Service Change Notice 16-51  
National Weather Service Headquarters Washington DC  
115 PM EST Tue Nov 15 2016

TO:           Subscribers:  
              -NOAA Weather Wire Service  
              -Emergency Managers Weather Information Network  
              -NOAAPORT  
              Other NWS partners and employees

FROM:        Rebecca Cosgrove  
              Chief, Implementation and Data Services Branch  
              NWS/NCEP Central Operations

SUBJECT:     Changes to the websites associated with the HADS  
              system effective December 13, 2016

On or about December 13, 2016, the websites associated with the Hydrometeorological Automated Data System (HADS) will point to new URLs. As part of internal NWS infrastructure upgrades, HADS is being integrated into the Meteorological Assimilation Data Ingest System (MADIS), which will be upgraded to release 2.1.5 on December 13. The following changes can be expected as a result of HADS becoming part of MADIS:

The old HADS public website home pages formerly at the following URLs:

<http://www.nws.noaa.gov/oh/hads>

<http://www.nws.noaa.gov/ohd/hads>

<http://www.weather.gov/oh/hads>

<http://www.weather.gov/ohd/hads>

will be available starting December 13 at

<https://hads.ncep.noaa.gov>

The content will remain the same throughout the website, however many .html links have been changed to .shtml.

Users that have the HADS pages bookmarked will need to also remove the path oh/hads or ohd/hads from the URL. Example:

<http://www.nws.noaa.gov/oh/hads/USGS/>

will be available at:

<https://hads.ncep.noaa.gov/USGS>

The old HADS public website used a second server named amazon.nws.noaa.gov for dynamically serving HADS data. Example:

<http://amazon.nws.noaa.gov/cgi-bin/hads/interactiveDisplays/displayMetaData.pl?table=dcp&nwsli=FDKM2>

The dynamically served data will be available on <https://hads.ncep.noaa.gov>

Example of accessing the same data using the new website:

<https://hads.ncep.noaa.gov/cgi-bin/hads/interactiveDisplays/displayMetaData.pl?table=dcp&nwsli=FDKM2>

The old URL for the anonymous FTP access to the HADS RRS SHEF products and other text files was:

[ftp://amazon.nws.noaa.gov/pub/hads/shef\\_products/](ftp://amazon.nws.noaa.gov/pub/hads/shef_products/)

The new URL with the same content will be:

[ftp://madis-data.ncep.noaa.gov/hads/shef\\_products/](ftp://madis-data.ncep.noaa.gov/hads/shef_products/)

Under this URL will be subdirectories for the Weather Forecast Offices (WFOs), River Forecast Centers (RFCs), National Operational Hydrologic Remote Sensing Center (NOHRSC), National Center for Environmental Prediction (NCEP), and National Center for Environmental Prediction (NCEI), and Mesowest.

Stakeholders who pull data from the HADS Public Website using wget will need to use the command line option --no-check-certificate when running the command.
