          -NOAAPORT  
          Other NWS partners and NWS employees

From:     Eli Jacks  
          Chief, Forecast Services Division

Subject:  Soliciting Comments until September 15, 2017, on the  
          Experimental Post Wildfire Debris Flow and Flash  
          Flood Webpage

Effective on or before September 15, 2016, the NWS Western Region Headquarters in Salt Lake City, UT, will produce experimental information on recent burn scars that pose an increased risk to life and property. The web page includes an overview page showing burn scars across the Western United States. Individual burn scars linked from the overview page will have their individual web pages. Burn scar specific web page(s) will provide more detailed information including a map of the burn scar, road, communities, and other values at risk. Public safety information will be included to educate and inform the public.

The web page can be accessed at:

<http://www.wrh.noaa.gov/wrh/postwildfire/>

Comments will be accepted from September 15, 2016, through September 15, 2017, via electronic survey at the following link:

[www.nws.noaa.gov/survey/nws-survey.php?code=PWHAZARDS](http://www.nws.noaa.gov/survey/nws-survey.php?code=PWHAZARDS)
