Weather-Ready Nation

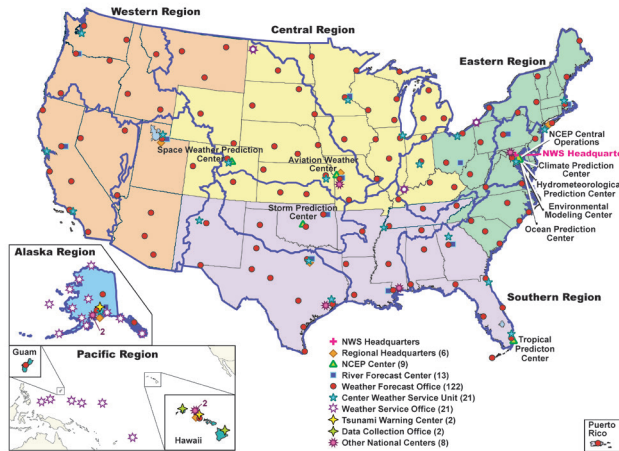

The National Weather Service

The National Weather Service's (NWS) mission is to provide weather, water, and climate data, along with forecasts and warnings for the protection of life and property and enhancement of the national economy. Our vision is for a Weather-Ready Nation in which society is prepared for and responds to weather-dependent events.

The NWS has employees spread across 122 weather forecast offices, 13 river forecast centers, 9 national centers, 6 regional centers, 21 center weather service units, and other support offices across the United States and its territories. Each year, the NWS collects about 76 billion observations and issues approximately 1.5 million forecasts and 50,000 warnings.

NWS Facilities Map

The NWS hiring process is operated through usajobs.gov/ where you can search for active job positions by location, job title, or keywords. You can also post resumes and customize email notifications for job openings.

Opportunities

There are many types of opportunities available to students interested in the NWS.

- **Pathways Program**

The Pathways Internship Program is for current students. This program provides current students in high schools, colleges, trade schools and other qualifying educational institutions with paid opportunities to work while completing their education.

Careers

The NWS serves in a variety of careers across the country such as meteorologists, hydrologists, computer programmers, electronics engineers and technicians, budget analysts, program managers, lawyers and many more! To learn more visit weather.gov/careers/
