Information Requirements for Consumer Choice of Plans in Insurance Exchanges

Pacific Business Group on Health Version 1.0 - March 2, 2012

1. The following worksheets are organized by information categories that represent dimensions and topics to support consumer choice of health plan. The purpose of this document is to provide candidate data elements to support consumers in plan choice decisionmaking. Most of these data elements would be supplied by issuers; other data elements would be created by the Exchange or supplied by other parties. Each tab is set up to print on 1-2 legal pages.

2. The Consumer Choice of Health Plans: Decision Support Rules for Health Exchanges - a separate attachment - addresses how this information is organized and used in a consumer choice of plan software application.

3. This information set is based on meeting the consumer's information needs – it has not been fully vetted for consistency with industry standards, federal exchange reporting requirements or overall reporting burden. Most of the Covered Services elements are drawn from the Summary of Benefits and Coverage Final Rule¹, although we have added two additional categories for consideration. Several categories/data characteristics also were drawn from the Healthcare.gov content requirements².

4. This is a Version 1.0 - there will be a version update later in 2012. Outstanding federal guidance is expected to impact these information requirements. Please submit any feedback to aketchel@pbgh.org with the subject line "Data Elements Feedback".

User Vignettes to Illustrate Unique Information Requirements

The following anticipates some of the unique information needs of potential exchange customers, which are also reflected in the subsequent tabs.

Example 1: Family with varied program eligibility (Medicaid, Subsidized Exchange)

*Needs to know if family members can keep the same doctor despite being enrolled in different programs (searchable provider directory linked to plans)

*Needs to know total cost of each plan option, taking subsidies into account

Example 2: Couple, one member requires breast cancer treatment and needs continuity of physician

*Needs to filter total plan cost based on heavy use of the healthcare system

*Needs to look up personal doctor and see what plans are contracted with that physician

*Needs to understand details of what plan covers relevant to cancer treatment, hospitalization, specialist access

Example 3: Spanish-speaking individual has a chronic disease and must use a specific medication

*Needs to filter plan cost based on heavy use of the healthcare system

*Needs to compare plans based on cost of prescriptions - view formularly and tiered pricing structure

*Needs to review quality ratings to confirm plan supports good chronic disease management

*Needs to be aware of language access support services

C	ategory	Element	Description	Data Characteristic	Data Source	Frequency

Note: Generally, there is little evidence about consumer use of these ratings. Further analysis is needed to determine what subset of these categories should be displayed on exchange websites as opposed to used by the exchange for plan mangement purposes. These scores are all reported at the issuer line of business level.

			Note: HEDIS and CAHPS information will not be available for new products - this information may only be reportable in future	Given that there are several accreditation organizations, this is an NCQA	
Accreditation Scores			years.	example	
		This is the health insurer's accreditation score from NCQA. NCQA evaluates the insurer's			
	Overall report card	quality measures and ongoing improvement.	Categorical (Commendable, excellent, etc.)	NCQA	Annual
	Access & service	NCQA evaluates how well the insurer provides access to needed care and with good customer service. To evaluate these activities, NCQA reviews the insurer's appeals and denials, interviews the insurer's staff and grades the results from consumer surveys.	Star rating	NCQA	Annual
		NCQA evaluates the insurer's efforts to confirm that each doctor is licensed and trained to practice medicine and that the health plan's members are happy with their doctors. To evaluate these activities, NCQA uses records of doctors' credentials, interviews the			
	Qualified providers	insurer's staff, and grades the results from consumer surveys.	Star rating	NCQA	Annual
	Staying healthy	NCQA evaluates the insurer's activities that help people maintain good health and avoid illness. To evaluate these activities, NCQA reviews the insurer's records, grades independently verified clinical data and reviews materials sent to members.	Star rating	NCQA	Annual
	Staying reating			Negr	Annuar
	Getting better	NCQA evaluates health plan activities that help people recover from illness. To evaluate these activities, NCQA reviews the insurer's records and interviews the insurer's staff.	Star rating	NCQA	Annual
	Living with illness	NCQA evaluates health plan activities that help people manage chronic illness. NCQA grades independently verified clinical data and interviews the insurer's staff.	Star rating	NCQA	Annual
