publicly available on my official website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Dear Chairman Obey and Ranking Member Lewis,

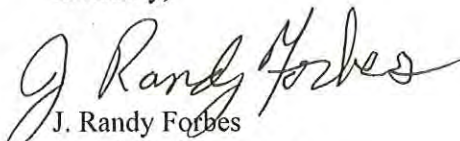

I am requesting funding in the FY2010 Energy and Water Appropriations bill for the Atlantic Intracoastal Waterway Albemarle and Chesapeake Canal. The entity to receive funding for this project is the Army Corps of Engineers at 803 Front Street, Norfolk, Virginia, 23510. It is my understanding that the funding would be used to protect the navigation route between the Southern Branch of the Elizabeth River and the VA-NC state line in the North Landing River, a distance of 27 miles. The ACC is of critical importance to transportation, especially to the U.S. Navy which transported over 55 million gallons of jet fuel yearly from the Craney Island to Oceana Naval Air Station in Virginia Beach. Failure to fund the ACC will result in the Navy being unable to meet the fuel demand of the Oceana Naval Station. The Navy has stated that trucking this much fuel would not be feasible on a long-term basis. In addition, commercial and recreation vessels travel the ACC in lieu of the Atlantic Ocean to prevent entry into the dangerous waters off Cape Hatteras. An average of over 1,000,000 tons of commerce passed through the Great Bridge Lock yearly. Funds will be used to continue to operate the navigation lock, swing bridge, and canal.

I hereby certify that to the best of my knowledge, this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I also hereby certify that this request will be made publicly available on my official website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request: (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. Sincerely,

I certify that neither I nor my spouse has any financial interest in this project.

The funding would be used for the City of Winter Garden for a community-wide weatherization project for several historically Black, impoverished residential neighborhoods in East Winter Garden, specifically the Center Street and 10th Street areas. The City plans to renovate and provide "Green" retro-fitting of dilapidated homes in the community while constructing new affordable housing throughout the neighborhood. The goal is to promote an environmentally-conscious, safe, and "green" community by revitalizing existing homes while building new homes. This project is a good use of tax-payer dollars because it will make existing, dilapidated homes livable while using green and environmentally friendly materials.

I am requesting \$300,000 in funding for the City of Winter Garden, Florida in fiscal year 2010. The entity to receive funding for this project is the City of Winter Garden located at 300 W. Plant St, Winter Garden, FL 34787.

Dear Chairman Obey and Ranking Member Lewis,

I am requesting \$700,000 in funding for the Orange County Environmental Protection Division in fiscal year 2010. The entity to receive funding for this project is the Orange County Government located at 800 Mercy Drive.: Orlando, Florida 32808..

The funding would be used for a Solar Demonstration & Research Facility to construct a 150 Kilowatt Photovoltaic Demonstration/Research Facility at the Orange County Agricultural Extension Center. Solar energy systems, as a means of reducing fossil fuel consumption and greenhouse gas (GHG) emissions, are critical and help meet important goals of Orange County's Local Climate Action Plan and the State's Energy Act. This is a central component of the Mayor's "Orange to Green" Initiative, and vital to meeting future goals in the Local Climate Change Plan. This project is a good use of tax-payer dollars because it will create a green-facility whose research will center on expanding new forms of energy.

Dear Chairman Obey and Ranking Member Lewis:

I am requesting funding in the FY 2010 Energy and Water Development Appropriations bill, Department of Energy, Biomass and Biorefinery Systems R&D account for the Sustainable Energy Research Center (SERC), a continuing research program at Mississippi State University, P.O. Box 9632, Mississippi State, MS 39762. It is my understanding that funding would be used to continue the SERC Program with the goal of developing new engineering and scientific knowledge and to serve as a catalyst to create renewable transportation fuel industries in the Southeastern US. Renewable transportation fuel platforms under development by SERC include bio-oil, biocrude, and syngas to gasoline. I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I hereby certify that this request will be made publicly available on my official website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request: 1) is not directed to an entity or program that will be named after a sitting Member of Congress; 2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and 3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Dear Mr. Chairman and Mr. Ranking Member:

I am requesting \$248,000 in the Fiscal Year 2010 Energy and Water Development appropriations measure for the City of Findlay, Ohio, within the Army Corps of Engineers Section 205 account.

It is my understanding that the funding will be used by the Corps' Buffalo District (1776 Niagara Street, Buffalo, New York 14207) to continue a flood control study in Findlay; the Corps has worked diligently since 2007 to develop these flood damage reduction plans.

To the best of my knowledge, this request is not directed to an entity or program that will be named for a sitting member of Congress, is not intended for use by an entity to secure funds for other entities (unless such use is consistent with the specified purpose of the request), and meets or exceeds all statutory requirements for matching funds where applicable.

I certify that neither I nor my spouse has a direct and foreseeable financial interest in this request. I further certify that this request will be made available on my official website as is required by the Chairman's policy on project disclosure.

Should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of taxpayer funds for this project.

Dear Chairman Obey and Ranking Member Lewis:

I am requesting funding for **CHARITON RIVER/RATHBUN LAKE WATERSHED, IA** in fiscal year 2010.

The entity to receive funding for this project is:
U.S. Army Corps of Engineers, Kansas City District
601 E 12th Street

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY10 Energy and Water Appropriations bill for the South Sacramento Streams Group. The entity to receive funding for this project is U.S. Army Corps of Engineers, Sacramento District, at 1325 J Street, Sacramento, CA 98514. It is my understanding that the funding would be used to extend the project upstream along Elder Creek, Unionhouse Creek and construct levee improvements to 3300-feet of railroad embankment protecting several hundred homes. In addition, design efforts will continue so that construction can occur in 2010 further reducing flood risk to residences along the various streams.

I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of me or my spouse.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress [OR: was named after Representative John Doe in 1983]; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. The Honorable Jerry Lewis, Ranking Member
House Appropriations Committee

Washington DC 20515

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY10 Energy and Water Appropriations bill for the McClellan Nuclear Radiation Center. The entity to receive funding for this project is the University of California at Davis, at One Shields Avenue, Davis, CA 95616. It is my understanding that the funding would be used to replace the nation's current sole domestic source of Iodine-125 (I-125) production located at the UC Davis McClellan Nuclear Radiation Center (MNRC). In April 2004, the system experienced its fourth and final failure causing production to cease entirely and the system remains inoperable today. It remains the only existing domestic supply source for the material.

I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of me or my spouse.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress [OR: was named after Representative John Doe in 1983]; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I

further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

I hereby certify that this request will be made publicly available on my official website, as required by Chairman Obey's new committee policy that only posted requests will be considered.

Sincerely,

A handwritten signature in blue ink that reads "Daniel E. Lungren". The signature is written in a cursive style with a large initial "D" and a long, sweeping underline.

Dear Chairman Visclosky and Ranking Member Frelinghuysen:

Thank you for your leadership on the House Appropriations Subcommittee on Energy and Water Development. I am requesting funding for The InteGrid Laboratory: Developing the Smart Grid Simulation Laboratory in fiscal year 2010. The entity to receive funding for this project is Colorado State University, located at 203 Administration Building, Fort Collins, CO 80523. The funding would be used for personnel, supplies, and the specialized equipment and instrumentation necessary to develop Smart Grid capabilities that will demonstrate in situ a reliable, secure, and market-driven electric power grid.

The funding for this project is a good use of taxpayer funds, because fully integrated smart grid technology will reduce consumer electricity costs by using energy more efficiently and ensure wind and solar power are more reliable sources of energy. This technology will also allow real-time monitoring of the grid for trouble shooting potential weaknesses in the system. Such monitoring will ultimately reduce blackouts and their costly economic impacts. I certify that neither I nor my spouse has any financial interest in this project.

Thank you for your leadership on the House Appropriations Subcommittee on Energy and Water Development. I am requesting funding for the Sustainable Biofuels Development Center (SBDC) in fiscal year 2010. The entity to receive funding for this project is Colorado State University, located at 203 Administration Building, Fort Collins, CO 80523. The funding will be used to establish shared collaborative research facilities; support undergraduate students, graduate students, and postdoctoral researchers; provide seed funding for research projects; to support student internships in biofuels companies, especially small businesses; and to sponsor workshops and travel opportunities that will benefit SBDC research.

The funding for this project is a good use of taxpayer money because SBDC will enhance the capability of America's biofuels industry to produce transportation fuels and chemical feedstocks on a large scale, with significant energy yields, at competitive cost, through sustainable production techniques. I certify that neither I nor my spouse has any financial interest in this project.

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding for the Odessa Subarea Special Study project in the FY10 Energy and Water Appropriations bill. The amount requested for this project is \$1,000,000. The entity to receive funding for this project is Columbia Basin Development League, located at 8582 Road K SW, Royal City, WA 99357.

The Federal Reclamation Columbia Basin Project has been the underlying driver for the economy in Central Washington. Investment in the expansion of Project infrastructure to allow delivery of Project water to eligible lands will avoid ecological disaster by preserving the remaining groundwater supplies for other uses, maintain the existing production base, preserve jobs, and provide long-term stability.

I hereby certify that this request will be made publicly available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered. I also attest that this project does not have a direct or foreseeable effect on the financial interests of me or my spouse.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge the request: (1) is not directed to any entity or program that will be named after a sitting Member of Congress (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding for the Whitworth University Science, Technology, Engineering, and Mathematics (STEM) Equipment Project in the FY10 Energy and Water Appropriations bill. The amount requested for this project is \$400,000. The entity to receive funding for this project is Whitworth University, located at 300 West Hawthorne Road, Spokane, WA 99201.

To attract more students into careers in science and mathematics, it is necessary to purchase state-of-the-art STEM equipment. This will prepare the general population with the levels of mathematics and science education necessary for America to compete.

I hereby certify that this request will be made publicly available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered. I also attest that this project does not have a direct or foreseeable effect on the financial interests of me or my spouse.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge the request: (1) is not directed to any entity or program that will be named after a sitting Member of Congress (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Best Wishes,

Cathy McMorris Rodgers

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding for the General Investigations, Walla Walla Watershed project in the FY10 Energy and Water Appropriations bill. The amount requested for this project is \$500,000. The entity to receive funding for this project is Confederated Tribes of Umatilla Indian Reservation, located at 73239 Confederated Way, Pendleton, Oregon 97801.

The Army Corps, in conjunction with the Confederated Tribes of the Umatilla, is focusing on the restoration and management of a viable ecosystem within the Walla Walla River Basin. The project is a high-priority for the local communities and the agricultural sector because instream flows enable the start of salmon reintroduction and a strong agricultural economy.

I hereby certify that this request will be made publicly available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered. I also attest that this project does not have a direct or foreseeable effect on the financial interests of me or my spouse.

I am requesting funding for Contra Costa Canal in fiscal year 2010.

The entity to receive funding for this project is the Contra Costa Water District, located at 1331 Concord Avenue, P.O. Box H2O, Concord, CA 94524.

The project would replace aging infrastructure and provide immediate water quality benefits to 550,000 people in the Contra Costa Water District service area, flood protection benefits to residents that live near the levees, and would help the Central Valley Project (CVP) meet water quality standards in the Canal while reducing water releases from upstream reservoirs. This funding would allow continuation of construction for this project, for which project design is complete and all permits are in place.

I am requesting funding for Brazos Island Harbor, TX, in fiscal year 2010.

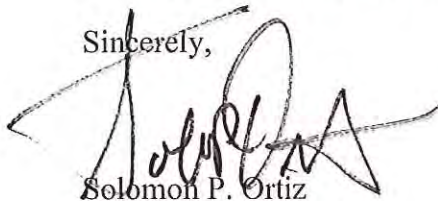

The entity to receive the funding for this project is:

Brownsville Navigation District, The Port of Brownsville
1000 Foust Rd
Brownsville, TX 78512

Funding for this project is needed to address shoaling and silting in the port channel and maintain the viability of The Port of Brownsville as a major center of industrial development with over 250 companies doing business representing some 8,000 jobs to the surrounding area. The Port of Brownsville is truly the economic engine for South Texas. It represents the promise of the economic viability of the region which has been economically depressed for many years. With the implementation of NAFTA, the Port has seen steady growth for years. The Port expects this tremendous growth to continue and will need the infrastructure to keep up with demand.

I am requesting funding for the Nueces River Observatory in fiscal year 2010.

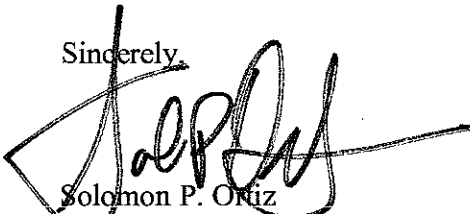

The entity to receive the funding for this project is:

Texas A&M University—Corpus Christi
6300 Ocean Drive
Corpus Christi, TX 78412

The funding for this project is will assist in managing water resources in the Coastal Bend of Texas in the face of a changing population, land use, and climate has proven to be a difficult challenge, especially when factoring in the need to provide sufficient water to meet not only human but environmental needs as well. Currently about 4,000,000 people live in South Texas and regional aquifers and rivers supply all their water. Existing water projects have taken a toll on the coastal ecosystem, and efforts to restore the Nueces estuary have been underway since 1995 when it was discovered that environmental flows were reduced by more than 90% from 1983-1993, which resulted in severe degradation of the Nueces Delta marsh.

I certify that neither I nor my spouse has any financial interest in this project.

I am requesting funding for the Regional Sediment Management in fiscal year 2010.

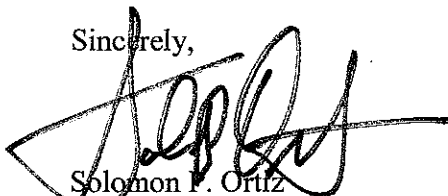

The entity to receive the funding for this project is:

Town of South Padre Island
4501 Padre Boulevard
South Padre Island, TX 78597

The funding for this study will allow the Army Corps of Engineers in cooperation with the Town of South Padre Island and Port of Brownsville to engage in a regional sediment management program, which would involve the use of material dredged from a regional Inlet for placement on a nearby shoreline. Material dredged from Brazos Santiago Pass would be placed on the shoreline of South Padre Island. The study would determine the cost/benefit analysis on the beneficial use of dredged material placed on our shoreline. The beaches of South Padre Island are critical economic and environmental assets as they host approximately 22,074 visitors and inhabitants daily, are estimated to generate \$64 million dollars in total retail sales, result in the creation of about 3171 jobs, and generate annual property tax revenues of over \$4.56 million.

The entity to receive funding for this project is the United States Bureau of Reclamation located at the United States Bureau of Reclamation Great Plains Regional Office, P.O. Box 36900, Billings, MT 59107. The Pick-Sloan Missouri Basin-Garrison Diversion project is a rural water project specifically authorized to compensate North Dakota for the loss of more than 500,000 acres of land inundated due to the construction of the dams along the Missouri River. The project was reauthorized in 2000 with the enactment of the Dakota Water Resources Act to meet our state's contemporary water needs. Through the funds provided for the Pick-Sloan Missouri Basin-Garrison Diversion project, we have been able to provide safe and affordable water to thousands of people. One project that is funded through Pick-Sloan Missouri Basin-Garrison Diversion is the Northwest Area Water Supply (NAWS). NAWS will deliver a quality water supply to more than 60,000 users in a 10-county area in the northwestern part of the state. I certify that I do not have any financial interest in this project.

I am requesting funding in the fiscal year (FY) 2010 Energy and Water Appropriations bill for Auburn Bioenergy and Bioproducts Research. The entity to receive funding for this project is Auburn University, located at 102 Samford Hall, Auburn, Alabama 36849. It is my understanding that the funding would be used to process biomass feedstocks and convert them into liquid fuels, electrical power, and higher value chemicals. This proposed initiative will capitalize on this infrastructure investment by using systems-based approaches to develop bioenergy solutions based primarily on forest residues, previously unmerchantable small-diameter trees, and other underutilized woody biomass feedstocks. I certify that this project does not have a direct and foreseeable effect on the pecuniary interest of my spouse or me.

I hereby certify that this request will be made publicly available on my Official Website as required by Chairman Obey's new Committee Policy that only posted request will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress [OR: was named after Representative John Doe in 1983]; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the Congressional Record describing how the funds will be spent and justifying the use of federal taxpayer funds.

I am requesting funding for LED Street Lighting Energy Efficiency Retrofit (Watts) in fiscal year 2010. The entity to receive funding for this project is: City of Los Angeles located at Bureau of Street Lighting, 200 N. Spring Street, Los Angeles, CA 90012. The purpose of the project is to install energy-efficient lighting in the Watts areas of the City of Los Angeles. The City would replace 250 existing streetlight fixtures with Light Emitting Diode (LED) fixtures. The project is valuable to taxpayers because it will save money and reduce pollution. LED fixtures will consume at least 40% less energy than the existing fixtures. These new fixtures also have two to three times the life span of the existing fixtures and require less maintenance. The conversion will reduce carbon emissions by approximately 75 tons per year. The City will realize annual energy savings of \$18,000. This project will also carry out a core Department of Energy mission of investing in clean energy sources and promoting energy efficiency in ways highly visible to the public.

I certify that I have no financial interest in this project.

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY10 Energy and Water Appropriations bill, Corps of Engineers, O&M account. The entity to receive funding for this project is the Port of New Orleans, 1350 Port of New Orleans Place, New Orleans, LA 70130. It is my understanding that the funding is for the dredging maintenance project to provide a minimum 45 foot draft for the Mississippi River at Napoleon Avenue Container Terminal which will allow the Port of New Orleans to continue to berth deep draft ships and remain competitive in attracting and retaining international business. I certify that this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I hereby certify that this request will be made publicly available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request: (1) is not directed to an entity or program that will be named after a sitting Member of Congress [OR: was named after Representative John Doe in 1983]; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the Congressional Record describing how the funds will be spent and justifying the use of federal taxpayer funds.

I am requesting funding for the Design and Implementation of Geothermal Energy Systems at West Chester University in fiscal year 2010. The entity to receive funding for this project is West Chester University located at Filano Hall, Room 101, West Chester, PA 19383. This change will significantly decrease the institution's carbon footprint and serve as a national model for green campus efforts. The institution is in the process of designing and implementing this project by building well fields and installing connecting piping to provide the geothermal heat/cooling source for campus buildings. I certify that neither I nor my spouse has any financial interest in this project.

I am requesting funding for the Feasibility Study and Design of "Brightfield" Solar Farm in fiscal year 2010. The entity to receive funding for this project is Lower Providence Township located at 100 Parklane Drive, Eagleville, PA 19403. Funding would assist the creation of a viable "brightfield" (i.e. solar farm) on the former Moyer's Landfill, which was declared a superfund site in 1998, thus turning a blighted area with little use potential into something that will help meet our green energy needs. The project would also serve as an education opportunity for children in the local school district. I certify that neither I nor my spouse has any financial interest in this project.

RE: South Central Pennsylvania Environmental Improvement Program

Dear Chairman Obey and Ranking Member Lewis:

I am contacting you in compliance with the rules of the House of Representatives for the 111th Congress. In the Fiscal Year (FY) 2010 Energy and Water Development bill, Corps of Engineers (Baltimore), Construction account, I am requesting funding for South Central Pennsylvania Environmental Improvement Program. The entity to receive funding for this project is U.S. Army Corps of Engineers – Baltimore District, 10 South Howard Street, Baltimore, MD 21201

It is my understanding that funding for this project would be used to provide design and construction assistance for water-related environmental infrastructure and resource protection and development projects in South Central Pennsylvania. The program provides the funding necessary for local communities to install basic sewer and water systems and is a key aspect of building and enhancing infrastructure for many rural communities in Pennsylvania. To the best of my knowledge, I certify that neither I nor my spouse has any direct or foreseeable financial interest in this project, which I define as "direct personal or pecuniary interest" under Clause 1 of House Rule III.

I hereby certify that this request will be made publicly available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

RE: Juniata Hybrid Locomotive

Dear Chairman Obey and Ranking Member Lewis:

I am contacting you in compliance with the rules of the House of Representatives for the 111th Congress. In the Fiscal Year (FY) 2010 Energy and Water Development bill, Department of Energy, EERE – Vehicle Technologies account, I am requesting funding for Juniata Hybrid Locomotive. The entity to receive funding for this project is Pennsylvania State University, 117 Old Main, University Park, PA 16802.

It is my understanding that funding for this project would be used to assess and develop technological alternatives to diesel locomotives and to develop a more energy efficient and environmentally friendly locomotive for yard, local, and main line applications. Dear Chairman Obey and Ranking Member Lewis:

I am requesting funding in the Fiscal Year 2009 Energy and Water FY 2010 Appropriations bill, for the following project:

The entity to receive funding for this project is Creighton University. Creighton University is located at 2500 California Plaza, Omaha, NE 68178. Creighton University requests \$1.2 million in funding to support costs associated with expansion of its energy technology training program and the establishment of the Research Center for Solar Energy that are consistent with the mission of the Department of Energy – “to strengthen America’s energy security, environmental quality, and economic vitality in public-private partnerships that 1) enhance energy efficiency and productivity, 2) bring clean, reliable and affordable energy technologies to the marketplace, and 3) make a difference in the everyday lives of Americans by enhancing their energy choices and their quality of life.”

This new program would take advantage of Creighton’s developing leadership in Energy Technology. The new Energy Technology Program will create two faculty research labs that will be designed as settings for project-based and internship-based research settings. Federal funding would allow the university to offer specialized technical training programs in photovoltaics and wind energy to create highly skilled manpower to provide the expertise to develop and implement solar energy. These programs would serve the needs of both traditional and non-traditional students as well as addressing training and retraining needs for a growing energy sector of the economy.

I certify that neither I nor my spouse has any direct financial interest in this project. Additionally, I hereby certify that this request will be made publicly available on my Official Website as required by Chairman Obey’s new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership’s policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to an entity or program named or will be named after a sitting member of Congress; (2) is not intended for a “front” or “pass through” entity; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, and I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Sincerely,

Committee on Appropriations
2362 Rayburn House Office Building
Washington, D.C. 20515

Dear Chairman and Ranking Member:

I am requesting \$450,000 for the Middle Potomac River Watershed Assessment, to protect and restore critical water resources in the Middle Potomac River watershed of MD, DC, VA, PA & WV. The project will assess the impacts of current and protected future human activities and influences on the river's hydrology—including water withdrawals, dam operations, changes in watershed land use and development, and projected climate change—to determine how they might be balanced and mitigated to prevent water use conflicts and ecological degradation of the Potomac River.

I certify that neither I nor my spouse has any financial interest in this project.

I am requesting funding for U.S. Bureau of Reclamation, Deschutes Project in fiscal year 2010. The entity to receive funding for this project is the Deschutes Basin Board of Control (DBBC), located at P.O. Box 919 Madras, Oregon 97741. According to the requestor the funds would be used by the Bureau of Reclamation in coordination with the DBBC (which consists of the seven primary irrigation districts in Central Oregon) in pursuing water conservation, piping, lining and efficiency projects that will improve irrigation efficiencies and result in increased in-stream flows benefiting federally listed steelhead and bull trout in the Deschutes and Crooked Rivers and their tributaries.

I certify that neither I nor my spouse has any financial interest in this project.

This request will be made publically available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, to the best of my knowledge this request (1) is not directed to an entity or program that will be named after a sitting Member of Congress; and (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark. Should funding be provided to this entity, I will ask them to certify their intent to comply with all statutory obligations. Should this request be included in the bill, I will place a statement in the Congressional Record describing the entity's plan for how the money will be spent and their justification for the use of federal taxpayer funds.

Dear Chairman Obey and Ranking Member Lewis:

I am requesting funding for **INTRACOASTAL WATERWAY, JACKSONVILLE TO MIAMI, FL** in fiscal year 2010.

The entity to receive funding for this project is:
Florida Inland Navigation District

The funding would be used for **dredging the IWW in two locations: (1) Matanzas Inlet (St. Johns County) and in the vicinity of St. Augustine. In addition, funds will be used to (1) Restoration of Dredged Material Management Area in St. Johns County and (2) Construction of Dredged Material Management Area in Indian River County.**

Dear Chairman Obey and Ranking Member Lewis:

I am requesting funding for **Fusion Energy Spheromak Turbulent Plasma Experiment (STPX)** in fiscal year 2010.

The entity to receive funding for this project is:

Florida A & M University
1601 Martin Luther King Jr., Blvd.
Tallahassee, FL 32307

The funding would be used for a **spheromak-type reactor, which could generate energy from fusion at a much lower cost and greater efficiency than tokamak-type reactors since it would require far fewer magnets. A spheromak reactor would be less difficult to construct and less expensive to maintain since it is much simpler than a tokamak. New scientific advances in physics offer tools for longer lasting and hotter spheromak plasmas. These areas would benefit all of fusion science and technology.**

Dear Chairman Visclosky:

I am requesting funding for Methanol Economy. The entity to receive funding for this project is the University of Southern California, located at 3720 South Flower Street, Third Floor; Los Angeles, CA 90089. The funding would be used to develop the chemistry to directly convert natural gas (methane) to methanol, which is one of the significant chemical challenges of the 21st century. The program also researches methods to convert carbon dioxide into methanol using any alternative source of energy. Under the leadership of Nobel Prize winning chemist Professor George Olah and other leading experts in the field of hydrocarbons, USC's goal is to develop a renewable source of energy that can help replace U.S. dependence upon fossil fuels (oil, gas, and coal), and to recycle carbon dioxide into new fuels and materials while mitigating manmade effects on climate change. I certify that I have no financial interest in this project.
