I am requesting funding for "Nanotechnology Initiative" as part of the Fiscal Year 2010 appropriations process. The proposed recipient of funding for this project is:

Connecticut State University System
39 Woodland Street
Hartford, CT 06106

Funding would be used to build nanotechnology program capacity within the Connecticut State University System (CSUS) and acquire necessary instrumentation for baccalaureate and the master degree level research and education. Existing bachelor and master degree programs lack the necessary exposure to the field and new programs need to be designed and supported with appropriate instrumentation. Breakthroughs in this area are essential to continued innovation in the state and our nation.

I certify that neither I nor my spouse has any financial interest in this project. Thank you for your consideration of this request.

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding in the FY2010 Energy and Water Appropriations bill for the Dismal Swamp & Dismal Swamp Canal. The entity to receive funding for this project is the Army Corps of Engineers at 803 Front Street, Norfolk, Virginia, 23510. It is my understanding that the funding would be used to maintain the swamp as fixed by weirs across the drainage ditches to restrict the flow of water out of the swamp and inward to Lake Drummond in the middle of the Dismal Swamp. The water exiting Lake Drummond through a feeder ditch is used to maintain the level of water in the Dismal Swamp Canal, a portion of the Atlantic Intracoastal Waterway. When Lake Drummond spilled from its banks due to heavy rains, it inundates the surrounding area. The public perceives that the Corps may have prevented or minimized the flooding by diverting the floodwaters from Lake Drummond through the navigation locks at Deep Creek, Virginia, and at South Mills, North Carolina. The feasibility study will address these concerns as well as opportunities to provide for environmental restoration.

I hereby certify that to the best of my knowledge, this project does not have a direct and foreseeable effect on the pecuniary interests of my spouse or me.

I also hereby certify that this request will be made publicly available on my official website as required by Chairman Obey's new Committee policy that only posted requests will be considered.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request: (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

Dear Chairman Obey and Ranking Member Lewis,

I am requesting funding for the Power Grid Reliability Study project in the FY10 Energy and Water Appropriations bill. The amount requested for this project is \$2,000,000. The entity to receive funding for this project is Washington State University, located at the French Administration Building, Room 324, Pullman, WA 99164.

The existing power grid is highly unstable and vulnerable to natural and man-made interruptions, as well as being inadequate for increased power throughout and transmission speed. Making the power grid more reliable, capable, and secure requires development on several "software" fronts in order to make a "smart grid" possible. The U.S. government has stated the need to develop a new smart grid.

I hereby certify that this request will be made publicly available on my Official Website as required by Chairman Obey's new Committee policy that only posted requests will be considered. I also attest that this project does not have a direct or foreseeable effect on the financial interests of me or my spouse.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge the request: (1) is not directed to any entity or program that will be named after a sitting Member of Congress (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the *Congressional Record* describing how the funds will be spent and justifying the use of federal taxpayer funds.

The entity to receive funding for this project is University of Maine, AEWB Building, Orono, ME 04469. Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request: (1) is not directed to an entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable. I further certify that should this request be included in the bill, I will place a statement in the Congressional Record describing how the funds will be spent and justifying the use of federal taxpayer funds.
