8 **SEC. 2. FINDINGS.**

9 Congress makes the following findings:

10 (1) An estimated one out of every three women
 11 throughout the world will be beaten, coerced into
 12 sex, or otherwise abused in her lifetime.

13 (2) Up to 70 percent of women in some coun-
 14 tries report experiencing gender-based violence at
 15 some point in their lives.

1 (3) Intimate partner violence is the most preva-
2 lent form of violence against women, preventing
3 them from playing more active roles in the social,
4 economic, and political development of their commu-
5 nities.

6 (4) Sexual violence among adolescents and pre-
7 adolescents is alarmingly high. National surveys in
8 Swaziland, Tanzania, Zimbabwe, Kenya, and Haiti
9 have found that between 28 and 38 percent of girls
10 and between 9 and 18 percent of boys report experi-
11 encing sexual violence before reaching 18 years of
12 age.

13 (5) Adult male respondents in six countries who
14 had experienced violence as children were signifi-
15 cantly more likely to report perpetrating intimate
16 partner violence themselves according to the Inter-
17 national Men and Gender Equality Survey dataset.

18 (6) Gender-based violence harms economies and
19 the workers that fuel them. Despite under-reporting,
20 striking statistics document prevalent forms of gen-
21 der-based violence globally that affect the world of
22 work. Worldwide, women are concentrated in low-
23 wage, insecure jobs in workplaces where they lack
24 bargaining power, protections against gender-based
25 violence, safe and confidential reporting systems, re-

1 course to justice, and access to legal, medical, and
2 psychosocial services.

3 (7) Women living in poverty are particularly
4 vulnerable to gender-based violence. Lack of eco-
5 nomic opportunities often compel women to use des-
6 perate and dangerous means to provide for them-
7 selves and their families, risking significant exposure
8 to sexual exploitation and abuse. These women often
9 cannot afford critical social and medical services.

10 (8) Research conducted in India, Colombia,
11 South Africa, and Uganda indicates that when
12 women have greater control of assets, they are less
13 likely to experience intimate partner violence. Addi-
14 tionally, when women participate in the economy
15 they are able to develop a wider support network,
16 which allows them to more easily escape intimate
17 partner violence.

18 (9) Gender-based violence impacts livelihoods
19 and food security by reducing work capacity and
20 productivity, including the ability to grow food for
21 consumption. Studies have shown that women af-
22 fected by gender-based violence are exposed to ill-
23 nesses and injuries that hamper their ability to work
24 productively and care for their families. Diminished

1 food production consequently increases hunger and
2 women's vulnerability to further violence.

3 (10) Country studies indicate that the risk of
4 HIV among women who have experienced violence
5 may be up to three times higher than among those
6 who have not experience violence. The World Health
7 Organization found that women who experience inti-
8 mate partner violence are at more than 50 percent
9 greater risk of HIV infection, and in some instances
10 their risk of HIV infection increases four-fold.
11 Women living with HIV are more likely to experi-
12 ence violence than other women, and fear of violence
13 can prevent women from accessing HIV/AIDS infor-
14 mation and receiving treatment and counseling.

15 (11) Addressing gender norms and inequities is
16 essential to reducing HIV risk and increasing access
17 to HIV prevention, care, and treatment services for
18 women and men. The President's Emergency Plan
19 for AIDS Relief (PEPFAR) supports significant
20 work in the field to incorporate efforts to prevent
21 and respond to gender-based violence into existing
22 HIV treatment and prevention programs.

23 (12) Prevalence of sexual and physical violence
24 is higher among persons with disabilities, particu-
25 larly for adolescents and intimate partners with dis-

1 abilities, and for men and women with intellectual
2 impairments living in institutions. The World Health
3 Organization reports that rates of gender-based vio-
4 lence are between 4 and 10 times greater among
5 persons with disabilities compared to non-disabled
6 persons.

7 (13) Displaced, refugee, and stateless women
8 and girls in humanitarian emergencies, conflict set-
9 tings, and natural disasters face extreme violence
10 and threats, including—

11 (A) being forced to exchange sex for food
12 and humanitarian supplies; and

13 (B) being at increased risk of rape, sexual
14 exploitation, and abuse.

15 (14) Rape and sexual assault against women
16 and girls are used to torture, intimidate, and ter-
17 rorize communities. Rape and sexual assault are
18 used as tools of war in conflict zones, including the
19 Democratic Republic of the Congo, Iraq, Syria, Af-
20 ghanistan, Colombia, and South Sudan.

21 (15) Child and forced marriage of girls—

22 (A) is a harmful practice that deprives
23 girls of their dignity and rights and creates bar-
24 riers to development for communities and coun-
25 tries;

1 (B) is projected to affect more than
2 140,000,000 girls who will become brides be-
3 tween 2011 and 2020;

4 (C) can prematurely end girls' education,
5 increase vulnerability to gender-based violence,
6 and significantly raise the risk of maternal and
7 infant morbidity or mortality, including the risk
8 of obstetric fistula and sexually transmitted dis-
9 eases, including HIV/AIDS; and

10 (D) is perpetuated by poverty, a lack of
11 educational or employment opportunities for
12 girls, a lack of legal policies and enforcement of
13 laws, and religious, cultural, and social factors
14 related to girls' perceived lack of value, factors
15 which become particularly acute in conflict and
16 disaster settings where fears of sexual violence
17 and overstretched coping mechanisms often
18 drive child and forced marriage.

19 (16) Female genital mutilation/cutting (FGM/
20 C) is carried out most often on girls between infancy
21 and 15 years of age and has impacted more than
22 125,000,000 girls and women who are alive today.
23 FGM/C can cause long-term health problems, includ-
24 ing infertility, complications in childbirth, and in-
25 creased risk of newborn deaths.

1 (17) World Bank data shows that gender in-
2 equality directly corresponds to increased levels of
3 political and economic instability within states. Gen-
4 der-based violence impedes women’s meaningful par-
5 ticipation in social, political, and economic spheres,
6 which is essential to the stability and democratiza-
7 tion of a country. Since women disproportionately
8 experience gender-based violence during conflict and
9 post-conflict reconstruction, they can play a pivotal
10 role in preventing, mitigating, and resolving conflict,
11 and countering extremism.

12 (18) Gender-based violence is a contributing
13 factor to human trafficking. Experts in the field
14 have reported that women and girls who have experi-
15 enced gender-based violence and live in societies that
16 tolerate severe gender discrimination appear to be
17 more vulnerable to being trafficked. Comprehensive
18 efforts to reduce human trafficking must include ef-
19 forts to prevent and respond to gender-based vio-
20 lence due to the intertwined relationship of the two
21 crimes.

22 **SEC. 3. STATEMENT OF POLICY.**

23 It is the policy of the United States—

24 (1) to take effective action to prevent and re-
25 spond to violence against women and girls around

1 the world as a matter of basic human rights and to

3 proved public health;

4 (2) to systematically integrate and coordinate

2 the family, community, local, national, and inter-
3 national levels, to prevent and respond to violence
4 against women and girls around the world;

6 sonnel of professional foreign military and police
7 forces and judicial officials, including specific and
8 thorough instruction on preventing and responding
9 to violence against women and girls around the
10 world;

11 (8) to engage men and boys as partners, as an
12 essential element of making sustained reductions in
13 violence against women and girls;

14 (9) to include the prevention of child and forced
15 marriage as an important part of United States
16 Government efforts to prevent violence against girls
17 and promote gender equality and global health;

18 (10) to require that all United States contrac-
19 tors and grantees establish appropriate policies and
20 take effective measures to prevent violence against
21 women and girls and sexual exploitation and abuse
22 within their workforce;

23 (11) to exert sustained international leadership
24 to prevent and respond to violence against women

1 and girls, including in bilateral and multilateral fora;
