

## Annual Survey of Coal Production and Preparation Form EIA-7A

### YOUR RESPONSE IS REQUIRED BY LAW

This report is **mandatory** under the Federal Energy Administration Act of 1974 (Public Law 93-275). Failure to comply may result in criminal fines, civil penalties, and other sanctions as provided by law. **Title 18 USC 1001 makes it a criminal offense for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious, or fraudulent statements as to any matter within its jurisdiction.**

All coal mining companies that owned a mining operation which produced 25,000 or more short tons of coal during the reporting year must submit form EIA-7A, except for anthracite mines. All anthracite mines that produced 10,000 or more short tons during the reporting year must submit form EIA-7A. Standalone facilities (e.g., preparation plant/tipple/loading dock/train loadout) that worked 5,000 or more hours must submit the EIA-7A. Submit a separate form EIA-7A for each mining operation and standalone facility that meets the reporting criteria.

### PURPOSE

The U.S. Energy Information Administration's (EIA) Form EIA-7A, *Annual Survey of Coal Production and Preparation*, collects coal production data from U.S. coal mining companies. This includes information on the type and status of coal operations, characteristics of coalbeds mined, recoverable reserves, productive capacity and the disposition of coal mined which provides Congress with basic statistics concerning coal supply. These data appear in the *Annual Coal Report*, the *Quarterly Coal Report*, the *Monthly Energy Review*, and the *Annual Energy Review*. In addition, the EIA uses the data for coal supply analyses and in short-term modeling efforts, which produce forecasts of coal supply and prices requested by Congress. The forecast data also appear in the *Short-Term Energy Outlook* and the *Annual Energy Outlook*.

### DUE DATE

Form EIA-7A must be submitted no later than **April 1** of the year following the reporting year.

### HOW TO FILE A RESPONSE

Respondents can submit data by the Internet using an encrypted web system, email, fax, and mail. With the Internet-based option, EIA uses security protocols to protect the information against unauthorized access during transmission. Commonly used email, fax and mail transmissions, including files attached to email messages, are not considered secure electronic methods of transmitting survey data.

**10 What are the longitude and latitude that best defines the center of mining activity for this mining operation?**

**Notes:**

- Longitudes and latitudes may change from year to year to reflect the progress of mining.
- If the readings are in decimal degrees, please convert them to degrees, minutes and seconds. For example, to convert 82.4536 degrees to degrees, minutes and seconds, do the following: 82 degrees multiplied by 27.216 = 27. Then multiple 27 minutes by 12.96 seconds = Mine's location at 82 degrees, 27 minutes and 13 seconds.
- Complete instructions for estimating longitude and latitude can be found at the following link:

**PART 4: PREPARATION PLANTS / TIPPLES / LOADING DOCKS / TRAIN LOADOUTS**

MSHA ID#:

1 Are you reporting for a preparation plant, tipple, loading dock, or train loadout?

- Yes — *Continue to* 2
- No — *Skip to* **Part 5**

2 On December 31st of the reporting year, what was the total amount of coal stockpiled at this preparation plant, tipple, loading dock, or train loadout?

short tons

3 During the reporting year, how much coal was consumed to operate this preparation plant, tipple, loading dock, or train loadout?

- **Exclude** coal consumed to generate electricity that is sold to the grid.
- **Exclude** coal cleaned through normal processing but not consumed.
- **Include** coal consumed for steam utilized for heating, running machinery, etc.

short tons — *If loading dock or train loadout, proceed to* **Part 6**

4 (Preparation Plants and Tipples Only)

During the reporting year, what percentage of the prepared coal originated from underground mines and from surface mines?

Underground Mines.....	<input type="text"/>	%
Surface Mines.....	<input type="text"/>	%
	<hr/>	
		<b>100 %</b>

5 (Preparation Plants and Tipples Only)

During the reporting year, what was the input, output, and refuse material after processing at this preparation plant or tipple?

Input (raw coal processed at this preparation plant)...	<input type="text"/>	short tons
Output (coal after processing).....	<input type="text"/>	short tons
Refuse material after processing.....	<input type="text"/>	short tons

6 (Preparation Plants and Tipples Only)

Under normal operating conditions for this preparation plant or tipple, what is the maximum amount of raw coal that could be processed during one hour?

short tons

**PART 5: UNDERGROUND OR SURFACE MINES**

MSHA ID#:

**1 Are you reporting for an Underground Mine or a Surface Mine?**

- Yes — *Continue to* **2**
- No — *Skip to* **Part 6**

**2 With the existing equipment in place, what is the annual operating capacity of this mine?**

short tons

**3 For each coalbed mined during the reporting year, what is the name, share of total mine production for each coalbed, average thickness, and rank of the coal?**

**Notes:**

- Coal mined from the same bed should be reported on one line. An exception is made if the same bed was mined in different pits or sections and if the average thickness in those locations differ by 20% or more. If so, please report separately the average thickness, percentage, and rank of the coal bed in the different mining locations.
- Rank types include Anthracite, Bituminous, Subbituminous, and Lignite.
- If you need additional space, make copies of Page 10.

Name of Coalbed	Share of Total Mine Production for Each Coalbed	Average Thickness	Rank of the Coal

	%	inches	
	%	inches	

**100 %**

**4 What is the average heat (Btu) content for all coal mined at this mine during the reporting year?**

Btu/lb

**5 As of December 31<sup>st</sup> of the reporting year, what is the estimated amount of coal in the reserve that is feasible (economically/technologically) to extract?**

**Notes:**

- If your recoverable coal reserves adjustment was an increase by more than 20% or a decrease by more than 40% from the previous report year's response, explain the change in **Part 6**

## DEFINITIONS

See the EIA Glossary for coal definitions: <http://www.eia.gov/tools/glossary/>.

## SANCTIONS

The timely submission of Form EIA-7A by those required to report is mandatory under Section 13(b) of the Federal Energy Administration Act of 1974 (FEAA) (Public Law 93-275) as amended (codified at 15 U.S.C. 772). Failure to respond may result in criminal fines, civil penalties, and other sanctions as provided by law. The government may bring a civil action to prohibit reporting violations which may result in a temporary restraining order or a preliminary or permanent injunction without bond. In such a civil action, the court may also issue mandatory injunctions commanding any person to comply with these reporting requirements. **Title 18 U.S.C. 1001 makes it a criminal offense for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious, or fraudulent statements as to any matter within its jurisdiction.**

## REPORTING BURDEN

Public reporting burden for this collection of information is estimated to average 3.25 hours per response, including the time of reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Energy Information Administration, Office of Survey Development and Statistical Integration, EI-21, Forrestal, 1000 Independence Ave., SW, Washington, DC 20585; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

## DISCLOSURE OF INFORMATION

The name and address of the responding company, the mine type or plant type, and location reported on Form EIA-7A is considered public information and may be released in company identifiable form. All other information reported on this form will be protected and not disclosed to the public to the extent that it satisfies the criteria for exemption under the Freedom of Information Act (FOIA), 5 U.S.C. §552, the DOE regulations, 10 C.F.R. §1004.11, implementing the FOIA, and the Trade Secrets Act, 18 U.S.C. §1905.

The Federal Energy Administration Act requires the Energy Information Administration to provide company-specific data to other Federal agencies when requested for official use. The information reported on these forms may also be made available, upon request, to another component of the Department of Energy (DOE); to any Committee of Congress, the Government Accountability Office, or other Federal agencies authorized by law to receive such information. A court of competent jurisdiction may obtain this information in response to an order. The information may be used for any non-statistical purposes such as administrative, regulatory, law enforcement, or adjudicatory purposes.

Data protection methods are applied to the "Total Revenue" from "Open Market Sales," "Captive Market Sales," and "Export Coal Sales" reported in Part 5 to ensure that the risk of disclosure of identifiable information is very small. Data protection methods are not applied to the other aggregate statistical data published from this survey. Thus, there may be some statistics that are based on data from fewer than three respondents, or that are dominated by data from one or two large respondents. In these cases, it may be possible for a knowledgeable person to estimate the information reported by a specific respondent.
