## Utah FSA Newsletter

---

### Utah Farm Service Agency

125 South State Street  
Room 3202  
Salt Lake City, UT 84138

Phone: 801-524-4530  
Fax: 844-715-5091

[www.fsa.usda.gov/ut](http://www.fsa.usda.gov/ut)

### Acting State Executive Director:

Jeanine Cook

### State Committee:

Tim Munns, Chairman  
Ruth Ann George  
Brent Money

To find contact information for your local office go to [www.fsa.usda.gov/ut](http://www.fsa.usda.gov/ut)

### Upcoming Deadlines and Important Dates

USDA County Farm Service Agency (FSA) offices will be closed on February 20 in observance of Washington's Birthday. All offices will be open on February 21.

The Noninsured Crop Disaster Assistance Program (NAP) closing deadline for spring planted crops is March 15!!! Eligible producers must apply for coverage and pay the applicable service fees annually by the application closing date. Acreage reports are also due annually. Coverage for specific crops may be checked online at [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap).

The Marketing Assistance Loans (MAL) and Loan Deficiency Payments (LDP) deadline for prior year harvested wheat, barley, canola, crambe, flaxseed, honey, oats, rapeseed and sesame is March 31.

Contact or visit your local FSA office for a full customer calendar with program deadlines, NAP crop closure dates, observed holidays and more.

---

### USDA Encourages Producers to Consider Risk Protection Coverage before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. The 2014 Farm Bill expanded NAP to include higher levels of protection. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage, as well as discounted premiums for additional levels of protection."

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

USDA has partnered with Michigan State University and the University of Illinois to create an online tool at [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) that allows producers to determine

whether their crops are eligible for federal crop insurance or NAP and to explore the best level of protection for their operation. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price, including coverage for organics and crops marketed directly to consumers.

Deadlines for coverage vary by state and crop. To learn more about NAP visit [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) or contact your local USDA Service Center.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

---

## **New Actively Engaged Provisions for Non-Family Joint Operations or Entities**

Many Farm Service Agency programs require all program participants, either individuals or legal entities, to be "actively engaged in farming". This means participants provide a significant contribution to the farming operation, whether it is capital, land, equipment, active personal labor and/or management. For entities, each partner, stockholder or member with an ownership interest, must contribute active personal labor and/or management to the operation on a regular basis.

The 2014 Farm Bill established additional payment eligibility provisions relating to the farm management component of meeting "actively engaged in farming". These new provisions apply to joint operations comprised of non-family members or partners, stockholders or persons with an ownership in the farming operation. Effective for 2016 and subsequent crop years, non-family joint operations are afforded to one member that may use a significant contribution of active personal management exclusively to meet the requirements to be determined "actively engaged in farming". The person or member will be defined as the Farm Manager for the purposes of administering these new management provisions.

In some instances, additional persons or members of a non-family member joint operation who meet the definition of Farm Manager may also be allowed to use such a contribution of active personal management to meet the eligibility requirements. However, under no circumstances may the number of Farm Managers in a non-family joint operation exceed a total of three in any given crop and program year.

---

## **USDA Expands Grasslands Conservation Program to Small-Scale Livestock Producers**

USDA will accept over 300,000 acres in 43 states that were offered by producers during the recent ranking period for the Conservation Reserve Program (CRP) Grasslands enrollment with emphasis placed on small-scale livestock operations. Through the voluntary CRP Grasslands program, grasslands threatened by development or conversion to row crops are maintained as livestock grazing areas, while providing important conservation benefits. Approximately 200,000 of the accepted acres were offered by small-scale livestock operations.

The most recent ranking period closed on Dec. 16, 2016, and included for the first time a CRP Grasslands practice specifically tailored for small-scale livestock grazing operations to encourage broader participation. Under this ranking period and for future periods, small-scale livestock operations with 100 or fewer head of grazing cows (or the equivalent) can submit applications to enroll up to 200 acres of grasslands per farm. Larger operations may still make offers through the normal process. USDA met its goal of 200,000 acres under this small-scale initiative. The new practice for small-scale livestock grazing operations encourages greater diversity geographically and in all types of livestock operations. Visit <http://go.usa.gov/x9PFS> to view the complete list of acres accepted by state.

Participants in CRP Grasslands establish or maintain long-term, resource-conserving grasses and other plant species to control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands. CRP Grasslands participants can use the land for livestock production (e.g. grazing or producing hay), while following their conservation and grazing plans in order to maintain the cover.

Small livestock operations or other farming and ranching operations interested in participating in CRP Grasslands should contact their local FSA office. To learn more about FSA's conservation programs, visit [www.fsa.usda.gov/conservation](http://www.fsa.usda.gov/conservation).

## **Organic Producers and Handlers May Apply for Certification Cost Share Reimbursements; Expanded Eligibility for Transitional and State Certification Cost**

Starting March 20, 2017, organic producers and handlers will be able to visit over 2,100 USDA Farm Service Agency (FSA) offices to apply for federal reimbursement to assist with the cost of receiving and maintaining organic or transitional certification.

USDA reimburses organic producers up to 75 percent of the cost of organic certification, but only about half of the nation's organic operations currently participate in the program. Starting March 20, USDA will provide a uniform, streamlined process for organic producers and handlers to apply for organic cost share assistance either by mail or in person.

USDA is making changes to increase participation in the National Organic Certification Cost Share Program (NOCCSP) and the Agricultural Management Assistance Organic Certification Cost Share Program, and at the same time provide more opportunities for organic producers to access other USDA programs, such as disaster protection and loans for farms, facilities and marketing. Producers can also access information on nonfederal agricultural resources, and get referrals to local experts, including organic agriculture, through USDA's Bridges to Opportunity service at the local FSA office.

Historically, many state departments of agriculture have obtained grants to disburse reimbursements to those producers and handlers qualifying for cost share assistance. FSA will continue to partner with states to administer the programs. For states that want to continue to directly administer the programs, applications will be due Feb. 17, 2017.

Eligible producers include any certified producers or handlers who have paid organic or transitional certification fees to a [USDA-accredited certifying](#) agent. Application fees, inspection costs, fees related to equivalency agreement/arrangement requirements, travel/per diem for inspectors, user fees, sales assessments and postage are all eligible for a cost share reimbursement from USDA.

Once certified, producers and handlers are eligible to receive reimbursement for up to 75 percent of certification costs each year up to a maximum of \$750 per certification scope—crops, livestock, wild crops and handling. This announcement also adds transitional certification and state organic program fees as additional scopes.

To learn more about organic certification cost share, please visit [www.fsa.usda.gov/organic](http://www.fsa.usda.gov/organic) or contact a local FSA office.

---

## **USDA Announces Enrollment Period for Safety Net Coverage in 2017**

Producers on farms with base acres under the safety net programs established by the 2014 Farm Bill, known as the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs, can visit their local FSA office to sign contracts and enroll for the 2017 crop year. The enrollment period will continue until Aug. 1, 2017.

Since shares and ownership of a farm can change year-to-year, producers on the farm must enroll by signing a contract each program year.

If a farm is not enrolled during the 2017 enrollment period, the producers on that farm will not be eligible for financial assistance from the ARC or PLC programs for the 2017 crop should crop prices or farm revenues fall below the historical price or revenue benchmarks established by the program. Producers who made their elections in 2015 must still enroll during the 2017 enrollment period.

The ARC and PLC programs were authorized by the 2014 Farm Bill and offer a safety net to agricultural producers when there is a substantial drop in prices or revenues for covered commodities. Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain and sweet rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity. For more details regarding these programs, go to [www.fsa.usda.gov/arc-plc](http://www.fsa.usda.gov/arc-plc) or visit your local FSA office.

---

## Preauthorized Debit Available for Farm Loan Borrowers

USDA Farm Service Agency (FSA) has implemented pre-authorized debit (PAD) for Farm Loan Program (FLP) borrowers. PAD is a voluntary and alternative method for making weekly, bi-weekly, monthly, quarterly, semi-annual or annual payments on loans.

PAD payments are pre authorized transactions that allow the National Financial and Accounting Operations Center (NFAOC) to electronically collect loan payments from a customer's account at a financial institution.

PAD may be useful for borrowers who use nonfarm income from regular wages or salary to make payments on loans or adjustment offers or for payments from seasonal produce stands. PAD can only be established for future payments.

To request PAD, customers, along with their financial institution, must fill out form RD 3550-28. This form has no expiration date, but a separate form RD 3550-28 must be completed for each loan to which payments are to be applied. A fillable form can be accessed on the USDA Rural Development (RD) website at <http://www.rd.usda.gov/publications/regulations-guidelines>. Click forms and search for "Form 3550-28."

If you have a "filter" on the account at your financial institution, you will need to provide the financial institution with the following information: Origination ID: 1220040804, Agency Name: USDA RD DCFO.

PAD is offered by FSA at no cost. Check with your financial institution to discuss any potential cost. Preauthorized debit has no expiration date, but you can cancel at any time by submitting a written request to your local FSA office. If a preauthorized debit agreement receives three payment rejections within a three month period, the preauthorized debt agreement will be cancelled by FSA. The payment amount and due date of your loan is not affected by a cancellation of preauthorized debit. You are responsible to ensure your full payment is made by the due date.

For more information about PAD, contact your local FSA office.

---

## USDA Announces Streamlined Guaranteed Loans and Additional Lender Category for Small-Scale Operators

Options Help More Beginning, Small and Urban Producers Gain Access to Credit

The U.S. Department of Agriculture (USDA) announced the availability of a streamlined version of USDA guaranteed loans, which are tailored for smaller scale farms and urban producers. The program, called EZ Guarantee Loans, uses a simplified application process to help beginning, small, underserved and family farmers and ranchers apply for loans of up to \$100,000 from USDA-approved lenders to purchase farmland or finance agricultural operations.

A new category of lenders will join traditional lenders, such as banks and credit unions, in offering USDA EZ Guarantee Loans. Microlenders, which include Community Development Financial Institutions and Rural Rehabilitation Corporations, will be able to offer their customers up to \$50,000 of EZ Guaranteed Loans, helping to reach urban areas and underserved producers. Banks, credit unions and other traditional USDA-approved lenders, can offer customers up to \$100,000 to help with agricultural operation costs.

EZ Guarantee Loans offer low interest rates and terms up to seven years for financing operating expenses and 40 years for financing the purchase of farm real estate. USDA-approved lenders can issue these loans with the Farm Service Agency (FSA) guaranteeing the loan up to 95 percent.

More information about available types of FSA farm loans can be found at [www.fsa.usda.gov/farmloans](http://www.fsa.usda.gov/farmloans) or by contacting your local FSA office.

---

## USDA Announces Changes to Fruit, Vegetable and Wild Rice Planting Rules

Farm Service Agency (FSA) has announced fruit, vegetable and wild rice provisions that affect producers who intend to participate in certain programs authorized by the Agricultural Act of 2014.

Producers who intend to participate in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs are subject to an acre-for-acre payment reduction when fruits and nuts, vegetables or wild rice are planted on the payment acres of a farm. Payment reductions do not apply to mung beans, dry peas, lentils or chickpeas. Planting fruits, vegetables or wild rice on acres that are not considered payment acres will not result in a payment reduction. Farms that are eligible to participate in ARC/PLC but are not enrolled for a particular year may plant unlimited fruits, vegetables and wild rice for that year but will not receive ARC/PLC payments for that year. Eligibility for succeeding years is not affected.

Planting and harvesting fruits, vegetables and wild rice on ARC/PLC acreage is subject to the acre-for-acre payment reduction when those crops are planted on either more than 15 percent of the base acres of a farm enrolled in ARC using the county coverage or PLC, or more than 35 percent of the base acres of a farm enrolled in ARC using the individual coverage.

Fruits, vegetables and wild rice that are planted in a double-cropping practice will not cause a payment reduction if the farm is in a double-cropping region as designated by the USDA's Commodity Credit Corporation.

---

## Youth Loans

The Farm Service Agency makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is \$5000.

### Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA's general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

Stop by the county office for help preparing and processing the application forms.

---

## **USDA Makes it Easier to Transfer Land to the Next Generation of Farmers and Ranchers**

U.S. Department of Agriculture (USDA) is offering an early termination opportunity for certain Conservation Reserve Program (CRP) contracts, making it easier to transfer property to the next generation of farmers and ranchers, including family members. The land that is eligible for the early termination is among the least environmentally sensitive land enrolled in CRP.

Normally if a landowner terminates a CRP contract early, they are required to repay all previous payments plus interest. The new policy waives this repayment if the land is transferred to a beginning farmer or rancher through a sale or lease with an option to buy. With CRP enrollment close to the Congressionally-mandated cap of 24 million acres, the early termination will also allow USDA to enroll other land with higher conservation value elsewhere.

Acres terminated early from CRP under these land tenure provisions will be eligible for priority enrollment consideration into the CRP Grasslands, if eligible; or the Conservation Stewardship Program or Environmental Quality Incentives Program, as determined by the Natural Resources Conservation Service.

According to the Tenure, Ownership and Transition of Agricultural Land survey, conducted by USDA in 2014, U.S. farmland owners expect to transfer 93 million acres to new ownership during 2015-2019. This represents 10 percent of all farmland across the nation. Details on the early termination opportunity will be available starting on Jan. 9, 2017, at local USDA service centers. For more information about CRP and to find out if your acreage is eligible for early contract termination, contact your local Farm Service Agency (FSA) office or go online at [www.fsa.usda.gov/crp](http://www.fsa.usda.gov/crp).

---

## **FSA Offers Improved Program to Limit Losses on Forages**

Reduced forage quality is now considered a production loss for weather disaster assistance coverage under the new buy-up provisions of the Farm Service Agency (FSA) Noninsured Crop Disaster Assistance Program (NAP).

This safety net is important for cattlemen who produce non-insurable forages for feeding livestock. Previously, FSA only considered a decrease in overall forage tonnage produced when determining if the producer suffered a compensable loss after a qualifying weather event. Under FSA's new NAP buy-up provisions, a decrease in forage quality – such as protein content – is also considered.

To receive coverage for the 2018 crop year, producers must enroll their eligible forage in NAP by March 15, 2017. Beginning, limited resource and targeted underserved farmers or ranchers are eligible for a waiver of the NAP service fee and a 50 percent premium reduction in buy-up provisions.

For more information on NAP, visit [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap).
