A. INTRODUCTION

1. *Coverage.* This index lists all publications issued by the U.S. Tariff Commission and the U.S. International Trade Commission from the beginning of the agency to the end of 1993 (i.e., through USITC Publication 2716). It also lists, in section E, investigations for which no public report was issued.
2. *Depository Libraries.* In many cases, the publications listed herein may be found in Federal Depository Libraries. These include leading public, university, and college libraries throughout the country. A complete list of depository libraries may be obtained from the Superintendent of Documents of the U.S. Government Printing Office, Washington, DC 20402.
3. *Requests and Orders.* Publications that are listed as available from the Commission may be obtained without charge, as long as the supply lasts. Otherwise, all Commission publications designated as out-of-print may be obtained on microfiche through the Secretary's Office.

Publications shown as available at the U.S. Government Printing Office may be ordered from the Division of Public Documents, U.S. Government Printing Office, Washington, DC 20402. Orders should be accompanied by check or money order. All such orders and checks should be made out to the Superintendent of Documents, *not* to the Commission.

4. *Explanation of Symbols.* In sections B, C, and D, publications are listed under the several categories shown in the Outline of Contents. Summarized information concerning each report is shown in a series of five columns. For columns 1, 2 and 5, the headings are sufficiently explanatory. The symbols used in columns 3 and 4 are as follows:

GPO	Report must be obtained from Division of Public Documents, Government Printing Office; <i>not available at the Commission.</i>
OP	Out of print, but may be read at the Commission, in depository libraries, or obtained on microfiche. Further more, in accordance with the Freedom of Information Act, a copy will be made, on request, and a copying fee charged. (A fee may be charged for 50 sheets of microfiche and above.)

Column 5

Reports having designations of a combination of letter and number, usually contain information on a group of related products. For example, information respecting boric acid is listed as being in a report designated as A-1. This is a report entitled *Acids in Paragraph 1 and Related Materials* and contains information on many acids including boric acid. The relation of the letter designation to the several tariff schedules in the Tariff Act of 1913 is as follows:

- A Chemicals, oils, and paints
- B Earths, earthenware, and glassware
- C Metals and manufactures
- D Wood and manufactures
- E Sugar, molasses, and manufactures
- F Tobacco
- G Agricultural products
- I Cotton manufactures
- J Flax, hemp, jute, and manufactures
- K Wool and manufactures
- L Silk manufactures
- M Papers and books
- N Sundries
- FL Free list (reports with this designation are listed in the schedule relating to this type of commodities covered).

NOTE: The names of countries used in the entries of this listing generally are those used in the title of the reports. No attempt has been made to reflect changes of these names (e.g. West Germany is listed for earlier reports, as well as Germany for recent publications).
