June 16, 2020

Dear Honorable Members:

Axon has always been on the forefront of promoting less lethal technology and transparency for law enforcement. We believe it makes everyone safer. We stand for transparency, accountability, protecting life and protecting truth. We believe *everyone* deserves to get home safe.

Our nation needs a racial reconciliation. The events of these past weeks have made Axon, Americans and people around the world challenge the way we think, speak and act on race-related matters. Congress is in the best position to reform our national policies.

Axon supports comprehensive national reform efforts to create a just policing and justice system in our country. The Justice in Policing Act is an important first step to take.

Axon's vision is to make the bullet obsolete, reduce social conflict and ensure criminal justice systems are fair and effective. After this week we've learned that we can and must do even more. Axon is committed to real action: building technology that helps eradicate racism and excessive force in the justice system.

Axon is committed to change. We did it with the introduction of body-worn cameras and we stand ready to help the Committee in any way that we can. I encourage all Members of Congress to support a meaningful national reform effort.

Protect Life, Protect Truth.
