Service Change Notice 16-38 Amended
National Weather Service Headquarters, Washington, DC
305 PM EDT Wed Oct 5 2016

To: Subscribers:
 - NOAA Weather Wire Service
 - Emergency Managers Weather Information Network
 - NOAAPORT
 Other NWS partners and NWS employee

From: Luis Cano
 Director, NWS Office of Dissemination

Subject: Amended: EDIS Email Service Upgrade/Transition to
 start September 7, 2016 with completion by
 October 11, 2016

Amended to change effective date to October 11, 2016,, pending
completion of Critical Weather Day

This notice is being issued to advise all NWS partners of a
change to the email address used by NWS partners for delivering
weather products (SYNOP, METAR, etc.,) and data via email to NWS
for further dissemination. The NWS Email Data Input System
(EDIS) is a procedure that allows designated meteorological data
partners the capability to input weather bulletins to the NWS
network for further dissemination in accordance with WMO
guidelines. The submitting National Meteorological Centre (NMC)
or organization is responsible for the content of the
bulletin(s). Further information for the email service can be
obtained from the following web site:

<http://www.nws.noaa.gov/tg/emailingest.php>

In an effort to improve service and efficiency, the NWS is
completing a system upgrade of the EDIS system. The upgrade
includes new requirements for all partners using the service:
All partners must register once more with the NWS and each
partner must include their designated PIN number within the
subject line of each email delivered to the NWS. Additional
information on these changes can be obtained from the following
web site:

http://www.nws.noaa.gov/os/notification/pns16-22edis_pincca.htm

As part of the upgrade, the email address used by our partners
to deliver weather product(s) will also be changed. The
following email address will be operational beginning Wednesday,
September 7, 2016.

New EDIS Email Address: nws.rthkwbc.ops@noaa.gov

NWS plans to decommission the old email address, rthkwbc@noaa.gov, on Tuesday October 11, 2016. NWS recommends users begin transitioning to the new email address on September 7, 2016 to ensure successful delivery of all products sent via email.

Any problems experienced when using the new Email address should be reported to:

Kevin Conaty
NOAA/NWS/IDP NRT PM
Silver Spring, MD 20910
