Pre-Monitoring assessment is based on the ROC Division's knowledge of, history with, and learned information about the WDB, its service providers and contractors, and its programs and conducted prior to the on-site monitoring visit to help guide the scope of monitoring of each WDB. Post-Monitoring assessment is based on information gathered during the monitoring process, white a Pre-Monitoring Risk Factor score, and is conducted at the close of monitoring. Appropriate explanation(s), as warranted, will be provided within the Comprehensive Monitoring Report.
