USDA Issues Safety-Net Payments to Farmers Facing Market Downturn

USDA's Farm Service Agency (FSA) has announced that beginning today, nearly one half of the 1.7 million farms that signed up for either the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs will receive safety-net payments for the 2014 crop year.

Unlike the old direct payments program, which paid farmers in good years and bad, the 2014 Farm Bill authorized a new safety-net that protects producers only when market forces or adverse weather cause unexpected drops in crop prices or revenues.

Example: The corn price for 2014 is 30 percent below the historical benchmark price used by the ARC-County program, and revenues of the farms participating in the ARC-County program are down

Please contact your local FSA Office for questions specific to your operation or county.

by about $20 billion from the benchmark during the same period. The nearly $4 billion provided today by the ARC and PLC safety-net programs will give assistance to producers where revenues dropped below normal."

The ARC/PLC programs primarily allow producers to continue to produce for the market by making payments on a percentage of historical base production, limiting the impact on production decisions.

Nationwide, 96 percent of soybean farms, 91 percent of corn farms, and 66 percent of wheat farms elected the ARC-County coverage option. Ninety-nine percent of long grain rice and peanut farms, and 94 percent of medium grain rice farms elected the PLC option. Overall, 76 percent of participating farm acres are protected by ARC-County, 23 percent by PLC, and 1 percent by ARC-Individual. For data about other crops, as well as state-by-state program election results, final PLC price and payment data, and other program information including frequently asked questions, visit www.fsa.usda.gov/arc-plc.

Crops receiving assistance include barley, corn, grain sorghum, lentils, oats, peanuts, dry peas, soybeans, and wheat. In the upcoming months, disbursements will be made for other crops after marketing year average prices are published by USDA's National Agricultural Statistics Service. Any disbursements to participants in ARC-County or PLC for long and medium grain rice (except for temperate Japonica rice) will occur in November, for remaining oilseeds and also chickpeas in December, and temperate Japonica rice in early February 2016. ARC-individual payments will begin in November. Upland cotton is no longer a covered commodity.

The Budget Control Act of 2011, passed by Congress, requires USDA to reduce payments by 6.8 percent. For more information, producers are encouraged to visit their local Farm Service Agency office. To find a local Farm Service Agency office, visit http://offices.usda.gov.

USDA Extends Deadline to Increase Protections for Forage Crop Losses

The USDA Farm Service Agency (FSA) deadline for producers to obtain or modify higher levels of coverage through the Noninsured Crop Disaster Assistance Program (NAP) to protect against poor forage crop quality because of drought or other natural disasters where the forage is intended for mechanical harvest is Nov. 20, 2015.

For some 2016 forage crops, the application deadline for NAP occurred before information became available to measure losses due to quality that could influence loss payments, so the deadline was extended so that producers have more time to decide what type of modified coverage works best for their operation.

The Noninsured Crop Disaster Assistance Program protects agricultural crops for which crop insurance is not available from losses due to natural disasters, such as drought, freeze, hail, excessive moisture, excessive wind or hurricanes. The program offers basic coverage at 55 percent of the average market price for crop losses exceeding 50 percent of expected production, and higher levels of coverage, up to 65 percent of expected production at 100 percent of the average market price. Higher coverage is not available on grazing crops. However, the extension does not afford producers the opportunity to purchase basic 50/55 NAP coverage.

Producers interested in adjusting their NAP coverage must submit the appropriate paperwork to their local FSA county office before the Nov. 20 deadline. To find your local USDA Service Center go to http://offices.usda.gov. For more details on the Noninsured Crop Disaster Assistance Program, visit www.fsa.usda.gov/nap.

USDA Extends Dairy Margin Protection Program Deadline

USDA's Farm Service Agency (FSA) announced that the deadline to enroll for the dairy Margin Protection Program for coverage in 2016 has been extended until Nov. 20, 2015. The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating farmers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the farmer.

Producers are encouraged to use the online Web resource at www.fsa.usda.gov/mpptool to calculate the best levels of coverage for their dairy operation. The secure website can be accessed via computer, smartphone or tablet.

Producers who were enrolled in 2015 will need to make a coverage election for 2016 and pay the

$100 administration fee. Although any unpaid premium balances for 2015 must be paid in full by the enrollment deadline to remain eligible for higher coverage levels in 2016, premiums for 2016 are not due until Sept. 1, 2016. Also, producers can work with milk marketing companies to remit premiums on their behalf.

To enroll in the Margin Protection Program for Dairy, contact your local FSA county office. To find your local FSA county office, visit http://offices.usda.gov.

Payments under the program may be reduced by a certain percentage due to a sequester order required by Congress and issued pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985. Should a payment reduction be necessary, FSA will reduce the payment by the required amount.

Producers are Reminded to Complete NASS Crop Surveys

The National Agricultural Statistics Service (NASS) Field Offices are currently completing 2015 small grain yield surveys and will contact growers in December to complete row crop yield surveys. If you are one of the producers contacted to complete a 2015 yield survey, we encourage your participation and cooperation as many USDA agencies including the Farm Service Agency (FSA) and Risk Management Agency (RMA) use the NASS yield data for their programs.

FSA uses NASS county yield data for farm credit, conservation, disaster programs, loan and commodity programs. Under the 2014 Farm Bill, FSA uses the NASS county yield data to calculate Agriculture Risk Coverage – County (ARC-CO) benchmark revenues and current year county revenues. For example, the 2014 NASS county yield, along with the crop's marketing year average price (MYA), are used to determine the county's current year revenue to determine if the county will trigger an ARC-CO payment. An ARC-CO payment is triggered for a county when the current year revenue falls below the guarantee revenue for the crop and crop year. In cases where NASS county yield data is not available, the FSA State Committee must determine a county yield using RMA yield data or the best available yield data, including assigning a county yield using neighboring county yields from NASS or RMA.

Any information that producers provide to NASS is kept confidential and protected by federal law. NASS publishes only aggregate-level data, ensuring that no individual operation or producer can be identified. All reports will be available at www.nass.usda.gov.

Incentives for Working Grass, Range and Pasture Lands

Beginning Sept. 1, farmers and ranchers can apply for financial assistance to help conserve working grasslands, rangeland and pastureland while maintaining the areas as livestock grazing lands.

The initiative is part of the voluntary Conservation Reserve Program (CRP), a federally funded program that for 30 years has assisted agricultural producers with the cost of restoring, enhancing and protecting certain grasses, shrubs and trees to improve water quality, prevent soil erosion and reduce loss of wildlife habitat. In return, the U.S. Department of Agriculture (USDA) provides participants with rental payments and cost-share assistance. CRP has helped farmers and ranchers prevent more than 8 billion tons of soil from eroding, reduce nitrogen and phosphorous runoff relative to cropland by 95 and 85 percent respectively, and even sequester 43 million tons of greenhouse gases annually, equal to taking 8 million cars off the road.

The CRP-Grasslands initiative will provide participants who establish long-term, resourceconserving covers with annual rental payments up to 75 percent of the grazing value of the land. Cost-share assistance also is available for up to 50 percent of the covers and other practices, such as cross fencing to support rotational grazing or improving pasture cover to benefit pollinators or other wildlife. Participants may still conduct common grazing practices, produce hay, mow, or harvest for seed production, conduct fire rehabilitation, and construct firebreaks and fences.

With the publication of the CRP regulation today, the Farm Service Agency will accept applications on an ongoing basis beginning Sept. 1, 2015, with those applications scored against published ranking criteria, and approved based on the competiveness of the offer. The ranking period will occur at least once per year and be announced at least 30 days prior to its start. The end of the first ranking period will be Nov. 20, 2015.

To learn more about participating in CRP-Grasslands or SAFE, visit www.fsa.usda.gov/crp or consult with the local Farm Service Agency county office. To locate a nearby Farm Service Agency office, visit http://offices.usda.gov. To learn more about the 30th anniversary of CRP, visit www.fsa.usda.gov/CRPis30 or follow on Twitter using #CRPis30.

Farmers to Receive Documentation of USDA Services

Local Offices Issue Receipts for Services Provided

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

As part of FSA's mission to provide enhanced customer service, producers who visit FSA will receive documentation of services requested and provided. From December through June, FSA issued more than 327,000 electronic receipts.

The 2014 Farm Bill requires a receipt to be issued for any agricultural program assistance requested from FSA, the National Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity.

In some cases, a form or document – such as a completed and signed program enrollment form – serve as the customer receipt instead of a printed or electronic receipt. A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.

To learn more about FSA, visit www.fsa.usda.gov or to find your local USDA office, visit http://offices.usda.gov .

USDA Packages Disaster Protection with Loans to Benefit Specialty Crop and Diversified Producers

Free basic coverage and discounted premiums available for new and underserved loan applicants

U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) today announced that producers who apply for FSA farm loans also will be offered the opportunity to enroll in new disaster loss protections created by the 2014 Farm Bill. The new coverage, available from the Noninsured Crop Disaster Assistance Program (NAP), is available to FSA loan applicants who grow non-insurable crops, so this is especially important to fruit and vegetable producers and other specialty crop growers.

New, underserved and limited income specialty growers who apply for farm loans could qualify for basic loss coverage at no cost, or higher coverage for a discounted premium.

The basic disaster coverage protects at 55 percent of the market price for crop losses that exceed 50 percent of production. Covered crops include “specialty” crops, for instance, vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, hay, forage, grazing and energy crops. FSA allows beginning, underserved or limited income producers to obtain NAP coverage up to 90 days after the normal application closing date when they also apply for FSA credit.

In addition to free basic coverage, beginning, underserved or limited income producers are eligible for a 50 percent discount on premiums for the higher levels of coverage that protect up to 65 percent of expected production at 100 percent of the average market price. Producers also may work with FSA to protect value-added production, such as organic or direct market crops, at their fair market value in those markets. Targeted underserved groups eligible for free or discounted coverage are American Indians or Alaskan Natives, Asians, Blacks or African Americans, Native Hawaiians or other Pacific Islanders, Hispanics, and women.

FSA offers a variety of loan products, including farm ownership loans, operating loans and microloans that have a streamlined application process.

Growers need not apply for an FSA loan, nor be a beginning, limited resource, or underserved farmer, to be eligible for Noninsured Crop Disaster Assistance Program assistance. To learn more, visit www.fsa.usda.gov/nap or www.fsa.usda.gov/farmloans, or contact your local FSA office at https://offices.usda.gov.

Microloans

Farm Service Agency (FSA) reminds farmers and ranchers that the FSA borrowing limit for microloans increased from $35,000 to $50,000, on Nov. 7, 2014. Microloans offer borrowers simplified lending with less paperwork.

The microloan change allows beginning, small and mid-sized farmers to access an additional $15,000 in loans using a simplified application process with up to seven years to repay. Microloans are part of USDA’s continued commitment to small and midsized farming operations.

To complement the microloan program additional changes to FSA eligibility requirements will enhance beginning farmers and ranchers access to land, a key barrier to entry level producers. FSA policies related to farm experience have changed so that other types of skills may be considered to meet the direct farming experience required for farm ownership loan eligibility. Operation or management of non-farm businesses, leadership positions while serving in the military or advanced education in an agricultural field will now count towards the experience applicants need to show when applying for farm ownership loans. **Important Note**: Microloans cannot be used to purchase real estate.

Since 2010, more than 50 percent of USDA's farm loans now go to beginning farmers and FSA has increased its lending to targeted underserved producers by nearly 50 percent.

Please review the FSA Microloan Program Fact Sheet for program application, eligibility and related information.
