

Bureau of Customs and Border Protection

General Notices

DISTRIBUTION OF CONTINUED DUMPING AND SUBSIDY OFFSET TO AFFECTED DOMESTIC PRODUCERS

AGENCY: Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of intent to distribute offset for Fiscal Year 2003.

SUMMARY: Pursuant to the Continued Dumping and Subsidy Offset Act of 2000, this document is Customs and Border Protection's (CBP) notice of intention to distribute assessed antidumping or countervailing duties (known as the continued dumping and subsidy offset) for Fiscal Year 2003 in connection with antidumping duty orders or findings or countervailing duty orders. This document sets forth the list of individual antidumping duty orders or findings and countervailing duty orders, together with the affected domestic producers associated with each order or finding who are potentially eligible to receive a distribution. This document also provides the instructions for affected domestic producers to file written certifications to claim a distribution in relation to the listed orders or findings.

DATES: Written certifications to obtain a continued dumping and subsidy offset under a particular order or finding must be received by September 12, 3003.

ADDRESSES: Written certifications should be addressed to: Assistant Commissioner, Office of Regulations and Rulings, U.S. Bureau of Customs and Border Protection, 1300 Pennsylvania Avenue, NW., Washington, D.C. 20229 (ATTENTION: Ada Loo).

FOR FURTHER INFORMATION CONTACT:

Ada Loo, Office of Regulations and Rulings, (202-572-8869) or LaToya Burley, Office of Regulations and Rulings, (202-572-8793).

SUPPLEMENTARY INFORMATION:

BACKGROUND

The Continued Dumping and Subsidy Offset Act of 2000 (ACDSOA) was enacted on October 28, 2000, as part of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (“Act”). The provisions of the CDSOA are contained in Title X (sections 1001—1003) of the Act.

The CDSOA, in section 1003 of the Act, amended Title VII of the Tariff Act of 1930, by adding a new section 754 (codified at 19 U.S.C. 1675c) in order to provide that assessed duties received pursuant to a countervailing duty order, an antidumping duty order, or an antidumping duty finding under the Antidumping Act of 1921, must be distributed to affected domestic producers for certain qualifying expenditures that these producers incur after the issuance of such an order or finding. The term “affected domestic producer” means any manufacturer, producer, farmer, rancher or worker representative (including associations of such persons) that—

(A) Was a petitioner or interested party in support of a petition with respect to which an antidumping order, a finding under the Antidumping Act of 1921, or a countervailing duty order has been entered, and

(B) Remains in operation.

The distribution that these parties may receive is known as the continued dumping and subsidy offset.

List of Orders or Findings and Affected Domestic Producers

It is the responsibility of the U.S. International Trade Commission (USITC) to ascertain and timely forward to the Bureau of Customs and Border Protection (CBP) a list of the affected domestic producers that are potentially eligible to receive an offset in connection with an order or finding.

To this end, it is noted that the USITC has supplied CBP with the list of individual antidumping and countervailing duty cases, and the affected domestic producers associated with each case that are potentially eligible to receive an offset. This list appears at the end of this document.

CBP Regulations Implementing the CDSOA

It is noted that CBP published a final rule in the **Federal Register** (66 FR 48546) on September 21, 2001, as T.D. 01-68, which was effective as of that date, in order to implement the CDSOA. The final rule added a new subpart F to part 159 of the CBP Regulations (19 CFR part 159, subpart F (§§ 159.61—159.64)).

Notice of Intent to Distribute Offset

This document announces that CBP intends to distribute to affected domestic producers the assessed antidumping or countervailing duties that are available for distribution in Fiscal Year 2003 in connection with those antidumping duty orders or findings or countervailing duty orders that are listed in this document. Section 159.62(a), Customs Regulations (19 CFR 159.62(a)), provides that CBP will publish such a notice of intention to distribute assessed duties at least 90 days before the end of a fiscal year.

Certifications; Submission and Content

To obtain a distribution of the offset under a given order or finding, an affected domestic producer must submit a certification to CBP, in triplicate, indicating that the producer desires to receive a distribution.

As required by § 159.62(b), Customs Regulations (19 CFR 159.62(b)), this notice provides the case name and number of the order or finding concerned, as well as the specific instructions for filing a certification under § 159.63 to claim a distribution. However, although § 159.62(b) also provides that the dollar amounts subject to distribution that were contained in the Special Account for each listed order or finding as of July 1, 2003, would appear in this notice, because these dollar amounts were not available in time for inclusion in this publication, these preliminary amounts will instead be posted shortly on the CBP website (www.cbp.gov), for purposes of enabling affected domestic producers to determine whether it would be worthwhile to file a certification in a given case. The final amounts available for disbursement may differ from the preliminary amounts.

A successor to a company appearing on the list of affected domestic producers in this notice, or a member company of an association that appears on the list of affected domestic producers in this notice, where the member company does not appear on the list, should also consult § 159.61(b)(1)(i) or 159.61(b)(1)(ii), Customs Regulations, respectively (19 CFR 159.61(b)(1)(i) or 159.61(b)(1)(ii)), concerning whether and, if so, the additional procedures under which such party may file a certification to claim an offset.

Specifically, to obtain a distribution of the offset under a given order or finding, each affected domestic producer must timely submit a certification, in triplicate, to the Assistant Commissioner, Office of Regulations and Rulings, Headquarters, containing the required information detailed below as to the eligibility of the producer to receive the requested distribution and the total amount of the distribution that the producer is claiming. The certification must enumerate the qualifying expenditures incurred by the domestic producer since

the issuance of an order or finding and it must demonstrate that the domestic producer is eligible to receive a distribution as an affected domestic producer.

As provided in § 159.63(b), Customs Regulations (19 CFR 159.63(b)), certifications to obtain a distribution of an offset must be received by CBP no later than 60 days after the date of publication of the notice of intent in the **Federal Register**.

While there is no established format for a certification, the certification must contain the following information:

1. The date of this **Federal Register** notice;
2. The Commerce case number;
3. The case name (Product/country);
4. The name of the domestic producer and any name qualifier, if applicable (for example, any other name under which the domestic producer does business or is also known);
5. The address of the domestic producer (if a post office box, the secondary street address must also appear), including, if applicable, a specific room number or department;
6. The Internal Revenue Service (IRS) number (with suffix) of the domestic producer, employer identification number, or social security number, as applicable;
7. The specific business organization of the domestic producer (corporation, partnership, sole proprietorship);
8. The name(s) of any individual(s) designated by the domestic producer as the contact person(s) concerning the certification, together with the phone number(s) and/or facsimile transmission number(s) and electronic mail (email) address(es) for the person(s);
9. The total dollar amount claimed;
10. The dollar amount claimed by category, as described in the section below entitled "Amount Claimed for Distribution";
11. A statement of eligibility, as described in the section below entitled "Eligibility to Receive Distribution"; and
12. A signature by a corporate officer legally authorized to bind the producer.

Qualifying Expenditures which may be Claimed for Distribution

Qualifying expenditures which may be offset by a distribution of assessed antidumping and countervailing duties encompass those expenditures that are incurred after the issuance of an antidumping duty order or finding or a countervailing duty order, and prior to its termination, provided that such expenditures fall within any of the following categories: (1) Manufacturing facilities; (2) Equipment; (3) Research and development; (4) Personnel training; (5) Acquisition of technology; (6) Health care benefits for employees paid for by the employer; (7) Pension benefits for employees paid for by the employer; (8) Environmental equipment, training, or technology; (9) Ac-

quisition of raw materials and other inputs; and (10) Working capital or other funds needed to maintain production.

Amount Claimed for Distribution

In calculating the amount of the distribution being claimed as an offset, the certification must enumerate the following: (1) The total amount of any qualifying expenditures currently and previously certified by the domestic producer, and the amount certified by category; (2) The total amount of those expenditures which have been the subject of any prior distribution under 19 U.S.C. 1675c; and (3) The net amount for new and remaining qualifying expenditures being claimed in the current certification (the total amount currently and previously certified as noted in item “(1)” above minus the total amount that was the subject of any prior distribution as noted in item “(2)” above) (§ 159.63(b)(2)(i)—(b)(2)(iii), Customs Regulations (19 CFR 159.63(b)(2)(i)—(b)(2)(iii))). Total amounts disbursed by CBP under the CDSOA for Fiscal Year 2001 and 2002 are available on the CBP website.

Additionally, these qualifying expenditures must be related to the production of the same product that is the subject of the order or finding, with the exception of expenses incurred by associations which must relate to a specific case (§ 159.61(c), Customs Regulations (19 CFR 159.61(c))).

Eligibility to Receive Distribution

As noted, the certification must contain a statement that the domestic producer desires to receive a distribution and is eligible to receive the distribution as an affected domestic producer. Also, the domestic producer must affirm that the net amount certified for distribution does not encompass any qualifying for expenditures which distribution has previously been made (§ 159.63(b)(3)(i), Customs Regulations (19 CFR 159.63(b)(3)(i))).

Furthermore, where a party is listed as an affected domestic producer on more than one order or finding covering the same product and files a separate certification for each order or finding using the same qualifying expenditures as the basis for distribution in each case, each certification must list all the other orders or findings where the producer is claiming the same qualifying expenditures (§ 159.63(b)(3)(ii), Customs Regulations (19 CFR 159.63(b)(3)(ii))).

Moreover, as required by 19 U.S.C. 1675c(b)(1) and § 159.63(b)(3)(iii), Customs Regulations (19 CFR 159.63(b)(3)(iii)), the statement must include information as to whether the domestic producer remains in operation and continues to produce the product covered by the particular order or finding under which the distribution is sought. If a domestic producer is no longer in operation, or no

longer produces the product covered by the order or finding, the producer would not be considered an affected domestic producer entitled to receive a distribution.

In addition, as required by 19 U.S.C. 1675c(b)(5) and § 159.63(b)(3)(iii), the domestic producer must state whether it has been acquired by a company or business that is related to a company that opposed the antidumping or countervailing duty investigation that resulted in the order or finding under which the distribution is sought. If a domestic producer has been so acquired, the producer would again not be considered an affected domestic producer entitled to receive a distribution.

The certification must be executed and dated by a party legally authorized to bind the domestic producer and it must state that the information contained in the certification is true and accurate to the best of the certifier's knowledge and belief under penalty of law, and that the domestic producer has records to support the qualifying expenditures being claimed (see section below entitled "Verification of Certification").

Review and Correction of Certification

A certification that is submitted in response to this notice of distribution may be reviewed before acceptance to ensure that all informational requirements are complied with and that any amounts set forth in the certification for qualifying expenditures, including the amount claimed for distribution, appear to be correct. A certification that is found to be materially incorrect or incomplete will be returned to the domestic producer, as provided in § 159.63(c), Customs Regulations (19 CFR 159.63(c)). It is the sole responsibility of the domestic producer to ensure that the certification is correct, complete and satisfactory so as to demonstrate the entitlement of the domestic producer to the distribution requested. Failure to ensure that the certification is correct, complete and satisfactory will result in the domestic producer not receiving a distribution.

Verification of Certification

Certifications are subject to CBP's verification. Because of this, parties are required to maintain records supporting their claims for a period of three years after the filing of the certification (see § 159.63(d), Customs Regulations (19 CFR 159.63(d))). The records must be those that are normally kept in the ordinary course of business; these records must support each qualifying expenditure enumerated in the certification; and they must support how the qualifying expenditures are determined to be related to the production of the product covered by the order or finding.

Disclosure of Information in Certifications; Acceptance by Producer

The name of the affected domestic producer, the total dollar amount claimed by that party on the certification, as well as the total dollar amount that CBP actually disburses to that company as an offset, will be available for disclosure to the public, as specified in § 159.63(e), Customs Regulations (19 CFR 159.63(e)). To this extent, the submission of the certification is construed as an understanding and acceptance on the part of the domestic producer that this information will be disclosed to the public. Alternatively, a statement in a certification that this information is proprietary and exempt from disclosure will result in CBP's rejection of the certification.

List of Orders or Findings and Related Domestic Producers

The list of individual antidumping duty orders or findings and countervailing duty orders is set forth below, together with the affected domestic producers associated with each order or finding that are potentially eligible to receive an offset.

NOTE:

On April 8, 2003, the U.S. Court of International Trade (CIT) issued a decision concerning a successor company claim for a distribution under the Continued Dumping and Subsidy Offset Act of 2000 (CDSOA), 19 U.S.C. § 1675c. *Candle Corporation of America and Blyth, Inc. v. United States*, No. 02-00751 Slip Op. 03-40 (Ct. Int'l Trade Apr. 8, 2003), *appeal docketed*, No. 03-1348 (Fed. Cir. April 28, 2003). The CIT found that the Candle Corporation of America (CCA) response to a 1986 ITC questionnaire "clearly indicates that CCA did not support the petition." Slip Op at 13. The CIT reasoned that, although 19 CFR 159.61(b)(1)(i) permits a "successor company" to file a certification to claim an offset on behalf of its predecessor, the "eligibility for certification under the regulation is subject to the limitations imposed by 19 U.S.C. § 1675c, which requires that a claimant (1) have [petitioned] or supported the petition, and (2) remain in operation." Consequently, the CIT held that it was not arbitrary, capricious, an abuse of discretion or otherwise contrary to law for Customs (which is now CBP) to deny CCA's claim.

An appeal to the Federal Circuit has been filed. A final decision may affect future distributions. Assuming an appeal remains pending, CBP may evaluate whether interim adjustments to future distributions would be prudent. CBP will notify the public of any such adjustments through a future Federal Register notice.

DATED: July 7, 2003

LARRY L. BURTON,
*Acting Assistant Commissioner,
Office of Regulations and Rulings.*

[Published in the Federal Register, July 14, 2003 (68 FR 41597)].

[CBP Decision 03-06]

CUSTOMS ACCREDITATION OF INTERTEK TESTING SERVICES/CALEB BRETT AS A COMMERCIAL LABORATORY

AGENCY: Customs and Border Protection, Department of Homeland Security

ACTION: Notice of Accreditation of Intertek Testing Services/Caleb Brett of Texas City, Texas, as a Commercial Laboratory.

SUMMARY: Intertek Testing Services/Caleb Brett of Texas City, Texas has applied to Customs and Border Protection under Part 151.12 of the Customs Regulations for an extension of accreditation as a commercial laboratory to analyze petroleum products under Chapter 27 and Chapter 29 of the Harmonized Tariff Schedule of the United States (HTSUS). Customs has determined that this company meets all of the requirements for accreditation as a commercial laboratory. Specifically, Intertek Testing Services/Caleb Brett has been granted accreditation to perform the following test methods at their Texas City, Texas site: (1) Distillation of Petroleum Products, ASTM D86; (2) Flash-Point by Pensky Martens Closed Cup Tester, ASTM D93; (3) API Gravity by Hydrometer, ASTM D287; (4) Kinematic Viscosity of Transparent and Opaque Liquids, ASTM D445; (5) Sediment in Crude Oils and Fuel Oils by Extraction, ASTM D473; (6) Water in Crude Oil by Distillation, ASTM D4006; (7) Water and Sediment in Crude Oil by the Centrifuge Method, ASTM D4007; (8) Percent by Weight of Sulfur by Energy-Dispersive X-Ray Fluorescence, ASTM D4294; (9) Water in Crude Oils by Coulometric Karl Fischer Titration, ASTM D4928; (10) Density and Relative Density of Crude Oils by Digital Density Analyzer, ASTM D 5002; (11) Vapor Pressure of Petroleum Products, ASTM D5191; and (12) Pour Point of Crude Oils, ASTM D 5853. Therefore, in accordance with Part 151.12 of the Customs Regulations, Intertek Testing Services/Caleb Brett of Texas City, Texas is hereby accredited to analyze the products named above.

LOCATION: Intertek Testing Services/Caleb Brett accredited site is located at: 101 20th Street South, Texas City, TX 77590.

EFFECTIVE DATE: July 1, 2003

CUSTOMS ACCREDITATION OF ALCHEM LABORATORY, INC.
AS A COMMERCIAL LABORATORY

AGENCY: Customs and Border Protection, Department of Homeland Security

ACTION: Notice of Accreditation of Alchem Laboratory, Inc. of Ponce, Puerto Rico, as a Commercial Laboratory.

SUMMARY: Alchem Laboratory, Inc. of Ponce, Puerto Rico has applied to Customs and Border Protection under Part 151.12 of the Customs Regulations for an extension of accreditation as a commercial laboratory to analyze petroleum products under Chapter 27 and Chapter 29 of the Harmonized Tariff Schedule of the United States (HTSUS). Customs has determined that this company meets all of the requirements for accreditation as a commercial laboratory. Specifically, Alchem Laboratory, Inc. has been granted accreditation to perform the following test methods at their Ponce, Puerto Rico site: (1) Distillation of Petroleum Products, ASTM D86; (2) Kinematic Viscosity of Transparent and Opaque Liquids, ASTM D445; (3) Density, Relative Density (Specific Gravity), or API Gravity of Crude Petroleum and Liquid Petroleum Products by Hydrometer Method, ASTM D1298; (4) Percent by Weight of Sulfur by Energy-Dispersive X-Ray Fluorescence, ASTM D4294. Therefore, in accordance with Part 151.12 of the Customs Regulations, Alchem Laboratory, Inc. of Ponce, Puerto Rico is hereby accredited to analyze the products named above.

LOCATION: Alchem Laboratory, Inc. accredited site is located at: Sabanetas Industrial Park, Building M-1380, Ponce, PR 00731.

EFFECTIVE DATE: July 1, 2003

FOR FURTHER INFORMATION CONTACT: Arlene Faustermann, Science Officer, Laboratories and Scientific Services, Customs and Border Protection, 1300 Pennsylvania Avenue, NW, Suite 1500 North, Washington, D.C. 20229, (202) 927-1060.

19 CFR PART 177

PROPOSED REVOCATION OF RULING LETTER AND TREATMENT RELATING TO THE TARIFF CLASSIFICATION OF MET-PLUS, A RUMEN PROTECTED METHIONINE ADDITIVE

AGENCY: Bureau of Customs and Border Protection, Department of Homeland Security

ACTION: Notice of proposed revocation of tariff classification ruling letter and treatment relating to the classification of Met-Plus, a rumen protected methionine additive.

SUMMARY: Pursuant to section 625(c), Tariff Act of 1930 (19 U.S.C. 1625 (c)), as amended by section 623 of Title VI (Customs Modernization) of the North American Free Trade Agreement Implementation Act (Pub. L. 103-182, 107 Stat. 2057), this notice advises interested parties that Customs intends to revoke a ruling concerning the tariff classification of Met-Plus, a rumen protected methionine additive under the Harmonized Tariff Schedule of the United States (HTSUS). Similarly, Customs intends to revoke any treatment previously accorded by Customs to substantially identical transactions. Comments are invited on the correctness of the proposed actions.

DATE: Comments must be received on or before August 25, 2003.

ADDRESS: Written comments are to be addressed to Bureau of Customs and Border Protection, Office of Regulation and Rulings, Attention: Regulations Branch, 1300 Pennsylvania Avenue, N.W., Washington, D.C. 20229. Comments submitted may be inspected at 799 9th St. N.W. during regular business hours. Arrangements to inspect submitted comments should be made in advance by calling Mr. Joseph Clark at (202) 572-8768.

FOR FURTHER INFORMATION CONTACT: Allyson Mattanah,
General Classification Branch, (202) 572-8784.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On December 8, 1993, Title VI (Customs Modernization), of the North American Free Trade Agreement Implementation Act (Pub. L. 103-182, 107 Stat. 2057) (hereinafter "Title VI"), became effective. Title VI amended many sections of the Tariff Act of 1930, as amended, and related laws. Two new concepts which emerge from the law are "**informed compliance**" and "**shared responsibility**." These concepts are premised on the idea that in order to maximize voluntary compliance with Customs laws and regulations, the trade community needs to be clearly and completely informed of its legal obligations. Accordingly, the law imposes a greater obligation on Customs to provide the public with improved information concerning the trade community's responsibilities and rights under the Customs and related laws. In addition, both the trade and Customs share responsibility in carrying out import requirements. For example, under section 484 of the Tariff Act of 1930, as amended (19 U.S.C. § 1484), the importer of record is responsible for using reasonable care to enter, classify and value imported merchandise, and provide any other information necessary to enable Customs to properly assess duties, collect accurate statistics and determine whether any other applicable legal requirement is met.

Pursuant to section 625(c)(1), Tariff Act of 1930 (19 U.S.C. 1625(c)(1)), as amended by section 623 of Title VI (Customs Modernization) of the North American Free Trade Agreement Implementation Act (Pub. L. 103-182, 107 Stat. 2057), this notice advises interested parties that Customs intends to revoke a ruling pertaining to the tariff classification of Met-Plus, a rumen protected methionine additive. Although in this notice Customs is specifically referring to New York Ruling Letter (NY) I83524, dated July 31, 2002, this notice covers any rulings on this merchandise which may exist but have not been specifically identified. Customs has undertaken reasonable efforts to search existing data bases for rulings in addition to the one identified. No further rulings have been found. This notice will cover any rulings on this merchandise that may exist but have not been specifically identified. Any party who has received an interpretive ruling or decision (i.e., ruling letter, internal advice memorandum or decision or protest review decision) on the merchandise subject to this notice should advise Customs during this notice period.

Similarly, pursuant to section 625(c)(2), Tariff Act of 1930 (19 U.S.C. 1625(c)(2)), as amended by section 623 of Title VI, Customs intends to revoke any treatment previously accorded by Customs to substantially identical transactions. This treatment may, among

other reasons, be the result of the importer's reliance on a ruling issued to a third party, Customs personnel applying a ruling of a third party to importations of the same or similar merchandise, or the importer's or Customs previous interpretation of the Harmonized Tariff Schedule of the United States (HTSUS). Any person involved in substantially identical transactions should advise Customs during this notice period. An importer's failure to advise Customs of substantially identical transactions or of a specific ruling not identified in this notice may raise issues of reasonable care on the part of the importer or his agents for importations of merchandise subsequent to this notice.

In NY I83524, the merchandise was classified in subheading 3824.90.28, HTSUS, which provides for "[p]repared binders for foundry molds or cores; chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included: [o]ther: [o]ther, [m]ixtures containing 5 percent or more by weight of one or more aromatic or modified aromatic substances: [o]ther." NY I83524 is set forth as Attachment A to this document.

It is now Customs position that this substance was not correctly classified in NY I83524 because it is more specifically provided for in subheading 2309.90.95, HTSUS, the provision for: "[p]reparations of a kind used in animal feeding: [o]ther: [o]ther: [o]ther: [o]ther: [o]ther."

Customs, pursuant to 19 U.S.C. 1625(c)(1), intends to revoke NY I83524 and any other ruling not specifically identified, to reflect the proper classification of the merchandise pursuant to the analysis set forth in proposed HQ 966069, which is set forth as Attachment B to this document. Additionally, pursuant to 19 U.S.C. 1625(c)(2), Customs intends to revoke any treatment previously accorded by Customs to substantially identical transactions. Before taking this action, consideration will be given to any written comments timely received.

Dated: July 2, 2003

GERARD J. O'BRIEN JR.,
(for Myles B. Harmon, Director,
Commercial Rulings Division).

MR. JOHN PETERSON, ESQ.
NEVILLE, PETERSON LLP
80 Broad Street, 34th Floor
New York, NY 10004

RE: The tariff classification of a methionine based mixture from Japan.

DEAR MR. PETERSON:

In your letter, dated July 2, 2002, you requested a tariff classification ruling on behalf of your client, BioZyme, Inc., St. Joseph, MO.

The merchandise, "Met-Plus," is a methionine based mixture in the form of a fine, granular material. The product is a mixture of DL-methionine (C₅H₁₁NO₂S), calcium salts of long-chain fatty acids, lauric acid, and the preservative BHT. The methionine accounts for 65 percent of the product's total content, by weight. "Met-Plus" will be used as supplementary cattle feed.

In your correspondence you note that the classification of this product was the subject of an earlier ruling request (i.e., NYRL H86670, dated March 18, 2002), filed on behalf of Nisso America, Inc. Your state that your client, BioZyme, Inc., who is now responsible for the importation of this product, disagrees with the classification in the New York ruling letter and wishes to have that ruling reconsidered. Since your client was not the party to whom the ruling was issued, we cannot accept your letter as a request for reconsideration. Further, your letter states that the issues posed by this request have not previously been decided by the Customs Service. We disagree.

Briefly, you state that this DL-Methionine is used only as an animal feed supplement, that it is within the ambit of the Explanatory Notes (EN) to heading 23.09 and that, therefore, the product is not classifiable in heading 38.24, as a preparation of the chemical or allied industries, nesoi.

First, we would point out that not all substances, which may be used in, or added to, animal feeding preparations, are classifiable in heading 23.09. In fact, the first paragraph of the EN defines the scope of the entire heading, the balance of the note being read in the context of these initial provision. parameters. Thus, the EN state that "This heading covers sweetened forage and prepared animal feeding stuffs consisting of a mixture of several nutrients designed: (1) to provide the animal with a rational and balanced daily diet (complete feed); (2) to achieve a suitable daily diet by supplementing the basic farm-produced feed with organic or inorganic substances (supplementary feed); or (3) for use in making complete or supplementary feeds". [Bold-face added for emphasis.] Thus, NYRL 807746, March 13, 1995, classified the compound DL-Methionine (CAS No. 59-51-8), which was used as an ingredient in pet food, as an organic compound in heading 29.30, HTSUS. In HQRL 089931, October 15, 1991, Customs classified certain rawhide dog chews, "coated with a beef flavoring, dried and packaged," although principally eaten by dogs, but consisting only one component (namely, of flavored proteinaceous hide strips), in heading 05.11, HTSUS, as Animal products not elsewhere specified or included; dead animals of chapter 1 or 3, unfit for human consumption. In contrast, Methionine, when imported in a mixture of several nutrient ingredients as a preparation for use in animal feeding, has been classified in heading 23.09, HTSUS. See, for example, HQRLs 957213, January 4, 1995, and 953755, September 3, 1993, and NYRL D82484, October 2, 1998. Accordingly, the fact that the instant product has a use as a feedstuff additive, described in items (1), (2) or (3) of the referenced EN, above, or in one of the subsections thereunder, is not determinative of its classification in heading 23.09. In a ruling dated June 21, 2001, Headquarters addressed a similar situation in classifying a product called BHA-75, a pre-

servative used in animal feed. The inquired contended that the product was described in the EN to heading 23.09, based on its use as a preservative additive. In ruling, HQs responded to that claim, as follows: "You argue that EN 23.09(II)(C)(2) allow preparations, such as antioxidants, designed to preserve the feeding stuffs, to be included in classification under heading 2309, HTSUS. A close reading of the entire EN proves this argument incorrect.

"EN 23.09(II)(C)(2) must be read in the context of both the entire EN and the whole of subpart (II)(C). The first paragraph of the EN clearly defines the scope of the heading as those preparation which consist of a mixture of several nutrients. (emphasis added). It is undisputed that BHA-75 has no nutritive value."

Based on the foregoing, we would conclude that a preparation of DL-Methionine, mixed with functional ingredients, such as calcium salts of long-chain fatty acids and lauric acid, and the preservative BHT, are not preparations of a kind used in animal feeding, as provided for in heading 23.09, HTSUS.

Accordingly, the applicable subheading for "Met-Plus" will be 3824.90.2800, Harmonized Tariff Schedule of the United States (HTS), which provides for prepared binders for foundry molds or cores; chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included; residual products of the chemical or allied industries, not elsewhere specified or included: mixtures containing 5 percent or more by weight of one or more aromatic or modified aromatic substances: other. The rate of duty will be 0.7 cents per kilogram plus 7.9 percent *ad valorem*.

This ruling is being issued under the provisions of Part 177 of the Customs Regulations (19 CFR 177).

A copy of the ruling or the control number indicated above should be provided with the entry documents filed at the time this merchandise is imported. If you have any questions regarding the ruling, contact National Import Specialist Thomas Brady at (646) 733-3030.

ROBERT B. SWIERUPSKI,

Director,

National Commodity Specialist Division.

MR. JOHN M. PETERSON
NEVILLE PETERSON LLP
80 Broad Street, 34th Floor
New York, N.Y. 10004

Re: New York Ruling Letter I83524; Met-Plus, a rumen protected methionine additive

Dear MR. PETERSON:

This is our decision regarding your letter, dated January 23, 2003, addressed to the Director, National Commodity Specialist Division, on behalf of your client, BioZyme Inc., requesting reconsideration of New York Ruling Letter (NY) I83524, dated July 31, 2002, regarding the tariff classification, pursuant to the Harmonized Tariff Schedule of the United States (HTSUS), of Met-Plus, a rumen protected methionine additive. Your letter was forwarded to this office for reply. We have reviewed this ruling and believe it is incorrect.

FACTS:

DL-Methionine, an amino acid essential for milk production in dairy cows, has the chemical formula $C_5H_{11}NO_2S$ and is assigned the CAS number 59-51-8I. Met-Plus is a coated methionine product which increases the amount of post-rationally available methionine in dairy cows. It is a white, fine grain mixture that consists of a minimum of 65% DL-Methionine, calcium salts of long-chain fatty acids, lauric acid and BHT as a preservative in the calcium salts.

In NY I83524, the merchandise was classified in subheading 3824.90.28, HTSUS, which provides for: “[p]repared binders for foundry molds or cores; chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included: [o]ther: [o]ther: [m]ixtures containing 5 percent or more by weight of one or more aromatic or modified aromatic substances: [o]ther.”

ISSUE:

Is Met-Plus an animal feed supplement under the HTSUS?

LAW AND ANALYSIS:

Merchandise imported into the United States is classified under the HTSUS. Tariff classification is governed by the principles set forth in the General Rules of Interpretation (GRIs) and, in the absence of special language or context which requires otherwise, by the Additional U.S. Rules of Interpretation. The GRIs and the Additional U.S. Rules of Interpretation are part of the HTSUS and are to be considered statutory provisions of law for all purposes.

GRI 1 requires that classification be determined first according to the terms of the headings of the tariff schedule and any relative section or chapter notes and, unless otherwise required, according to the remaining GRIs taken in order. GRI 6 requires that the classification of goods in the subheadings of headings shall be determined according to the terms of those subheadings, any related subheading notes and *mutatis mutandis*, to the GRIs.

In understanding the language of the HTSUS, the Explanatory Notes (ENs) of the Harmonized Commodity Description and Coding System may be utilized. The ENs, although not dispositive or legally binding, provide a commentary on the scope of each heading, and are generally indicative of the proper interpretation of the HTSUS. *See* T.D. 89-80, 54 Fed. Reg. 35127 (August 23, 1989).

The HTSUS headings under consideration are as follows:

2309	Preparations of a kind used in animal feeding:
2309.90	Other:
	Other:
	Other:
	Other:
2309.90.95	Other
*	* * * * *
3824	Prepared binders for foundry molds or cores; chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included:
3824.90	Other:
	Other:
	Mixtures containing 5 percent or more by weight of one or more aromatic or modified aromatic substances:
3824.90.28	Other

The ENs to heading 23.09, HTSUS, state, in pertinent part, as follows:

This heading covers sweetened forage and prepared animal feeding stuffs consisting of a mixture of several nutrients designed :

- (1) to provide the animal with a rational and balanced daily diet (**complete feed**);
- (2) to achieve a suitable daily diet by supplementing the basic farm-produced feed with organic or inorganic substances (**supplementary feed**); or
- (3) for use in making complete or supplementary feeds.

HQ 964600, dated June 21, 2001, relied on the EN above, requiring a prepared animal feeding product to consist of "a mixture of nutrients" for inclusion in heading 2309, HTSUS. Following the reasoning in HQ 964600, NY I83524 failed to classify the instant product as a preparation for use in animal feeding because it contained but one active ingredient, which, if imported without coating, is classified in Chapter 29. The other ingredients simply coat the active ingredient for better digestion in bovines. NY I83524 concluded that this type of coated single ingredient added to a premix was not the type of "preparation" the heading and ENs contemplated for inclusion because the ENs specifically describe preparations as those containing "a mixture of several nutrients."

We find that NY I83524 ignores the fact that the methionine, calcium long chain fatty acids and lauric acid in the instant merchandise each constitute a nutritive ingredient. Our research indicates that calcium salts of long chain fatty acids are a rumen inert fat supplement that helps provide the required energy for increased milk production, better body condition and reproductive efficiency. Lauric acid is a medium chain fatty acid that converts to monolaurin in the body, an antiviral, antibacterial and antiprotozoal monoglyceride that destroys lipid-coated cells such as herpes, cytomegalovirus, influenza, listeria monocytogenes and giardia lanblia. Monolaurin also effects insulin secretion and can induce a proliferation of T-cells. As such, methionine, calcium salts of long chain fatty acids and lauric acid are all nutrients. Hence, Met-Plus is a mixture of several nutrients. Therefore, it is classified in subheading 2309.90.95, HTSUS, the provision for "[p]reparations of a kind used in animal feeding: [o]ther: [o]ther: [o]ther: [o]ther: [o]ther."

HOLDING:

At GRI 1, Met-Plus is classified in subheading 2309.90.95, HTSUS, the provision for "[p]reparations of a kind used in animal feeding: [o]ther: [o]ther: [o]ther: [o]ther: [o]ther."

EFFECT ON OTHER RULINGS:

NY I83524 is REVOKED.

MYLES B. HARMON,
Director,
Commercial Rulings Division.

19 CFR PART 177

PROPOSED REVOCATION AND MODIFICATION OF RULING LETTERS AND REVOCATION OF TREATMENT RELATING TO THE TARIFF CLASSIFICATION OF DIGITAL CAMERAS

AGENCY: U.S. Customs and Border Protection, Department of
Homeland Security.

ACTION: Notice of proposed revocation and modification of ruling
letters and revocation of treatment relating to the tariff classifica-
tion of digital cameras.

SUMMARY: Pursuant to section 625(c), Tariff Act of 1930, as amended, (19 U.S.C. 1625(c)), as amended by section 623 of Title VI (Customs Modernization) of the North American Free Trade Agreement Implementation Act (Pub. L. 103–182, 107 Stat. 2057), this notice advises interested parties that Customs is proposing to revoke two rulings and proposing to modify one ruling pertaining to the tariff classification of digital cameras under the Harmonized Tariff Schedule of the United States (“HTSUS”). Similarly, Customs is proposing to revoke any treatment previously accorded by Customs to substantially identical transactions. Customs invites comments on the correctness of the proposed action.

DATE: Comments must be received on or before August 25, 2003.

ADDRESS: Written comments are to be addressed to the U.S. Bureau of Customs and Border Protection, Office of Regulations & Rulings, Attention: Regulations Branch, 1300 Pennsylvania Avenue N.W., Washington, D.C. 20229. Submitted comments may be inspected at the offices of U.S. Customs and Border Protection, 799 9th Street, NW, Washington, D.C. during regular business hours. Arrangements to inspect submitted comments should be made in advance by calling Mr. Joseph Clark at (202) 572–8768.

FOR FURTHER INFORMATION CONTACT: Deborah Stern, General Classification Branch (202) 572–8785.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On December 8, 1993, Title VI, (Customs Modernization), of the North American Free Trade Agreement Implementation Act (Pub. L. 103–182, 107 Stat. 2057), (hereinafter “Title VI”), became effective. Title VI amended many sections of the Tariff Act of 1930, as amended, and related laws. Two new concepts which emerge from the law are **informed compliance** and **shared responsibility**. These concepts are premised on the idea that in order to maximize voluntary compliance with Customs laws and regulations, the trade community needs to be clearly and completely informed of its legal obligations. Accordingly, the law imposes a greater obligation on Customs to provide the public with improved information concerning the trade community’s responsibilities and rights under the Customs and related laws. In addition, both the trade and Customs share responsibility in carrying out import requirements. For example, under section 484 of the Tariff Act of 1930, as amended (19 U.S.C. 1484), the importer of record is responsible for using reasonable care to enter, classify and value imported merchandise, and provide any other information necessary to enable Customs to properly assess

duties, collect accurate statistics and determine whether any other applicable legal requirement is met.

Pursuant to section 625(c)(1), Tariff Act of 1930, as amended (19 U.S.C. 1625(c)(1)), this notice advises interested parties that Customs intends to revoke two ruling letters and modify one ruling letter pertaining to the tariff classification of digital cameras. Although in this notice Customs is specifically referring to three rulings (NY I84955, NY I84563 and NY I86730) this notice covers any rulings on this merchandise which may exist but have not been specifically identified. Customs has undertaken reasonable efforts to search existing databases for rulings in addition to the three identified. No additional rulings have been found. Any party who has received an interpretive ruling or decision (i.e., ruling letter, internal advice memorandum or decision or protest review decision) on the merchandise subject to this notice should advise Customs during this notice period.

Similarly, pursuant to section 625(c)(2), Tariff Act of 1930, as amended (19 U.S.C. 1625(c)(2)), Customs intends to revoke any treatment previously accorded by Customs to substantially identical transactions. This treatment may, among other reasons, be the result of the importer's reliance on a ruling issued to a third party, Customs personnel applying a ruling of a third party to importations of the same or similar merchandise, or to the importer's or Customs' previous interpretation of the Harmonized Tariff Schedule of the United States. Any person involved in substantially identical transactions should advise Customs during this notice period. An importer's failure to advise Customs of substantially identical transactions or of a specific ruling not identified in this notice may raise issues of reasonable care on the part of the importer or its agents for importations of merchandise subsequent to the effective date of the final notice of the proposed action.

In NY I84955, dated August 22, 2002 (Attachment A), NY I84563, dated July 22, 2002 (Attachment B), and NY I86730, dated October 22, 2002 (Attachment C), Customs classified three multifunctional digital cameras in subheading 8525.40.80, HTSUS, which provides, in pertinent part, for "still image video cameras and other video camera recorders; digital cameras: other." These three types of digital cameras performed functions that were provided for in more than one subheading under heading 8525, HTSUS. Thus, Section XVI, Note 3, HTSUS, was applied through General Rule of Interpretation (GRI) 6, directing classification by that subheading which provided for the cameras' principal function.

Where no principal function can be determined, the Harmonized Commodity Description and Coding System Explanatory Notes (ENs) regarding Section XVI, Note 3, provide for GRI 3(c) to be applied. According to GRI 3(c), the provision occurring last in numerical order of those that merit equal consideration provides the classi-

fication. In NY I84955, NY I86730 and NY I84563, Customs resorted to GRI 3(c) at the eight-digit subheading level, considering subheading 8525.40.80, HTSUS, which occurs last in numerical order.

It is now Customs position that GRI 3(c), applied through Section XVI, Note 3, HTSUS, and GRI 6, should not have been applied at the eight-digit level but at the six-digit level, thereby classifying the good under subheading 8525.40, HTSUS. Further, at the eight-digit level subheading 8525.40.80, HTSUS, should not have been considered. The 2002 amendment to the legal text of heading 8525, HTSUS, and subheading 8525.40, HTSUS, adding the term “digital cameras” did not change the scope of the heading or subheading. The amendment simply clarified the scope. Given that there was no change in scope at the six-digit level, the scope of subheading 8525.40.40, HTSUS, where digital cameras were previously classified, also did not change. Therefore, these cameras are still classified in subheading 8525.40.40, HTSUS. Classification in subheading 8525.40.80, HTSUS, was incorrect.

The Information Technology Agreement (ITA), which became effective July 1, 1997 by Presidential Proclamation No. 7011 (62 FR 35909, June 30, 1997) offers further guidance on the scope of subheading 8525.40.40, HTSUS. As a result of the ITA, digital cameras of the type at issue have been classified as “digital still image video cameras” of subheading 8525.40.40, HTSUS, because it the language adopted under the ITA to provide for such digital cameras. Accordingly, the instant digital cameras are classified in subheading 8525.40.40, HTSUS, which provides, in pertinent part, for “still image video cameras and other video camera recorders; digital cameras: digital still image video cameras.”

Pursuant to 19 U.S.C. 1625(c)(1), Customs intends to revoke NY I84955 and NY I84563, to modify NY I86730, and to revoke any other ruling not specifically identified to reflect the proper classification of the subject merchandise or substantially similar merchandise, pursuant to the analyses set forth in HQ 966072 (Attachment D), HQ 966531 (Attachment E) and HQ 966530 (Attachment F), respectively. Additionally, pursuant to 19 U.S.C. 1625(c)(2), Customs intends to revoke any treatment previously accorded by Customs to substantially identical merchandise. Before taking this action, we will give consideration to any written comments timely received.

Dated: July 2, 2003

GERARD J. O'BRIEN, JR.,

RE: The tariff classification of a digital camera from Taiwan and China.

DEAR Ms. KASSENBAUM:

In your letter dated August 7, 2002 you requested a tariff classification ruling.

The sample you have submitted is a Chameleon Mega 1.3 megapixel digital camera. This is a digital still camera with 16 MB of internal storage capability. The camera stores up to 120 photos on high resolution and up to 228 photos on good resolution. The camera operates independent of a computer. You state that the camera is also capable of recording 35–90 second video clips and can be used for teleconferencing at a video refresh rate of 10 frames per second. It is packaged for retail sale as a set together a USB cable, CD-ROM software, 2 AAA batteries, a camera case, a tripod, TV cable, quick start guide, users manual, and dell picture Studio information card. It should be noted that this office considers this camera to be a composite good. This is based upon its ability to function as both a television type camera, capturing live images in real time, and as a digital still image camera with storage capability.

Explanatory Note X to GRI 3b provides for the purpose of this rule, the term “goods put up in sets for retail sale” shall be taken to mean goods which:

- A. Consist of at least two different articles which are, prima facie, classifiable in different headings.
- B. Consist of products put up together to meet a specific activity; and
- C. Are put up in a manner suitable for sale to users without repackaging (e.g. in boxes or cases or on boards).

All of the aforementioned articles are prima facie classifiable in different headings. Together each enables the user to fully operate the digital camera. Based upon the attached packaging it is evident that the configured goods will not be repackaged upon importation. Therefore it is the opinion of this office that the digital camera and accompanying articles do in fact constitute a set in accordance with Explanatory Note X.

In accordance, in part, with GRI 3b ... goods put up in sets for retail sale, which cannot be classified by reference to GRI 3a, shall be classified as if they consisted of the material or component which gives them their essential character.

EN VIII to GRI 3b states that the factor, which determines essential character, will vary as between different kinds of goods. It may for example, be determined by the nature of the material or component, its bulk, quantity, weight or value, or by the role of the constituent material in relation to the goods.

It is the opinion of this office that the item which imparts the essential character to this particular set is that of the digital camera. It is clearly the reason why one would buy the set and it clearly dominates the set in terms of value and function.

It should be noted that this office considers this camera to be a composite good. This is based upon its ability to function as both a television type camera, capturing live images in real time, and as a digital still image camera with storage capability.

Note 3 to section XVI of the Harmonized Tariff Schedule of the United States (HTS) provides, in pertinent part, that unless the context requires otherwise, machines adapted for the purpose of performing two or more complimentary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function. It is the opinion of this office that based

upon the dual functionality of this digital camera neither demonstrates a principal function. Therefore classification of the Chameleon Mega 1.3 megapixel digital camera will be in accordance with GRI 3c, Harmonized Tariff Schedule of the United States, which requires, in part that the item be classified in the heading which occurs last in numerical order among those which merit equal consideration.

The applicable subheading for the Chameleon Mega 1.3 megapixel digital camera set will be 8525.40.8085, Harmonized Tariff Schedule of the United States (HTS), which provides for Transmission apparatus for radiotelephony, radiotelegraphy, radiobroadcasting or television, whether or not incorporating reception apparatus or sound recording or reproducing apparatus; television cameras; still image video cameras or other video camera recorders: Still image video cameras and other video camera recorders; Other * * * Other. The rate of duty will be 2.1 percent *ad valorem*.

Legal Note 6 of Chapter 85 will not be applied to the CD-ROM software program. The CD-ROM software program (recorded media) will be classified in accordance with Section XVI, Chapter 85, General Note B1 because the recorded media is presented with apparatus for which it is not-intended.

This ruling is being issued under the provisions of Part 177 of the Customs Regulations (19C.F.R. 177).

A copy of the ruling or the control number indicated above should be provided with the entry documents filed at the time this merchandise is imported. If you have any questions regarding the ruling, contact National Import Specialist Michael Contino at 646-733-3014.

Chicago, Illinois 60634

RE: The tariff classification of a digital camera from China.

DEAR Ms. SUCHOR:

In your letter dated July 22, 2002 you requested a tariff classification ruling.

The item in question is a digital camera. It is denoted as the Polaroid PDC 301 Web camera. This particular digital camera is packaged for retail sale, in a blister pack, with CD-ROM software, a user guide, a warranty card and a plastic clip used to attach the camera to a portable PC notebook.

Explanatory Note X to GRI 3b provides for the purpose of this rule, the term "goods put up in sets for retail sale" shall be taken to mean goods which:

- A. Consist of at least two different articles which are, prima facie, classifiable in different headings.
- B. Consist of products put up together to meet a specific activity; and
- C. Are put up in a manner suitable for sale to users without repackaging (e.g. in boxes or cases or on boards).

All of the aforementioned articles are prima facie classifiable in different headings. Together each enables the user to fully operate the digital camera. Based upon the at-

tached packaging it is evident that the configured goods will not be repackaged upon importation. Therefore it is the opinion of this office that the digital camera and accompanying articles do in fact constitute a set in accordance with Explanatory Note X.

In accordance, in part, with GRI 3b *** goods put up in sets for retail sale, which cannot be classified by reference to GRI 3a, shall be classified as if they consisted of the material or component which gives them their essential character.

EN VIII to GRI 3b states that the factor, which determines essential character, will vary as between different kinds of goods. It may for example, be determined by the nature of the material or component, its bulk, quantity, weight or value, or by the role of the constituent material in relation to the goods.

It is the opinion of this office that the item which imparts the essential character to this particular set is that of the digital camera. It is clearly the reason why one would buy the set and it clearly dominates the set in terms of value and function.

The Polaroid PDC 301 Digital Camera performs two distinct functions. It can function as a digital still image camera allowing the user to store still images, download and send them via the Internet. It can also serve as a web cam whereby it allows the user to conduct live action video conferencing with a receiving party.

Note 3 to section XVI of the Harmonized Tariff Schedule of the United States (HTS) provides, in pertinent part, that unless the context requires otherwise, machines adapted for the purpose of performing two or more complimentary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function. It is the opinion of this office that based upon the dual functionality of this digital camera neither demonstrates a principal function. Therefore classification of the Polaroid PDC 301 Digital Camera will be in accordance with GRI 3c, Harmonized Tariff Schedule of the United States, which requires, in part that the item be classified in the heading which occurs last in numerical order among those which merit equal consideration.

Legal Note 6 of Chapter 85 will not be applied to the CD-ROM software program. The CD-ROM software program (recorded media) will be classified in accordance with Section XVI, Chapter 85, General Note B1 because the recorded media is presented with apparatus for which it is not-intended.

The applicable subheading for the Polaroid Digital Camera, model PDC 301 will be 8525.40.8085, Harmonized Tariff Schedule of the United States (HTS), which provides for *** Still image video cameras and other video camera recorders; digital cameras: Other *** Other. The rate of duty will be 2.1 percent *ad valorem*.

This ruling is being issued under the provisions of Part 177 of the Customs Regulations (19 C.F.R. 177).

A copy of the ruling or the control number indicated above should be provided with the entry documents filed at the time this merchandise is imported. If you have any questions regarding the ruling, contact National Import Specialist Michael Contino at 646-733-3014.

ROBERT B. SWIERUPSKI,
Director,

Ms. VALERIE M. SUCHOR
SPECTRA MERCHANDISING INTERNATIONAL, INC.
4230 North Normandy Avenue
Chicago, Illinois 60634

RE: The tariff classification of digital cameras from China.

DEAR Ms. SUCHOR:

In your letter dated September 25, 2002 you requested a tariff classification ruling. The items in question are three types of digital cameras that are packaged for sale at the retail level. They are denoted as the Cool iCam CIC-50A model, the Cool iCam CIC-80A model and the Cool iCam CIC-175A model. Samples of each model, their package contents and descriptive literature of the proposed retail packaging have been furnished to this office. It is indicated that the various models are to be imported for retail sale in their immediate packaging. This office will base this ruling on those specific facts as indicated in the inquiry.

The CIC-50A model is packaged with a USB cable, a camera stand, batteries and a CD-ROM software package. The CIC-80A model is packaged with a USB cable, a camera stand, a non-textile wrist strap, batteries and a CD-ROM software package. The CIC-175A model is packaged with a USB cable, a non-textile pouch, non-textile neck and wrist straps, batteries and a CD-ROM software package.

Explanatory Note X to GRI 3b provides for the purpose of this rule, the term "goods put up in sets for retail sale" shall be taken to mean goods which:

Consist of at least two different articles, which are, prima facie, classifiable in different headings.

B. Consist of products put up together to meet a specific activity; and

C. Are put up in a manner suitable for sale to users without repackaging (e.g. in boxes or cases or on boards).

In the case of all three specific models of digital cameras, their respective configurations are made up of articles, which are prima facie classified, in different headings. Together each model configuration is designed to enable the user to take digital pictures, store them and transmit them via the Internet. Based upon the information provided there is no evidence that these particular model configurations will be repackaged after importation into the commerce of the United States. It is therefore the opinion of this office that each particular model configuration of the iCam digital cameras constitutes a set in accordance with Explanatory Note X.

In accordance, in part, with GRI 3b * * * goods put up in sets for retail sale, which cannot be classified by reference to GRI 3a, shall be classified as if they consisted of the material or component which gives them their essential character.

EN VIII to GRI 3b states that the factor, which determines essential character, will vary as between different kinds of goods. It may for example, be determined by the nature of the material or component, its bulk, quantity, weight or value, or by the role of a constituent material in relation to the goods.

It is the opinion of this office that the item which imparts the essential character to iCam digital camera set is the digital camera. It is clearly the most valuable of the items and is the dominant constituent item by use. It is clearly the reason why one would purchase the individual set.

Note 3 to Section XVI of the Harmonized Tariff Schedule of the United States (HTS) provides, in pertinent part, that unless the context requires otherwise, machines adapted for the purpose of performing two or more complimentary or alternative functions are to be classified as if consisting only of that component or as being that ma-

chine which performs the principal function.

It should be noted that this office considers each particular model of digital camera to be a composite good.

The iCam CIC-50A and iCam CIC-80A each combine Web-Cam capability, that of capturing live images in real time, with that of digital still image production with storage. The iCam CIC-175A combines Web-Cam, digital still image with storage and video clip capability all in one unit. Based upon the multi-functional capability of each particular model this office is of the opinion that no single function for each camera imparts a principal function. Therefore classification of each will be in accordance with GRI 3c, Harmonized Tariff Schedule of the United States which requires, in part, that the item be classified in the heading which occurs last in numerical order among those which merit equal consideration.

The applicable subheading for the iCam CIC-50A and iCam CIC-80A model sets will be 8525.40.4000, Harmonized Tariff Schedule of the United States (HTS), which provides for Transmission apparatus for radiotelephony, radiotelegraphy, radiobroadcasting or television, whether or not incorporating reception apparatus or sound recording or reproducing apparatus; television cameras; still image video cameras or other video camera recorders; digital cameras: Still image video cameras and other video camera recorders; digital cameras: Digital still image cameras. The rate of duty will be free.

The applicable subheading for the iCam CIC-175A model set will be 8525.40.8085, Harmonized Tariff Schedule of the United States (HTS), which provides for Transmission apparatus for radiotelephony, radiotelegraphy, radiobroadcasting or television, whether or not incorporating reception apparatus or sound recording or reproducing apparatus; television cameras; still image video cameras or other video camera recorders; digital cameras: Other * * * Other. The rate of duty will be 2.1 percent *ad valorem*.

Legal Note 6 to chapter 85 requires, in part, that records, tapes and other media of heading 8523 or 8524 remain classified in those headings when entered with the apparatus for which they are intended. For the purpose of this note, the term "apparatus for which they are intended" refers to apparatus which reads or plays the media or which records or writes on the media. The functioning of each iCam camera demonstrates that they do not qualify as "intended" apparatus for the purpose of the CD-ROM software package. Therefore each camera would be considered a "non-intended" apparatus. Therefore legal Note 6 does not apply to the CD-ROM software contained in each set and they do not have to be classified in the specific heading. The CD-ROM software package will be classified in accordance with Section XVI Chapter 85 General Note B (1), Harmonized Tariff Schedule of the United States.

This ruling is being issued under the provisions of Part 177 of the Customs Regulations (19 C.F.R. 177).

A copy of the ruling or the control number indicated above should be provided with the entry documents filed at the time this merchandise is imported. If you have any questions regarding the ruling, contact National Import Specialist Michael Contino at 646-733-3014.

ROBERT B. SWIERUPSKI,
Director,
National Commodity Specialist Division.

Ms. DEBBIE KASSEBAUM
LARGAN INC.
2432 West Peoria Avenue, Building 9
Phoenix, AZ 85029

RE: Revocation of NY I84955; Digital cameras

DEAR Ms. KASSEBAUM:

This is in reply to your request of November 21, 2002, for reconsideration of New York Ruling Letter (NY) I84955, issued to Largan Inc., on August 22, 2002, concerning the classification of a multi-functional digital camera and accompanying goods under the Harmonized Tariff Schedule of the United States (HTSUS). In NY I84955, Customs classified the "Largan Chameleon Mega Camera" in subheading 8525.40.80, HTSUS, which provides for other still image video cameras, video camera recorders and digital cameras. We have reviewed NY I84955 and have determined the ruling to be incorrect for the reasons set forth below. A sample was submitted. We regret the delay in responding.

In your request for reconsideration, you cited several rulings which appear to be inconsistent. We have reviewed those rulings and have determined that NY I84563, dated August 2, 2002, is incorrect, and NY I86730, dated October 22, 2002, is, in part, incorrect. The reconsideration of these rulings will be addressed in HQ 966531 and HQ 966530, respectively.

FACTS:

You describe the subject digital camera as the "Largan Chameleon Mega 1.3 Megapixel Digital Camera." In NY I84955, the digital camera was described as a composite good with multiple functions. Largan Inc.'s website, descriptive materials, and packaging state that the camera is a "4-in-1 camera," with digital still image, video, TV, and PC camera functions.

The basic components in the camera, all of which are incorporated into a rectangular housing (approximately 3.48 inches x 2.26 inches x 0.81 inches), are as follows: a CCD (charged-coupled device) image sensor, 16 MB internal flash memory, a fixed-focus lens, a data-conversion device for converting analog data from the CCD into digital data format for transmission by the Universal Serial Bus (USB) cable, USB and TV connector, optical viewfinder, LCD (liquid crystal display) function menu, synchronized flash, tripod mount, and battery compartment.

This digital camera captures live images in real time (i.e., for videoconferencing) with audio capacity and records digital still images and images in sequential order at 15 frames per second (fps) from 35-90 seconds (i.e., video clips) without audio. It operates independently of a computer, recording approximately 120 photos on 1280 x 1024 (high) resolution, or 228 photos on 640 x 480 VGA mode (low) resolution which can be stored in the camera's internal flash memory. When connected to a television, it can capture television-generated still images and sequential images.

The camera's LCD displays only the function menu. The LCD menu provides the following functions: a) delete stored photos individually, or all at once; b) high/low resolution control; c) photo counter; d) photos remaining; e) flash status; f) video recording; g) battery power; h) NTSC/PAL-TV system; i) sound/silent control; j) self-timer; and k) continuous snap shot/single snap shot control. The LCD does not provide a view of recorded images or act as a viewfinder. To view recorded images and clips, the digital camera must be connected to an automatic data processing (ADP) machine, such as a personal computer, or to a television.

This digital camera is packaged, imported and advertised for sale together with: 1) 2 AAA 1.5 volt batteries; 2) camera strap; 3) USB cable with connectors; 4) TV cable

with connectors; 5) instruction manual; 6) user's guide; 7) tripod; 8) leatherette camera case; and 9) CD-ROM installation software.

You claim that the digital camera is classifiable in subheading 8525.30.90, HTSUS, which provides for television cameras, or in the alternative, in subheading 8525.40.40, HTSUS, which provides for digital still image video cameras.

ISSUES:

- 1) Whether digital cameras are within the scope of the term "digital still image video cameras" of subheading 8525.40.40, HTSUS.
- 2) Whether the camera and accompanying merchandise are classifiable as "a set put up for retail sale" under the HTSUS.

LAW AND ANALYSIS:

Classification under the HTSUS is made in accordance with the General Rules of Interpretation ("GRIs"). GRI 1 provides that the classification of goods shall be determined according to the terms of the headings of the tariff schedule and any relative Section or Chapter Notes. In the event that the goods cannot be classified solely on the basis of GRI 1, and if the headings and legal notes do not otherwise require, the remaining GRIs may then be applied.

In understanding the language of the HTSUS, the Harmonized Commodity Description and Coding System Explanatory Notes may be utilized. The Explanatory Notes (ENs), although not dispositive or legally binding, provide a commentary on the scope of each heading of the HTSUS, and are generally indicative of the proper interpretation of these headings. Customs believes the ENs should always be consulted. *See* T.D. 89-80, 54 Fed. Reg. 35127, 35128 (Aug. 23, 1989).

The HTSUS provisions under consideration are as follows:

8525	Transmission apparatus for radiotelephony, radiotelegraphy, radiobroadcasting or television, whether or not incorporating reception apparatus or sound recording or reproducing apparatus; television cameras; still image video cameras and other video camera recorders; digital cameras:
8525.30	Television cameras:
8525.30.90	Other
*	* * * * *
8525.40	Still image video cameras and other video camera recorders; digital cameras:
8525.40.40	Digital still image video cameras
*	* * * * *
8525.40.80	Other

NY I84955, Customs stated that this digital camera is a composite good. A composite good is a good which is *prima facie* classifiable, in part only, in more than one heading. This digital camera is not a composite good, but rather a machine whose functions all fall within the scope of heading 8525, HTSUS. Thus, classification at the heading level is not in dispute. To determine in which subheading this digital camera is classified, we must employ GRI 6, which permits the comparison of same-level subheadings within a heading, in part by application of Rules 1 through 5, applied by the appropriate substitution of terms. Only subheadings at the same level are comparable, so we must first address the 6-digit level.

Subheading 8525.30, HTSUS, in pertinent part, provides for "television cameras." Subheading 8525.40, HTSUS, in pertinent part, provides for "still image video cameras and other video camera recorders; digital cameras." You claim that the digital camera is classifiable at GRI 3(a), applied at the 6-digit level by GRI 6, which requires the good be classified according to the most specific description. However, we do not reach GRI 3. According to GRI 1, applied through GRI 6, we must first look to the relevant section and chapter notes.

Section XVI, Note 3, provides:

“Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and other machines designed for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.” (2003) [Emphasis added.]

EN 85.25, section (C), describes television cameras as including, for example, “television cameras for television studios or for reporting, those used for industrial or scientific purposes or for supervising traffic.” Customs has classified PC cameras, which are those designed to be connected to ADP machines, used for videoconferencing, and for the capture of still images and moving images that do not contain internal or removable storage media as television cameras of subheading 8525.30.90, HTSUS. See e.g., HQ 964973, dated July 17, 2002. PC cameras are designed to transmit video images to an ADP machine for processing or for direct transmission over the Internet, transmitting live image as television cameras do. Therefore, whether this camera transmits real time images directly to a television set, video monitor for surveillance, or to a computer or other device, it performs the function of a category of cameras that fall within the term “television cameras” of subheading 8525.30, HTSUS. See HQ 964973; see also HQ 966172, dated June 4, 2003; HQ 965097, dated July 19, 2002; HQ 958632, dated January 25, 1996; NY A84032, dated May 31, 1996; NY B81818, dated February 13, 1997; NY A81240, dated March 18, 1996; NY F88315, dated June 29, 2000.

The PC videoconferencing function transmits live video images captured by the camera’s CCD to an automatic data processing machine (ADP) monitor via a USB cable attached to the USB connector on the camera’s left side. This live videoconferencing function is supported by the threaded mount in the digital camera’s base and fitted to a tripod for placement on top of an ADP machine’s monitor. Therefore, the camera’s functions are provided for in part by subheading 8525.30, HTSUS.

In the Information Technology Agreement (ITA), which went into effect on July 1, 1997 by Presidential Proclamation No. 7011 (62 FR 35909, June 30, 1997), the U.S. notified the other signatories that it would classify “digital still image video cameras” in subheading 8525.40.40, HTSUS. The intent of the provision was to provide duty-free treatment to a class of digital cameras which have both prior to and since the ITA been provided for in subheading 8525.40, HTSUS. See, e.g., NY 817941, dated January 14, 1996; HQ 960384, dated April 1, 1999 (classifying Casio QV-10 digital cameras entered in 1995); HQ 960664, dated April 20, 1999 (classifying Olympus Digital Still Camera model # D-200L entered in 1995); NY F86533, dated May 17, 2000; and NY G86928, dated February 9, 2001.

The term “digital cameras” was added to the text of heading 8525, HTSUS, and subheading 8525.40, HTSUS, as a result of the 2002 amendment in the HTSUS, effective January 10, 2002. That amendment was intended to clarify that the provisions included cameras that are commonly and commercially known as “digital cameras.” The addition of this term was not intended to change the scope of the heading or subheading level. Generally, digital cameras perform still image capture and limited sequential image capture, but they are not those cameras commonly and commercially known as camcorders.

The legal text to subheading 8525.40, HTSUS, both before and after the 2002 amendment, describes the cameras of the subheading as “recorders.” EN 85.25 (3rd Edition, 2002) indicates that the cameras of this category “record images” or “record sequential images.” That is, these cameras have the ability to record and store still images or video on permanent or removable media within the camera (e.g., random access memory (RAM), flash memory cards, memory sticks or magnetic tape, as with certain camcorders), such that the images can be retrieved and viewed at a time subsequent to the time they are captured. See HQ 966307, dated June 6, 2003.

In addition to videoconferencing capabilities, the digital camera captures still images and sequential images (up to 90 seconds of video) through a CCD and stores them in the internal flash memory. Though it operates independently from an ADP machine or TV, it must be connected to an ADP machine for viewing and processing,

or to a television set for viewing. In addition, it can capture 16 continuous still frames from the television as it can receive NTSC signals and record them. The recording of digital images and the ability to view and process them via ADP machine and TV are functions are provided by subheading 8525.40, HTSUS.

As the digital camera performs functions that are covered by subheading 8525.30, HTSUS and 8525.40, HTSUS, it is a multifunctional camera designed for the purpose of performing two or more complementary or alternative functions. As such, it is a composite machine, classified according to the camera's principal function, pursuant to Section XVI, Note 3, HTSUS.

The instant camera contains no feature that predominates over any other feature to suggest that one capability constitutes the principal function. In fact, all of the digital camera's capabilities are advertised equally on the good's packaging and in the owner's manual. As such, we are unable to determine the digital camera's principal function.

General EN (VI) to Section XVI provides that, "[w]here it is not possible to determine the principal function, and where as provided in Note 3 to the Section, the context does not otherwise require, it is necessary to apply General Interpretative Rule 3(c) * * *" GRI 3(c) provides that "When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration."

Both subheading 8525.30, HTSUS, and 8525.40, HTSUS, merit equal consideration for the reasons stated above. Thus, the digital camera is classified in subheading 8525.40, HTSUS.

Because the 2002 legal text amendment did not change the scope of subheading 8525.40, we find that the scope of subheading 8525.40.40, HTSUS, which provides for "digital still image video cameras," also did not change. Subheading 8525.40.40, HTSUS, still provides for those articles commonly and commercially referred to as digital cameras. Accordingly, this digital camera is classified in subheading 8525.40.40, HTSUS.

NY I84955 applied GRI 3(c), through Section XVI, Note 3 and GRI 6, to the eight-digit subheading level rather than the six-digit level, as discussed above. Further, subheading 8525.40.80, HTSUS, should not have been considered, as the scope of subheading 8525.40.40, HTSUS, has not changed. Therefore, NY I84955 is incorrect.

The other components that are imported with the camera are each described under a different heading. As such, they cannot be classified according to GRI 1. GRI 2(b) provides that "[t]he classification of goods consisting of more than one material or substance shall be according to the principles of Rule 3."

GRI 3 provides, "when, by application of Rule 2(b) or for any other reason, goods are, *prima facie*, classifiable under two or more headings, classification shall be effected as follows:

- (a) The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.

Insofar as two or more headings each refer to part only of these goods GRI 3(a) does not apply. However, GRI 3(b) provides, in pertinent part:

* * * goods put up in sets for retail sale, which cannot be classified by reference to 3(a), shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.

The EN to GRI 3(b) indicates that to meet the criteria of a set put up together for retail sale, "articles must:

- (a) consist of at least two different articles, which are, *prima facie*, classifiable in different headings;

- (b) consist of products or articles put up together to meet a particular need or carry out a specific activity; and
- (c) are put up in a manner suitable for sale directly to users without repacking (e.g., in boxes or cases or on boards)."

All of the articles are *prima facie* classifiable in different headings (leatherette case – 4202; plastic tripod/stand – 3926; user's guide and instruction manual – 4901; batteries – 8506; CD-ROM – 8524; USB and TV cables – 8544; camera strap – 6307). They all contribute to the use of the functions of the digital camera, including videoconferencing and capturing, recording, viewing, editing and processing digital images. The digital camera is imported and packaged together for direct sale with the above-listed articles. This is confirmed by information from Largan Inc.'s Internet website, the camera's packaging, instruction manual, and user's guide.

Under these facts, the subject goods meet all three criteria of the GRI 3(b) EN, and therefore, form a set put up for retail sale. Thus, the goods are to be classified according to the component that imparts the "essential character" of the set. EN VIII to GRI 3(b) provides that the characteristic which gives a set its "essential character" may, for example, be determined by the nature of the material or component, its bulk, quantity, weight or value or by the role of a constituent material in relation to the use of the goods.

It is clear that the digital camera is the most important article in the set. The digital camera is the most valuable article in terms of marketability, for the importer, and in terms of utility, for the consumer. As such, we conclude that the digital camera imparts the "essential character" of the set.

Chapter 85, Legal Note 6, HTSUS, provides that, "[r]ecords, tapes, and other media of heading 8523 or 8524 remain classified in those headings when entered with the apparatus for which they are intended." However, the note "does not apply to such media when they are entered with articles other than the apparatus for which they are intended." The CD-ROM installation software is used in an ADP machine, not in the camera. However, it is part of this digital camera set. General EN (B)(1) to Chapter 85, HTSUS, directs that if recorded media presented with apparatus for which it is not intended is part of a set for retail sale, it is classified pursuant to GRI 3(b). Therefore, the instant CD-ROM need not be classified separately; it is subsumed in the set.

HOLDING:

At GRI 3(b), the Largan 1.3 megapixel digital camera set for retail sale is classified subheading 8525.40.40, HTSUS, which provides for, in pertinent part, "[t]ransmission apparatus for radiotelephony * * * television cameras; still image video cameras and other video camera recorders; digital cameras: Still image video cameras and other video camera recorders; digital cameras: digital still image video cameras."

EFFECT ON OTHER RULINGS:

NY I84955, dated August 22, 2002, is hereby REVOKED.

Chicago, IL 60634

RE: Revocation of NY I84563; Digital cameras

DEAR Ms. SUCHOR:

On July 22, 2002, the U.S. Customs and Border Protection National Commodity Specialist Division issued to you New York Ruling (NY) I84563, which classified the Polaroid PDC 301 digital camera under the Harmonized Tariff Schedule of the United States (HTSUS). We have reconsidered that ruling and determined it is incorrect.

FACTS:

The merchandise at issue is a digital camera, the Polaroid PDC 301. This digital camera is packaged for retail sale, in a blister pack, with CD-ROM software, a user guide, a warranty card and a plastic clip used to attach the camera to a portable PC notebook. After determining that the products comprised a "set for retail sale," classifiable by the camera, which imparts the essential character of the set, NY I84563 stated the following:

The Polaroid PDC 301 Digital Camera performs two distinct functions. It can function as a digital still image camera allowing the user to store still images, download and send them via the Internet. It can also serve as a web cam whereby it allows the user to conduct live action video conferencing with a receiving party.

Note 3 to section XVI of the Harmonized Tariff Schedule of the United States (HTS) provides, in pertinent part, that unless the context requires otherwise, machines adapted for the purpose of performing two or more complimentary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function. It is the opinion of this office that based upon the dual functionality of this digital camera neither demonstrates a principal function. Therefore classification of the Polaroid PDC 301 Digital Camera will be in accordance with GRI 3c, Harmonized Tariff Schedule of the United States, which requires, in part that the item be classified in the heading which occurs last in numerical order among those which merit equal consideration.

NY I84563 classified the camera in subheading 8525.40.80, HTSUS, which provides for other still image video cameras and other video recorders; digital cameras.

ISSUE:

What is the classification under the HTSUS of the instant multifunctional digital camera?

LAW AND ANALYSIS:

Classification under the HTSUS is made in accordance with the General Rules of Interpretation ("GRIs"). GRI 1 provides that the classification of goods shall be determined according to the terms of the headings of the tariff schedule and any relative Section or Chapter Notes. In the event that the goods cannot be classified solely on the basis of GRI 1, and if the headings and legal notes do not otherwise require, the remaining GRIs may then be applied.

In understanding the language of the HTSUS, the Harmonized Commodity Description and Coding System Explanatory Notes may be utilized. The Explanatory Notes (ENs), although not dispositive or legally binding, provide a commentary on the scope

of each heading of the HTSUS, and are generally indicative of the proper interpretation of these headings. Customs believes the ENs should always be consulted. See T.D. 89-80, 54 Fed. Reg. 35127, 35128 (Aug. 23, 1989).

The HTSUS provisions under consideration are as follows:

8526	Transmission apparatus for radiotelephony, radiotelegraphy, radiobroadcasting or television, whether or not incorporating reception apparatus or sound recording or reproducing apparatus; television cameras; still image video cameras and other video camera recorders; digital cameras:
8526.30	Television cameras:
*	* * * * *
8525.41	Still image video cameras and other video camera recorders; digital cameras:
8525.40.41	Digital still image video cameras
*	* * * * *
8525.40.80	Other

As stated in NY I84563, the Polaroid PDC 301 performs two distinct functions. The digital camera captures and stores still images, which can then be processed by an automatic data processing (ADP) machine. The camera also captures live images in real time (i.e., for videoconferencing). Both of these functions fall within the scope of heading 8525, HTSUS. Thus, classification at the heading level is not in dispute.

To determine in which subheading this digital camera is classified, we must employ GRI 6, which permits the comparison of same-level subheadings within a heading, in part by application of Rules 1 through 5, applied by the appropriate substitution of terms. Only subheadings at the same level are comparable, so we must first address the 6-digit level.

Subheading 8525.30, HTSUS, in pertinent part, provides for “television cameras.” Subheading 8525.40, HTSUS, in pertinent part, provides for “still image video cameras and other video camera recorders; digital cameras.” According to GRI 1, applied through GRI 6, we must first look to the relevant section and chapter notes.

Section XVI, Note 3, provides:

“Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and **other machines designed for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.**” (2003) [Emphasis added.]

EN 85.25, section (C), p. 1668 (3rd Edition, 2002), describes television cameras as including, for example, “television cameras for television studios or for reporting, those used for industrial or scientific purposes or for supervising traffic.” Customs has classified PC cameras, which are those designed to be connected to ADP machines, used for videoconferencing, and for the capture of still images and moving images that do not contain internal or removable storage media as television cameras of subheading 8525.30.90, HTSUS. See e.g., HQ 964973, dated July 17, 2002. PC cameras are designed to transmit video images to an ADP machine for processing or for direct transmission over the Internet, transmitting live image as television cameras do. Therefore, whether this camera transmits real time images directly to a television set, video monitor for surveillance, or to a computer or other device, it performs the function of a category of cameras that fall within the term “television cameras” of subheading 8525.30, HTSUS. See HQ 964973; see also HQ 966172, dated June 4, 2003; HQ 965097, dated July 19, 2002; HQ 958632, dated January 25, 1996; NY A84032, dated May 31, 1996; NY B81818, dated February 13, 1997; NY A81240, dated March 18, 1996; NY F88315, dated June 29, 2000.

The PC videoconferencing function transmits live video images captured by the camera to an ADP monitor via a USB cable. Therefore, the camera's functions are provided for in part by subheading 8525.30, HTSUS.

In the Information Technology Agreement (ITA), which went into effect on July 1, 1997, by Presidential Proclamation No. 7011 (62 FR 35909, June 30, 1997), the U.S. notified the other signatories that it would classify "digital still image video cameras" in subheading 8525.40.40, HTSUS. The intent of the provision was to provide duty free treatment to a class of digital cameras which have both prior to and since the ITA been provided for in subheading 8525.40, HTSUS. *See, e.g.*, NY 817941, dated January 14, 1996; HQ 960384, dated April 1, 1999 (classifying Casio QV-10 digital cameras entered in 1995); HQ 960664, dated April 20, 1999 (classifying Olympus Digital Still Camera model # D-200L entered in 1995); NY F86533, dated May 17, 2000; and NY G86928, dated February 9, 2001.

The term "digital cameras" was added to the text of heading 8525, HTSUS, and subheading 8525.40, HTSUS, as a result of the 2002 amendment in the HTSUS, effective January 10, 2002. That amendment was intended to clarify that the provisions included cameras that are commonly and commercially known as "digital cameras." The addition of this term was not intended to change the scope of the heading or subheading level. Generally, digital cameras perform still image capture and limited sequential image capture, but are not those cameras commonly and commercially known as camcorders.

The legal text to subheading 8525.40, HTSUS, both before and after the 2002 amendment, describes the cameras of the subheading as "recorders." EN 85.25 (3rd Edition, 2002) indicates that the cameras of this category "record images" or "record sequential images." That is, these cameras have the ability to record and store still images or video on permanent or removable media within the camera (e.g., random access memory (RAM), flash memory cards, memory sticks or magnetic tape, as with certain camcorders), such that the images can be retrieved and viewed at a time subsequent to the time they are captured. *See* HQ 966307, dated June 6, 2003.

In addition to videoconferencing capabilities, the instant camera captures still images and stores them internally. Though it operates independently from an ADP machine, it must be connected to an ADP machine for processing the recorded digital images. This function is provided for in subheading 8525.40, HTSUS.

As the instant digital camera performs functions that are covered by subheading 8525.30, HTSUS and 8525.40, HTSUS, it is a multifunctional camera designed for the purpose of performing two or more complementary or alternative functions. As such, it is a composite machine, classified according to the camera's principal function, pursuant to Section XVI, Note 3, HTSUS.

General EN (VI) to Section XVI provides that, "[w]here it is not possible to determine the principal function, and where as provided in Note 3 to the Section, the context does not otherwise require, it is necessary to apply General Interpretative Rule 3(c)." GRI 3(c) provides that "When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration."

Subheadings 8525.30, HTSUS, and 8525.40, HTSUS, merit equal consideration for the reasons stated above. Thus, the instant digital camera is classified in subheading 8525.40, HTSUS.

Because the 2002 legal text amendment did not change the scope of subheading 8525.40, we find that the scope of subheading 8525.40.40, HTSUS, which provides for "digital still image video cameras," also did not change. Subheading 8525.40.40, HTSUS, still provides for those articles commonly and commercially referred to as digital cameras. Accordingly, the instant digital camera is classified in subheading 8525.40.40, HTSUS.

NY I84563 applied GRI 3(c), through Section XVI, Note 3 and GRI 6, to the eight-digit subheading level rather than the six-digit level, as discussed above. Further, subheading 8525.40.80, HTSUS, should not have been considered, as the scope of subheading 8525.40.40, HTSUS, has not changed. Therefore, NY I84563 is incorrect.

It is noted that NY I84563 was correct in determining that the camera imported in a blister pack with CD-ROM software, a user guide, a warranty card and a plastic clip used to attach the camera to a portable PC notebook comprises a set put up for retail sale, and that the essential character of the set is imparted by the camera. Further, the application of Note 6 to Chapter 85, HTSUS, regarding classification of software, was also correct. Therefore, the set, including the CD-ROM, is classified as if consisting only of that article which imparts the essential character of the set: the digital camera.

HOLDING:

At GRI 3(b), the Polaroid PDC 301 digital camera set is classified subheading 8525.40.40, HTSUS, which provides for, in pertinent part, "[t]ransmission apparatus for radiotelephony * * * television cameras; still image video cameras and other video camera recorders; digital cameras: Still image video cameras and other video camera recorders; digital cameras: digital still image video cameras."

EFFECT ON OTHER RULINGS:

NY I84563, dated July 22, 2002, is hereby REVOKED.

MYLES B. HARMON,
Director,
Commercial Rulings Division.

RE: Modification of NY I86730; Digital cameras

DEAR Ms. SUCHOR:

On October 22, 2002, the U.S. Customs and Border Protection National Commodity Specialist Division issued to you New York Ruling (NY) I86730, which classified three types of digital cameras, the Cool iCam models CIC-50A, CIC-80A and CIC-175A, under the Harmonized Tariff Schedule of the United States (HTSUS). We have reconsidered that ruling and determined that the classification of the Cool iCam CIC-175A is incorrect. Therefore, we are proposing to modify NY I86730 to reflect the proper classification of that model.

FACTS:

The Cool iCam model CIC-175A ("CIC-175A") is a multi-functional digital camera. It functions as a personal computer video camera (PC camera or Web-Cam), which is used for videoconferencing when connected to an automatic data processing (ADP) machine. The camera also digitally captures and records still images and sequential images (video clips). The CIC-175A model is packaged for direct sale with a Universal Serial Bus (USB) cable, a non-textile pouch, non-textile neck and wrist straps, batteries and a CD-ROM software package. In NY I86730 we stated that, based on the multi-functional capability of the camera, no single function for each camera imparts a principal function, and as such the classification of each will be in accordance with General Rule of Interpretation 3(c), HTSUS, which requires that the item be classified in the heading which occurs last in numerical order among those which merit

equal consideration. The CIC-175A was thus classified in subheading 8525.40.80, HTSUS, which provides for other still image video cameras and other video recorders; digital cameras.

ISSUE:

What is the classification under the HTSUS of the instant multifunctional digital camera?

LAW AND ANALYSIS:

Classification under the HTSUS is made in accordance with the General Rules of Interpretation (“GRIs”). GRI 1 provides that the classification of goods shall be determined according to the terms of the headings of the tariff schedule and any relative Section or Chapter Notes. In the event that the goods cannot be classified solely on the basis of GRI 1, and if the headings and legal notes do not otherwise require, the remaining GRIs may then be applied.

In understanding the language of the HTSUS, the Harmonized Commodity Description and Coding System Explanatory Notes may be utilized. The Explanatory Notes (ENs), although not dispositive or legally binding, provide a commentary on the scope of each heading of the HTSUS, and are generally indicative of the proper interpretation of these headings. Customs believes the ENs should always be consulted. *See* T.D. 89-80, 54 Fed. Reg. 35127, 35128 (Aug. 23, 1989).

The HTSUS provisions under consideration are as follows:

8527	Transmission apparatus for radiotelephony, radiotelegraphy, radiobroadcasting or television, whether or not incorporating reception apparatus or sound recording or reproducing apparatus; television cameras; still image video cameras and other video camera recorders; digital cameras:
8527.30	Television cameras:
*	* * * * *
8525.42	Still image video cameras and other video camera recorders; digital cameras:
8525.40.42	Digital still image video cameras
*	* * * * *
8525.40.81	Other

As stated in NY I86730, the CIC-175A performs several functions. The digital camera captures and stores still images and sequential images (video clips), which can then be processed by an ADP machine. The camera also captures live images in real time (i.e., for videoconferencing). These functions fall within the scope of heading 8525, HTSUS. Thus, classification at the heading level is not in dispute.

To determine in which subheading this digital camera is classified, we must employ GRI 6, which permits the comparison of same-level subheadings within a heading, in part by application of Rules 1 through 5, applied by the appropriate substitution of terms. Only subheadings at the same level are comparable, so we must first address the 6-digit level.

Subheading 8525.30, HTSUS, in pertinent part, provides for “television cameras.” Subheading 8525.40, HTSUS, in pertinent part, provides for “still image video cameras and other video camera recorders; digital cameras.” According to GRI 1, applied through GRI 6, we must first look to the relevant section and chapter notes.

Section XVI, Note 3, provides:

“Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and **other machines designed for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or**

as being that machine which performs the principal function.” (2003)
[Emphasis added.]

EN 85.25, section (C), p. 1668 (3rd Edition, 2002), describes television cameras as including, for example, “television cameras for television studios or for reporting, those used for industrial or scientific purposes or for supervising traffic.” Customs has classified PC cameras, which are those designed to be connected to ADP machines, used for videoconferencing, and for the capture of still images and moving images that do not contain internal or removable storage media as television cameras of subheading 8525.30.90, HTSUS. See e.g., HQ 964973, dated July 17, 2002. PC cameras are designed to transmit video images to an ADP machine for processing or for direct transmission over the Internet, transmitting live image as television cameras do. Therefore, whether this camera transmits real time images directly to a television set, video monitor for surveillance, or to a computer or other device, it performs the function of a category of cameras that fall within the term “television cameras” of subheading 8525.30, HTSUS. See HQ 964973; see also HQ 966172, dated June 4, 2003; HQ 965097, dated July 19, 2002; HQ 958632, dated January 25, 1996; NY A84032, dated May 31, 1996; NY B81818, dated February 13, 1997; NY A81240, dated March 18, 1996; NY F88315, dated June 29, 2000.

The PC videoconferencing function transmits live video images captured by the camera to an ADP monitor via a USB cable. Therefore, the camera’s functions are provided for in part by subheading 8525.30, HTSUS.

In the Information Technology Agreement (ITA), which went into effect on July 1, 1997, by Presidential Proclamation No. 7011(62 FR 35909, June 30, 1997), the U.S. notified the other signatories that it would classify “digital still image video cameras” in subheading 8525.40.40, HTSUS. The intent of the provision was to provide duty free treatment to a class of digital cameras which have both prior to and since the ITA been provided for in subheading 8525.40, HTSUS. See, e.g., NY 817941, dated January 14, 1996; HQ 960384, dated April 1, 1999 (classifying Casio QV-10 digital cameras entered in 1995); HQ 960664, dated April 20, 1999 (classifying Olympus Digital Still Camera model # D-200L entered in 1995); NY F86533, dated May 17, 2000; and NY G86928, dated February 9, 2001.

The term “digital cameras” was added to the text of heading 8525, HTSUS, and subheading 8525.40, HTSUS, as a result of the 2002 amendment in the HTSUS, effective January 10, 2002. That amendment was intended to clarify that the provisions included cameras that are commonly and commercially known as “digital cameras.” The addition of this term was not intended to change the scope of the heading or subheading level. Generally, digital cameras perform still image capture and limited sequential image capture, but are not those cameras commonly and commercially known as camcorders.

The legal text to subheading 8525.40, HTSUS, both before and after the 2002 amendment, describes the cameras of the subheading as “recorders.” EN 85.25 (3rd Edition, 2002) indicates that the cameras of this category “record images” or “record sequential images.” That is, these cameras have the ability to record and store still images or video on permanent or removable media within the camera (e.g., random access memory (RAM), flash memory cards, memory sticks or magnetic tape, as with certain camcorders), such that the images can be retrieved and viewed at a time subsequent to the time they are captured. See HQ 966307, dated June 6, 2003.

In addition to videoconferencing capabilities, the instant camera captures still images and limited sequential images and stores them internally. Though it operates independently from an ADP machine, it must be connected to an ADP machine for processing the recorded digital images. These functions are provided for in subheading 8525.40, HTSUS.

As the instant digital camera performs functions that are covered by subheading 8525.30, HTSUS and 8525.40, HTSUS, it is a multifunctional camera designed for the purpose of performing two or more complementary or alternative functions. As such, it is a composite machine, classified according to the camera’s principal function, pursuant to Section XVI, Note 3, HTSUS.

General EN (VI) to Section XVI provides that, “[w]here it is not possible to determine the principal function, and where as provided in Note 3 to the Section, the context does not otherwise require, it is necessary to apply General Interpretative Rule 3(c).” GRI 3(c) provides that “When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.”

Subheadings 8525.30, HTSUS, and 8525.40, HTSUS, merit equal consideration for the reasons stated above. Thus, the instant digital camera is classified in subheading 8525.40, HTSUS.

Because the 2002 legal text amendment did not change the scope of subheading 8525.40, we find that the scope of subheading 8525.40.40, HTSUS, which provides for “digital still image video cameras,” also did not change. Subheading 8525.40.40, HTSUS, still provides for those articles commonly and commercially referred to as digital cameras. Accordingly, the instant digital camera is classified in subheading 8525.40.40, HTSUS.

NY I86730 applied GRI 3(c), through Section XVI, Note 3 and GRI 6, to the eight-digit subheading level rather than the six-digit level, as discussed above. Further, subheading 8525.40.80, HTSUS, should not have been considered, as the scope of subheading 8525.40.40, HTSUS, has not changed. Therefore, NY I84563 is incorrect.

It is noted that NY I86730 was correct in determining that the camera imported in a blister pack with CD-ROM software, a user guide, a warranty card and a plastic clip used to attach the camera to a portable PC notebook comprises a set put up for retail sale, and that the essential character of the set is imparted by the camera. Further, the application of Note 6 to Chapter 85, HTSUS, regarding classification of software, was also correct. Therefore, the set, including the CD-ROM, is classified as if consisting only of that article which imparts the essential character of the set: the digital camera.

HOLDING:

At GRI 3(b), the Cool iCam model CIC-175A digital camera set is classified in subheading 8525.40.40, HTSUS, which provides for, in pertinent part, “[t]ransmission apparatus for radiotelephony * * * television cameras; still image video cameras and other video camera recorders; digital cameras: Still image video cameras and other video camera recorders; digital cameras: digital still image video cameras.”

EFFECT ON OTHER RULINGS:

NY I86730, dated October 22, 2002, is hereby MODIFIED.

MYLES B. HARMON,
Director,
Commercial Rulings Division.
