There is absolutely no democratically legitimate reason to eliminate or soften the fiduciary rule. It's wrong for a mechanic to advise a customer to do unnecessary work on a car just so that mechanic can make more money. Or a contractor or a doctor or a dentist or any businessperson. It's corruption.

So it is corrupt to allow financial advisors to give self-serving advice that is not in the best interest of the client. Do not continue to legalize corruption.

Thank you,
