## Social Security Is Important to Women

Securing today and tomorrow

On average, women receive less monthly income from Social Security than men but they rely on it more heavily.

Women are the primary or co-breadwinner in 6 out of 10 American homes.

Elderly women are less likely than elderly men to have significant retirement income other than Social Security.

**45%** unmarried women age 65 or older receiving their own private pensions either as a retired worker or a survivor.

Women reaching age 65 in 2015 are expected to live an average of 2.5 years longer than men.

Social Security will continue to help you and your family secure today and tomorrow.
