

HIV *in the* United States

Not all people with HIV are getting the care they need.

1.1 million people living with HIV in the US in 2015

* Had 2 tests at least 3 months apart to measure level of virus in the body. ** Virus at low enough level to stay healthy and reduce transmission risk. Based on most recent test. Based on the most recent data available in November 2018.

Get Tested. Get in Care. Stay in Care.
Be Healthy.
