Message from Morgan Freeman:
Screening for Colorectal Cancer PSA (:60)

[Morgan Freeman] Hi, this is Morgan Freeman. Has anyone ever said, 'You're the picture of health'? You look healthy, you feel fine, but that may not be the full picture. Colorectal cancer is the second leading cancer killer of men and women over 50. Since it doesn't always cause symptoms, you may not know you have it. The only way to know is by getting screened. Screening can find precancerous polyps, so they can be removed before they turn into cancer. This is one cancer you can prevent! Plus, screening can find colorectal cancer at an early stage, when the chance for a full recovery is very high. Talk with your doctor and get tested for colorectal cancer. Medicare and many insurance plans help pay for screening. Get screened ... make sure you are the picture of health!

[Announcer] A message from the U.S. Department of Health and Human Services and the Centers for Disease Control and Prevention.
