Subject: RE: MAcond - 7" Casing Option
Importance: Normal

Current plan would be to run 7" x 9-7/8" tapered long string (saves a lot of time having to tieback the 9-7/8" at least 3 days)

If we run a liner, we will use the Atlantis 7-5/8" pipe, no issues cementing the slightly larger size as a liner, but it does cause issues if you run it as a tapered long string...

Thanks
Brian

Yes, we have the MTRs and I've forwarded them to Morey for review. Does this mean the plan to run as a liner is no longer on the table?

Tom - Can you call Pat and see how much of this they have and what they are going to have to get for it? Also, according to the inspection reports, this pipe was inspected at Tubo-Amelia. Is that where it is still located?

Thanks

Al,

Do we have the MTR's for this pipe and is it available, should know this weekend or early next week if we are going to need this pipe, but want to have something lined up if we do need it so we can start making cross-overs?

6000' would work great, but we can live with a little less ~5500 (includes 10% extra)

Thanks
Brian

Here's the best 7" option I've seen so far - 7" 32# Q-125 HC Hydril 523 subject o review of MTRs.

Pat,

This looks really good. Still don't have exactly what they're going to do in this well yet.

If it's not too much trouble do you have the following that you could send?

1. The location of the pipe
2. The recent inspection report(s)- we may not need to reinspect.
3. The Mill or MTR(s) even better.

Just as soon as we know the outcome of the requirement, we'll let you know.

Regards and Thanks,

Tom Couch

Tom,

Nexen has 6,000' – 7" 32# Q-125 HC Hydril 513
Condition A – recently inspected

What's your need date?

Subject to management approval – will pursue if you are interested.

STA,
BP is looking for approx 5,500 feet of 7.00", 32#, Q-125, Hyd. 513 or 523 Liner. Will look at other connections and possibly P110 material.
PLEASE DO NOT RESPOND UNLESS YOU HAVE SOMETHING TO OFFER.

Regards and Thanks,

Tom Couch
