INTRODUCTION

The Consumer Sentinel Network (CSN) is a secure online database of millions of consumer complaints available only to law enforcement. In addition to storing complaints received by the FTC, the CSN also includes complaints filed with state law enforcement organizations such as the North Carolina and Oregon Departments of Justice, the Tennessee Division of Consumer Affairs, the South Carolina Department of Consumer Affairs, and the Offices of the Attorneys General for California, Colorado, Idaho, Indiana, Iowa, Michigan, Mississippi, Montana, Ohio and Washington. Federal agencies, including the Consumer Financial Protection Bureau, the U.S. Postal Inspection Service and the FBI's Internet Crime Complaint Center contribute data as well. The Commission also receives complaints from the Canadian Anti-Fraud Centre. Non-governmental organizations also provide complaint data to the FTC. The Council of Better Business Bureaus, consisting of all North American BBBs, is a major contributor of complaint data. Other organizations include the following: Catalog Choice, the Center for Democracy and Technology, Green Dot, the Identity Theft Assistance Center, the Lawyers' Committee for Civil Rights Under Law, MoneyGram International, the National Fraud Information Center, PrivacyStar, and Western Union.

Law enforcement partners --- whether they are down the street, across the nation, or around the world --- can use information in the database to enhance and coordinate investigations.

Begun in 1997 to collect fraud and identity theft complaints, the CSN now has more than 8 million complaints, including those about credit reports, debt collection, mortgages, and lending, among other subjects. The CSN has a five-year data retention policy; complaints older than five years are purged biannually. Between January and December 2012, the CSN received more than 2 million consumer complaints, which the FTC has sorted into 30 complaint categories. Some organizations transfer their complaints to the CSN after the end of the calendar year, and new data providers, added to the system each year, are contributing complaints from prior years. As a result, the total number of complaints for 2012 will increase during the next few months, and totals from previous years may differ from prior CSN annual reports.

The 2012 Consumer Sentinel Network Data Book is based on unverified complaints reported by consumers. The data is not based on a consumer survey.

For more information about the Consumer Sentinel Network, visit www.FTC.gov/sentinel. Law enforcement personnel may join CSN at Register.ConsumerSentinel.gov.

- Over one million complaints were fraud-related. Consumers reported paying over \$1.4 billion in those fraud complaints; the median amount paid was \$535. Fifty-nine percent of the consumers who reported a fraud-related complaint also reported an amount paid.
- Fifty-seven percent of all fraud-related complaints reported the method of initial contact. Of those complaints, 38% said email, while another 34% said the telephone. Only 9% of those consumers reported mail as the initial point of contact.

Appendix A1: The Consumer Sentinel Network

The Consumer Sentinel Network is a free, online database of consumer complaints available only to law enforcement. It includes complaints about identity theft, fraud, financial transactions, debt collection, credit reports, and Spam, among other subjects. The Consumer Sentinel Network is based on the premise that sharing information can make law enforcement even more effective. To that end, the Consumer Sentinel Network provides law enforcement members with access to consumer complaints provided directly to the FTC, as well as to complaints shared by other data contributors.

www.FTC.gov/Sentinel

The Identity Theft Data Clearinghouse was launched in November 1999 and is the sole national repository of consumer complaints about identity theft. The Clearinghouse provides specific investigative material for law enforcement and broader reports that provide insight to both private and public sector partners on ways to reduce the incidence of identity theft. Information in the Clearinghouse is available to law enforcement members via the Consumer Sentinel Network. This access enables law enforcers to readily spot local identity theft problems and to coordinate with other law enforcement officers where the data reveals common schemes or perpetrators.

www.FTC.gov/idtheft

Econsumer.gov was created in April 2001 to gather and share cross-border e-commerce complaints to respond to the challenges of multinational Internet fraud, and enhance consumer confidence in e-commerce. Through econsumer.gov, consumers can file cross-border consumer complaints online and learn about alternative ways to resolve them. All information is available in English, French, German, Japanese, Korean, Polish, Spanish, and Turkish. Using the existing Consumer Sentinel Network, the incoming complaints are shared through the government Website with participating consumer protection law enforcers from 28 nations.

www.econsumer.gov

Consumer Sentinel/Military, which was established in September 2002, is a project of the Federal Trade Commission and the Department of Defense to identify and target consumer protection issues that affect members of the United States Armed Forces and their families. Consumer Sentinel/Military also provides a gateway to consumer education materials covering a wide range of consumer protection issues, such as auto leasing, identity theft, and work-at-home scams. Members of the United States Armed Forces can enter complaints directly into Consumer Sentinel. This information is used by law enforcement agencies, members of the Judge Advocate General staff, and other Department of Defense personnel to help protect armed services members and their families from consumer protection-related problems.
