USDA Resumes Incentives to Grow the Bioeconomy and Improve Forest Health

USDA announced that \$1.5 million will be available in fiscal year 2017 for farmers and foresters who harvest and deliver biomass for renewable energy. The funds are from the Biomass Crop Assistance Program (BCAP), which was reauthorized by the 2014 Farm Bill.

In fiscal year 2017, there is \$3 million total available for BCAP, half of which is for harvesting and delivering forest or agricultural residues to a USDA-approved energy facility. BCAP also provides financial assistance to farmers and ranchers who establish and maintain new crops of biomass for energy or biobased products; additional information on the resumption of those funds will be announced at a later date.

Facilities seeking to be qualified by USDA to accept BCAP-funded biomass can begin enrollment Nov. 14 through Dec. 5, 2016. Also, between Jan. 9, 2017, through March

Program Chiefs:
Bob Perry, Farm
Loan Chief
Rick Blackwood,
Farm Program Chief
Dan LoFaro, Chief
Administrative
Officer

15, 2017, USDA will accept applications from foresters and farmers seeking incentives to remove biomass residues from fields or national forests for delivery to energy generation facilities. The retrieval payments are provided at match of \$1 for \$1, up to \$20 per dry ton. Eligible crops include corn residue, orchard waste or diseased or insect-infested wood materials.

To learn more about BCAP or to enroll in updates, visit www.fsa.usda.gov/bcap or contact your local FSA county office. To find your local county office, visit <http://offices.usda.gov>.

USDA Climate Hub Building Block: Nitrogen Stewardship

USDA Climate Hubs are working with farmers, livestock producers, pasture and forest landowners to effectively partner in ways to help mitigate and adapt to a changing climate. Next in our series on the 10 Building Blocks for Climate Smart Agriculture and Forestry is Nitrogen Stewardship.

**Next State
Committee
Meeting:**
November 30 -
December 1

Within the United States, agriculture is a significant source of nitrous oxide (N₂O) emissions—a greenhouse gas (GHG) that has a global warming potential 250 times more than carbon dioxide (CO₂). In 2013, cropland agriculture released approximately 136 MMTCO₂e (Million Metric Tons of Carbon Dioxide-Equivalent) in direct N₂O emissions. More than half of these N₂O emissions are from synthetic fertilizers and organic amendments. Improved nitrogen management practices can reduce emissions from these sources.

To find contact information for your local office go to www.fsa.usda.gov/or

The primary practice used in the Nitrogen Stewardship Building Block to reduce GHG emissions involves the 4Rs: right source, right rate, right time, and right place. The 4Rs come from the NRCS Conservation Practice Standard (CPS) Nutrient Management (590). To read more about Nitrogen Stewardship click the following link or copy and paste the link into your web browser:

http://www.usda.gov/oce/climate_change/building_blocks/2_NitrogenStewardship.pdf

For more information about the USDA Climate Hubs click here:

FSA Urges Farmers and Ranchers to Vote in County Committee Elections

USDA encourages farmers and ranchers to make their voices heard by voting in the upcoming Farm Service Agency (FSA) County Committee elections. Beginning Monday, Nov. 7, 2016, USDA will begin mailing ballots to eligible farmers and ranchers across the country. Producers must return ballots to their local FSA offices by Dec. 5, 2016, to ensure that their vote is counted.

Nearly 7,700 FSA County Committee members serve FSA offices nationwide. Each committee has three to 11 elected members who serve three-year terms of office. One-third of county committee seats are up for election each year. County committee members apply their knowledge and judgment to help FSA make important decisions on its commodity support programs, conservation programs, indemnity and disaster programs, and emergency programs and eligibility.

Producers must participate or cooperate in an FSA program to be eligible to vote in the county committee election. Farmers and ranchers who supervise and conduct the farming operations of an entire farm, but are not of legal voting age, also may be eligible to vote.

Farmers and ranchers will begin receiving their ballots the week of Nov. 7. Ballots include the names of candidates running for the local committee election. FSA has modified the ballot, making it easily identifiable and less likely to be overlooked. Voters in local administrative areas that are conducting elections this year and who do not receive ballots in the coming week can pick one up at their local FSA office. Ballots returned by mail must be postmarked no later than Dec. 5, 2016. Newly elected committee members will take office Jan. 1, 2017.

For more information, visit the FSA website at www.fsa.usda.gov/elections or contact your local County FSA office at www.fsa.usda.gov/or

Margin Protection Program for Dairy Enrollment Deadline is Dec. 16

The deadline for dairy producers to enroll in the Margin Protection Program (MPP) for Dairy is Dec. 16, 2016. This voluntary dairy safety net program, established by the 2014 Farm Bill, provides financial assistance to participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the producer. A USDA web tool, available at www.fsa.usda.gov/mpptool, allows dairy producers to calculate levels of coverage available from MPP based on price projections.

USDA Expands Working-Lands Conservation Opportunities through CRP

USDA will offer a new Conservation Reserve Program (CRP) Grasslands practice specifically tailored for small-scale livestock grazing operations. Small livestock operations with 100 or fewer head of grazing dairy cows (or the equivalent) can submit applications to enroll up to 200 acres of grasslands per farm. USDA's goal is to enroll up to 200,000 acres.

The current CRP Grassland ranking period will end on Nov. 10, 2016. To date, the USDA's Farm Service Agency (FSA) has received nearly 5,000 offers covering over 1 million acres for this CRP working-lands conservation program. These offers are predominantly larger acreage ranchland in Western states.

The new practice for small-scale livestock grazers aims, in part, to encourage greater diversity geographically and in types of livestock operation. This opportunity will close on Dec. 16, 2016. Offers selected this fiscal year will be enrolled into CRP Grasslands beginning Oct. 1, 2017.

Participants in CRP Grasslands establish or maintain long-term, resource-conserving grasses and other plant species to control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands. CRP Grasslands participants can use the land for livestock production (e.g. grazing or producing hay), while following their conservation and grazing plans in order to maintain the cover. A goal of CRP Grasslands is to minimize conversion of grasslands either to row crops or to non-agricultural uses. Participants can receive annual payments of up to 75 percent of the grazing value of the land and up to 50 percent to fund cover or practices like cross-fencing to support rotational grazing or improving pasture cover to benefit pollinators or other wildlife.

USDA will select offers for enrollment based on six ranking factors: (1) current and future use, (2) new farmer/rancher or underserved producer involvement, (3) maximum grassland preservation, (4) vegetative cover, (5) environmental factors and (6) pollinator habitat. Offers for the second ranking period also will be considered from producers who submitted offers for the first ranking period but were not accepted, as well as from new offers submitted through Dec. 16.

Small livestock operations or other farming and ranching operations interested in participating in CRP Grasslands should contact their local FSA office. To find your local FSA office, visit <http://offices.usda.gov>. To learn more about FSA's conservation programs, visit www.fsa.usda.gov/conservation.

USDA Announces Enrollment Period for Safety Net Coverage in 2017

Producers on farms with base acres under the safety net programs established by the 2014 Farm Bill, known as the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs, can begin visiting FSA county offices starting Nov. 1, 2016, to sign contracts and enroll for the 2017 crop year. The enrollment period will continue until Aug. 1, 2017.

Since shares and ownership of a farm can change year-to-year, producers on the farm must enroll by signing a contract each program year.

If a farm is not enrolled during the 2017 enrollment period, the producers on that farm will not be eligible for financial assistance from the ARC or PLC programs for the 2017 crop should crop prices or farm revenues fall below the historical price or revenue benchmarks established by the program. Producers who made their elections in 2015 must still enroll during the 2017 enrollment period.

The ARC and PLC programs were authorized by the 2014 Farm Bill and offer a safety net to agricultural producers when there is a substantial drop in prices or revenues for covered commodities. Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain and sweet rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity. For more details regarding these programs, go to www.fsa.usda.gov/arc-plc.

For more information, producers are encouraged to visit their local FSA office. To find a local FSA office, visit <http://offices.usda.gov>.

Reporting Organic Crops

Producers who want to use the Noninsured Crop Disaster Assistance Program (NAP) organic price and selected the "organic" option on their NAP application must report their crops as organic.

When certifying organic acres, the buffer zone acreage must be included in the organic acreage.

Producers must also provide a current organic plan, organic certificate or documentation from a certifying agent indicating an organic plan is in effect. Documentation must include:

- name of certified individuals
- address
- telephone number
- effective date of certification
- certificate number
- list of commodities certified
- name and address of certifying agent
- a map showing the specific location of each field of certified organic, including the buffer zone acreage

Certification exemptions are available for producers whose annual gross agricultural income from organic sales totals \$5,000 or less. Although exempt growers are not required to provide a written certificate, they are still required to provide a map showing the specific location of each field of certified organic, transitional and buffer zone acreage.

For questions about reporting organic crops, contact your local FSA office. To find your local office, visit <http://offices.usda.gov>.

Preauthorized Debit Available for Farm Loan Borrowers

USDA Farm Service Agency (FSA) has implemented pre-authorized debit (PAD) for Farm Loan Program (FLP) borrowers. PAD is a voluntary and alternative method for making weekly, bi-weekly, monthly, quarterly, semi-annual or annual payments on loans.

PAD payments are pre authorized transactions that allow the National Financial and Accounting Operations Center (NFAOC) to electronically collect loan payments from a customer's account at a financial institution.

PAD may be useful for borrowers who use nonfarm income from regular wages or salary to make payments on loans or adjustment offers or for payments from seasonal produce stands. PAD can only be established for future payments.

To request PAD, customers, along with their financial institution, must fill out form RD 3550-28. This form has no expiration date, but a separate form RD 3550-28 must be completed for each loan to which payments are to be applied. A fillable form can be accessed on the USDA Rural Development (RD) website at <http://www.rd.usda.gov/publications/regulations-guidelines>. Click forms and search for "Form 3550-28."

If you have a "filter" on the account at your financial institution, you will need to provide the financial institution with the following information: Origination ID: 1220040804, Agency Name: USDA RD DCFO.

PAD is offered by FSA at no cost. Check with your financial institution to discuss any potential cost. Preauthorized debit has no expiration date, but you can cancel at any time by submitting a written request to

your local FSA office. If a preauthorized debit agreement receives three payment rejections within a three month period, the preauthorized debt agreement will be cancelled by FSA. The payment amount and due date of your loan is not affected by a cancellation of preauthorized debit. You are responsible to ensure your full payment is made by the due date.

For more information about PAD, contact your local FSA office. To find a local FSA office, visit

<http://offices.usda.gov>

USDA Announces Streamlined Guaranteed Loans and Additional Lender Category for Small-Scale Operators

Options Help More Beginning, Small and Urban Producers Gain Access to Credit

The U.S. Department of Agriculture (USDA) announced the availability of a streamlined version of USDA guaranteed loans, which are tailored for smaller scale farms and urban producers. The program, called EZ Guarantee Loans, uses a simplified application process to help beginning, small, underserved and family farmers and ranchers apply for loans of up to \$100,000 from USDA-approved lenders to purchase farmland or finance agricultural operations.

USDA today also unveiled a new category of lenders that will join traditional lenders, such as banks and credit unions, in offering USDA EZ Guarantee Loans. Microlenders, which include Community Development Financial Institutions and Rural Rehabilitation Corporations, will be able to offer their customers up to \$50,000 of EZ Guaranteed Loans, helping to reach urban areas and underserved producers. Banks, credit unions and other traditional USDA-approved lenders, can offer customers up to \$100,000 to help with agricultural operation costs.

EZ Guarantee Loans offer low interest rates and terms up to seven years for financing operating expenses and 40 years for financing the purchase of farm real estate. USDA-approved lenders can issue these loans with the Farm Service Agency (FSA) guaranteeing the loan up to 95 percent.

USDA is providing a 90-day period for the public to review and comment on program improvements. To review program details, visit www.regulations.gov, reference RIN 0560-AI34 and follow the instructions to submit comments.

More than half of all FSA loans go to new farmers and more than a quarter to underserved borrowers. FSA also offers loans of up to \$5,000 to young farmers and ranchers through the Youth Loan Program. Loans are made to eligible youth to finance agricultural projects, with almost 9,000 young people now participating. More information about the available types of FSA farm loans can be found at www.fsa.usda.gov/farmloans or by contacting your local FSA office. To find your nearest office location, visit <http://offices.usda.gov>

Document the Drought: USDA U.S. Drought Monitor Offers Producers a Voice to Report Drought Impacts

The U.S. Drought Monitor's reporting feature offers producers an opportunity to submit drought impact and condition reports.

The USDA, in partnership with the National Oceanic and Atmospheric Administration and the University of Nebraska in Lincoln, produced the U.S. Drought Monitor to include a reporting feature that allows producers to report local drought impacts and conditions.

The report allows producers to:

- Provide a written description of drought impacts on livelihood, activities, etc.;
- Select categories to show losses and gains as a result of the drought;
- Report on the duration of drought event;
- Select Affected Places – geographic areas ranging from an entire state to a small area within a state;
- Submit images that document the drought and its impact;
- Provide contact information (includes an option to keep information confidential).

The reporting tool for producers to record the effects of the drought can be accessed at the following link: <http://droughtreporter.unl.edu/submitreport/>

More information including state specific drought impact maps can be found on the U. S. Drought Monitor homepage: <http://droughtmonitor.unl.edu/Home.aspx>

Farmers to Receive Documentation of USDA Services

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

The 2014 Farm Bill requires a customer receipt to be issued for any agricultural program assistance requested from FSA, the National Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity. Electronic receipts for acreage reports will begin on August 1, 2016.

A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.

Selected Interest Rates for October

90 Day Treasury Bill = 0.375 %

Farm Operating Loans - Direct = 2.125 %

Farm Ownership Loans - Direct = 3.250 %

Farm Ownership Loans - Direct Downpayment, Beginning Farmer or Rancher = 1.500 %

Emergency Loans = 3.125 %

Farm Storage Facility Loans

(7 years) = 1.500 %

(10 years) = 1.750 %

(12 years) = 1.750 %

Commodity Loans = 1.625 %

Important Dates and Deadlines

November 1 - Enrollment begins for the 2017 ARC PLC Program

November 30 - Deadline to Enroll Eligible Forage in the NAP program.

December 5 - Deadline for County Committee Elections Voted Ballots to be Returned to the County Office or Postmarked.

December 16 - Deadline for Registration and Annual Election in the Margin Protection Program (MPP) for 2017 Dairy Producers.

January 30, 2017 - Deadline for Lake County Producers to File a Livestock Forage Program (LFP) Application

August 1, 2017 - Enrollment ends for the 2017 ARC PLC Program
