A Message from the State Executive Director

Agriculture is a year-round effort in Texas. At the USDA Farm Service Agency (FSA), we recognize the importance of working closely with our customers to assist them to meet their agriculture goals, help producers recover from losses due to natural disasters, establish conservation practices, obtain credit, and adjust to market fluctuations.

The Agricultural Act of 2014, also referred to as the Food, Farm, and Jobs Bill, authorized programs and resources that FSA is charged with implementing through its national network of state and local offices. In Texas, we have 173 local offices available to assist 254 counties across the state.

The 2014 Farm Bill delivery in Texas has shown remarkable results. Specifically for 2015, Texas FSA distributed \$2.2 billion in federal farm program payments and loans to farmers, ranchers, and producers. This included more than \$1 billion in federal farm program benefits through commodity and price support payments.

Division Chiefs:

Ronda Arnett
Chris Morris
Darren Owens
David Sullivan
Eddie Trevino
Micky Woodard

Please contact your local FSA Office for questions specific to your operation or county.

FSA also invested \$125.7 million in Texans' conservation efforts. Participation in the Conservation Reserve Program (CRP), Grassland Reserve Program (GRP), Emergency Conservation Program (ECP), and Emergency Forest Restoration Program (EFRP) helped improve soil, water, energy, and wildlife resources throughout the state.

Texas saw severe weather in 2015, and FSA's resources helped farmers and ranchers who suffered losses. FSA delivered \$611 million to Texas producers following natural disasters including drought, flood, freeze, and tornadoes.

Texas FSA provided crucial agriculture credit totaling \$313 million

in loans for Texas farmers and ranchers who manage family-sized operations. FSA loan funds were allocated to producers who have worked in agriculture for generations, as well as many newcomers to agriculture, from college graduates to veterans, and second career seekers.

Please take a moment to view the Texas FSA Fiscal Year 2015 report at the [Texas Farm Service Agency Home Page](#), as well as results from previous years. In 2014, nearly \$1.6 billion was provided to Texas producers, as well as more than \$1.9 billion in 2013.

No matter the weather or the market, Texas FSA stands by all Texas farmers and ranchers—ready to deliver the safety-net and risk management programs needed to adjust to the uncertainties inherent in the agriculture industry. We look forward to continued service to Texas agriculture through the years ahead.

For more information on any of FSA's programs, please visit your local FSA office.

Sincerely,
Judith A. Canales
Texas Farm Service Agency Executive Director

USDA Expands Microloans to Help Farmers Purchase Farmland and Improve Property

Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land

The U.S. Department of Agriculture (USDA) will begin offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans will be especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program, which celebrates its third anniversary this week, has been hugely successful, providing more than 16,800 low-interest loans, totaling over \$373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to \$50,000 to qualified producers, and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

This microloan announcement is another USDA resource for America's farmers and ranchers to utilize, especially as [new and beginning farmers and ranchers](#) look for the assistance they need to get started. To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or contact your local FSA office. To find your nearest office location, please visit <http://offices.usda.gov>.

USDA Removes Farm Program Payments to Managers Not Actively Engaged in Farming

USDA finalized a rule to ensure that farm safety-net payments are issued only to active managers of farms that operate as joint ventures or general partnerships, consistent with the direction and authority provide by Congress in the 2014 Farm Bill. The action, which exempts family farm operations, closes a loophole where individuals who were not actively part of farm management still received payments.

Since 1987, the broad definition of "actively engaged" resulted in some general partnerships and joint ventures adding managers to the farming operation, qualifying for more payments, that did not substantially contribute to management. The rule applies to operations seeking more than one farm manager, and requires measureable, documented hours and key management activities each year. Some operations of certain sizes and complexity may be allowed up to three qualifying managers under limited conditions. The changes apply to payments for 2016 and subsequent crop years for Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) Programs, Loan Deficiency Payments (LDP) and Marketing Loan Gains (MLG) realized via the Marketing Assistance Loan program.

As required by Congress, the new rule does not apply to family farms, or change regulations related to contributions of land, capital, equipment, or labor. The changes go into effect for the 2016 crop year for most farms. Farms that have already planted fall crops for 2016 have until the 2017 crop year to comply. For more details, producers are encouraged to consult their local Farm Service Agency office.

USDA Encourages Producers to Consider Risk Protection Coverage before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for the Noninsured Crop Disaster Assistance Program (NAP). The 2014 Farm Bill expanded NAP to include higher levels of protection. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage, as well as discounted premiums for additional levels of protection."

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent

federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

USDA has partnered with Michigan State University and the University of Illinois to create an online tool at www.fsa.usda.gov/nap that allows producers to determine whether their crops are eligible for federal crop insurance or NAP and to explore the best level of protection for their operation. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price, including coverage for organics and crops marketed directly to consumers.

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

Filing a Notice of Loss

The CCC-576, Notice of Loss, is used to report failed acreage and prevented planting and may be completed by any producer with an interest in the crop. Timely filing a Notice of Loss is required for all crops including grasses. For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), you must file a CCC-576, Notice of Loss, in the FSA County Office within 15 days of the occurrence of the disaster or when losses become apparent.

Producers of hand-harvested crops must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a CCC-576, email, fax or phone. Producers who notify the County Office by any method other than by filing the CCC-576 are still required to file a CCC-576, Notice of Loss, within the required 15 calendar days.

If filing for prevented planting, an acreage report and CCC-576 must be filed within 15 calendar days of the final planting date for the crop.

ARC, PLC and CTAP Acreage Maintenance

Producers enrolled in Agriculture Risk Coverage (ARC), Price Loss Coverage (PLC) or the Cotton Transition Assistance Program (CTAP) must protect all cropland and noncropland acres on the farm from wind and water erosion and noxious weeds. Producers who sign ARC county or individual contracts and PLC contracts agree to effectively control noxious weeds on the farm according to sound agricultural practices. If a producer fails to take necessary actions to correct a maintenance problem on a farm that is enrolled in ARC, PLC or CTAP, the County Committee may elect to terminate the contract for the program year.

In Texas, sound agricultural practices include, but are not limited to, minimum tillage, traditional tillage, rodent control, not over-grazing and planting cover crops as needed to prevent soil erosion. Contract participants in Texas must have 95 percent control of noxious weeds on the farm. The list of noxious weeds can be found on the [Introduced, Invasive, and Noxious Plants website](#)

<http://plants.usda.gov/java/noxiousDriver>.

USDA Announces Changes to Fruit, Vegetable and Wild Rice Planting Rules

Farm Service Agency (FSA) has announced fruit, vegetable and wild rice provisions that affect producers who intend to participate in certain programs authorized by the Agricultural Act of 2014.

Producers who intend to participate in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs are subject to an acre-for-acre payment reduction when fruits and nuts, vegetables or wild rice are planted on the payment acres of a farm. Payment reductions do not apply to mung beans, dry peas, lentils or chickpeas. Planting fruits, vegetables or wild rice on acres that are not considered payment acres will not result in a payment reduction. Farms that are eligible to participate in ARC/PLC but are not enrolled for a particular year may plant unlimited fruits, vegetables and wild rice for that year but will not receive ARC/PLC payments for that year. Eligibility for succeeding years is not affected.

Planting and harvesting fruits, vegetables and wild rice on ARC/PLC acreage is subject to the acre-for-acre payment reduction when those crops are planted on either more than 15 percent of the base acres of a farm enrolled in ARC using the county coverage or PLC, or more than 35 percent of the base acres of a farm enrolled in ARC using the individual coverage.

Fruits, vegetables and wild rice that are planted in a double-cropping practice will not cause a payment reduction if the farm is in a double-cropping region as designated by the USDA's Commodity Credit Corporation.

Farm Storage Facility Loans

FSA's Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to \$50,000 can be secured by a promissory note/security agreement and some loans between \$50,000 and \$100,000 will no longer require additional security.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit www.fsa.usda.gov/pricesupport or contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

Filing CCC-941 Adjusted Gross Income (AGI) Certifications

Many producers have experienced delays in receiving Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) payments, Loan Deficiency Payments (LDPs) and Market Gains on Marketing Assistance Loans (MALs) because they have not filed form CCC-941, Adjusted Gross Income Certification. LDPs will not be paid until all eligible producers, including landowners who share in the crop, have filed a valid CCC-941.

Producers without a valid CCC-941 certifying their compliance with the average adjusted gross income provisions will not receive payments that have been processed. All farm operator/tenants/owners who have not filed a CCC-941 and have pending payments should IMMEDIATELY file the form with their recording county FSA office. Farm operators and tenants are encouraged to ensure that their landowners have filed the form. FSA has been issuing 2014 ARC/PLC payments, 2015 LDPs and Market Gains.

FSA can accept the CCC-941 for 2014, 2015 and 2016. Unlike the past, producers must have the CCC-941 certifying their AGI compliance before any payments can be issued.

Guaranteed Loan Program

FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender's normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through a lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.

Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.

FSA can guarantee farm ownership and operating loans up to \$1,399,000. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your lender or local FSA farm loan office for more information on guaranteed loans.

Beginning Farmer Loans

FSA assists beginning farmers to finance agricultural enterprises. Under these designated farm loan programs, FSA can provide financing to eligible applicants through either direct or guaranteed loans. FSA defines a beginning farmer as a person who:

- Has operated a farm for not more than 10 years
- Will materially and substantially participate in the operation of the farm
- Agrees to participate in a loan assessment, borrower training and financial management program sponsored by FSA
- Does not own a farm in excess of 30 percent of the county's average size farm

Additional program information, loan applications, and other materials are available at your local

USDA Service Center. You may also visit www.fsa.usda.gov.
