

U.S. SKIN CANCER CASES AND COSTS ON THE RISE FROM 2002-2011

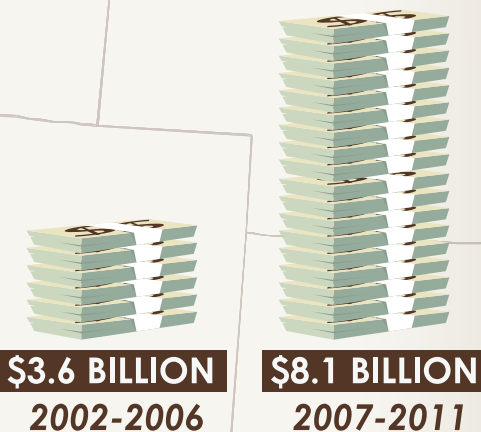

Skin cancer is the most commonly diagnosed cancer in the United States, yet most cases are preventable.

New research shows that between the years of 2002 and 2011...

The number of **people TREATED** for skin cancer increased from 3.4 million to 4.9 million.

The average annual **COST** of skin cancer treatment increased from \$3.6 billion to \$8.1 billion.

The annual cost for all skin cancer treatments increased by 126%.

Skin Cancer is a serious public health concern. Use sun protection strategies that work.
