

Message from Jimmy Smits: Screening for Colorectal Cancer PSA (:30)

[Jimmy Smits] Hi, I'm Jimmy Smits and I'd like to talk to you about screening ... no, not a movie screening, but a screening test for colorectal cancer. It could save your life. Colorectal cancer is highly preventable, yet it is the second-leading cancer killer of men and women in the U.S. But it doesn't have to be. Screening finds precancerous polyps, so they can be removed before they turn into cancer. So please, get screened for colorectal cancer. I did.

[Announcer] If you are 50 or older, get screened. A message from the U.S. Department of Health and Human Services.
