## Message from the Chairman

I am pleased to transmit the *FY 2017 Agency Financial Report* for the United States International Trade Commission. This report documents the Commission's financial performance for the fiscal year and discusses our accomplishments and challenges. The report also provides an overview of the agency's programmatic performance.

The Commission has three long-standing, important statutory mandates: (1) to make determinations in proceedings involving imports that are alleged to injure a domestic industry or that violate U.S. intellectual property rights; (2) to provide independent tariff, trade and competitiveness-related analysis to the Congress and the President; and (3) to maintain the Harmonized Tariff Schedule of the United States. In carrying out these mandates, the Commission independently and objectively investigates unfair trade complaints, impartially administers the relevant trade laws, and helps the President and Congress make informed policy decisions by providing accurate, timely, and insightful analysis on an evolving range of international trade matters. The American Manufacturing Competitiveness Act of 2016 added an additional important statutory mandate to create and maintain an open and transparent process for consideration of petitions for duty suspensions and reductions.

The Commission reviews its strategic goals and objectives annually. During the year, the Commission also continued to apply enterprise risk management principles in its planning and budget formulation processes in order to improve the efficiency and effectiveness of its decision-making in these areas.

### Program Accomplishments

I would like to highlight the following accomplishments in the last fiscal year.

The Commission made substantial progress toward achieving its strategic objectives in FY 2017; it met or exceeded most of its annual performance goals and improved upon agency performance in other areas. This year, the agency instituted 135 new investigations and completed 128 investigations in the areas of import injury, intellectual property, and industry and economic analysis.

Consistent with its performance goals, the Commission conducted import injury and unfair import investigations in a timely and objective manner, produced sound determinations, and provided relief when warranted under the statute. In FY 2017, our import injury investigations covered a broad range of products, including various types of steel and steel products,

biodiesel, a range of agriculture products including pistachios, shrimp, ripe olives, high tech and consumer goods including solar cells, civil aircraft, residential washers, and different types of paper and wood products, among other things. Our unfair import investigations covered a similarly wide array of products, including personal transportation devices, mobile devices, tablets and other computer and telecommunication products, air mattress systems, automated teller machines, activity tracking devices, height adjustable desks, dental implants, and beverage brewing capsules, among other things.

To support the development of well-informed trade policy the Commission provided the U.S. Trade Representative and Congress with high-quality economic analysis and technical support. Intended to fill critical information gaps for policy makers, the Commission's fact-finding investigations covered a variety of topics in 2017, such as rules of origin under the U.S. Morocco Free Trade Agreement (FTA); market opportunities and foreign trade restrictions in global digital trade; the effects of significant U.S. import restraints; and the global competitiveness of the U.S. aluminum industry. The Commission also implemented the Miscellaneous Tariff Bill Petition System—a new statutory mandate. The system allowed the Commission to produce a report covering 2,524 petitions, of which 1,683 were recommended for passage in an omnibus tariff bill. In addition, the agency compiled the 2017 Harmonized Tariff Schedule and its updates.

Throughout the year, the Commission continued its efforts to improve the effectiveness of its investigative and research processes. These improvements helped it to absorb the significant increase in its investigative and research workload.

The Commission also made steady progress on many of its management and administrative goals during 2017, particularly in achieving agency-wide efficiency and effectiveness to advance agency mission and its related objectives, efficiently and effectively recruiting and developing highly qualified and flexible human capital, providing good stewardship of taxpayer funds, and using information technology to support productivity gains. The agency continued to strengthen its strategic planning and performance management processes, improve internal controls, and incorporate enterprise risk management principles into its planning, administrative, and budgeting processes. The Commission also continued to strengthen the security and effectiveness of its information systems, which will help enhance the productivity and efficiency of staff.

## FY 2017 Agency Financial Report

The Commission's FY 2017 financial statement audit resulted in an unmodified opinion by the independent accounting firm Castro & Company, LLC, monitored by the Inspector General. The independent auditors identified no material weaknesses, significant deficiencies, or instances of non-compliance with laws and regulations. During FY 2017, the Commission continued to assess and improve internal controls in accordance with OMB Circular A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*. Senior management meets regularly to strengthen the oversight and further improve Commission operations. The Commission followed the provisions of the Federal Managers' Financial Integrity Act of 1982 (FMFIA). Although the Commission is exempt from the requirements of the Federal Financial Management Improvement Act of 1996 (FFMIA), it has complied with the key provisions of this statute.

I am providing a modified statement of assurance that our internal controls over operations meet the objectives of FMFIA, as of September 30, 2017, in light of the material weaknesses described in the Chairman's Statement of Assurance section of this report. Additionally, I can provide reasonable assurance that, as of June 30, 2017, the Commission's internal controls over financial reporting were in compliance with FMFIA and OMB Circular A-123, Appendix A and no material weaknesses were found in the design or operations of the financial internal controls. Furthermore, as required by the Government Card Abuse Prevention Act of 2012 and OMB Circular A-123, Appendix B, I can provide reasonable assurance that, as of September 30, 2017, the appropriate controls were in place to mitigate the risk of fraud and inappropriate charge card practices.

The financial information presented herein is complete and accurate, and in accordance with law and Office of Management and Budget guidance.

As Chairman, I assure you that Commission employees are committed to the agency's mission, and I applaud their efforts during a very challenging year.

Rhonda K. Schmidlein  
Chairman  
November 15, 2017

# Management's Discussion and Analysis

## Introduction

The United States International Trade Commission (Commission or USITC) FY 2017 Agency Financial Report (AFR) presents the results of the Commission's program and financial performance and demonstrates to the Congress, the President, and the public, the USITC's commitment to its mission and accountability for the resources entrusted to it. This report is available at [www.usitc.gov](http://www.usitc.gov). The USITC will issue its FY 2017 Annual Performance Report, which fully describes its performance for the fiscal year, when it issues its Congressional Budget Justification in FY 2018.

## About the USITC

The USITC is an independent, quasi-judicial federal agency with broad investigative responsibilities on matters of trade. The USITC was established by Congress on September 8, 1916 as the U.S. Tariff Commission. In 1974, the name was changed to the United States International Trade Commission by section 171 of the Trade Act of 1974.

The Commission has specific responsibilities in the application of U.S. trade laws. The agency investigates, generally at the request of private sector parties, the effects of dumped and subsidized imports on domestic industries and conducts global safeguard investigations. It also adjudicates cases involving imports that allegedly infringe intellectual property rights or otherwise unfairly injure a domestic industry. The Commission also, by law, provides the House Committee on Ways and Means, the Senate Committee on Finance, the President, and, by delegation, the U.S. Trade Representative with objective and thorough analysis and information on trade policy and U.S. competitiveness matters. The Commission also has the responsibility of maintaining the U.S. Harmonized Tariff Schedule, the official legal document that specifies the appropriate tariff, if any, applied to imported goods. In addition, the agency was given new statutory responsibilities in the American Manufacturing Competitiveness Act of 2016 to accept, analyze, and report to Congress on petitions seeking temporary suspensions or reduction of tariffs. The Commission makes most of its information and analysis available through its website to the public to promote a better understanding of international trade issues.

## Mission

Consistent with its statutory mandate, the Commission makes determinations in proceedings involving imports claimed to injure a domestic industry or violate U.S. intellectual property

rights; provides independent tariff, trade and competitiveness-related analysis and information; and maintains the U.S. tariff schedule.

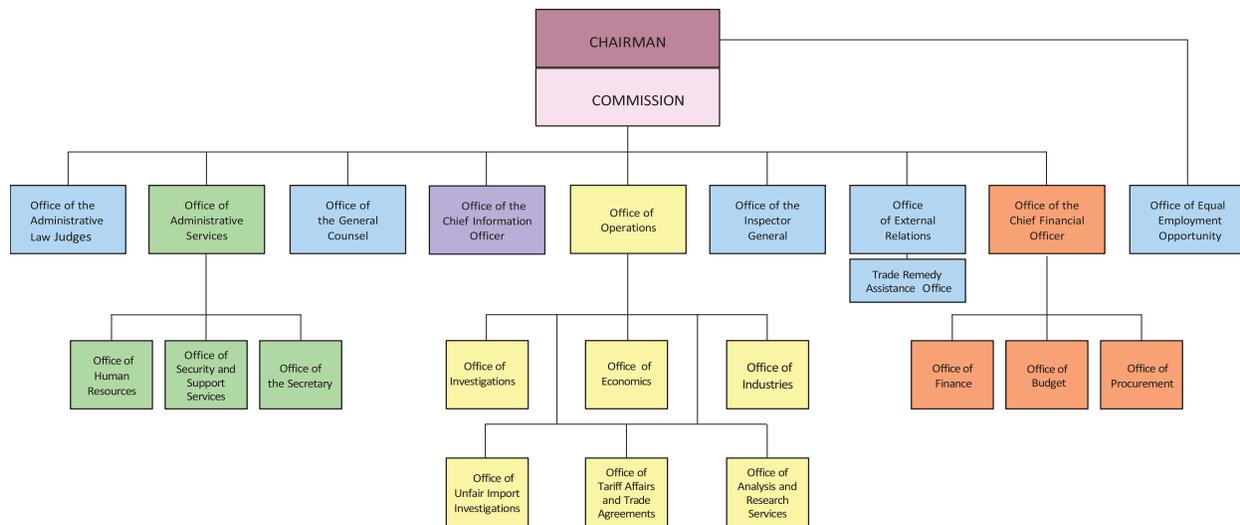

## Organization

### Commissioners

The USITC is headed by six Commissioners, who are nominated by the President and confirmed by the U.S. Senate. Rhonda K. Schmidlein, a Democrat, is serving as Chairman. David S. Johanson, a Republican, is serving as Vice Chairman. Other Commissioners currently serving are, in order of seniority, Irving A. Williamson and Meredith M. Broadbent. There are currently two vacant Commissioner positions.

Each of the six Commissioners serves a term of nine years, unless appointed to fill an unexpired term. The terms are set by statute<sup>1</sup> and are staggered so that a different term expires every 18 months. A Commissioner who has served for more than five years is ineligible for reappointment. A Commissioner may, however, continue to serve after the expiration of his or her term until a successor is appointed. No more than three Commissioners may be members of the same political party. The Chairman and the Vice Chairman are designated by the President and serve for a statutory two-year term. The Chairman may not be of the same political party as the preceding Chairman, nor may the President designate two Commissioners of the same political party to serve as Chairman and Vice Chairman. Currently two Democrats and two Republicans serve as Commissioners.

### Office-Level Organizational Chart

<sup>1</sup> 19 U.S.C § 1330, Organization of Commission

## USITC Staff

USITC staff is organized into offices designed to support the mission of the agency. These include the:

- Office of Operations (OP), and its subordinate Offices of Investigations (INV), Industries (IND), Economics (EC), Tariff Affairs and Trade Agreements (TATA), Unfair Import Investigations (OUII), and Analysis and Research Services (OARS);
- Office of the Administrative Law Judges (ALJ);
- Office of the General Counsel (GC);
- Office of External Relations (ER), including the Trade Remedy Assistance Office (TRAO);
- Office of the Chief Financial Officer (OCFO), and its subordinate Offices of Budget (OB), Finance (FIN), and Procurement (PR);
- Office of the Chief Information Officer (OCIO);
- Office of Administrative Services (OAS), and its subordinate Offices of the Secretary (SE), Human Resources (HR), and Security and Support Services (SSS);
- Office of the Inspector General (OIG); and
- Office of Equal Employment Opportunity (EEO).

Appendix A provides additional information on the individual offices of the USITC.

## Performance Goals, Objectives, and Results

The Commission develops annual performance goals and uses the results to evaluate its performance in order to fulfill its mission efficiently and effectively. This section summarizes the Commission's strategic planning and management activities and provides an overview of its performance during FY 2017.

### Commission Strategic Planning and Management

The Commission issues a Strategic Plan, an Annual Performance Plan, and an Annual Performance Report in accordance with the Government Performance and Results Act of 1993 (GPRA), as amended by the GPRA Modernization Act of 2010 (2010 Act). The Strategic Plan establishes strategic goals, strategic objectives, and performance goals for the Commission. To ensure the effectiveness of strategic planning and budget development, the Commission aligns its budget formulation and execution with its Annual Performance Plan. The Annual Performance Report provides a detailed review of agency performance with respect to the agency's Annual Performance Plan.

During FY 2014, the Commission issued its Strategic Plan for FY 2014–2018. During FY 2017, the agency issued its corresponding Annual Performance Plan for FY 2017–2018. This Performance Plan provides specific annual performance goals that support the agency's strategic and management goals and objectives. During the year, the Commission continued to integrate enterprise risk management into its planning, budget formulation, and budget execution processes.

The Performance Plan sets out annual measures that correspond to the broader strategic goals, performance goals, and strategies identified in the Strategic Plan. The Commission's FY 2018 Budget Justification describes the operational processes, human capital, and technology, as well as the information and other resources, required to meet the performance goals.

### Strategic Goals and Management Priorities

Although the Commission has one program activity set forth in the Budget of the United States Government, the Commission's Strategic Plan for FY 2014–2018 identifies two strategic goals and corresponding strategic objectives.

Goals	Objectives
<b>Strategic Goal 1</b> Investigate and Decide: Produce sound, objective, and timely determinations in investigative proceedings	S1.1 Reliable Process: Conduct expeditious and technically sound investigative proceedings S1.2 Clear Proceedings: Promote transparency and understanding of investigative proceedings
<b>Strategic Goal 2</b> Inform: Produce objective, high-quality, and responsive tariff, trade, and competitiveness-related analysis and information	S2.1 Timely: Deliver timely and accessible analysis and information S2.2 Effective: Produce high-quality analysis and information and strategic insights to support the development of the U.S. trade agenda
<b>Management Goal</b> Achieve agency-wide efficiency and effectiveness to advance agency mission	M1.1 People: Efficiently and effectively recruit and develop highly qualified and flexible human capital M1.2 Money: Provide good stewardship of taxpayer funds M1.3 Technology: Deliver high-performing and secure networks and services
<b>Cross-cutting Objectives</b>	C.1 Use feedback to improve agency operations and enhance employee and customer satisfaction C.2 Improve the resource and performance management capabilities of Commission managers

The Commission’s strategic goals directly support the agency’s mission. The management goal and corresponding objectives relate to three management priority areas: human resources, financial management, and information technology. The agency focuses on high performance and goal attainment in each area to fulfill its mission and to support government-wide initiatives. Cross-cutting objectives focus on enhancing transparency and management effectiveness.

For each strategic, management, and cross-cutting objective, the Commission’s Annual Performance Plan identifies strategies to meet these objectives and specific performance goals.

## Summary of Performance Results

The Commission made substantial progress toward its strategic and management goals during FY 2017 by meeting or exceeding the majority of its annual performance goals. The agency focused on improving the timeliness of its determinations, enhancing its analytical and

management capabilities, achieving efficiencies in its information collection and other data management activities, improving internal controls, enhancing cybersecurity, developing data presentation tools, and enhancing communication with and outreach to its customers and the general public.

The Commission made progress on its goals despite facing increases in its investigative caseload and a new statutory requirement. The new statutory requirement, mandated by the American Manufacturing and Competitiveness Act of 2016, made it necessary for the Commission to reprioritize resources across the agency. Highlights for each strategic and management goal follow.

### **Investigate and Decide: Produce sound, objective, and timely determinations in investigative proceedings**

The Commission administers and applies U.S. laws assessing injury to U.S. industries caused by subsidized and dumped imports, increased imports that injure a domestic industry, and imports that infringe a domestic intellectual property right or otherwise unfairly injure a domestic industry. U.S. laws, court decisions, and U.S. international obligations require the Commission to reach its determinations based on transparent procedures and a well-developed record. The Commission, and the Administrative Law Judges in unfair import investigations under section 337 (which are most often intellectual property-based), must consistently perform thorough investigations and make sound factual findings. The record in each investigation must be developed and analyzed in an objective manner, and the resulting determinations must be well-reasoned, timely, and consistent with the law.

In terms of volume, the Commission's overall investigation caseload increased in FY 2017.<sup>2</sup>

### **Strategic Objective 1.1 Reliable Process: Conduct expeditious and technically sound investigative proceedings**

The Commission has a reputation for conducting prompt, thorough, and independent investigations and engaging in sound decision-making. Timely decisions are critical to the Commission's mission because import injury investigations have statutory deadlines, while section 337 investigations are required by Congress to be resolved at the earliest practicable time. Timely decisions relieve the business uncertainty these disputes cause for private sector participants.

---

<sup>2</sup> Import injury investigation activity increased in FY 2017, as 66 investigations and reviews were instituted and 62 were completed. In contrast, there were 57 institutions and 51 completions in FY 2016. The case load under section 337 remained high in FY 2017, with 64 investigations instituted and 61 investigations completed. In contrast, there were a total of 79 institutions and 64 completions in FY 2015.

During FY 2017, the Commission met all but one of the performance goals associated with this strategic objective.

The Commission met its statutory deadlines throughout the year, as it delivered its import injury determinations on time.

The Commission also made progress on a number of the performance goals associated with its section 337 investigations. Commission staff remained focused in FY 2017 on ways to reduce the length of investigations, while the agency continued its analysis of public comments with respect to proposed changes to its procedural rules, although they were not published in FY 2017. Despite continuing high case load levels, the average length of section 337 investigations concluded on the merits declined slightly from 15.8 months in FY 2016 to 15.1 months in FY 2017. At the same time, the Commission met its goal to complete ancillary proceedings on a timely basis. During the year, the Commission evaluated the effectiveness and efficiency of three pilot programs pertaining to the conduct of section 337 investigations, and developed recommendations based on these evaluations. The Commission will continue such efforts in the future.<sup>3</sup>

In addition, the Commission continued to make significant progress on its efforts to collect information electronically, surpassing its goal of transmitting or receiving 90 percent of import injury questionnaires electronically. During FY 2017, the Commission also evaluated agency decision-making based on an analysis of judicial and NAFTA panel remands from FY 2016 to determine if there were any patterns or issues that the Commission could consider going forward. This ongoing evaluation, which began in FY 2014, will continue during FY 2018 and will include any remands from FY 2017.

### **Strategic Objective 1.2** Clear Proceedings: Promote transparency and understanding of investigative proceedings

The Commission recognizes the importance of providing stakeholders in its investigative proceedings with information on the Commission's decision-making process. The Commission promotes transparency by providing accurate, accessible, and timely public information about its investigative proceedings. Investigation participants, as well as the public, benefit by having a more detailed and broader understanding of investigative procedures and processes.

During FY 2017, the agency met or made substantial progress on most performance goals for this objective. Although the agency was able to make progress on development of the Title VII

---

<sup>3</sup> The three pilot programs concern early disposition, initial disclosures, and e-discovery case management. In addition, the Commission recently implemented a pilot program to test an expedited process for modifications and advisory opinions.

data system (a new system designed to provide information regarding its import injury [Title VII] investigations), it continued to defer work to add electronic service capability to the agency's Electronic Document Information System (EDIS) as resources were redirected to the Miscellaneous Tariff Bill Petition System (MTBPS) to meet deadlines mandated in the American Manufacturing and Competitiveness Act of 2016.

The agency met its target of posting information on its import injury investigation case webpages within specific timeframes during FY 2017. In addition, the Commission continued to meet or exceed performance goals related to public outreach to external groups through participation in conferences and other events and availability of documents in EDIS.

### **Inform: Produce objective, high-quality, and responsive tariff, trade, and competitiveness-related analysis and information**

By statute, the Commission is responsible for providing independent advice, analysis, and information to Congress, the President, and the Office of the United States Trade Representative (USTR) in a number of areas. In response to U.S. policy makers' requests, the Commission and its staff provide objective information and analysis on a variety of topics, both through formal investigations under section 332 and other provisions and informal expert assistance. To fulfill its mission, the Commission must provide the highest caliber of information and analysis to U.S. policy makers and the public. Providing this information in a timely manner assists policy makers when they are engaged in trade negotiations or when they are undertaking legislative or other policy actions that affect the U.S. economy and industry competitiveness.

In FY 2017, active Commission fact-finding investigations covered a wide range of topics, such as: rules of origin under the U.S. – Morocco FTA; market opportunities and foreign trade restrictions in global digital trade; the effects of significant U.S. import restraints; and the global competitiveness of the U.S. aluminum industry.<sup>4</sup> Commission staff also provided technical support to Congress and USTR throughout the year on a variety of trade and competitiveness-related issues.

The Commission also publishes and maintains the Harmonized Tariff Schedule of the United States (HTS), which serves the U.S. government as the basis for collecting customs duties, compiling trade data, and formulating many trade actions. The HTS is vital to U.S. businesses, government agencies, and others involved in trade that depend upon access to accurate, current tariff rates and useful trade data. The agency continued to refine its electronic system for maintaining and searching the HTS, which it deployed in FY 2015.

---

<sup>4</sup> In FY 2017, five new fact-finding investigations were instituted and five were completed. In addition, the Commission published eight reports related to recurring investigations.

### **Strategic Objective 2.1** Timely: Deliver timely and accessible analysis and information

Timely trade and competitiveness information and analysis are often necessary for the USTR and Congress to meet negotiation schedules or make time-sensitive decisions. The agency's customers expect it to adhere to statutory deadlines, relevant regulations, and requested delivery dates. The information the Commission provides must be timely, clear, and easily accessible.

During FY 2017, the Commission met the annual performance goals supporting the objective of providing timely and accessible analysis and information. Of note, the agency met its goal to implement the Miscellaneous Tariff Bill Petition System to meet required statutory deadlines. The system was developed and deployed on time and was well received by external users. It allowed the agency to ultimately produce a report covering 2,524 petitions, of which 1,683 were recommended for passage in an omnibus tariff bill.

The agency made significant progress in improving information it provides to the public by publishing reports that are section 508 compliant. The agency also updated the interactive graphics for this year's *Trade Shifts* report, *Recent Trends* report, and the *Year in Trade*. The agency made progress in updating and strengthening internal controls associated with operational processes, including its processes for fact-finding reports and roundtables. In doing so, it continued to evaluate processes and to identify ways to improve efficiency.

The Commission met its performance goal related to the HTS concerning the accuracy of HTS information as well as its annual target for response timeliness to public inquiries concerning the HTS.

### **Strategic Objective 2.2** Effective: Produce high-quality analysis and information and strategic insights to support the development of the U.S. trade agenda

The Commission often receives requests from policy makers that cover issues or areas that have not been evaluated extensively by academics or policy analysts. The requests may require application of different analytic approaches and cover topics that have limited publicly available data. To address these requests, the Commission continuously improves and enhances its information collection processes and analytic methods, as well as the way it maintains and provides information. To better respond to shifts in public policy priorities, the agency established performance goals regarding acquisition of information, development of analytical tools, and investment in human capital, which enable the agency to respond to shifts in public policy priorities.

The Commission met the three performance goals that support the objective of producing high-quality analysis, information, and insights. The agency regularly met with its congressional and executive branch customers throughout the year. The Commission used feedback it received from these customers to help prioritize its research and other capacity-building efforts. During the year, the agency also enhanced its economic modeling capabilities; expanded its analysis of topics such as: supply chains; and the effects of trade on labor markets, on different regions in the United States, and on specific industries such as semiconductors. Moreover, it furthered its research capabilities related to U.S. trade relationships through its analysis of manufacturing offshoring and also of services trade with Sub-Saharan Africa.

Additionally, the Commission continued to measure the extent to which its basic research efforts directly or indirectly contribute to its statutory work.

### **Achieve agency-wide efficiency and effectiveness to advance agency mission**

The Commission is committed to continuous process improvement and support for the Commission's strategic goals and mission. Three management objectives and two cross-cutting objectives support management's goal of advancing the agency's mission in an efficient and effective way. These management objectives align with three functional areas: human resources; budget, acquisitions, and finance; and information technology. The FY 2017 performance goals reflect agency management priorities.

#### **Management Objective 1.1 People: Efficiently and effectively recruit and develop highly qualified and flexible human capital**

The Commission is committed to hiring and retaining a highly talented workforce as human capital is critical for mission attainment. As part of the management initiative to improve effectiveness and efficiency in this area, the Commission is working to decrease processing time for hiring actions, improve documentation pertaining to hiring activities, and improve satisfaction with agency hiring practices, employee development, and training.

In FY 2017, the Commission met its performance goals concerning human capital. The agency continued to make progress in strengthening internal controls pertaining to documentation, and met the target it set for file accuracy.<sup>5</sup> The agency completed all hiring actions within established timeframes. It also met goals concerning stakeholder satisfaction with recruiting efforts and opportunities for professional development, as measured by the Federal Employee Viewpoint Survey (FEVS).

---

<sup>5</sup> The target for FY 2017 was to improve the overall accuracy and completeness of hiring case files; 98 percent of the files were found accurate and complete when reviewed in FY 2017 compared to 94 percent in FY 2016.

### **Management Objective 1.2 Money:** Provide good stewardship of taxpayer funds

Financial oversight and sound stewardship of appropriated funds are fundamental aspects of the accountability and transparency taxpayers deserve. The Commission has established three long-term performance goals: (1) improve the agency's financial management reports; (2) improve the efficiency and effectiveness of the acquisition process; and (3) maintain an annual unmodified audit opinion on the agency's financial statements.

In FY 2017, the Commission met annual performance goals relating to accurate and timely financial reporting and status reporting of procurement actions. However, the agency did not meet its goal regarding the timeliness of procurement actions that exceeded the established timeframes. The OCFO and the OCIO began working on prototype Expenditure Plan ID reporting using business intelligence software and expects to make further progress on these reports, which provide near real time financial activity by budget line, during FY 2018. The agency also achieved an annual unmodified audit on its FY 2017 financial statements, as it did for FY 2016.

### **Management Objective 1.3 Technology:** Use information technology to support productivity gains

Information technology directly and indirectly supports the Commission's mission-related activities. The Commission is committed to using information technology to drive productivity gains in its mission and support functions. The agency also has dedicated a significant effort to enhancing cybersecurity.

In FY 2017, the Commission fully met one of its annual goals and made progress on its other annual goals. Although the agency met its goal of system availability to users at 99 percent or greater for five systems, email availability lagged. To help ensure a robust security posture, the agency completed deployment of Trusted Internet Connection (TIC) during the first quarter of FY 2017. Moreover, the OCIO expects to bring the agency into HSPD-12 compliance in the first quarter of FY 2018.

The agency also made progress on implementing and verifying security configuration baselines for all enterprise wide operating systems installed on new hardware during FY 2017, though it did not fully meet its target. Similarly, the agency made progress on its goal to make its major systems open data compliant, but was not able to reach its goal of 100 percent compliance. The agency completed the Authorization to Operate (ATO) for its new version of EDIS, which is scheduled for deployment in early FY 2018.

### **Cross-cutting objectives**

The Commission set two cross-cutting objectives in its FY 2014–2018 Strategic Plan. Both support improvements in various aspects of the agency's operations.

**Cross-cutting Objective 1:** Use feedback to improve agency operations and enhance employee and customer satisfaction

The Commission regularly seeks feedback from its customers and employees on various aspects of its operations. The agency uses feedback to help prioritize improvements in agency operations and to improve the functionality and utility of information it provides on its website and through web applications.

In FY 2017, the Commission met its goal of making continuous improvements to the Commission's web presence, as measured by its website satisfaction score. The agency partially met its goal of showing improvement over its FY 2016 FEVS baseline results (employee engagement and global satisfaction indices). However, the agency delayed issuing a new survey to measure user satisfaction with EDIS pending enhancements to EDIS that it expects to make available in early FY 2018.

**Cross-cutting Objective 2:** Improve the resource and performance management capabilities of Commission managers

In recent years the Commission has made significant improvements in the management of its administrative and program operations. During FY 2017, the agency made progress in assessing management's data and reporting needs, and using business intelligence software to develop prototypes for management reports, although it did not fully meet the targets established for the performance goal. The Commission expects to make significant progress in this area during FY 2018.

## Management Assurances

The Federal Managers' Financial Integrity Act of 1982 (FMFIA) establishes management's responsibility to assess and report on internal controls. Such controls include program, operational, and administrative areas, as well as accounting and financial management. The FMFIA requires federal agencies to establish controls that reasonably ensure obligations and costs are in compliance with applicable law; funds, property, and other assets are safeguarded against waste, loss, unauthorized use, and misappropriation; and revenues and expenditures are properly recorded and accounted for to maintain accountability over the assets.

The FMFIA requires the head of the agency, based on the agency's internal evaluation, to provide an annual Statement of Assurance on the effectiveness of their management, administrative, and financial controls. The Office of Management and Budget (OMB) Circular A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*, implements the FMFIA and defines management's responsibility for enterprise risk management (ERM) and internal control in Federal agencies. Federal leaders and managers are responsible for establishing goals and objectives around operating environments, ensuring compliance with relevant laws and regulations, and managing both expected and unexpected or unanticipated events.

FMFIA Section 2 requires agencies to establish internal controls and systems in accordance with standards prescribed by the Comptroller General (Government Accountability Office). The Government Accountability Office (GAO) *Standards for Internal Control in the Federal Government* (known as the Green Book) provides an overall framework for establishing and maintaining an effective internal control system. The Green Book defines internal control as a process affected by an entity's oversight body, management, and other personnel that provides reasonable assurance that the objectives of an entity will be achieved. These objectives and related risks can be broadly classified into one or more of the following three categories:

- effectiveness and efficiency of operations;
- reliability of reporting for internal and external use; and
- compliance with applicable laws and regulations.

OMB Circular A-123 requires agencies to submit a single assurance statement consistent with the original requirement of the FMFIA. In addition, OMB Circular A-136, *Financial Reporting Requirements*, requires a separate assessment of the effectiveness of the internal controls over financial reporting as a subset of the overall FMFIA assurance. Agencies must also provide assurances on their process to identify risks and establish controls or integrate existing controls to identified risks. The Chairman's FMFIA assurance statement is primarily based on individual

assurance statements from component and assessable unit directors. The individual statements assessed internal controls and risks related to the effectiveness and efficiency of programs and operations, internal and external reporting, and compliance with laws and regulations based on the following elements:

- agency risk profile;
- internal control assessments (entity and office level);
- specific program level assessments (e.g., acquisition, financial, information technology, privacy); and
- OIG and external oversight reviews, audits, and evaluations.

FMFIA Section 4 requires that agencies annually evaluate and report on whether financial management systems conform to government-wide requirements. The Commission evaluated the Statements on Standards for Attestation Engagements (SSAE) 18 – Type 2 Reports received from the Department of the Interior’s (DOI), Interior Business Center (IBC), who is the Commission’s financial management shared services provider for financial and payroll systems.

Appendix A of OMB Circular A-123 calls for the agency head to also provide assurance on the effectiveness of internal control over financial reporting. The Commission assessed internal control at the entity-level, process, and transaction level. The assessment of the effectiveness of process level controls related to the agency’s financial reporting was obtained through detailed test procedures. As part of this effort, the agency performed a review of:

- significant financial reports;
- significant line items and accounts;
- transactions;
- reporting and regulatory requirements; and
- existing deficiencies and corrective action plans.

# Chairman's Statement of Assurance

## Statement of Modified Assurance

The United States International Trade Commission's management is responsible for establishing and maintaining effective internal control and financial management systems that meet the objectives of Sections 2 and 4 of the Federal Managers' Financial Integrity Act of 1982 (FMFIA). Management is also responsible for implementing practices that identify, assess, respond, and report on risks.

The Commission conducted its assessment of the effectiveness of its risk management framework and system of internal control for Fiscal Year (FY) 2017 in accordance with OMB Circular A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*. Based on the results of the assessment, the Commission can provide reasonable assurance that it has effective internal controls over operations, reporting, and compliance with applicable laws and regulations as of September 30, 2017. However, due to the following material weaknesses, I am submitting a modified statement of assurance.

- Risk in an agency IT program as it relates to compliance with a law/regulation related to systems.
- Risk in the agency system of internal rules also known as the directive management system.

With respect to the status of material weaknesses, the Commission remediated one of four reported in FY 2016 and downgraded one to a deficiency. Management has discussed the remaining weaknesses, has developed corrective action plans to address them, and will monitor the remediation progress throughout FY 2018.

With respect to the financial systems, the Commission can provide reasonable assurance that it is fully compliant with the objectives of Section 4 of FMFIA. The agency uses a federal shared services provider, the U.S. Department of Interior's Interior Business Center (IBC), to process its financial data and payroll. The Commission assessed the *Report on the U.S. Department of the Interior's Description of Its Oracle Federal Financials and Oracle Federal Financials – Virtual Environment Systems and the Suitability of the Design and Operating Effectiveness of Their Controls (SSAE 18 SOC 1 – Type 2 Report)* and the *Report on the U.S. Department of the Interior's Description of Its Federal Personnel and Payroll System and the Suitability of the Design and Operating Effectiveness of Their Controls (SSAE 18 SOC 1 – Type 2 Report)*. The systems are compliant with Federal financial management system requirements, standards promulgated by FASAB, and the U.S. Standard General Ledger (USSGL) at the transaction level.

The Commission also assessed the effectiveness of its internal control over financial reporting, which includes safeguarding of assets and compliance with applicable laws and regulations, in accordance with Appendix A of OMB Circular A-123. Based on the results of this evaluation, the Commission can provide reasonable assurance that, as of September 30, 2017, its internal control over financial reporting was operating effectively and that no material weaknesses were found in the design or operations of the internal control over financial reporting.

Rhonda K. Schmidtlein  
Chairman  
November 15, 2017

## Overview of Financial Results

### Overview of Financial Statements

The Commission received an unmodified opinion on its FY 2017 financial statements.

#### Summary of the Balance Sheets and Statements of Changes in Net Position

*Assets:* At the end of FY 2017, the Commission's balance sheet showed total assets of \$23.5 million, an increase of \$1.0 million or 4.5 percent over FY 2016. This was due to an increase in Fund Balance with Treasury of \$609,908 (3.5 percent) and an increase in Plant, Property and Equipment of \$421,043 (8.4 percent).

*Liabilities:* At the end of FY 2017, the Commission's total liabilities were \$11.4 million, an increase of \$1.5 million or 14.8 percent over FY 2016. The 14.8 percent increase is due to rent abatement from General Services Administration (GSA), net decreases in overall accounts payable and net increases to employee-related payroll accounts.

*Net Position:* The Commission's net position on the Balance Sheet and the Statement of Changes in Net Position at the end of FY 2017 was \$12.1 million, a decrease of \$453,597 or 3.6 percent less than FY 2016. This is the net effect of a \$1 million increase to unexpended appropriations and an offsetting \$1.5 million decrease in cumulative results of operations.

#### Summary of the Statement of Net Cost

The Commission's net cost of operations for FY 2017 was \$94.8 million, an increase of \$4.0 million or 4.4 percent over FY 2016. The increase in net cost of operations was primarily the result of more operating and program expenses.

#### Statement of Budgetary Resources

The Statement of Budgetary Resources provides information on budgetary resources made available to the Commission and the status of these resources at the end of the fiscal year. For FY 2017, total budgetary resources were \$95.7 million. This represents an increase of \$5.1 million, or 5.6 percent, from the FY 2016 total budgetary resources of \$90.7 million. The Commission was appropriated \$91.5 million in FY 2017 and \$88.5 million in FY 2016. Prior year recoveries increased \$2.0 million (113.2 percent).

Additionally, direct obligations were \$95.4 million and net outlays totaled \$91.0 million this fiscal year. This represents an increase in direct obligations of \$5.1 million (5.6 percent) and an increase in net outlays of \$4.7 million or 5.4 percent over FY 2016.

## Limitations on Financial Statements

The Commission's financial statements were prepared in conformity with the hierarchy of accounting principles approved by the Federal Accounting Standards Advisory Board (FASAB) and OMB Circular No. A-136, *Financial Reporting Requirements*.

The principal financial statements have been prepared to report the financial position and results of operations of the Commission, pursuant to the requirements of 31 U.S.C. 3515(b).

The statements have been prepared from the books and records of the Commission in accordance with U.S. Generally Accepted Accounting Principles (GAAP) for Federal entities and the formats prescribed by OMB and are in addition to the financial reports used to monitor and control budgetary resources, which are prepared from the same books and records.

The statements should be read with the realization that they are for a component of the U.S. Government, a sovereign entity.

## Management Controls and Compliance with Laws and Regulations

### Federal Managers' Financial Integrity Act (FMFIA)

The Federal Managers' Financial Integrity Act of 1982 (FMFIA) requires federal agencies to establish internal accounting and administrative controls consistent with standards prescribed by the Comptroller General that reasonably ensure that obligations and costs comply with applicable law; all assets are safeguarded against waste, loss, unauthorized use, and misappropriation; and revenues and expenditures applicable to agency operations are recorded and accounted for properly so that accounts and reliable financial and statistical reports may be prepared and accountability of the assets may be maintained. The FMFIA also requires federal agencies to assess and report on their internal accounting and administrative controls following guidelines established by the Office of Management and Budget. OMB guidance provides that agencies should assess (1) the effectiveness of the organization's internal controls to support effective and efficient programmatic operations, reliable financial reporting, and compliance with applicable laws and regulations (FMFIA § 2) and (2) whether financial management systems comply with Federal financial management systems requirements (FMFIA § 4).

In accordance with the Accountability of Tax Dollars Act of 2002 (ATDA), the Commission's financial information is audited annually. Additionally, at the end of each fiscal year, management reviews the operating units' performance data to ensure that performance results can be properly supported.

For FY 2017, the Commission evaluated the internal controls over the effectiveness and efficiency of operations and compliance with applicable laws and regulations in accordance with OMB Circular A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*. In addition, the Commission evaluated the effectiveness of internal control over financial reporting in accordance with the requirements of Appendix A of OMB Circular A-123, assessed the charge card program in accordance with Appendix B of OMB Circular A-123, and tested for improper payments in accordance with Appendix C of OMB Circular A-123. Based on these evaluations, the Commission provides modified assurance that its internal controls were operating effectively.

OMB Circular A-123 was updated last year, incorporating ERM as a management responsibility, which reinforces the purpose of the FMFIA. During the past fiscal year, the Commission also evaluated the organization's external and internal risks using an established ERM framework.

### **Government Performance and Results Act (GPRA), as amended by the GPRA Modernization Act**

The Government Performance and Results Act of 1993 (GPRA) requires a recurring cycle of performance reporting for federal agencies. This cycle involves five-year strategic plans, annual performance plans, and annual program performance reports. The GPRA Modernization Act of 2010 updates the Federal Government's performance management framework, retains and amplifies some aspects of the GPRA, reconfirms the requirements of the original GPRA legislation, and requires quarterly performance reporting.

The Commission complied with the requirements specified by the law and followed the guidance provided in OMB Circular A-11 (2017), *Preparation, Submission and Execution of the Budget*. For example, the Commission:

- held quarterly reviews of agency performance goals, to monitor progress, better understand challenges, factors affecting change, and the costs of delivery; and
- issued the agency's combined Annual Performance Plan for FY 2017 – 2018 and Annual Performance Report for FY 2016 (APP-APR). The APP-APR described the agency's programmatic and management goals for FY 2017 and FY 2018, documented the agency's performance and accomplishments for FY 2016, and discussed challenges going forward.

### **Federal Financial Management Improvement Act (FFMIA)**

Under the Federal Financial Management Improvement Act of 1996, agencies are required to report on whether their financial management systems substantially comply with the federal financial management systems requirements, applicable federal accounting standards, and the

United States Standard General Ledger (USSGL) at the transaction level. Since the Commission is not a CFO Act agency, it is not subject to the FFMIA.

The Commission uses the IBC to process its financial and payroll transactions. IBC provides the Commission SSAE 18 internal control reports for the financial and payroll systems. The Commission reviewed the SSAE 18 reports and determined that the servicing organization's relevant information processing objectives and internal controls were adequate. For those servicing providers' control objectives that can only be achieved if complimentary user controls are suitably designed and operating effectively, the Commission ensured controls were in place and operating effectively. Thus, the Commission's financial management system complied with the requirements of FFMIA and produced records in accordance with USSGL at the transaction level.

### **Federal Information Security Management Act of 2002, as amended by the Federal Information Security Modernization Act of 2014**

The Federal Information Security Management Act of 2002 (FISMA 2002) requires each federal agency to establish and maintain an information security program for all non-national security information and information systems. To further improve cybersecurity and clarify oversight responsibilities, Congress passed Federal Information Security Modernization Act of 2014 (FISMA 2014). FISMA 2014 is intended to address the increasing sophistication of cybersecurity attacks, promote the use of automated security tools with the ability to continuously monitor and diagnose the security posture of federal agencies, and provide for improved oversight of federal agencies' information security programs.

The agency last submitted its FISMA report on November 10, 2016 in compliance with OMB memorandum M-17-05, *Fiscal Year 2016-2017 Guidance on Federal Information Security and Privacy Management Requirements*. In its submission, the Commission reported the progress made toward meeting the 2016 FISMA metrics.

This fiscal year, the Commission completed key initiatives to strengthen its information security program, which included:

- expanding utilization of the Program Management Office (PMO) providing better communication of project status, improved reporting and forecasting, and extending liaison functions with various business units to better ensure IT governance policies and procedures are followed;
- update of security policies to comply with National Institute of Standards and Technology (NIST) guidelines;
- implementation of critical enhancements to the agency's internal and external software systems;

- deployment of two Data Loss Prevention (DLP) solutions to protect the Commission from possible exfiltration of sensitive data;
- deployment of a new web proxy server solution at the Commission network boundary enhancing connectivity troubleshooting issues;
- deployment of a security appliance on to the visitor wireless network allowing the OCIO to limit unwanted and potentially malicious traffic; and
- deployment of a threat detection and prevention tool to all Commission workstations.

### **Accountability of Tax Dollars Act**

ATDA requires the preparation of financial statements by the federal agencies that were exempted by the Chief Financial Officers Act of 1990. OMB Circular A-136, *Financial Reporting Requirements*, enables agencies to produce a consolidated Performance and Accountability Report or a separate Agency Financial Report. The Commission chose to produce an Agency Financial Report. This report meets the requirements of the Act.

The Commission's financial statements are audited each year. The Commission received an unmodified opinion for FY 2017 (see Independent Auditor's Report on page 30).

### **Improper Payments Elimination and Recovery Act**

The Improper Payments Elimination and Recovery Act of 2010 (IPERA), enacted on July 22, 2010, and amended by the Improper Payments Elimination and Recovery Improvement Act of 2012 (IPERIA), requires the development of policies and procedures for the prevention and detection of improper payments in the federal government. The Act expands on the Improper Payments Information Act of 2002 (IPIA), which requires an initial assessment to identify those programs that are susceptible to significant risk of improper payments.

The Commission's formal, written improper payment identification and recovery plan includes analysis of receivables, analysis of payroll transactions, and sample testing of both payroll and non-payroll disbursements to identify improper payments. In addition, the Commission participates in the Do Not Pay (DNP) initiative through its shared service provider.

FY 2017 testing for improper payments showed that the USITC can provide reasonable assurance that its internal control over the payment issuance or receipt of payments was operating effectively and that no material weaknesses were found in the design or operations of the internal controls over disbursement or receivable payments (see Payment Integrity section on page 65).

## **Pay and Allowance System for Civilian Employees as provided in 5 U.S.C. Chapters 51-59**

The Pay and Allowance System for Civilian Employees requires employees to be paid at the appropriate rates established by law, including general pay increases. The Commission ensures that pay and allowances for agency employees are appropriately administered and executed in accordance with laws, regulations, and agency policies.

### **Prompt Payment Act**

The Prompt Payment Act of 1982, as amended, provides government-wide guidelines for establishing due dates on commercial invoices and provides for interest payment on invoices paid late.

### **Government Charge Card Abuse Prevention Act**

The Government Charge Card Abuse Prevention Act requires establishing and maintaining safeguards and internal controls for the charge card program.

The Commission assessed the charge card program as directed by the guidance provided in OMB Circular A-123 Appendix B, OMB Memorandum M-12-12 *Promoting Efficient Spending to Support Agency Operations*, and OMB Memorandum M-13-21 *Implementation of the Government Charge Card Abuse Prevention Act of 2012*. The agency reviewed and updated the Charge Card Management plan to help prevent improper payments and deter misuse of cards. Additionally, the Inspector General conducted its 2017 Charge Card Risk Assessment and determined that the overall risk for the purchase card program remained low.

### **Digital Accountability and Transparency (DATA) Act**

The Digital Accountability and Transparency Act of 2014 is intended to make Federal spending data more accessible, searchable, and reliable. The U.S. Department of the Treasury (Treasury) and OMB are leading the government-wide implementation of the DATA Act.

The Commission was successful in uploading its data into the data broker by the reporting deadline. During the implementation, the OCFO reviewed its accounting and procurement data and processes, and, as a result, many old, incomplete, or incorrect accounting and procurement files were either deleted or corrected. The OCFO has continued to review and reconcile its procurement and accounting data to ensure that we will successfully meet the quarterly filing requirements.

## Debt Collection Improvement Act

The Debt Collection Improvement Act of 1996 requires agencies to review and report annually on their internal standards and policies regarding compromising, writing down, forgiving, or discharging debt. The Commission refers debts to the Treasury Offset Program (TOP). Further information is available in Other Accompanying Information, Improper Payments Information Reporting Details.

## Anti-Deficiency Act

The Anti-Deficiency Act prohibits federal employees from:

- making or authorizing an expenditure from, or creating or authorizing an obligation under, any appropriation or fund in excess of the amount available in the appropriation or fund unless authorized by law;
- involving the government in any obligation to pay money before funds have been appropriated for that purpose, unless otherwise allowed by law;
- accepting voluntary services for the United States, or employing personal services not authorized by law, except in cases of emergency involving the safety of human life or the protection of property; and
- making obligations or expenditures in excess of an apportionment or reapportionment, or in excess of the amount permitted by agency regulations.

The agency implemented effective internal controls to track commitments, and ensured managers are knowledgeable about the current year's appropriations and budget to ensure compliance. The agency did not have any Anti-Deficiency Act violations during FY 2017.

# Financial Section

## Message from the Chief Financial Officer

I am pleased to present the United States International Trade Commission's financial statements for the FY 2017 Annual Financial Report. The independent accounting firm of Castro & Company, LLC, monitored by the Inspector General, issued an unmodified opinion on the Commission's FY 2017 financial statements -- the seventh consecutive year the Commission has received a clean audit opinion. Behind this success is not only the exceptional work performed by the CFO team, but also the efforts of Cost Center Managers and Contracting Officer's Representatives throughout the Commission. Of course, none of the improvement would have been possible without the commitment and support of the current Chairman and previous Chairmen.

During the past year there were several other key accomplishments. For example, the Commission:

- Implemented a new "Budget Review Board" process whereby each office in the Commission presented their budget requests before the Commissioners, explaining the need for the funding, and detailing the risks of not getting the funding.
- Met all of its small business procurement and socio-economic goals.
- Fully integrated Enterprise Risk Management into the Commission's budget formulation and expenditure plan processes -- the ERM framework to identify, assess, and manage risks, and the Commission only committed and expended funds on the highest-ranked initiatives and programs.
- Issued new versions of the Concur Travel System Guide, Travel Handbook, Contracting Officer's Representative Handbook, Purchase Card Handbook, and the Financial Management Manual, to assist agency personnel understand and comply with travel and financial processes.

Looking forward to FY 2018, in addition to sustaining its audit readiness, the Commission will:

- Transition to the Invoice Processing Platform (IPP), a secure, Web-based service that more efficiently manages government invoicing from purchase order through payment notification, at no charge to the Commission or its vendors.
- Explore the acquisition of a contract writing system that is integrated with our accounting system.
- Together with all Interior Business Center client agencies, transition to a new financial reporting tool.

- Expand its internal controls program and test and evaluate key controls, and also incorporate the risk process into the ongoing activities of the Commission.
- Continue to develop and automate financial management reports that meet the needs of managers throughout the Commission using the business intelligence tool.

We are pleased with our progress and accomplishments, and we remain committed to ensuring a sound financial management environment. The accomplishments in FY 2017 and the past few years were the result of efforts across the entire organization. The CFO team looks forward to working closely with internal and external stakeholders to make further improvements to the Commission's financial management and internal controls operations in FY 2018.

John M. Ascienzo  
Chief Financial Officer

## Inspector General's Transmittal Letter of Independent Auditor's Report

OFFICE OF INSPECTOR GENERAL

---

### UNITED STATES INTERNATIONAL TRADE COMMISSION

---

WASHINGTON, DC 20436

November 9, 2017

IG-PP-022

Chairman Schmidlein:

This memorandum transmits the results of the audit (OIG-AR-18-03) of the Commission's financial statements for the fiscal year ended September 30, 2017 and 2016. We contracted with the independent certified public accounting firm, Castro & Company to conduct this audit. The contract required that the audit be performed in accordance with U.S. generally accepted government auditing standards.

My office has policies and procedures that are designed to provide assurance that work performed by non-Federal auditors complies with the auditing standards. These procedures follow the guidelines provided in the GAO/PCIE Financial Audit Manual (FAM650). In connection with this contract, we reviewed Castro & Company's final report and related documentation and made inquiries of its representatives. Our involvement in the audit process included monitoring audit activities, participating in discussions, reviewing audit plans, and the inspection of selected documentation, conclusions, and results.

Our involvement and review of Castro & Company's work disclosed no instances where they did not comply, in all material respects, with the U.S. generally accepted government auditing standards; however, this review cannot be construed as an audit, and is not intended to enable us to express, and we do not express, any opinion on the Commission's financial statements. Castro & Company is solely responsible for the audit report dated November 9, 2017 and the conclusions expressed in the report.

Thank you for the cooperation and courtesies extended to both Castro & Company and my staff during this audit.

Sincerely,

Philip Heneghan  
Inspector General

### Independent Auditor's Report

Inspector General  
U.S. International Trade Commission

We have audited the accompanying balance sheets of the U.S. International Trade Commission (USITC) as of September 30, 2017 and 2016 and the related statements of net cost, changes in net position, and budgetary resources for the fiscal years then ended.

#### ***Management's Responsibility for the Financial Statements***

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### ***Auditor's Responsibility***

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with the auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and, Office of Management and Budget (OMB) Bulletin No. 17-03, *Audit Requirements for Federal Financial Statements*. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the agency's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the agency's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### ***Opinion***

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the USITC as of September 30, 2017 and 2016, and the related

statements of net cost, changes in net position, and budgetary resources for the years then ended in accordance with accounting principles generally accepted in the United States of America.

***Required Supplementary and Other Information***

U.S. generally accepted accounting principles require that the information in the *Required Supplementary Information*, including *Management's Discussion and Analysis*, be presented to supplement the basic financial statements. Such information, although not part of the basic financial statements, is required by the Federal Accounting Standards Advisory Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. The supplementary information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the basic financial statements. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

The information presented in the Message from the Chairman, Chief Financial Officer, Other Accompanying Information, and Appendices is presented for purposes of additional analysis and are not required as part of the basic financial statements. Such information has not been subjected to auditing procedures applied by us in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

***Other Reporting Required by Government Auditing Standards***

In accordance with U.S. *Government Auditing Standards* and OMB Bulletin No. 17-03, we have also issued our reports dated November 9, 2017, on our consideration of the USITC's internal control over financial reporting and the results of our tests of its compliance with certain provisions of laws, regulations, and other matters that are required to be reported under *Government Auditing Standards*. The purpose of those reports is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. Those reports are an integral part of an audit performed in accordance with U.S. *Government Auditing Standards* and OMB Bulletin 17-03 in considering the USITC's internal control and compliance, and should be read in conjunction with this report in considering the results of our audit.

This report is intended solely for the information and use of management and the USITC Office of Inspector General, OMB, U.S. Government Accountability Office, and Congress, and is not intended to be and should not be used by anyone other than these specified parties.

WASHINGTON, DC 20436

November 9, 2017

OIG-PP-023

Chairman Schmidlein:

This memorandum transmits the Independent Auditor's Report on Internal Control (OIG-AR-18-04) associated with the audit of the Commission's financial statements for fiscal year 2017.

We contracted with the independent certified public accounting firm, Castro & Company to conduct the financial statement audit. The contract required that the audit be conducted in accordance with U.S. generally accepted government auditing standards and these auditing standards require a report on Internal Control to be produced as part of the audit.

Throughout the audit and at its conclusion, my office followed procedures and conducted a final review that included monitoring the performance of the audit, reviewing Castro & Company's report and related documentation, and making inquiries of its representatives. Our final review disclosed no instances where Castro & Company did not comply, in all material respects, with the U.S. generally accepted government auditing standards; however, this final review cannot be construed as an audit, and is not intended to enable us to express, and we do not express, any opinion on the Commission's internal control. Castro & Company is solely responsible for this report dated November 9, 2017, and the conclusions expressed in the report.

Thank you for the courtesies extended to the auditors and my staff during this audit.

Sincerely,

Philip Heneghan  
Inspector General

### Independent Auditor's Report on Internal Control

Inspector General  
U.S. International Trade Commission

We have audited the financial statements of the U.S. International Trade Commission (USITC) as of and for the year ended September 30, 2017, and have issued our report thereon dated November 9, 2017. We conducted our audit in accordance with the auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 17-03, *Audit Requirements for Federal Financial Statements*.

In planning and performing our work, we considered the USITC's internal control over financial reporting by obtaining an understanding of the design effectiveness of the USITC's internal control, determining whether controls had been placed in operation, assessing control risk, and performing tests of the USITC's controls as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not to express an opinion on the effectiveness of the USITC's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the USITC's internal control over financial reporting. We limited our internal control testing to those controls necessary to achieve the objectives described in the Office of Management and Budget (OMB) Bulletin No. 17-03, *Audit Requirements for Federal Financial Statements*. We did not test all internal controls relevant to operating objectives as broadly defined by the Federal Managers' Financial Integrity Act of 1982 (FMFIA), such as those controls relevant to ensuring efficient operations.

Our consideration of internal control over financial reporting was for the limited purposes described in the preceding paragraph and would not necessarily identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. During our audit, we did not identify any deficiencies in internal control that we consider to be material weaknesses or

significant deficiencies. However, material weaknesses or significant deficiencies may exist that have not been identified.

We noted less significant matters involving internal control and its operations which we have reported to USITC management in a separate letter dated November 9, 2017.

This report is intended solely for the information and use of the management and the USITC Office of Inspector General, OMB, the Government Accountability Office, and Congress, and is not intended to be and should not be used by anyone other than these specified parties.

## Inspector General's Transmittal of Independent Auditor's Report on Compliance with Laws and Regulations

OFFICE OF INSPECTOR GENERAL

---

### UNITED STATES INTERNATIONAL TRADE COMMISSION

---

WASHINGTON, DC 20436

November 9, 2017

IG-PP-024

Chairman Schmidlein:

This memorandum transmits the Independent Auditor's Report on Compliance with Laws and Regulations (OIG-AR-18-05) associated with the audit of the Commission's financial statements for fiscal year 2017.

We contracted with the independent certified public accounting firm, Castro & Company LLC, to conduct this audit. The contract required that the audit be conducted in accordance with U.S. generally accepted government auditing standards and these auditing standards require a report on compliance with laws and regulations to be produced as part of the audit.

The auditors did not identify any instances of noncompliance that would have a direct or material effect on the determination of financial statement amounts.

Throughout the audit and at its conclusion, my office followed procedures and conducted a final review designed to assure that the work performed by non-Federal auditors complied with the auditing standards. Our final review disclosed no instances where Castro & Company did not comply, in all material respects, with the U.S. generally accepted government auditing standards; however, this final review cannot be construed as an audit, and is not intended to enable us to express, and we do not express, any opinion on the Commission's compliance with laws and regulations. Castro & Company is solely responsible for this report dated November 9, 2017 and the conclusions expressed in the report.

Thank you for the cooperation and courtesies extended to both Castro & Company and my staff during this audit.

Sincerely,

Philip Heneghan  
Inspector General

### Independent Auditor's Report on Compliance with Laws and Regulations

Inspector General  
U.S. International Trade Commission

We have audited the financial statements of the U.S. International Trade Commission (USITC) as of and for the year ended September 30, 2017, and have issued our report thereon dated November 9, 2017. We conducted our audit in accordance with the auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 17-03, *Audit Requirements for Federal Financial Statements*.

The management of USITC is responsible for complying with laws and regulations applicable to the USITC. We performed tests of its compliance with certain provisions of laws and regulations, noncompliance with which could have a direct and material effect on the determination of financial statement amounts, and certain other laws and regulations specified in the Office of Management and Budget (OMB) Bulletin No. 17-03, *Audit Requirements for Federal Financial Statements*, including the requirements referred to in the Federal Managers' Financial Integrity Act of 1982 (FMFIA). We limited our tests of compliance to these provisions, and we did not test compliance with all laws and regulations applicable to the USITC.

The results of our tests of compliance with applicable laws and regulations, and government-wide policies, described in the preceding paragraph identified no instances of noncompliance that are required to be reported under *Government Auditing Standards* or OMB guidance.

Providing an opinion on compliance with certain provisions of laws and regulations and government-wide policies was not an objective of our audit, and accordingly, we do not express such an opinion.

This report is intended solely for the information and use of management and the USITC Office of Inspector General, OMB, the Government Accountability Office, and Congress, and is not intended to be and should not be used by anyone other than these specified parties.

A handwritten signature in black ink that reads "Castro &amp; Company, LLC". The signature is written in a cursive, flowing style.

## United States International Trade Commission

### Notes to Financial Statements

September 30, 2017 and 2016

#### **Note 1. Significant Accounting Policies**

##### **A. Reporting Entity**

The United States International Trade Commission (USITC) is an independent agency of the U.S. Government created by an act of Congress and is headed by six commissioners, appointed by the President and confirmed by the U.S. Senate for nine-year terms. The President designates the chairman and vice chairman, each of whom serve two-year terms. The USITC's budget constitutes a single program in the Budget of the United States. Accordingly, the USITC receives a lump sum appropriation. The appropriated funds are "no year" funds and may be obligated for goods and services that are provided in subsequent fiscal years.

The Commission conducts investigations and reports findings relating to imports and the effect of imports on industry, and unfair import practices. The USITC advises the President on the probable economic effect of proposed trade agreements with foreign countries. The USITC also conducts analytical studies and provides reports on issues relating to international trade and economic policy to Congress and the President.

##### **B. Basis of Accounting and Presentation**

The USITC's financial statements conform to Generally Accepted Accounting Principles (GAAP) as promulgated by the Federal Accounting Standards Advisory Board (FASAB). The American Institute of Certified Public Accountants (AICPA) recognizes FASAB Standards as GAAP for federal reporting entities. These principles differ from budgetary reporting principles. The differences relate primarily to the capitalization and depreciation of property, plant, and equipment, as well as the recognition of other long-term assets and liabilities. The statements were prepared in conformity with OMB Circular No. A-136, *Financial Reporting Requirements*.

The financial statements have been prepared from the books and records of the USITC and include all accounts of all funds under the control of the USITC. Accounting principles generally accepted in the United States of America encompass both accrual and budgetary transactions. Under the accrual method, revenues are recognized when earned and expenses are recognized when a liability is incurred, without regard to receipt or payment of cash. Budgetary accounting facilitates compliance with legal constraints and controls over the use of federal funds. The accompanying financial statements are prepared on the

accrual basis of accounting. The USITC's fiscal year (FY) is October 1 through September 30, 2017. FY 2016 financial statements are presented to allow comparison.

*Assets:* Intragovernmental assets are those assets that arise from transactions with other federal entities. Funds with the U.S. Treasury represent intragovernmental assets on the USITC's balance sheet. Fiduciary assets are not assets of the USITC and are not recognized on the balance sheet. The USITC holds cease and desist bonds, which are held for non-federal parties that the USITC does not have the authority to use in its operations. See Note 12, Fiduciary Activities, for additional disclosures.

*Financing Sources:* The USITC has received "no year" appropriations for operations since FY 1993. Appropriations are recognized as a financing source and expensed when related operating expenses are incurred. Differences between appropriations received and those expensed are included as unexpended appropriations. Congress appropriated \$91,500,000 to the USITC for salaries and expenses in FY 2017 and \$88,500,000 in FY 2016.

*Fund Balance with the U.S. Treasury:* Cash receipts and disbursements are processed by the Treasury. The fund balance with the U.S. Treasury represents appropriated entity funds in the custody of the U.S. Treasury and is available to pay current liabilities and to finance authorized purchase commitments. The USITC's obligated and unobligated fund balances are carried forward until goods or services are received and payments are made, or until such time as funds are deobligated.

### **C. Property, Plant, and Equipment, Net**

The USITC's portfolio of assets includes IT-related equipment, furniture, software, and leasehold improvements. For financial statement reporting purposes, the USITC does not own heritage assets or plant, as defined in the FASAB Statements of Federal Financial Accounting Standard (SFFAS) No. 6, *Accounting for Property, Plant, and Equipment*. The USITC therefore reports only the above-mentioned property and equipment in its financial statements. The USITC's operations are housed in a leased structure. In FY 2017, the USITC extended the operating lease agreement with the GSA by 15 years for the facility that houses its day-to-day mission operations.

The USITC capitalizes all equipment and furniture when an asset acquisition costs \$50,000 or more and when the acquired asset has a useful life of two or more years. Depreciation expense for equipment and furniture is calculated using the straight-line method over an estimated economic useful life. Maintenance and license fees associated with equipment are expensed in the accounting period that purchased maintenance and licenses are received.

The USITC capitalizes internal use software (IUS) using the standards defined and prescribed in the SFFAS No. 10, the *Accounting for Internal Use Software*. Accordingly, the USITC begins to accumulate IUS development costs for equipment integral to the functioning and operation of the software, as well as costs for development work associated with an IUS project when accumulated costs reach \$10,000. When the combined accumulated equipment and IUS development costs reach \$100,000, the IUS project is classified for financial statement reporting purposes as a capital asset and reported in the financial statements as an “in progress” capital asset. Equipment integral to the functioning and operation of the software is not depreciated until the software is placed in service. Upon completion and user acceptance testing, IUS and its associated equipment are reclassified as IUS equipment and software. The equipment is depreciated and the software is amortized using the straight-line (S/L) method over an estimated economic useful life. Maintenance and license fees associated with an IUS capital asset are accrued, expensed, and allocated between accounting periods based on period-of-performance timeframes specified in contractual agreements. Commercial software costs that do not meet the capitalization criteria and thresholds are expensed in the accounting period that the purchased software is received.

The USITC capitalizes all leasehold improvement acquisition costs that are \$50,000 or more and that have a useful life of two or more years. The USITC applies the same accounting treatment and standards to leasehold improvements as it does for IUS, when the leasehold improvement involves multiple stages of completion before work acceptance. For financial reporting purposes, all accumulated costs are captured in an “in progress” account and reported on the financial statements. Upon completion and acceptance of work, the costs are reclassified and reported on the financial statements as a leasehold improvement subject to amortization. Leasehold improvements are amortized over either the remaining life of lease term or the estimated economic useful life of the leasehold improvement, whichever is less.

#### **D. Accrued Annual Leave**

Accrued annual leave is paid from future funding sources and accordingly is reflected as a liability not covered by budgetary resources. Each quarter the balance in the accrued leave account is adjusted to reflect the current leave balances and pay rates. Sick leave and other types of non-vested leave are expensed as taken.

### **E. Employee Retirement Plans**

Commission employees participate in either the Civil Service Retirement System (CSRS), the Federal Employees Retirement System (FERS), which became effective on January 1, 1987, the Federal Employees Retirement System-Revised Annuity Employees (FERS-RAE), which became effective on January 1, 2013 or the Federal Employees Retirement System- Further Revised Annuity Employees (FRAE), which became effective on January 1, 2014. Most federal employees hired after December 31, 1983, are automatically covered by FERS, FERS-RAE, or FERS-FRAE and Social Security. For employees covered by CSRS, the USITC withheld 7.0 percent of base pay earnings. The Commission matches this withholding, and the sum of the withholding and the matching funds is transferred to the Civil Service Retirement System.

FERS, FERS-RAE, and FERS-FRAE contributions made by employer agencies and covered employees are comparable to the U.S. Government's estimated service costs. For FERS, FERS-RAE and FERS-FRAE covered employees, the Commission made contributions of 13.70 percent, 11.90 and 11.90 percent, respectively, of basic pay. Employees participating in FERS, FERS-RAE or FERS-FRAE are covered under the *Federal Insurance Contribution Act (FICA)* for which both the Commission and employees contributed 6.2 percent of salaries up to \$127,200 and \$118,500 during calendar years 2017 and 2016, respectively, into the Old-Age, Survivors, and Disability Insurance (OASDI) program; both the Commission and employees contribute 1.45 percent of salaries (with no upper limit) to Medicare's Hospital Insurance (HI) program.

### **F. Net Position**

Net position is the residual difference between assets and liabilities and is composed of unexpended appropriations and the cumulative results of operations. Unexpended appropriations represent the amount of unobligated and unexpended budget authority. Unobligated balances are the amount of appropriations or other authority remaining after deducting the cumulative obligations from the amount available for obligation. Cumulative results of operations are the net result of the USITC's operations since inception.

### **G. Intragovernmental Activities**

The USITC records and reports only those government-wide financial matters for which it is responsible and identifies only those financial matters that the USITC has been granted the budget authority and resources to manage.

## H. Use of Estimates

The financial statements are based on the selection of accounting policies and the application of certain accounting estimates, some of which require management to make significant assumptions. Further, the estimates are based on current conditions that may change in the future. Actual results could differ materially from the estimated amounts. The financial statements include information to assist in understanding the effect of changes in assumptions to the related information.

### Note 2. Fund Balance with Treasury

Fund Balance with Treasury is an intragovernmental asset. The Commission fund balance represents funds appropriated by Congress for use by the USITC. No funds are restricted; however, in accordance with section 605 of Title 5 of Public Law 105-277, Congressional approval is required under certain reprogramming or transfer actions.

No discrepancies exist between the Fund Balance reflected in the general ledger and the balance in the Treasury accounts.

Fund Balance with Treasury	2017	2016
Fund balance		
Appropriated funds	\$ 18,052,705	\$ 17,442,797
<b>Total</b>	<b>\$ 18,052,705</b>	<b>\$ 17,442,797</b>
Status of Fund Balance with Treasury		
Unobligated balance available	304,666	336,966
Obligated balance not yet disbursed	17,748,039	17,105,831
<b>Total</b>	<b>\$ 18,052,705</b>	<b>\$ 17,442,797</b>

### Note 3. Accounts Receivable

The balance of accounts receivable was \$5,000 and \$19,337 at September 30, 2017 and September 30, 2016, respectively. The non-governmental accounts receivable are for sponsored travel, vendor and employee debts. These items may be reported to the Department of the Treasury, Treasury Offset Program if not collected within prescribed collection terms.

Receivable Type	2017	2016
Non-governmental	\$ 5,000	\$ 19,337
<b>Total</b>	<b>\$ 5,000</b>	<b>\$ 19,337</b>

### Note 4. Property, Plant, and Equipment, Net

Depreciation and amortization expense was \$1,696,066 and \$1,838,183 for fiscal years ending September 30, 2017 and 2016, respectively, and is included in the accumulated depreciation.

Comparative asset tables summarized by class of property appear below:

#### Property, Plant, and Equipment as of September 30, 2017

Class of Property	Depreciation/ Amortization Method	Capitalization Threshold for Individual Purchases	Service Life (Years)	Acquisition Cost	Accumulated Depreciation/ Amortization	Book Value
Equipment and Furniture	S/L	\$ 50,000	5	\$ 6,336,502	\$ 5,452,221	\$ 884,281
Software	S/L	100,000	5	4,715,908	4,139,474	576,434
Software in Development	–	–	–	3,289,176	–	3,289,176
Leasehold Improvements	S/L	50,000	Varies	6,459,464	6,299,618	159,846
Leasehold Improvements in Progress	–	–	–	500,113	–	500,113
<b>Total</b>				<b>\$ 21,301,163</b>	<b>\$ 15,891,313</b>	<b>\$ 5,409,850</b>

#### Property, Plant, and Equipment as of September 30, 2016

Class of Property	Depreciation/ Amortization Method	Capitalization Threshold for Individual Purchases	Service Life (Years)	Acquisition Cost	Accumulated Depreciation/ Amortization	Book Value
Equipment and Furniture	S/L	\$ 50,000	5	\$ 6,095,996	\$ 4,882,230	\$ 1,213,766
Software	S/L	100,000	5	4,588,321	3,894,504	693,817
Software in Development	–	–	–	1,584,129	–	1,584,129
Leasehold Improvements	S/L	50,000	Varies	6,459,464	5,418,513	1,040,951
Leasehold Improvements in Progress	–	–	–	456,144	–	456,144
<b>Total</b>				<b>\$ 19,184,054</b>	<b>\$ 14,195,247</b>	<b>\$ 4,988,807</b>

## Note 5. Liabilities Not Covered by Budgetary Resources

Liabilities not covered by budgetary authority are not charged to the USITC's appropriation. These liabilities include unfunded Federal Employees' Compensation Act (FECA) liability, accrued annual leave, and actuarial FECA liability.

**Unfunded FECA Liability:** The FECA program is administered by the Department of Labor (DOL). DOL pays valid claims against the USITC and subsequently seeks reimbursement. Reimbursements are paid by the USITC out of current funds.

**Other Liabilities:** During FY17, USITC signed a new 15 year lease with GSA for the headquarter building. The lease has several initial months of rent abatement. This liability account establishes the FY17 portion of free rent and will be amortized, along with any FY18 rent abatements, over the remaining term of the scheduled lease payments, which begin in April 2018.

**Accrued Annual Leave:** Accrued annual leave is paid from future funding sources and accordingly is reflected as a liability not covered by budgetary resources. Each quarter the balance in the accrued leave account is adjusted to reflect the current leave balances and pay rates. Sick leave and other types of non-vested leave are expensed as taken.

**Actuarial FECA Liability:** This represents an estimated liability for future workers compensation claims based on data provided from DOL. DOL calculates the estimate based principally on benefit payments made over the prior 12 quarters.

**Liabilities Covered by Budgetary Resources:** In contrast to the liabilities identified above, all other liabilities are charged to the USITC's appropriation and thus are covered by budgetary resources. These liabilities include accounts payable, employer contributions of taxes and benefits, payroll taxes, and accrued funded payroll. The composition of accounts payable is described in more detail in Note 6, below.

Liabilities Not Covered by Budgetary Resources	2017	2016
Intragovernmental		
Unfunded FECA liability	\$ 1,509	\$ 624
Other Liabilities	1,633,222	-
Total Intragovernmental	1,634,731	624
Accrued annual leave	4,560,222	4,244,131
Actuarial FECA liability	8,554	5,756
Total liabilities not covered by budgetary resources	6,203,507	4,250,511
Total liabilities covered by budgetary resources	5,180,594	5,663,379
<b>Total Liabilities</b>	<b>\$ 11,384,101</b>	<b>\$ 9,913,890</b>

## Note 6. Accounts Payable

The amounts reported on the Balance Sheet for Accounts Payable represent amounts owed by the USITC to other federal agencies (intragovernmental) and to non-federal entities for goods and services received but not paid by the USITC as of the Balance Sheet date.

Amounts payable to trading partners were \$508,800 and \$67,383 as of September 30, 2017 and 2016, respectively. For FY 2017, amounts were principally owed to GSA, DHHS and GPO for rent, security control assessments and printing services, respectively. For FY 2016, amounts were principally owed to DOI and OPM for software licenses and background investigations, as well as GPO and GSA for publications and IT services/equipment.

The amounts reported below as real estate taxes payable, \$667,418 and \$831,888 represent unpaid property taxes for the periods (1) January 1, 2017 to September 30, 2017, and (2) January 1, 2016 to September 30, 2016, respectively. These amounts represent taxes that are invoiced and generally paid annually by September for the previous calendar year to the GSA. Thus, each fiscal year the Commission recognizes twelve months of real estate tax expense – three months of actual expense (Oct-Dec) and nine months of accrued expense (Jan-Sep).

Amounts shown on the Balance Sheet as payable to vendors represent amounts owed by the USITC to non-federal entities for goods and services received by the USITC in support of mission operations as of the Balance Sheet date.

Accounts Payable	2017	2016
Intragovernmental		
Accounts payable to trading partners	\$ 508,800	\$ 67,383
Real estate taxes payable	667,418	831,888
<b>Total Intragovernmental</b>	<b>1,176,218</b>	<b>899,271</b>
Non-federal		
Accounts payable to vendors	1,340,180	2,263,137
<b>Total Accounts Payable</b>	<b>\$ 2,516,398</b>	<b>\$ 3,162,408</b>

## Note 7. Leases

The USITC has an operating lease for the facility that houses its day-to-day mission operations. In FY 2017, the USITC extended the current operating lease with the General Services Administration (GSA) for a period of 180 months commencing on August 11, 2017. In accordance with the terms of the new Occupancy Agreement, the ITC will receive total free rent in the amount of \$6.8 million, as well as a broker commission credit totaling \$591 thousand. The full service rent will be abated in its entirety from commencement date of the new lease until the free rent is exhausted in FY 2018. USITC has no capital leases.

While the leases with the GSA are cancellable, the ITC's intention is to stay in the currently leased space and disclose the amounts that will be paid in the future to the GSA under signed lease agreements. Future minimum lease payments under leases of commercial property due as of September 30, 2017 are as follows:

Fiscal Year	
2017 (Aug. 1 – 10)	\$ 251,890
2018	4,047,376
2019	9,870,264
2020	9,932,929
2021	9,997,475
Thereafter	113,009,039
<b>Total Future Minimum Lease Payments</b>	<b>\$ 147,108,973</b>

### Note 8. Commitments and Contingencies

The USITC has certain claims pending against it. USITC management and legal counsel believe that losses, if any, from other claims and lawsuits will not be material to the fair presentation of the USITC's financial statements.

### Note 9. Other Financing Sources (Non-Exchange)

*Imputed Financing:* The amounts remitted to OPM for employees covered by the federal civilian benefit programs generally do not cover the actual cost of the benefits those employees will receive after they retire. As a consequence, the USITC has recognized an "imputed financing" equal to the difference between the cost of providing benefits to USITC's employees and the contributions the USITC remitted for them. The amount of imputed financing is calculated based on a formula provided by OPM.

### Note 10. Undelivered Orders at the End of the Period

Undelivered orders consist of goods and services ordered and obligated that have not been received. Undelivered orders may be indicative of obligations to cover future delivery of good and services or may represent potential de-obligations. Since the USITC has "no year" funds, it often funds contracts, particularly service contracts, on a calendar year or other annual basis, rather than on a fiscal year basis. Undelivered orders were \$12,567,446 and \$11,442,452 as of September 30, 2017 and September 30, 2016, respectively.

**Note 11. Explanation of Differences between the Statement of Budgetary Resources and the Budget of the United States Government**

The Budget of the United States Government with actual amounts for the year ended September 30, 2017 has not been published as of the issue date of these financial statements. This document will be available in February 2018 at OMB’s website.

For FY 2016 there were no material differences between amounts reported in the Commission’s Statement of Budgetary Resources and the actual amounts reported on the President’s Budget.

**Note 12. Fiduciary Activities**

Fiduciary activities are the collection or receipt, and the management, protection, accounting, investment and disposition by the federal government of cash or other assets in which non-federal individuals or entities have an ownership interest that the federal government must uphold.

Fiduciary cash and other assets are not assets of the federal government and accordingly are not recognized on the balance sheet.

Fiduciary net assets held by the USITC consist of cease and desist bonds held for non-Federal recipients.

Fiduciary Assets	2017	2016
Fiduciary net assets, beginning of year	\$ 161,280	\$ 158,814
Cash collections from cease and desist bonds	4,525,329	2,466
<b>Fiduciary Net Assets, end of year</b>	<b>\$ 4,686,609</b>	<b>\$ 161,280</b>

**Note 13. Reconciliation of Net Cost of Operations to Budget**

A reconciliation of net cost of operations to budget is presented below to show the relationship between accrual-based (financial accounting) information in the statement of net cost and obligation-based (budgetary accounting) information in the statement of budgetary resources. This reconciliation ensures that the proprietary and budgetary accounts in the financial management system are in balance. For FY 2017, the USITC reconciled the difference between the \$95.4 million in obligated resources and the \$94.8 million in the net cost of operations and for FY 2016, the difference between the \$90.3 million in obligated resources and the \$90.9 million in the net cost of operations by adjusting for offsetting collections, adjustments, recoveries, imputed financing, financing

resources not part of the net cost of operations, and depreciation. The details of these reconciliations are as follows:

Reconciliation of Net Cost of Operations to Budget	2017	2016
<b>Resources Used to Finance Activities:</b>		
Budgetary resources obligated:		
New obligations and upward adjustments	\$ 95,442,723	\$ 90,346,227
Less: Spending authority from offsetting collections and recoveries	3,910,423	1,841,541
Net Obligations	91,532,300	88,504,686
Other Resources:		
Imputed financing from costs absorbed by others	2,880,894	3,473,204
<b>Total Resources Used to Finance Activities</b>	<b>94,413,194</b>	<b>91,977,890</b>
<b>Resources Used to Finance Items Not Part of the Net Cost of Operations:</b>		
Change in budgetary resources obligated for goods, services, and benefits ordered but not yet provided	1,124,994	1,042,109
Resources that fund expenses recognized in prior periods	(14,337)	(2,284)
Resources that finance the acquisition of assets	2,117,109	1,973,550
<b>Total Resources Used to Finance Items Not Part of the net Cost of operations</b>	<b>3,227,766</b>	<b>3,013,375</b>
<b>Total resources Used to Finance the Net Cost of Operations</b>	<b>91,185,428</b>	<b>88,964,515</b>
<b>Components of Net Cost of Operations That Will Not Require or Generate Resources in the Current Period:</b>		
<b>Components Requiring or Generating Resources in Future Periods:</b>		
Increase/decrease in annual leave liability	316,091	67,853
Increase/Decrease in Worker's Compensation	3,684	3,488
Increase/decrease in Other Liabilities	1,633,222	-
<b>Components Requiring or Generating Resources in Future Periods</b>	<b>1,952,997</b>	<b>71,341</b>
<b>Components Not Requiring or Generating Resources:</b>		
Depreciation and amortization	1,696,066	1,838,183
<b>Total Components of Net Cost of Operations That Will Not Require or Generate Resources in Current Period</b>	<b>3,649,063</b>	<b>1,909,524</b>
<b>Net Cost of Operations</b>	<b>\$ 94,834,491</b>	<b>\$ 90,874,039</b>

## Management and Performance Challenges

### Inspector General's Summary of Management and Performance Challenges

---

## UNITED STATES INTERNATIONAL TRADE COMMISSION

---

WASHINGTON, DC 20436

October 12, 2017

IG-PP-020  
OIG-MR-18-01

Chairman Schmidlein:

This memorandum transmits the Inspector General's summary of the top management and performance challenges facing the Commission and briefly assesses management's progress in addressing these challenges.

I have identified three management and performance challenges for fiscal year 2018: Managing Data, Internal Controls, and IT Management. These challenges were identified based on work by the Office of Inspector General, input from Commission management, and knowledge of the Commission's programs and operations.

#### Managing Data

Information drives decision-making in an organization, and this information is derived from data in the Commission's systems and databases. An organization needs complete, accurate, and consistent enterprise data to make timely and effective decisions. Thus, the underlying business processes and practices for the creation, storage, and use of data should be designed to allow key information to be entered consistently across applications, systems, and databases.

Properly managed data is essential for the development of timely, reliable, and accurate reporting. Managers should identify information needs, understand the characteristics of the data, and determine the appropriate level of detail required to ensure data is collected to develop useable and relevant management reports. Management reports should be based on a clear purpose and meet the defined needs of the intended user. As such, the format and content of management reports should contain a sufficient level of information to meet the purpose for which those reports were developed. Properly designed reports with relevant and timely information serve to help effectively manage day-to-day operations, support the decision-making process, evaluate performance, and communicate information across the organization.

Effective organization of data is critical to obtain useful and relevant information that is versatile for a variety of purposes across all levels of the organization. The Commission should have a flexible and adaptable coding structure organized to generate useful information in a timely manner that is accurate and complete, with minimal human interaction. The codes should follow a systematic method of assignment based on a logical flow of data that allows detailed information to be aggregated to meet the needs of managers at every level of the Commission. This logical structure must be considered when determining the level of data necessary to provide the desired information. Inconsistent methods of assigning and entering codes increase the risk that aggregations of data will be incomplete and information from different systems will provide conflicting results.

The Commission should be able to rely on the quality and integrity of its data across systems, applications, and databases. The accuracy and completeness of information relies on how we capture, enter, code, and reconcile data at the source of entry. The value of the information generated by a system is only as good as its quality at the point of entry. Employees need to understand the importance of the data and, more importantly, how inaccurate or incomplete entries affect the organization. Data reconciliation processes should be performed regularly to identify and correct any errors or omissions and improve the processes to reduce future errors.

The Commission's systems were developed for a specific need or to solve a single problem. The data within these systems was not seen as an enterprise resource. Because these systems were developed for a single purpose, their functionality, access, and reporting capabilities are limited. Without staff knowing how the information from various systems and subsystems is defined, captured, and updated, misleading information can be produced and excess staff time might be needed to attempt to reconcile multiple data sets across the organization.

The Commission needs to take a thoughtful, enterprise-wide approach to manage data to ensure it is relevant, complete, and available when necessary to make good strategic and operational decisions and manage enterprise risks. The Commission's strategy should use all data assets across the organization to meet its financial and nonfinancial reporting objectives.

#### Internal Controls:

The Commission's management is responsible for establishing and maintaining a system of internal controls. These internal controls are the plans, policies, procedures, and organizational environment that managers use to ensure their programs and operations are achieving the intended results through the effective use of public resources.

The *Standards for Internal Control in the Federal Government* (Green Book) defines internal control as “a continuous built-in component of operations, effected by people” and identifies five components for internal control. In order for a system of internal control to be effective, all five components must be effectively designed, implemented, and operating. In addition, all five components must be working together in an integrated manner.

The control environment is the foundation for a system of internal control. One principal of the control environment is the establishment of an organizational structure, assignment of responsibility, and delegations of authority to meet the objectives of the Commission. In 2015, we completed an audit of the Commission’s directives management system, which included a review of these control environment elements. The audit found that the Commission’s directives were not current and the directives contained outdated assignments of responsibility and delegations of authority. This lack of monitoring led to weaknesses in each of the five components of internal control. Monitoring is necessary to determine if the system of internal control is properly designed, working as intended, and achieving the desired results. The lack of accountability meant that individuals had roles and responsibilities within the process, but no one was held accountable for the overall success of the Commission’s directives system.

The Commission has now recognized the importance of having strong internal controls. The Commission has consistently acknowledged and responded to internal control weaknesses identified in reports issued by the Office of Inspector General. However, even with the strides taken by the Commission over the past five years, there is still an underlying assumption that because specific actions were completed, all internal control problems have been resolved. Management needs to continually monitor and review internal controls to ensure that controls work effectively and achieve the desired results.

Another area where the Commission has shown continued commitment towards improving and strengthening the internal control environment is in enterprise risk management. The Enterprise Risk Management Program continues to mature and has been integrated into the budget process to assist management in making informed decisions. Because enterprise risk management is an iterative process, the Commission must keep management focused on maturing its processes and procedures, ensuring that program risk assessments are completed and used to inform the enterprise risk, identifying new and emerging risks, reevaluating the risks’ impact/probability scores for reasonableness, and assessing whether mitigation strategies are working effectively.

The Commission must continue the engagement of senior management in all aspects of internal control to ensure buy-in across programmatic and administrative offices and to make certain it can be sustained over a long period of time in order to achieve a mature and effective internal control program. The Commission will be challenged to manage and drive the cultural changes associated with the development and implementation of an effective organizational internal control program.

### IT Management

Daily attention to the four foundational, critical security controls remains necessary, as these controls are the cornerstone of securing the Commission’s network. These controls are: (1) Inventory of authorized and unauthorized devices, (2) Inventory of authorized and unauthorized

software; (3) Secure configurations for hardware and software on mobile device laptops, workstations, and servers; and (4) Continuous vulnerability assessment and remediation.

The Commission has identified and begun to implement business systems that will automate and improve the effectiveness of the Commission's operations. These new systems include collecting electronic data for some Title VII investigations, consolidating different databases of 337 data, cataloging external administrative reports in a manageable database, and modernizing the Harmonized Tariff Schedule business processes and information systems. Taking advantage of automation should improve the integrity, effectiveness, and efficiency of all the Commission's work.

Modern computing platforms have the potential to provide staff with a high level of availability and the features they need to get their jobs done, while also providing high levels of information security. The Commission should work to modernize its systems to benefit from the native capabilities of modern software platforms to enhance functionality and reduce the management complexity of its network.

The Commission has recently suffered multiple and extended outages related to basic functions, including internet access and wireless availability. These outages all have a cost to productivity and lower staff's confidence in the reliability of these platforms. The Commission's professional staff require a consistent and stable IT foundation that is developed and managed effectively to enhance the work done by Commission staff. If the Commission's IT systems do not work effectively, staff are unnecessarily stressed, deadlines are risked, and results-oriented staff will use alternative means of accomplishing their work on unmanaged devices. The Commission should continue to focus on the delivery and maintenance of a stable and secure technology platform that serves its staff.

I will continue to work with you, the other Commissioners, and management to reassess our goals and objectives to ensure that my focus can continue to remain on the risks and priorities of the Commission.

Philip M. Heneghan  
Inspector General

## Chairman's Response to Inspector General's Summary of Management and Performance Challenges

---

### UNITED STATES INTERNATIONAL TRADE COMMISSION

---

WASHINGTON, DC 20436

#### COMMENTS ON MANAGEMENT CHALLENGES IDENTIFIED BY THE INSPECTOR GENERAL

In Management Report: USITC Management and Performance Challenges, dated October 12, 2017, the USITC Inspector General identified three management challenges for the Commission, (1) managing data, (2) internal controls, and (3) the management of information technology (IT). As required by the Reports Consolidation Act of 2000, the Inspector General also assessed the Commission's progress in addressing these challenges.

The Commission concurs with the Inspector General on the management challenges facing the agency. The Commission is pleased that progress has been made during FY 2017 to address the two previously identified management challenges of internal controls and managing IT. Managing data is a newly identified management challenge that the Commission has yet to comprehensively address. The Commission will continue its efforts in FY 2018 to address these three challenges.

#### **Management Challenge: Managing Data**

As discussed above, data management has been newly identified by the Inspector General as a management challenge facing the Commission. Data management is integral to the Commission's operations and the productivity of its staff. The Commission recognizes that our data are a valuable asset which can be optimized through the use of improved data governance and technology. As the Commission addresses this challenge, processes will be reviewed to ensure data are handled and maintained correctly and made accessible to those with legitimate uses. The agency will also assess existing data to identify opportunities to consolidate the data

and reduce duplication. The Commission will develop adaptive and flexible structures that enable the data to be used for a variety of purposes throughout the enterprise.

The Commission will examine its business systems and processes to find ways that data capture can be made more efficient and accurate. More fundamentally, the agency will review the way it currently classifies data to ensure that systems using the same data are defining the data in the same way and that the classifications are maintained over time.

At the end of FY 2016 the Commission acquired business intelligence software used to enhance reporting capabilities, providing management and staff with useable and relevant reports to effectively manage day-to-day operations, support decision-making, and communicate information across the organization and, where appropriate, to the public. Over the next few years, the agency will continue to identify reporting needs across the agency, develop or refine its data systems accordingly, and issue improved reports.

### **Management Challenge: Internal Control**

As the Inspector General notes, the Commission has recognized the importance of having strong internal controls and has consistently acknowledged and responded to internal control weaknesses. Since the issue of internal controls was first identified as a management challenge, the Commission has been committed to improving and strengthening its system of internal control, and has made significant strides in this critical area. The Commission will continue to improve and refine its internal controls and has undertaken several multi-year corrective action initiatives to ensure that controls are working effectively on a continuous basis.

One ongoing high priority corrective action initiative is the redesign of the Commission's system of internal rules, which includes the USITC's policy directives and related procedural documents. The system of internal rules sets forth all delegations of authority, provides the foundation of the Commission's control environment, and is essential to ensuring the USITC's internal policies and procedures are accessible, intelligible, and consistent. The system is also crucial to enforcing accountability among USITC staff as its content sets forth the appropriate standards by which Commission functions should be carried out.

The Inspector General, when reviewing the Commission's policy directives, found that many policies were outdated and inconsistent and that the agency's management of this function did not adequately ensure accountability for its upkeep. Senior management and staff established a working group that met regularly throughout the fiscal year to address the issues identified by the Inspector General. The working group found problems similar to those identified by the Inspector General across its system of internal rules and concluded that, in order to remediate the issues identified, the Commission would have to redesign its policies and procedures for managing the entire system of internal rules and update all content within it. This effort was a tremendous undertaking that raised issues central to agency governance and organization. Though the process for addressing the Inspector General's findings has been lengthy, it has

been necessary to ensure that these critical issues are addressed effectively as well as to prevent future reoccurrences of the dynamics that led to significant problems with the current system.

The working group completed drafts of policy and procedure documents that form the basis for a new system of internal rules and received legal review of each from the Office of the General Counsel. Currently, the documentation is undergoing Commission review and approval. Upon approval of the Commission, the implementation of the new system will begin with the establishment of an Internal Administration Committee to ensure Senior Executives are regularly engaged in agencywide policy development, review, and analysis, as well as the tracking and implementation of external requirements. The Committee will also implement a multi-year remediation plan.

The proposed system and implementation plan will address all of the issues raised by the Inspector General, including the underlying process inefficiencies that gave rise to the problems identified, and provide standards for accountability in case procedures are not followed. The Commission has dedicated significant resources to address this management challenge, and implementing the new system of internal rules will be a priority for the Commission over the coming fiscal years.

### **Management Challenge: IT Management**

The Commission has continued to make substantial improvements in the IT platforms, modernizing the infrastructure, stabilizing operations, supporting mission functions, and reducing cybersecurity risks. While accomplishing these goals, the Office of the Chief Information Officer (OCIO) has made significant progress toward full compliance on all mandates as well as fully implementing an online portal for the submission and management of Miscellaneous Tariff Bill petitions. The Commission has also made progress in improving its IT security posture and management of IT assets by closing out all management decisions in response to audit findings.

OCIO implemented the four technical capabilities identified within the DHS Continuous Diagnostics and Mitigation (CDM) program, Hardware Asset Management (HWAM), Software Asset Management (SWAM), Vulnerability Management (VULN), and Configuration Settings Management (CSM). These four capabilities directly correlate to the four foundational, critical security controls identified in the Inspector General's report.

OCIO has taken several steps to secure the Commission's network. OCIO deployed two data loss prevention solutions Commission-wide to protect the Commission from the possible exfiltration of sensitive data (e.g., Social Security Numbers). This strategy is a repeatable process allowing OCIO to implement changes to the various offices across the Commission while mitigating downtime and impacts to productivity. OCIO deployed a threat detection and prevention tool to all Commission workstations. This tool continuously monitors Commission endpoints for

Indicators of Compromise (IOCs) and immediately locks down endpoints and performs automated forensics when an IOC is detected.

The Commission continues to improve device management, security, and operability. The United States Government Configuration Baseline (USGCB) has been applied and maintained for all workstations, bringing the Commission into compliance with the Federal government-wide mandate. All new Commission servers have secure baseline configurations customized for our environment and unique mission needs. Mobile device configurations are also managed via a secure solution. These standardized configurations improve the Commission's ability to manage and safeguard network devices against intrusion or exposure to vulnerabilities, as well as ensuring optimal operations.

OCIO conducts ongoing continuous security control monitoring and risk assessment of systems and networks. To augment these cybersecurity programs, OCIO coordinates with DHS National Cybersecurity & Communications Integration Center (NCCIC) to conduct numerous external cybersecurity assessments of USITC systems. OCIO converted all public-facing websites and web applications to use secure encrypted protocols for all transmissions, improving the security of information for all users.

OCIO continues to work to improve the availability of Commission systems. The Commission is deploying new technologies to meet shifting priorities and goals while at the same time seeking to avoid introducing unnecessary obstacles to daily operations. In support of agency operations, OCIO implemented several critical enhancements to the agency's internal and external software systems and websites. OCIO enhanced the USITC repository for all Commission investigation documents and conducted a redesign of a new internal intranet website, providing for easier access to agency information and services. OCIO developed and deployed a new application to create and maintain the administrative, cost and appeal information related to FOIA requests. OCIO began a project to re-engineer its legacy DataWeb platform, which provides the public access to trade data reports and query capabilities. The new system, planned for deployment in late 2017, provides a modernized interface for users. OCIO also enhanced its internal system for managing the Harmonized Tariff Schedule (HTS) to improve the efficiency of the update process.

The Commission has recently deployed a business intelligence tool to allow internal and external users greater access to data as well as providing a robust suite of analytic and visualization options. The initial project assigned to this solution was the development of the preliminary and final reports for the Miscellaneous Tariff Bill Petition process. Other projects using the BI tool included the development of a Conflict of Interest (CoINs) system to identify conflicts of interest for key Commission staff and expenditure reporting for Finance. A prototype for collecting vote information (for Title VII and adequacy) is near completion. Operational FOIA reports are in development and requirements are being gathered for labor cost reports.

In further efforts to improve on the Commission's ability to better manage its data as an asset, modernize systems, and deliver a stable technology platform, the OCIO upgraded its existing SharePoint platform from Version 2010 to 2013, not only replacing an archaic architecture but also providing better navigation, search, and collaboration capabilities for USITC staff.

The Commission is dedicated to providing its staff with a consistent and stable IT foundation and has taken steps to address recent outages identified by the Inspector General that have affected staff productivity. For example, the Commission is addressing recent email issues by investing in a cloud email solution with an aggressive target of end of calendar year 2017. Moreover, the Commission has also engaged our internet service provider to ensure better communication and escalation strategies to minimize the impact of future maintenance outages on agency operations.

The Commission is committed to address its management challenges. We appreciate the Inspector General's efforts to identify areas of improvement and his advice on how to successfully improve the efficiency and effectiveness of operations.

Rhonda K. Schmidlein  
Chairman  
November 9, 2017

<sup>1</sup> The Commission uses a federal shared services provider, the Department of Interior’s (DOI), Interior Business Center (IBC), for financial systems.

## Payment Integrity

The information presented in this report complies with guidance provided in the *Improper Payments Information Act of 2002* (IPIA) as amended by the *Improper Payments Elimination and Recovery Act of 2010* (IPERA) and the *Improper Payments Elimination and Recovery Improvement Act of 2012* (IPERIA), Office of Management and Budget (OMB) Circular A-136, and Appendix C of OMB Circular A-123, M-15-02, *Requirements for Effective Estimation and Remediation of Improper Payments*.

The guidance requires agencies to assess every Federal program and dollar for improper payment risk, measure the accuracy of payments annually, and initiate program improvements to ensure payment errors are reduced. On November 20, 2009, *Executive Order 13520—Reducing Improper Payments and Eliminating Waste in Federal Programs*, was issued for the purpose of intensifying efforts to eliminate payment error, waste, fraud, and abuse in the major programs administered by the Federal government, while continuing to ensure that the right people receive the right payment for the right reason at the right time. The supporting website, <https://paymentaccuracy.gov/>, contains the following information.

- Current and historical rates and amounts of improper payments for Federal agencies.
- Why improper payments occur.
- What agencies are doing to reduce and recover improper payments.

### Program Review

The USITC has only one program for budget purposes. The FY 2017 appropriated funding for the program is \$91.5 million in appropriations. All of the agency's transactions are for employee payroll and benefits, intra-governmental and non-Federal transactions.

The USITC does not maintain its own financial management system, but uses a shared service provider (IBC/DOI) to process all accounting transactions to include payroll and benefits. The IBC is subject to external audit in accordance with the Standards for Attestation Engagements (SSAE) 18, *Attestation Standards: Clarification and Recodification*. The OCFO examines the SSAE No. 18 audit results annually to determine if the shared service provider's internal controls are operating effectively and evaluates the internal controls required to supplement the shared service provider's controls as outlined in the SSAE 18.

Intra-governmental transactions, accounts payables, and payments to agency employees are reviewed as part of the agency's internal control program under OMB Circular A-123, Appendix A, *Internal Control over Financial Reporting* and Appendix C, *Requirements for Effective Estimation and Remediation of Improper Payments*.

Based on OMB Circular A-123, Appendix C, Part I.A.9. Step 1, all programs and activities were reviewed to identify those that were susceptible to significant improper payments. For FY 2017 the USITC non-Federal payment was \$17.8 million (vendor disbursements and non-federal accounts payable) and payroll was \$62.9 million for a combined total of \$80.7 million. IPERA defines “significant” as either (1) improper payments that exceed both \$10 million and 1.5% of program disbursements; or (2) improper payments in excess of \$100 million. Significant improper payments in the USITC’s program needed to exceed both \$1.2 million (1.5% improper payment rate) and \$10 million of all non-Federal payments and payments to Federal employees. The improper payments identified by USITC in FY 2017 were less than 0.03% which is beneath the defined thresholds for significant improper payment reporting.

In addition, the following risk factors, likely to contribute to improper payments, were applied to the USITC’s appropriated funds.

1. Any new programs or activity in the agency.
2. Complexity of the activity with respect to correct payments amounts.
3. Volume of payments made annually.
4. Whether payment decisions were made outside the agency.
5. Recent major changes in activity funding, authority, practice, or procedures.
6. Level, experience, and quality of training for personnel responsible for certifying that payments are accurate.
7. Inherent risks of improper payments due to the nature of agency operations.
8. Significant deficiencies in the audit reports of the agency that included Inspector General audit findings or external financial audit findings.
9. Results from prior improper payment work.

The USITC maintains a Financial Risk Management and Internal Control Plan that is updated annually with an internal control test plan. The annual Plan addresses review of general ledger accounts (volume and nature) and known process or personnel deficiencies that may contribute to an improper payment. Of the nine risk factors listed above factor number six has generated improper payments discovered during annual internal control testing.

### **Improper Payments Strategy**

The 2010 Act requires agencies to conduct payment recapture audits with respect to each program and activity of the agency that expends \$1 million or more annually, if conducting such audits would be cost-effective. The USITC addresses proper management of payments by:

- preventing payment errors through documented processes and internal controls;

- detecting overpayment and underpayments through control testing; and
- establishing a process with the U.S. Treasury (Treasury Offset Program) to recapture overpayments when identified.

Our Financial Internal Control and Risk Management Plan contributes to our efforts to identify improper payments.

### Do Not Pay (DNP) Initiative

The OCFO reviews the System for Award Management (SAM) database prior to each acquisition award to ensure the vendor is registered to do business with the Federal government. For post award payments, the IBC sends the weekly payee file to the Treasury’s DNP Business Center for continuous monitoring. The data sources currently used are listed below.

- Death Master File (DMF).
- Systems for Awards Management-Exclusion Records – Private.
- List of Excluded Individuals/Entities (LEIE).
- System for Award Management (SAM) Entity Registration Records, Private.

	Number of payments reviewed for improper payments	Dollars of payments reviewed for improper payments	Number of payments stopped	Dollars of payments stopped	Number of improper payments reviewed and not stopped	Dollars of improper payments reviewed and not stopped
Reviews with the DMF only	All agency payments submitted to shared service provider	\$ 16.4M <sup>2</sup>	0	0	0	0
Reviews with all other databases <sup>3</sup>	All agency payments submitted to shared service provider	\$ 16.4M	0	0	0	0

### Recapture of Improper Payments Reporting

The IPERA Act of 2010 replaced the recovery auditing program contained in the National Defense Authorization Act of 2002. The 2010 Act requires agencies to conduct recovery audits with respect to each program and activity of the agency that expends \$1 million or more annually, if conducting such audits would be cost-effective.

<sup>2</sup> \$16.4M was cash disbursements paid to non-Federal vendors. Any resulting matches are provided to the OCFO for determination of payment.

<sup>3</sup> Databases are 1) Systems for Awards Management-Exclusion Records – Private; 2) List of Excluded Individuals/Entities (LEIE); and 3) System for Award Management (SAM) Entity Registration Records, Private.

Once the OCFO has identified an improper payment with a non-Federal vendor, it is USITC’s policy to aggressively correct the improper payment. Upon research and analysis of supporting documentation the vendor is contacted for resolution (underpayment to the agency). If it is an ongoing contract, the OCFO will offset the amount to be recovered on the next billing. For all other contracts the vendor is contacted and a receivable is established for collection. If the vendor does not provide payment the debt is entered into the Treasury Offset Program. If an improper payment is identified as an overpayment to the USITC the vendor is promptly paid.

The table below shows the result of improper payments (in millions of dollars) identified during FY 2017 <sup>4</sup>.

Reason for Improper Payment	Overpayment	Underpayment	Total Amount Overpayment Recaptured	Total Amount Underpayment Paid
Failure to verify vendor invoice amount	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0
Administrative processing	0.0	0.0	0.0	0.0
<b>Total</b>	<b>\$ 0.0</b>	<b>\$ 0.0</b>	<b>\$ 0.0</b>	<b>\$ 0.0</b>

The following table shows cumulative overpayments (in millions of dollars) through FY 2017.

Reason for Improper Payment	Overpayment	Underpayment	Total Amount Overpayment Recaptured	Total Amount Underpayment Paid
Failure to verify vendor invoice amount	\$ 0.0	\$ 0.0	\$ 0.0	\$ 0.0
Administrative processing	0.0	0.0	0.0	0.0

Recovery of employee overpayment is expected to be between 30-40% and 100% for employee underpayment for FY 2018.

---

<sup>4</sup> USITC overpayments were less than \$50,000 cumulative to include FY 2017.

# Fraud Reduction

OMB Circular A-123 and the GAO Green Book calls for agencies to adhere to leading practices for managing fraud risk. Standards now require agencies to take a closer look at fraud risks (GAO principle 8 shown below) and identify fraud risk factors and programs with increased susceptibility for fraud.

Control environment	Risk assessment	Control activities	Information & communication	Monitoring activities
<ol style="list-style-type: none"> <li>1. Demonstrates commitment to integrity and ethical values</li> <li>2. Exercises oversight responsibilities</li> <li>3. Establishes structure, authority, and responsibility</li> <li>4. Demonstrates commitment to competence</li> <li>5. Enforces accountability</li> </ol>	<ol style="list-style-type: none"> <li>6. Define objectives and risk tolerances</li> <li>7. Identifies, analyzes, and responds risk</li> <li>8. <b>Assesses fraud risk</b></li> <li>9. Identifies and analyzes and responds to change</li> </ol>	<ol style="list-style-type: none"> <li>10. Designs control activities</li> <li>11. Selects and develops general controls for the system</li> <li>12. Deploys and implements control activities</li> </ol>	<ol style="list-style-type: none"> <li>13. Uses relevant, quality information</li> <li>14. Communicates internally</li> <li>15. Communicates externally</li> </ol>	<ol style="list-style-type: none"> <li>16. Performs ongoing monitoring activities</li> <li>17. Evaluates issues and remediates deficiencies</li> </ol>

COSO Framework of Internal Control

The USITC maintains an annual Financial Internal Control and Risk Management Plan that identifies, through quantitative and qualitative analysis, transactional areas that are susceptible to inaccuracies and or fraud. The plan contains specific process areas that are tested throughout the fiscal year to ensure the process results are accurate and reasonable. For FY 2017 the use of government purchase cards was identified as a program at a high risk for fraud.

The following financial controls are in place to prevent potential fraud within the government purchase card program.

- The purchase card has a limit of \$3,500 per cardholder.
- A Purchase Card Handbook is published defining the roles and rules of the program. The handbook is reviewed and updated periodically.

The following administrative controls are in place to detect potential fraud within the government purchase card program.

- The Purchase Card Coordinator reviews all purchase cardholders statements and supporting receipts on a quarterly basis.
- The Purchase Card Coordinator reviews the Cardholder History Report obtained from the servicing bank to review what purchase cardholders have procured during the quarter.
- The Purchase Card Coordinator writes a quarterly report summarizing all purchase card activity.

Any purchases that are deemed suspect are referred to the agency's Inspector General.

Other areas reviewed for the annual Financial Internal Control and Risk Management Plan include payroll, large contracts, and all government charge cards. The Human Resource Office is currently reviewing internal processes to identify controls and possible areas for fraud. Large contracts are reviewed by the Internal Control and Risk Management (ICRM) division as part of the Plan. Travel cards are not deemed a fraud risk as the travel card account is the cardholders financial responsibility and not the agency's. Travel cards are reviewed monthly for misuse.

## Reduce the Footprint

The Commission leases all buildings under an intra-agency agreement with GSA and as such does not provide square footage data to the Federal Real Property Profile (FRPP).

# Appendix A

## U.S. International Trade Commission Staff Offices

### Office of the Administrative Law Judges

The Commission's administrative law judges (ALJs) hold hearings and make initial determinations in investigations under section 337 of the Tariff Act of 1930. If after receipt of a petition, the Commission decides to institute an investigation, the matter is referred to this office. The Chief ALJ assigns each case on a rotational basis to one of our six ALJs. After a discovery process, a formal evidentiary hearing is held in accordance with the Administrative Procedure Act (APA) (5 U.S.C. 551 et seq.). The ALJ considers the evidentiary record and the arguments of the parties and makes an initial determination, including findings of fact and conclusions of law. The ID becomes the Commission's determination unless the Commission determines to review it or send the matter back to the ALJ for further consideration. Temporary relief may be granted in certain cases.

### Office of the General Counsel

The **General Counsel (GC)** serves as the Commission's chief legal advisor. The GC and the staff attorneys provide legal advice and support to the Commissioners and staff on investigations and research studies, represent the Commission in court and before dispute resolution panels and administrative tribunals, and provide assistance and advice on general administrative matters, including personnel, labor relations, and contract issues.

### Office of Operations

The Commission's core of investigative, industry, economic, nomenclature, and technical expertise is found within the **Office of Operations (OP)**. The following six offices are under the supervision of the Director:

The **Office of Economics (EC)** conducts investigations primarily under section 332 of the Tariff Act of 1930, section 131 of the Trade Act of 1974, and section 2104 of the Trade Act of 2002. EC also provides expert economic analysis for import injury investigations, as well as other industry and economic analysis products.

The **Office of Industries (IND)** conducts investigations primarily under section 332 of the Tariff Act of 1930, section 131 of the Trade Act of 1974, and section 2104 of the Trade Act of 2002. IND maintains technical expertise related to the performance and global competitiveness of

industries and the impact of international trade on those industries for these studies and import injury investigations.

The **Office of Investigations (INV)** supports the Commission's mandate to conduct import injury investigations, including those specified in the Tariff Act of 1930, the Trade Act of 1974, the North American Free Trade Agreement (NAFTA) Implementation Act of 1993, and the Uruguay Round Agreements Act (URAA) of 1994.

The **Office of Tariff Affairs and Trade Agreements (TATA)** implements the Commission's responsibilities with respect to the Harmonized Tariff Schedule of the United States and the International Harmonized System.

The **Office of Unfair Import Investigations (OUII)** participates in adjudicatory investigations, usually involving patent and trademark infringement, conducted under section 337 of the Tariff Act of 1930, both during the pre-institution phase and as a party with no commercial interest in the outcome.

The **Office of Analysis and Research Services (OARS)** provides research and investigative support. It comprises the library, editorial, knowledge resources, and statistical services.

### **Office of External Relations**

The **Office of External Relations (ER)** develops and maintains liaison between the Commission and our external customers and is the point of contact with USTR and other executive branch agencies, Congress, foreign governments, international organizations, the public, and the media. Our Trade Remedy Assistance Office (TRAO), located in ER, provides information about the benefits and remedies available under U.S. trade laws and assists small businesses seeking relief under those laws.

### **Office of the Chief Information Officer**

The **Office of the Chief Information Officer (OCIO)** provides information technology leadership, a comprehensive services and applications support portfolio, and a sound technology infrastructure to the Commission and its customers. The OCIO seeks to promote, deliver, and manage the secure and efficient application of technology to our business activities. OCIO comprises a front office and five divisions: Cybersecurity, Service Delivery, Systems Engineering, Network Support, and Data Management.

### **Office of the Chief Financial Officer**

The **Office of the Chief Financial Officer (OCFO)** compiles the Commission’s annual budget, prepares the appropriation and authorization requests, and closely monitors budget execution. The OCFO also provides support for acquisitions and is responsible for financial reporting. In addition, the OCFO manages the Commission’s internal control program in accordance with FMFIA guidance. Component offices include the Office of Budget, Office of Procurement, and the Office of Finance.

### **Office of Administrative Services**

The **Office of Administrative Services (OAS)** provides human resource services—including collective bargaining with union representatives—information and document management; management of work life issues; facilities management services, and is responsible for all Commission physical and personnel security matters. Component offices include Human Resources, Security and Support Services, and the Office of the Secretary.

### **Office of Inspector General**

The **Office of Inspector General (OIG)** provides audit, evaluation, inspection, and investigative support services covering all Commission programs and strategic operations. The mission of the OIG is to promote and preserve our effectiveness, efficiency, and integrity. The OIG activities are planned and conducted based on requirements of laws and regulations, requests from management officials, and allegations received from Commission personnel and other sources.

### **Office of Equal Employment Opportunity**

The **Office of Equal Employment Opportunity (OEEO)** administers the Commission’s affirmative action program. The Director advises the Chairman, the Commission, and USITC managers on all EEO issues; manages and coordinates all EEO activities in accordance with relevant EEO laws and EEO Commission regulations; evaluates the sufficiency of the Agency’s EEO programs and recommends improvements or corrections, including remedial and disciplinary action; encourages and promotes diversity outreach; and monitors recruitment activities to assure fairness in agency hiring practices.
