Important ARC/PLC Program Deadlines Approaching

Producers are reminded that the deadline to update yield history and/or reallocate base acres is Feb. 27, 2015. Farm owners and producers can choose between the new 2014 Farm Bill established programs, Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) through March 31, 2015. The new programs, designed to help producers better manage risk, usher in one of the most significant reforms to U.S. farm programs in decades.

USDA helped create online tools to assist in the decision process, allowing farm owners and producers to enter information about their operation and see projections that show what ARC and/or PLC will mean for them under possible future scenarios. Farm owners and producers can access the online resources, available at www.fsa.usda.gov/arc-plc, from the convenience of their home computer or mobile device at any time.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain

Affairs/Outreach:

Neal Leonard

Please contact your local FSA Office for questions specific to your operation or county.

sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity.

Dates associated with ARC and PLC that farm owners and producers need to know:

- Now through Feb. 27, 2015: Farm owners may visit their local Farm Service Agency office to update yield history and/or reallocate base acres.
- Now through March 31, 2015: Producers make a one-time election between ARC and PLC for the 2014 through 2018 crop years.
- Mid-April 2015 through summer 2015: Producers sign contracts for 2014 and 2015 crop years.
- October 2015: Payments issued for 2014 crop year, if needed.

To learn more about which safety net options are most appropriate for specific farming operations, farmers can use new Web tools at www.fsa.usda.gov/arc-plc, which can be accessed from the convenience of a home computer or a mobile device at any time. To learn more about upcoming educational meetings, farmers can contact their local Farm Service Agency county office at <http://offices.sc.egov.usda.gov/locator/app>.

FSA Announces New Yield Data for Safety Net Calculations

Farmers can Update Yield History through Feb. 27, 2015

The U.S. Department of Agriculture Farm Service Agency (FSA) offers farmers new information to update program payment yields that will help them better select protections offered by the Agricultural Risk Coverage (ARC) and Price Loss Coverage (PLC) programs. The new programs, established by the 2014 Farm Bill, are cornerstones of the commodity farm safety, offering farmers protection when market forces cause substantial drops in crop prices and revenues.

The Farm Bill provides landowners with the option of updating their farm program payment yields and this is the first time that many producers have been able to update yields since 1986. FSA has worked with the Risk Management Agency (RMA) to make available certified yield data that producers can use to better calculate how the new safety net programs can offer the best protection against market swings.

Producers can check with their local FSA county office to see if data is available for them. This data belongs to the producer and only the producer associated with the crop insurance records will be provided this service. Updating yield history or reallocating base acres can occur until Feb. 27

2015.

FSA also issued a reminder that from Nov. 17, 2014, to March 31, 2015, producers will make a one-time election of either ARC or PLC for the 2014 through 2018 crop years. For more information, producers are encouraged to make an appointment to go into their local FSA county office. To find a local FSA county office, visit offices.usda.gov. Additional information on the new programs is available at www.fsa.usda.gov/arc-plc.

USDA Creates More Bird Habitat Opportunities on Irrigated Farmland

USDA's Farm Service Agency (FSA) announces more bird habitats to be established in irrigated farmland regions through the Conservation Reserve Program (CRP).

Declines in upland bird populations, such as the northern bobwhite, pheasant, and prairie chicken, led to the creation of new Conservation Reserve Program features to help restore habitats for these species in these agricultural areas. Since the program's creation in 2004, more than 240,000 acres of marginal cropland has been converted to native grasslands, spurring an increase in upland bird populations.

In recent years, however, applications for this type of habitat creation have slowed. To encourage more participation, USDA's new policy focuses on farmland with center-pivot irrigation systems where there are circular areas of cropland with patches of land beyond the reach of irrigation. Until now, these patches – known as pivot corners – were only eligible for habitat creation when connected by a linear strip of grassland also enrolled in the program. The new policy allows producers interested in habitat creation to use disconnected pivot corners to help increase the population of upland birds.

Other species that can benefit from today's change include the mourning dove, wild turkey, several sparrows, meadowlark and bobolinks.

The Conservation Reserve Program is a voluntary program. FSA contracts with agricultural landowners so that environmentally sensitive land is not farmed but instead used for conservation. Participants establish long-term plant species that control soil erosion, sequester carbon, improve water quality, and strengthen declining wildlife populations. In return, participants receive annual rental payments between 10 and 15 years.

Interested landowners can enroll pivot corners in the Conservation Reserve Program at any time. Participants and land must meet certain eligibility requirements. Other restrictions may apply. For additional details, contact your local Farm Service Agency office at offices.usda.gov or visit the website at www.fsa.usda.gov/conservation.

USDA Provides Greater Protection for Fruit, Vegetable and Other Specialty Crop Growers

Free Basic Coverage Plans and Premium Discounts Available for New, Underserved and Limited Income Farmers

Greater protection is now available from the Noninsured Crop Disaster Assistance Program for crops that historically have been ineligible for federal crop insurance. The new options, created by the 2014 Farm Bill, provide greater coverage for losses when natural disasters affect specialty crops such as vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass,

ginseng, honey, syrup, and energy crops.

Previously, the program offered coverage at 55 percent of the average market price for crop losses that exceed 50 percent of expected production. Producers can now choose higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price.

The expanded protection will be especially helpful to beginning and socially disadvantaged producers, as well as farmers with limited resources, who will receive fee waivers and premium reductions for expanded coverage. More crops are now eligible for the program, including expanded aquaculture production practices, and sweet and biomass sorghum. For the first time, a range of crops used to produce bioenergy will be eligible as well.

To help producers learn more about the Noninsured Crop Disaster Assistance Program and how it can help them, USDA, in partnership with Michigan State University and the University of Illinois, created an online resource. The Web tool, available at www.fsa.usda.gov/nap, allows producers to determine whether their crops are eligible for coverage. It also gives them an opportunity to explore a variety of options and levels to determine the best protection level for their operation.

To learn more, visit the Farm Service Agency (FSA) website at www.fsa.usda.gov/nap or contact your local FSA office at offices.usda.gov. The Farm Service Agency (FSA), which administers the program, also wants to hear from producers and other interested stakeholders who may have suggestions or recommendations on the program. Written comments will be accepted until Feb. 13, 2015 and can be submitted through www.regulations.gov.

2015 Acreage Report Dates

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA office to file an accurate crop certification report by the applicable deadline. Crops not reported by the established deadline will be assessed a "late fee" for crops reported after the deadline.

The following acreage reporting dates are applicable for the entire state of Georgia:

January 2, 2015: Honey

January 15, 2015: Apples, Blueberries, Canola, Peaches, Rye, and all other Fall-seeded Small Grains

March 15, 2015: Pecans, Cabbage (pltd 10/1/14 thru 2/22/15), Onions (pltd 10/21/14 thru 2/21/15)

May 15, 2015: Tobacco, Sweet Corn (pltd 1/1/15 thru 5/15/15), Tomatoes (pltd 1/1/15 thru 5/15/15)

July 15, 2015: ALL other crops for which a specific acreage reporting date is not listed – These Include, but are not limited to Corn, Cotton, Grain Sorghum, Peanuts, Soybeans

The following exceptions apply to the above acreage reporting dates:

- If the crop has not been planted by the above acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the above acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease

Appropriate documentation must be provided to the county office.

- If a perennial forage crop is reported with the intended use of “cover only,” “green manure,” “left standing,” or “seed,” then the acreage must be reported by July 15th; otherwise, the reporting date for perennial forage is November 15.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your local County FSA office.

Emergency Assistance for Livestock, Honeybee, and Farm-Raised Fish Program (ELAP)

The Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP) provides emergency assistance to eligible livestock, honeybee, and farm-raised fish producers who have suffered losses due adverse weather or other conditions, such as wildfires, not covered by other agricultural disaster assistance programs.

Eligible livestock losses include grazing losses not covered under the Livestock Forage Disaster Program (LFP), and loss of purchased feed and/or mechanically harvested feed due to an eligible adverse weather event.

Eligible honeybee losses include loss of purchased feed due to an eligible adverse weather event, cost of additional feed purchased above normal quantities due to an eligible adverse weather condition, colony losses in excess of normal mortality due to an eligible weather event or loss condition, including CCD, and hive losses due to eligible adverse weather.

Eligible farm-raised fish losses include death losses in excess of normal mortality and/or loss of purchased feed due to an eligible adverse weather event.

Producers who suffer eligible livestock, honeybee, or farm-raised fish losses from October 1, 2014 to September 30, 2015 must file:

- A notice of loss **the earlier of** 30 calendar days of the date of the loss or by November 1, 2015
- An application for payment by November 1, 2015

The Farm Bill caps ELAP disaster funding at \$20 million per federal fiscal year.

The following ELAP Fact Sheets (by topic) are available online:

- ELAP for Farm-Raised Fish Fact Sheet
- ELAP for Livestock Fact Sheet
- ELAP for Honeybees Fact Sheet

To view these and other FSA program fact sheets, visit the FSA fact sheet web page at

FSA Targets Funds for Historically Underserved Farmers

The Georgia State Farm Service Agency (FSA) announced the availability of direct and guaranteed loan funds for historically underserved individuals who want to purchase or operate a family-size farm in fiscal year 2015.

In Fiscal year 2014, which ended September 30, 2014, Georgia Farm Loan Programs made 251 direct and guaranteed loans to historically underserved farmers totaling more than \$25.31 million. Thus far in Fiscal year 2015, FSA has provided more than \$6.41 million in loans to historically underserved applicants.

“The targeted financing is for those individuals who have been subjected to racial, ethnic or gender inequality without regard to their individual qualities. Historically underserved members include women, African Americans, American Indians, Hispanic, Asian and Pacific Islanders and Alaskan Natives,” said Fred Harrison, Jr., State Executive Director of the Georgia Farm Service Agency.

The program provides direct and guaranteed assistance in the form of farm operating and farm ownership loans. Direct loan applications are originated and processed for applicants by the local FSA staff. Guaranteed loans are issued by participating lending institutions, but typically 90 percent of the loan is guaranteed by FSA.

Operating loans may be used to purchase livestock, equipment, feed, seed, and other business related expenses. Repayment terms run from one to seven years.

Ownership loans provide capital to purchase or enlarge a farm, construct or improve buildings, promote soil and water conservation and pay closing costs. Direct ownership loan terms are up to 40 years. Guaranteed loan terms are established by the lender.

Qualified applicants are provided information and assistance to develop sound management practices, analyze problems and utilize available resources essential for successful farming operations to cope with the changing agricultural environment. Loan applicants do not receive automatic approval. Applicants must be U.S. citizens with a satisfactory history of meeting credit obligations; have sufficient education, training or experience managing or operating a farm; possess legal capacity to incur debt; be unable to obtain credit elsewhere; and meet certain other eligibility requirements.

Contact your local FSA County Office or USDA Service Center for more loan information. You may find the local office phone number listed under the blue or government pages of your local telephone directory.

Youth Loans

The Farm Service Agency makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is \$5000.

Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA's general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

Stop by the county office for help preparing and processing the application forms.
