The *Small Business State and Territory Profiles* report on the economic status of small business from 2007 to 2014. They include information on the number of firms, employment, demographics and other topics using the most recently available government data. They are a reference tool for researchers, policymakers, and small entities who are interested in how small firms are performing regionally or nationally. *Note that this report defines small businesses as firms with fewer than 500 employees.*

Income and Finance

- The number of banks reported in the Call Reports between June 2013 and June 2014 declined. (Source: FDIC)
- In 2012, **14,603** loans under \$100,000 (and valued at **\$137.3 million**) were issued by Community Reinvestment Act lending institutions in the District of Columbia. (Source: FFIEC)
- The median income for individuals who are self-employed at their own incorporated businesses for the past 12 months was **\$91,644** in 2013. For individuals self-employed at their own unincorporated firms, this figure was **\$26,717**. (Source: ACS)

Note: Median income represents earnings from all sources. Unincorporated self-employment income includes unpaid family workers, a very small percent of the unincorporated self-employed.

Business Owner Demographics

- **Table 1** shows the top industry for nine business owner demographics. For example, **34.3 percent** of female-owned businesses were in the professional, scientific, and technical services industry, and female-owned firms made up **29.6 percent** of this industry.
