Message from the State Executive Director

As the Holiday Season is upon us, Arkansas FSA would like to extend our best wishes to you and your family. Have a safe and Happy Holiday Season and a New Year filled with success. FSA values our relationship with you and looks forward to working with you for many years to come.

FSA is currently completing the issuance of 2015 ARC-CO and PLC Rice payments which began being issued in November. ARC and PLC programs were designed to protect against unexpected drop in crop prices or revenues due to market downturns. I want to remind farmers and ranchers across the state of federal farm program benefits that may be available to producers in recovering from adverse weather events. FSA offers disaster programs such as the Non-insured Crop Disaster Program, Livestock Indemnity Program, Tree Assistance Program, Emergency Assistance for Livestock, Honeybees, and Farm Raised Fish Program, and the Emergency Conservation Program. Please visit your local FSA for more details on each of our disaster programs.

Please contact your local FSA Office for questions specific to your operation or county. To find contact information for your local office go to www.fsa.usda.gov/ar

Additional information on these programs is contained in this newsletter.

Farm Service Agency Extends Voting Deadline for County Committee Elections

Producers now Have Until Dec. 13 to Submit Ballots

The deadline to submit ballots for the USDA Farm Service Agency (FSA) 2016 County Committee Elections has been extended to ensure farmers and ranchers have sufficient time to vote. Eligible voters now have until Dec. 13, 2016 to return ballots to their local FSA offices. Producers in the local administrative area with an election who have not received their ballot should pick one up at their local County FSA office.

FSA has modified the ballot, making it easily identifiable and less likely to be overlooked. Ballots returned by mail must be postmarked no later than Dec. 13, 2016. Newly elected committee members will take office Jan. 1, 2017.

Nearly 7,700 FSA County Committee members serve FSA offices nationwide. Each committee has three to 11 elected members who serve three-year terms of office. One-third of County Committee seats are up for election each year. County Committee members apply their knowledge and judgment to help FSA make important decisions on its commodity support, conservation, indemnity, disaster and emergency programs.

Producers must participate or cooperate in an FSA program to be eligible to vote in the County Committee election. Approximately 1.5 million producers are currently eligible to vote. Farmers and ranchers who supervise and conduct the farming operations of an entire farm, but are not of legal voting age, also may be eligible to vote.

For more information, visit the FSA website at www.fsa.usda.gov/elections or contact your local FSA office.

USDA Expands Working-Lands Conservation Opportunities through CRP

USDA will offer a new Conservation Reserve Program (CRP) Grasslands practice specifically tailored for small-scale livestock grazing operations. Small livestock operations with 100 or fewer head of grazing dairy cows (or the equivalent) can submit applications to enroll up to 200 acres of grasslands per farm. USDA's goal is to enroll up to 200,000 acres.

The current CRP Grassland ranking period will end on Nov. 10, 2016. To date, the USDA's Farm Service Agency (FSA) has received nearly 5,000 offers covering over 1 million acres for this CRP

working-lands conservation program. These offers are predominantly larger acreage ranchland in Western states.

The new practice for small-scale livestock grazers aims, in part, to encourage greater diversity geographically and in types of livestock operation. This opportunity will close on Dec. 16, 2016. Offers selected this fiscal year will be enrolled into CRP Grasslands beginning Oct. 1, 2017.

Participants in CRP Grasslands establish or maintain long-term, resource-conserving grasses and other plant species to control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands. CRP Grasslands participants can use the land for livestock production (e.g. grazing or producing hay), while following their conservation and grazing plans in order to maintain the cover. A goal of CRP Grasslands is to minimize conversion of grasslands either to row crops or to non-agricultural uses. Participants can receive annual payments of up to 75 percent of the grazing value of the land and up to 50 percent to fund cover or practices like cross-fencing to support rotational grazing or improving pasture cover to benefit pollinators or other wildlife.

USDA will select offers for enrollment based on six ranking factors: (1) current and future use, (2) new farmer/rancher or underserved producer involvement, (3) maximum grassland preservation, (4) vegetative cover, (5) environmental factors and (6) pollinator habitat. Offers for the second ranking period also will be considered from producers who submitted offers for the first ranking period but were not accepted, as well as from new offers submitted through Dec. 16.

Small livestock operations or other farming and ranching operations interested in participating in CRP Grasslands should contact their local FSA office. To find your local FSA office, visit <http://offices.usda.gov>. To learn more about FSA's conservation programs, visit www.fsa.usda.gov/conservation.

USDA Announces Enrollment Period for Safety Net Coverage in 2017

Producers on farms with base acres under the safety net programs established by the 2014 Farm Bill, known as the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs, can begin visiting FSA county offices starting Nov. 1, 2016, to sign contracts and enroll for the 2017 crop year. The enrollment period will continue until Aug. 1, 2017.

Since shares and ownership of a farm can change year-to-year, producers on the farm must enroll by signing a contract each program year.

If a farm is not enrolled during the 2017 enrollment period, the producers on that farm will not be eligible for financial assistance from the ARC or PLC programs for the 2017 crop should crop prices or farm revenues fall below the historical price or revenue benchmarks established by the program. Producers who made their elections in 2015 must still enroll during the 2017 enrollment period.

The ARC and PLC programs were authorized by the 2014 Farm Bill and offer a safety net to agricultural producers when there is a substantial drop in prices or revenues for covered commodities. Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain and sweet rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity. For more details regarding these programs, go to www.fsa.usda.gov/arc-plc.

For more information, producers are encouraged to visit their local FSA office. To find a local FSA office, visit <http://offices.usda.gov>.

Margin Protection Program for Dairy Enrollment Deadline is Dec. 16

The deadline for dairy producers to enroll in the Margin Protection Program (MPP) for Dairy is Dec. 16, 2016. This voluntary dairy safety net program, established by the 2014 Farm Bill, provides

financial assistance to participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the producer. A USDA web tool, available at www.fsa.usda.gov/mpptool, allows dairy producers to calculate levels of coverage available from MPP based on price projections.

Measurement Service

Farmers who would like a guarantee on their crop plantings and land use acreages can make it official by using the FSA measurement service. Producers must file a request with the county office staff and pay the cost of a field visit to have stake and referencing done on the farm. Measurement service is available using digital imagery. If an on-site visit is not required producers are charged a reduced rate.

Incorrect acreage self-certification can result in reduced program payments, penalty or loss of eligibility.

USDA Encourages Producers to Consider Risk Protection Coverage before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. The 2014 Farm Bill expanded NAP to include higher levels of protection. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage, as well as discounted premiums for additional levels of protection."

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

USDA has partnered with Michigan State University and the University of Illinois to create an online tool at www.fsa.usda.gov/nap that allows producers to determine whether their crops are eligible for federal crop insurance or NAP and to explore the best level of protection for their operation. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price, including coverage for organics and crops marketed directly to consumers.

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

USDA Announces Conservation Reserve Program Results

More Than 800,000 Acres Selected Through Highly Competitive Application Rounds

USDA announced the enrollment of more than 800,000 acres in the Conservation Reserve Program (CRP). Through CRP, the U.S. Department of Agriculture (USDA) helps farmers offset the costs of restoring, enhancing and protecting certain grasses, shrubs and trees that improve water quality, prevent soil erosion and strengthen wildlife habitat. Farmers' and ranchers' participation in CRP continues to provide numerous benefits to our nation, including helping reduce emissions of harmful greenhouse gases and providing resiliency to future weather changes.

A nationwide acreage limit was established for this program in the 2014 Farm Bill, capping the total number of acres that may be enrolled at 24 million for fiscal years 2017 and 2018. At the same time, USDA has experienced a record demand from farmers and ranchers interested in participating in the voluntary program. As of March 2016, 23.8 million acres were enrolled in CRP, with 1.7 million acres set to expire this fall.

Over three million acres have been offered for enrollment this year across the three main categories within CRP, with USDA's Farm Service Agency (FSA) receiving over 26,000 offers to enroll more than 1.8 million acres during the general enrollment period, and over 4,600 offers to enroll more than one million acres in the new CRP Grasslands program. Coming off a record-setting 2015 continuous enrollment of over 860,000 acres, more than 364,000 acres already have been accepted for 2016 in the CRP continuous enrollment, triple the pace of last year.

FSA will accept 411,000 acres in general enrollment, the most competitive selection in the history of the program, with the acreage providing record high conservation benefits. USDA selected offers by weighing environmental factors plus cost, including wildlife enhancement, water quality, soil erosion, enduring benefits, and air quality.

The results of the first-ever enrollment period for CRP Grasslands, FSA will also accept 101,000 acres in the program, providing participants with financial assistance for establishing approved grasses, trees and shrubs on pasture and rangeland that can continue to be grazed. More than 70 percent of these acres are diverse native grasslands under threat of conversion, and more than 97 percent of the acres have a new, veteran or underserved farmer or rancher as a primary producer. FSA continues to accept CRP Grasslands offers and will conduct another ranking period later this year.

Participants in CRP establish long-term, resource-conserving plant species, such as approved grasses or trees (known as "covers") to control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands. In return, FSA provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years.

To learn more about FSA's conservation programs, visit www.fsa.usda.gov/conservation or contact a local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

Fire Management on CRP Acres

Landowners who participate in the Conservation Reserve Program (CRP) are responsible for fire management on their CRP acreage. Fireguard technical practices should be outlined in the Conservation Plan of Operations (CPO).

Landowners must complete the necessary management activities outside of the Primary Nesting Season. In Arkansas, the Primary Nesting Season is April 1st through July 15th for grazing benefits and all other activities. The goal is to suppress the amount of fuel in the event of a wildfire while still promoting the diversity of the conservation cover.

FSA encourages producers to be proactive in preventing the spread of wildfire. Fire management includes installing firebreaks, which should be included in the contract support document and installed according to NRCS firebreak standards.

Barren firebreaks will only be allowed in high risk areas, such as transportation corridors, rural communities, and adjacent farmsteads. A conservationist must certify that there will not be an erosion hazard from the barren firebreak. If erosion becomes a problem, remedial action will be taken

Report Livestock Losses

The Livestock Indemnity Program (LIP) provides assistance to eligible producers for livestock death losses in excess of normal mortality due to adverse weather and attacks by animals reintroduced into the wild by the federal government or protected by federal law. LIP compensates livestock owners and contract growers for livestock death losses in excess of normal mortality due to adverse

weather, including losses due to hurricanes, floods, blizzards, wildfires, extreme heat or extreme cold.

For 2016, eligible losses must occur on or after Jan. 1, 2016, and no later than 60 calendar days from the ending date of the applicable adverse weather event or attack. A notice of loss must be filed with FSA within 30 days of when the loss of livestock is apparent. Participants must provide the following supporting documentation to their local FSA office no later than 90 calendar days after the end of the calendar year in which the eligible loss condition occurred.

- Proof of death documentation
- Copy of growers contracts
- Proof of normal mortality documentation

USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 1.5% and Non-Adult Beef Cattle (less than 400 pounds) = 3%. These established percentages reflect losses that are considered expected or typical under “normal” conditions. Producers who suffer livestock losses in 2016 must file both of the following:

- A notice of loss the earlier of 30 calendar days of when the loss was apparent or by January 30, 2017
- An application for payment by March 30, 2017.

Additional Information about LIP is available at your local FSA office or online at: www.fsa.usda.gov.

USDA Offers Targeted Farm Loan Funding for Underserved Groups and Beginning Farmers

The USDA Farm Service Agency (FSA) reminds producers that FSA offers targeted farm ownership and farm operating loans to assist underserved applicants as well as beginning farmers and ranchers.

USDA defines underserved applicants as a group whose members have been subjected to racial, ethnic, or gender prejudice because of their identity as members of the group without regard to their individual qualities. For farm loan program purposes, targeted underserved groups are women, African Americans, American Indians and Alaskan Natives, Hispanics and Asians and Pacific Islanders.

Underserved or beginning farmers and ranchers who cannot obtain commercial credit from a bank can apply for either FSA direct loans or guaranteed loans. Direct loans are made to applicants by FSA. Guaranteed loans are made by lending institutions who arrange for FSA to guarantee the loan. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. The FSA guarantee allows lenders to make agricultural credit available to producers who do not meet the lender's normal underwriting criteria.

The direct and guaranteed loan program provides for two types of loans: farm ownership loans and farm operating loans. In addition to customary farm operating and ownership loans, FSA now offers Microloans through the direct loan program. The focus of Microloans is on the financing needs of small, beginning farmer, niche and non-traditional farm operations. Microloans are available for both ownership and operating finance needs. To learn more about microloans, visit www.fsa.usda.gov/microloans.

To qualify as a beginning producer, the individual or entity must meet the eligibility requirements outlined for direct or guaranteed loans. Additionally, individuals and all entity members must have operated a farm for less than 10 years. Applicants must materially or substantially participate in the operation.

For more information on FSA's farm loan programs and targeted underserved and beginning farmer guidelines, visit www.fsa.usda.gov/farmloans.

USDA Expands Microloans to Help Farmers Purchase Farmland and Improve Property

Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land

The U.S. Department of Agriculture (USDA) is offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program, which celebrates its third anniversary this week, has been hugely successful, providing more than 16,800 low-interest loans, totaling over \$373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to \$50,000 to qualified producers, and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

This microloan announcement is another USDA resource for America's farmers and ranchers to utilize, especially as [new and beginning farmers and ranchers](#) look for the assistance they need to get started. To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or contact your local FSA office. To find your nearest office location, please visit <http://offices.usda.gov>.

Rates and Dates

Selected Interest Rates for December 2016	
90-Day Treasury Bill	.250
Farm Operating Loans — Direct	2.25
Farm Ownership Loans — Direct	3.25
Farm Ownership Loans — Direct Down Payment, Beginning Farmer or Rancher	1.50
Emergency Loans	3.25
Farm Storage Facility Loans (7 years)	1.75
Sugar Storage Facility Loans	2.125
Commodity Loans 1996-Present	1.75

Dates to Remember	
12/15/2016	Final Date to Report Acreage for Fall-Seeded Small Grains for 2017
12/16/2016	Deadline for Enrollment in Dairy Margin Protection Program

Persons with disabilities who require accommodations to attend or participate in this meeting/function/event should contact their local County Executive Director or Sharon Baker at 501-301-3014, (TDD# or Federal Relay Service at 1-800-877-8339, and (Sharon.Baker@ar.usda.gov).
