Service Change Notice 17-96
National Ocean Service Headquarters Silver Spring, MD
Relayed by National Weather Service
1010 AM EDT Tue Aug 29 2017

To: Subscribers:
 -NOAA Weather Wire Service
 -Emergency Managers Weather Information Network
 -NOAAPORT
 Other NWS partners and NWS employees

From: Pat Burke
 Chief, National Ocean Service (NOS) Center for
 Operational Oceanographic Products and Services (CO-OPS)
 Oceanographic Division

Subject: Discontinuation of Tides On Line (TOL) Coastal
 Observation Product at NOS/CO-OPS Effective
 October 16, 2017

Effective October 16, 2017, at 1300 Coordinated Universal Time
(UTC) (9AM EST), the NOAA/NOS Tides On Line Product will be
discontinued by NOS/CO-OPS
<https://tidesonline.nos.noaa.gov/>.

The TOL product displays coastal near real time observations of
water level, winds, water and air temperature and atmospheric
pressure from NOS/CO-OPS NWLON stations. There are no changes to
the NWLON observing system but the TOL display has become
redundant with newer data dissemination pathways at
<https://tidesandcurrents.noaa.gov/>

Users of this product are directed to the following URLs which
display the same information:
<https://tidesandcurrents.noaa.gov/map/index.shtml>

<https://tidesandcurrents.noaa.gov/products.html>

Every NWLON station has a home page which provides the same real
time data as displayed by TOL along with station specific
metadata and links to the full suite of products derived from
that station's observations. An example of a NWLON station home
page can be found at:
<https://tidesandcurrents.noaa.gov/stationhome.html?id=8575512>

The URLs listed above are already active and users can start
using them at any time.
For more information, please contact:
