FISCAL YEAR 2012 NATIONAL DEFENSE AUTHORIZATION BILL

FULL COMMITTEE ISSUES MARK

SECTION-BY-SECTION SUMMARY OF THE LEGISLATIVE PROVISIONS

Section 1—Short Title

This section would provide that the short title of this Act is the National Defense Authorization Act for Fiscal Year 2012.

Section 2—Organization of Act into Divisions; Table of Contents

This section would provide a table of contents for this Act.

Section 3—Congressional Defense Committees

This section would define the term “congressional defense committees” as defined in section 101(a)(16) of title 10, United States Code.

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE I—PROCUREMENT

SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS

Section 101—Authorization of Appropriations

This section would authorize appropriations for Procurement at the levels identified in section 4101 of division D of this Act.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS

Section 201—Authorization of Appropriations

This section would authorize appropriations for research, development, test, and evaluation at the levels identified in section 4201 of division D of this Act.

SUBTITLE B—PROGRAM REQUIREMENTS, RESTRICTIONS, AND LIMITATIONS

Section 213—Limitation on Availability of Funds for Ohio-class Ballistic Missile Submarine Replacement Program

This section would contain four findings concerning the number of submarine launched ballistic missile (SLBM) launchers (missile tubes) planned for the *Ohio*-class ballistic missile submarine (SSBN) replacement, the composition of the deployed nuclear deterrent force of the United States planned under the New Strategic Arms Reduction Treaty (New START), and recent testimony by the commander of the United States Strategic Command.

This section would express a sense of Congress that:

- (1) The long-term ability of the United States to maintain a nuclear force sufficient to address the range of mission requirements necessary to deter, dissuade, and defeat potential adversaries and assure allies and partners must not be comprised solely on the basis of the promise of potential cost savings resulting from the Department's decision to reduce the planned number of missile tubes per *Ohio*-class ballistic missile submarine from 24 to 16; and
- (2) The planned *Ohio*-class ballistic submarine replacement is expected to be in operations through 2080 and therefore near-term design decisions should take into consideration uncertainties in the future threat and strategic environment.

This section would also limit the obligation and expenditure of funds authorized to be appropriated or otherwise made available for fiscal year 2012 for the *Ohio*-class ballistic missile submarine replacement program to not more than 90 percent until the Secretary of Defense submits to the congressional defense committees a report summarizing the analysis that supported the Department's decision to reduce the planned number of missile tubes per submarine to 16. Reporting elements would include: a description of the assumed threat and strategic environment throughout the expected operational lifetime of the program; a description of any assumptions regarding changes in nuclear policy and strategy, and further nuclear reductions; an identification of any missions or requirements that may have increased risk; and a summary of the cost comparison between 16 and 20 missile tube designs, including the accuracy of the cost estimate.

Over the course of the last year, the committee has received inconsistent information on the number of missile tubes per hull planned for the *Ohio*-class ballistic missile submarine replacement. In a May 13, 2010, report to Congress, required by section 1251 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84), the President outlined his SSBN force structure plans: "The Secretary of Defense, based on recommendations from the Joint Chiefs of Staff, has established a baseline nuclear force structure that fully supports U.S. security requirements and conforms to the New START limits... The United States will reduce the number of SLBM launchers (launch tubes) from 24 to 20 per SSBN, and deploy no more than 240 SLBMs at any time." These plans for 20 missile tubes per SSBN were reaffirmed in the joint Department of Energy and Department of Defense February 16, 2011, update to the report required by section 1251. However, on January 10, 2011, the Under Secretary of Defense for Acquisition, Technology, and Logistics issued an acquisition decision memorandum for the *Ohio*-class submarine replacement program whereby the Navy received milestone A approval to proceed with a design based on 16 missile tubes.

The committee remains unclear as to the analysis and assumptions that informed the Department's decision to reduce the planned number of missile tubes per SSBN from 24 to 16, and the rationale for its deviation from the baseline force structure of 20 missile tubes per SSBN outlined in the report required by section 1251, other than the promise of potential cost savings. The committee seeks to hold the Department accountable to providing it with such information.

SUBTITLE D—OTHER MATTERS

Section 252—Preservation and Storage of Certain Property Related to F136 Propulsion System

This section would require the Secretary of Defense to develop and carry out a plan for the preservation and storage of property owned by the Federal Government that was acquired under the F136 propulsion system development contract that would: ensure that the Secretary preserves and stores such property in a manner that would allow the development of the F136 propulsion system to be restarted after a period of idleness, provide for the long-term sustainment and repair of such property; and allow for such preservation and storage to be conducted at either the facilities of the Federal Government or a contractor under such contract; identify supplier base costs of restarting development; and identify any contract modifications, additional facilities or funding that the Secretary determines necessary to carry out the plan. This section would also prohibit the obligation or expenditure of amounts authorized to be appropriated by this Act or otherwise make available for fiscal year 2012 for research, development, test, and evaluation, Navy, or research, development, test and evaluation, Air Force, for the F-35 Lightning II program for activities related to destroying or disposing of the property acquired under the F136 propulsion system development contract. Additionally, this section would require the Secretary of Defense to submit a report to the congressional defense committee, not later than 45 days after the date of enactment of the Act, on the Secretary's plan for the preservation and storage of such property.

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

SUBTITLE F—DISABILITY, RETIRED PAY AND SURVIVOR BENEFITS

Section 651—Monthly Amount and Duration of Special Survivor Indemnity Allowance for Widows and Widowers of Deceased Members of the Armed Forces Affected by Required Survivor Benefit Plan Annuity Offset for Dependency and Indemnity Compensation

This section would increase existing monthly amounts and establish additional monthly amounts paid under the Special Survivor Indemnity Allowance to surviving spouses or former spouses of deceased service members who are denied the full amount of their annuity under the Survivor Benefit Program (SBP) due to the offset required by the receipt of Dependency and Indemnity Compensation (DIC) from the Department of Veterans Affairs. The section would also extend the termination date for the Special Survivor Annuity Allowance authority from October 1, 2017 to October 1, 2021.

This “widows’ tax” has long denied surviving family members the payment of their SBP benefits earned by the service of their spouses and paid for through premium reductions to retired pay. This section would provide an incremental step in the continuing effort to eliminate the DIC offset against SBP annuities. This section would provide the following monthly amounts for the Special Survivor Indemnity Allowance, to include increases through fiscal year 2017 and newly established amounts for fiscal years 2018-2021:

- Fiscal year 2013 from \$90 to \$163;
- Fiscal year 2014 from \$150 to \$200;
- Fiscal year 2015 from \$200 to \$215;

Fiscal year 2016 from \$275 to \$282;
Fiscal year 2017 from \$310 to \$314;
Fiscal year 2018 set at \$9;
Fiscal year 2019 set at \$15;
Fiscal year 2020 set at \$20; and
Fiscal year 2021 set at \$27.

TITLE VII—HEALTH CARE PROVISIONS

SUBTITLE A—IMPROVEMENTS TO HEALTH BENEFITS

Section 701—Annual Enrollment Fees for Certain Retirees and Dependents

This section would express the sense of Congress that career members of the uniformed services and their families make extraordinary sacrifices to protect freedom for all Americans and that those sacrifices constitute pre-payment for health care during retirement. This section would also limit any annual increase in TRICARE Prime enrollment fees to the amount equal to the percentage by which retiree pay is increased beginning October 1, 2012.

704—Transition Enrollment of Uniformed Services Family Health Plan Medicare-Eligible Retirees to TRICARE for Life

This section would prohibit a Medicare eligible military retiree from enrolling in the managed care program of a designated provider after September 30, 2012.

TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

SUBTITLE A—ACQUISITION POLICY AND MANAGEMENT

Section 801—Requirements Relating to Core Logistics Capabilities for Milestone A and Milestone B and Elimination of References to Key Decision Points A and B

This section would amend section 2366a and 2366b of title 10, United States Code, to require the Milestone Decision Authority to certify that a preliminary analysis of core logistics capabilities for each major weapons system has been performed as entrance criteria for entering the technology development phase of a major defense acquisition program (milestone A) and that the core logistics requirements and associated sustaining workloads for the weapons system have been determined as entrance criteria for entering the engineering and manufacturing development phase (milestone B). This section also would require certification that relevant sustainment criteria and alternatives were sufficiently evaluated and addressed in the initial capabilities document to support an analysis of alternatives and the development of key performance parameters for sustainment of the program throughout its projected life cycle. Furthermore, this section would require certification that life-cycle sustainment planning has identified and evaluated relevant sustainment costs through development, production, operation,

sustainment, and disposal of the program, and any alternatives, and that such costs are reasonable and have been accurately estimated.

The committee is aware that the Secretary issued formal guidance on the operation of the defense acquisition system October 18, 2010 which directed space systems to be subject to milestone A and milestone B requirements. Therefore, this section also would strike references to “key decisions points” in section 2366a and 2366b of title 10, United States Code.

Section 802—Revision to Law Relating to Disclosures to Litigation Support Contractors

This section would amend title 10, United States Code, to include a new section relating to the disclosure of confidential commercial, financial or proprietary information, technical data, or other privileged information to a litigation support contractor for the sole purpose of providing litigation support. This section would require the litigation support contractor to execute a contract with the Government agreeing to or acknowledging that any information furnished will be used only for the purpose stated in the contract, that the litigation support contractor will take all precautions necessary to protect the sensitive information, that the sensitive information will not be used by the litigation support contractor to compete against the third party for contracts, and that a violation of any of the above would be basis for the Government to terminate the contract. This section would also repeal a superseded provision in section 2320 of title 10, United States Code.

Section 803—Extension of Applicability of the Senior Executive Benchmark Compensation Amount for Purposes of Allowable Cost Limitations under Defense Contracts

This section would amend section 2324 of title 10, United States Code, by expanding the existing executive compensation cap to apply to any individual performing on a contract rather than certain management employees. The committee is aware that the Defense Contract Audit Agency has shown that there are lower-level executives not subject to the cap and non-executive employees who receive compensation in excess of the benchmark compensation amount. The committee believes that this section would reduce the risk of excessive individual compensation charged to defense contracts.

Section 804—Supplier Risk Management

This section would require the Secretary of Defense to manage supplier risk by directing contracting personnel to use a business credit reporting bureau, or other objective sources of business information, to evaluate supplier risk on all Department of Defense (DOD) contract actions. This section also would require the use of automated, off-the-shelf products to identify suppliers by location and to monitor suppliers for events that may affect their performance, such as a merger or acquisition, or bankruptcy filing.

The committee notes that while the Federal Acquisition Regulation requires that Federal contracting officials determine contractor responsibility prior to contract award, adherence within the Department to this requirement has been inconsistent, often varying both among, and within, individual contracting offices. In addition, the evaluation of supplier risk traditionally has been treated as a one-time event, rather than an ongoing responsibility. As a result, DOD

contracting personnel frequently have limited or belated visibility into changes occurring after contract award that could impact a supplier's ability to meet their requirements.

The committee notes that commercial firms increasingly have sought solutions to manage supplier risk throughout the contract lifecycle. In addition, the committee is aware that the Department of Veterans Affairs has employed a business credit reporting system to assist its acquisition personnel with contractor responsibility determinations. The committee believes that such a supplier risk management initiative would benefit the Department of Defense through cost avoidance (by reducing its exposure to high-risk suppliers), increased efficiency, and a greater return on investment.

The committee also believes that such a tool could be implemented in a manner that focuses on those suppliers that are most likely to be a risk, and could also allow the Department of Defense to evaluate supplier risk with lower-tier suppliers.

Section 805—Extension of Availability of Funds in the Defense Acquisition Workforce Development Fund

This section would make technical amendments to section 1705 of title 10, United States Code, the Defense Acquisition Workforce Development Fund (DAWDF). The committee notes that this section would enable all funds credited, transferred, appropriated, or deposited to the DAWDF to remain available for expenditure in the fiscal year for which it is credited and the 2 succeeding fiscal years.

Section 806—Defense Contract Audit Agency Annual Report

This section would require the Director of the Defense Contract Audit Agency (DCAA) to submit an annual report that summarizes DCAA's audit activities during the previous fiscal year, including significant problems, abuses, and deficiencies, a statistical table showing the total number of audit reports, the length of time taken for each audit, and the questioned dollar value, as well as recommendations for corrective actions. The report also would include a summary of any backlog of pending contractor audits and a rationale for the cause of the backlog. This section would require the annual report to be provided to the congressional defense committees by March 30 of each year and be made available on a public website within 60 days after receipt of the report by Congress. The committee believes that this section would increase transparency and accountability, and facilitate congressional oversight of the Defense Contract Audit Agency.

SUBTITLE B—AMENDMENTS TO GENERAL CONTRACTING AUTHORITIES, PROCEDURES, AND LIMITATIONS

Section 812—Change in Deadline for Submission of Selected Acquisition Reports from 60 to 45 days

This section would amend section 2432(f) of title 10, United States Code, to require the comprehensive annual Selected Acquisition Reports to be delivered to Congress not later than 45 days after the end of the first quarter of the fiscal year. The committee believes that this will enhance congressional oversight.

Section 813—Extension of Sunset Date for Certain Protests of Task and Deliver Order Contracts

This section would amend section 4106(f) of title 41, United States Code, to extend the sunset date to September 20, 2016. The committee is aware that section 843 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181) temporarily expanded the Government Accountability Office's (GAO) jurisdiction to hear bid protests by authorizing it to hear protests on task and delivery orders valued in excess of \$10.0 million. The authority was provided with a sunset in 2011 in order to allow Congress to evaluate the effectiveness of the expanded jurisdiction and gauge the impact of increased workload on GAO. Section 825 of the Ike Skelton National Defense Authorization Act for fiscal year 2011 (Public Law 111-383) extended the sunset date for bid protests on task and delivery orders for defense acquisitions until September 30, 2016. However, section 825 did not address civilian agency acquisitions.

Section 814—Clarification of Department of Defense Authority To Purchase Right-hand Drive Passenger Sedan Vehicles

This section would amend section 2253 of title 10, United States Code, to clarify the cost threshold of \$30,000 per vehicle applies specifically to right-hand drive passenger sedans and does not apply to right-hand drive vehicles such as ambulances, fire trucks, or buses.

Section 815—Amendment relating to Buying Tents, Tarpaulins, or Covers from American Sources

This section would amend section 2533a of title 10, United States Code, to clarify that the domestic source requirement for tents, tarpaulins, or covers includes the materials and components of tents, tarpaulins, or covers.

SUBTITLE C—PROVISIONS RELATING TO CONTRACTS IN SUPPORT OF CONTINGENCY OPERATIONS IN IRAQ OR AFGHANISTAN

Section 821—Restrictions on Awarding Contracts in Support of Contingency Operations in Iraq or Afghanistan to Adverse Entities

This section would allow the Secretary of Defense to void a contract, or task or delivery order that has been awarded or issued by, or on behalf of the Department of Defense, if the Secretary determines that a foreign entity or foreign individual performing on the contract, or task or delivery order, is directly engaged in hostilities or is substantially supporting forces that are engaged in hostilities against the U.S. or its coalition partners conducting operations in support of contingency operations in the Republic of Iraq or the Islamic Republic of Afghanistan.

Section 822—Authority To Use Higher Thresholds for Procurements in Support of Contingency Operations

This section would allow the Secretary of Defense to apply a simplified acquisition threshold of \$1.0 million and micro-purchase threshold of \$25,000 for contracting activities supporting contingency operations in the Republic of Iraq or the Islamic Republic of Afghanistan, regardless of the location of the contracting activity.

Section 823—Authority To Examine Records of Foreign Contractors Performing Contracts in Support of Contingency Operations in Iraq or Afghanistan

This section would allow the Secretary of Defense to examine the records of a foreign contractor, or a foreign subcontractor, performing a contract in support of contingency operations in the Republic of Iraq or the Islamic Republic of Afghanistan. This authority would not apply if the contract was being performed by a contractor or a subcontractor that is a foreign government, or agency of a foreign government, or if precluded by applicable laws. This section also would require the Secretary to issue guidance, not later than 30 days after the date of enactment of this Act, to implement this section.

Section 824—Definitions

This section would define certain terms used in this subtitle.

SUBTITLE C—OTHER MATTERS

Section 831—Miscellaneous Amendments to Public Law 111-383 Relating to Acquisition

This section would make three amendments to the Ike Skelton National Defense Authorization Act for fiscal year 2011 (Public Law 111-383) relating to acquisition. This section would strike the requirement in section 804 that the acquisition process for rapid fielding of capabilities in response to urgent operational needs may only be applied for capabilities that can appropriately be acquired under fixed price contracts. This section also would strike the requirement in section 812 for the Secretary of Defense to issue guidance requiring the use of manufacturing readiness levels as a basis for measuring, assessing, reporting, and communicating manufacturing readiness and risk. This section also would amend section 1073 by allowing, rather than directing, the Secretary of Defense to establish a defense research and development rapid innovation program.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

SUBTITLE A—DEPARTMENT OF DEFENSE MANAGEMENT

Section 902—Redesignation of the Department of the Navy as the Department of the Navy and Marine Corps

This section would designate the Department of the Navy as the Department of the Navy and the Marine Corps and change the title of its secretary to the Secretary of the Navy and Marine Corps. This section would formally recognize the responsibility of the Office of the Secretary of the Navy over both the Navy and Marine Corps and the Marine Corps' status as an equal partner with the Navy.

SUBTITLE C—INTELLIGENCE-RELATED MATTERS

Section 921—Report on Implementation of Recommendations by the Comptroller General on Intelligence Information Sharing

This section would direct the Secretary of Defense to provide a report to the congressional defense committees, the House Permanent Select Committee on Intelligence, and the Senate Select Committee on Intelligence on actions taken to implement the recommendation of the Government Accountability Office (GAO) report, “Intelligence, Surveillance, and Reconnaissance: Establishing Guidance, Timelines, and Accountability for Integrating Intelligence Data Would Improve Information Sharing” (GAO-10-265NI). GAO recommends that the Secretary of Defense direct the Under Secretary of Defense for Intelligence, in coordination with the Chairman of the Joint Chiefs of Staff and the Secretaries of the military services, develop intelligence information sharing guidance, such as a concept of operations, and to provide such direction and prioritization to improve intelligence community information sharing. In addition, this section directs the Comptroller General of the United States to review the Under Secretary’s report to determine whether it is consistent with and adequate to address its recommendation.

The committee is concerned about the extent to which Department of Defense intelligence, surveillance, and reconnaissance efforts are managed in accordance with overarching direction and priorities for sharing intelligence information across the defense intelligence community. The committee encourages the Secretary of Defense to implement the recommendation. The committee also requests that GAO provide it with an update regarding its conclusions from this review as soon as practicable.

Section 922—Insider Threat Detection

This section would require the Secretary of Defense to establish a program for enhanced information sharing protection and insider threat mitigation for the information systems of the Department of Defense in order to detect unauthorized access to, use of, or transmission of, classified or controlled unclassified information.

The committee is concerned with the acute damage to national security of recent unauthorized releases of classified information from the Department of Defense and other Government information systems. The committee notes that the impact of these releases will continue for many years, to the detriment of existing operations in the Islamic Republic of Afghanistan, as well as the reputation and credibility of the United States in international affairs now and in the future.

The committee recognizes that the Department is responding seriously to this event and is implementing safeguards to prevent such a breach again. While the Department should continue to pursue technical security measures, the committee is concerned that the human dimension is not receiving sufficient attention. The committee therefore encourages the Department to conduct a comprehensive analysis of the means by which to detect, respond and mitigate the threat posed by trusted persons inside the organization who would purposely compromise the security of the network (otherwise known as the “insider threat”).

Furthermore, the committee is concerned that the technological and procedural responses may be having a negative impact on the productivity and effectiveness of forces supporting

ongoing operations in areas of hostility. The committee cautions the Department to pay special consideration in how technological or procedural fixes are implemented in operational areas of hostility to ensure that these concerns do not become a significant problem.

SUBTITLE D—TOTAL FORCE MANAGEMENT

Section 931—General Policy for Total Force Management

This section would amend section 129a of title 10, United States Code to require the Secretary of Defense to develop and implement a total force management plan that would determine the appropriate manpower mix of military (Active and Reserve Components), civilian and contractor personnel necessary to accomplish the mission of the Department of Defense (DOD). Overall responsibility for establishing the policies and procedures to implement such a plan would be given to the Under Secretary of Defense for Personnel and Readiness, with responsibility for requirements determination, planning and programming being given to the manpower and force structure authorities for each DOD component.

The committee is aware that DOD Instruction 1100.2 requires the Under Secretary of Defense for Acquisition, Technology, and Logistics to obtain a written statement from each requiring official regarding decisions to contract for support. This section would codify that requirement and also would require the Under Secretary of Defense for Acquisition, Technology, and Logistics to ensure that the policies and procedures governing the acquisition process are consistent with those developed to implement the total force management plan. Furthermore, to ensure that budget decisions are developed in line with these policies, the Under Secretary of Defense (Comptroller) would be required to justify in the annual budget submission any budget decision that may inhibit implementation of the total force management plan.

The committee notes that manpower and force structure personnel should have a greater role in requirements determination, planning, programming, and budgeting. This is intended to ensure that all aspects of the Department of Defense workforce (military, civilian and contractor personnel) are utilized in a balanced and rational fashion.

Section 932—Revisions to Department Of Defense Civilian Personnel Management Constraints

This section would amend section 129 of title 10, United States Code, to require that the civilian personnel of the Department of Defense (DOD) are managed on the basis of workload and in support of the total force management plan developed in accordance with section 129a, as would be amended by this Act. This change would reinforce the committee's position that manpower requirements should be based on mission requirements and not arbitrary cost savings that ignore the workload needs of the DOD components.

Section 933—Additional Amendments Relating to Total Force Management

This section would amend section 113 of title 10, United States Codes, to include an accounting for contractors in the Secretary of Defense annual report to Congress on expenditures, work, and accomplishments of the Department of Defense. The inclusion of contractors in this report would facilitate improved awareness of the role of contractors in accomplishing the mission of the Department. In addition, this section would amend section

1597 of title 10, United States Code, to require that the guidelines put in place related to civilian personnel reductions comply with the total force management plan required by section 129a, title 10, United States Code, as would be amended by this act.

This section also would amend section 863 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383), to include considerations relating to policy for total force management required by section 129a of title 10, United States Code, in the implementation plan required for establishment of requirements processes for the acquisition of services. The committee believes that this is necessary in order to align the processes for the acquisition of services with the manpower requirements determination process required by section 129a.

Section 934—Amendments to Annual Defense Manpower Requirements Report

This section would amend section 115a of title 10, United States Code, to revise the annual defense manpower requirements report to include a projection of the annual Department of Defense (DOD) civilian personnel requirements for the next fiscal year, and the strength levels of the previous year. This change reflects the recognition that DOD civilian personnel should be managed by workload requirements, which may fluctuate during a given year and should be accommodated as necessary. In addition, this section would require the inclusion of an estimate for contractor requirements for support services, as outlined in each military department's service contractor inventory as required by section 2330a of title 10, United States Code. The inclusion of contractors in this report would facilitate an improved awareness of the Department of Defense requirements being performed by contractors.

Section 935—Revisions to Strategic Workforce Plan

This section would amend section 115b of title 10, United States Code to achieve the following outcomes in Department of Defense (DOD) civilian workforce planning requirements:

- (1) Reduce costs associated with planning and allow the Department to improve its implementation efforts by moving from an annual to a biennial report;
- (2) Align the workforce planning assessment period to correspond with existing DOD budget and manpower planning cycles upon which workforce requirements, authorizations, and forecasts are based; and
- (3) Require that the assessment of the appropriate mix of military, civilian, and contractor personnel is aligned with the total force management plan developed in accordance with section 129a, title 10, United States Code, as would be amended by this Act.

While the committee recommends these changes in order to align the Department's strategic civilian workforce plans with existing budget and manpower planning structures and provide time to implement planned strategies, it remains concerned that the Department has not fully complied with the requirements outlined in section 115b of title 10, United States Code. According to a September 2010 report by the Government Accountability (GAO-10-814R), this could result in the Department relying on "incomplete information concerning the size, composition and needs of the civilian workforce. In particular, the Department may not be able to determine whether its investment in strategies to improve the civilian workforce is effective and efficient." Therefore, the committee urges the Department to develop performance measures to assess its progress and guide its civilian workforce planning.

Section 936— Technical Amendments to Requirement for Service Contract Inventory

This section would amend section 2330a(c) of title 10, United States Code, to provide additional clarity regarding the types of contracted services to be inventoried and the manner in which contractor full-time equivalents are captured. In addition, this section would more clearly delineate the statutory responsibilities and roles in developing guidance and implementing particular aspects of the statute. This section also would direct the Under Secretary of Defense for Personnel and Readiness and the Under Secretary of Defense (Comptroller) to develop and promulgate guidance specific to the review requirements outlined in paragraph (e) of 2330a of title 10, United States Code. This clarification is intended to ensure that the Department of Defense's total force manpower management equities are fully represented.

Section 937—Modification of Temporary Suspension of Public-Private Competitions for Conversion of Department of Defense Functions to Contractor Performance

This section would lift the temporary suspension of Department of Defense public-private competitions that was included in section 325 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84). Section 325 temporarily suspended the authority to initiate public-private competitions until the Secretary of Defense provided a report to Congress on the conduct of such competitions and certified compliance with certain statutory requirements. This section would eliminate the compliance certification and lift the suspension 30 days after receipt by Congress of the Secretary of Defense report, and after an assessment of the report is conducted by the Comptroller General of the United States.

The committee notes that the moratorium already could have been lifted if the Department had complied with the requirements of Section 325 under the time frame outlined in that section. However, the committee is taking this action to ensure that the report is delivered promptly so that the Department can reinstate the public-private competition process once the reporting requirements are complied with.

Section 938—Preliminary Planning and Duration of Public-Private Competitions

This section would amend section 2461 of title 10, United States Code, to place the responsibility to issue and maintain guidance and procedures for preliminary planning for public-private competitions with the Under Secretary of Defense for Personnel and Readiness. Currently all elements of public-private competitions are the responsibility of the Under Secretary of Defense for Acquisition, Technology, and Logistics. However, the committee believes that preliminary planning for public-private competitions should include an increased and more active role for the manpower and personnel communities, which have greater expertise in determining manpower requirements, whether military, civilian, or contractor personnel. While the committee believes that the manpower and personnel communities should remain actively engaged throughout the entirety of the process, the conduct of the acquisition component of the competition remains the responsibility of the Under Secretary of Defense for Acquisition, Technology, and Logistics, which has the requisite acquisition expertise. However, the committee recommends the Under Secretary of Defense for Acquisition, Technology, and Logistics realign responsibility for public-private competitions from the Deputy Under Secretary

for Installations and Environment to the Director for Defense Procurement and Acquisition Policy.

Section 939— Conversion of Certain Functions from Contractor Performance to Performance by Department of Defense Civilian Employees

This section would amend section 2463 of title 10, United States Code, to require the conversion of any inherently governmental function to performance by Department of Defense (DOD) civilian employees. The committee notes that this requirement was not specifically included in section 2463 when it was enacted originally because it was presumed that such functions were not being performed by contractors. However, the committee is aware that was a false presumption. For example, according to a report by the Government Accountability Office, “Defense Acquisitions: Further Action Needed to Better Implement Requirements for Conducting Inventory of Service Contract Activities, January 2011”, within the Department of the Army, more than 2,000 contractor full-time equivalents are performing work that is inherently governmental, and an additional 45,934 Army contractors are performing activities deemed closely associated with inherently governmental functions. The committee finds this troubling and urges the military services, particularly the Army, to convert such functions immediately to performance by DOD civilian employees.

In addition, this section would require a cost analysis and a savings differential before converting certain commercial functions to performance by DOD civilian employees. This requirement would be applied only for the conversion of functions that are not inherently governmental. This section also would require procedures to be developed to notify a contractor of the intent to insource a contract on which the contractor is currently performing; a copy of the contractor notification also would be provided to the congressional defense committees. The intent of the notification is to provide fair notice to affected contractors but not to delay or stop an insourcing initiative.

Subtitle E—Quadrennial Roles and Missions and Related Matters

Section 951—Transfer of Provisions Relating to Quadrennial Roles and Missions Review

This section would amend title 10, United States Code, to transfer the requirement for the Chairman of the Joint Chiefs of Staff to conduct an assessment of roles and missions of the Armed Forces from section 118b to section 153, and to enhance the chairman’s role in advising the Secretary of Defense on the assignment of functions of the Armed Forces in order to obtain maximum efficiency and effectiveness of the Armed Forces.

Section 952—Revisions to Quadrennial Roles and Missions Review

This section would amend section 118b of title 10, United States Code, to enhance the requirements of the Quadrennial Roles and Missions Review by requiring the review to include an assessment of the functions and capabilities of the department of Defense and its major components to achieve the objectives of the national defense strategy and the national military strategy.

Section 953—Amendment to Presentation of Future-Years Budget and Comptroller General Report on Budget Justification Material

This section would amend section 944 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181) to include the functions of each of the armed forces as identified under the most recent Quadrennial Roles and Missions Review pursuant to section 118b of title 10, United States Code. This section also would require the Comptroller General of the United States to review the sufficiency of Department of Defense regulations, policies, and guidance governing the construction of budget exhibits and to provide recommendations to improve the consistency, clarity, accuracy, and completeness of the Department of Defense’s budget justification material.

Section 954—Chairman of the Joint Chiefs of Staff Assessment of Contingency Plans

This section would amend paragraph (b)(1) of section 153 of title 10, United States Code, to require the Chairman of the Joint Chiefs of Staff submit to Congress, as part of the Chairman’s assessment of risks under the National Military Strategy submitted pursuant to paragraph (b)(2) of such section, an assessment of the critical deficiencies and strengths in force capabilities (including manpower, logistics, intelligence, and mobility support) identified during the preparation and review of contingency plans of each geographic combatant commander, and assess the effect of such deficiencies and strengths on meeting national security objectives, policy, and strategic plans. The committee notes that the Chairman of the Joint Chiefs of Staff is already required to advise the Secretary of Defense on such information, in accordance with Department of Defense Directive 5100.01. This section would further amend paragraph (b)(2) of section 153 of title 10, United States Code, to require the Secretary of Defense to submit to Congress a plan for mitigating a critical deficiency in force capability for a contingency plan, as identified by the Chairman in paragraph (b)(1) of such section, as amended.

SUBTITLE F—OTHER MATTERS

Section 961—Deadline Revision for Report on Foreign Language Proficiency

This section would amend section 958 of the National Defense Authorization Act of Fiscal Year 2008 (Public Law 110-181) by striking “annually thereafter” in subsection (a) and inserting “by June 30 each year thereafter;” and by striking “December 31, 2013” in subsection (d) and inserting “June 30, 2013”.

Section 962—Military Activities in Cyberspace

This section would affirm that the Secretary of Defense has the authority to conduct military activities in cyberspace. The committee recognizes that because of the evolving nature of cyber warfare, there is a lack of historical precedent for what constitutes traditional military activities in cyberspace.

In particular, this section would clarify that the Secretary of Defense has the authority to conduct clandestine cyberspace activities in support of military operations pursuant to the Authorization for the Use of Military Force (Public Law 107-40; 50 U.S.C. 1541 note) outside of

the United States or to defend against a cyber attack on an asset of the Department of Defense.

The committee notes that al Qaeda, the Taliban, and associated forces are increasingly using the internet to exercise command and control as well as to spread technical information enabling attacks on U.S. and coalition forces in areas of ongoing hostilities.

While these terrorist actions often lead to increased danger for U.S. and coalition forces in areas of ongoing hostilities, terrorists often rely on the global reach of the internet to communicate and plan from distributed sanctuaries throughout the world. As a result, military activities may not be confined to a physical battlefield, and the use of military cyber activities has become a critical part of the effort to protect U.S. and coalition forces and combat terrorism globally.

In certain instances, the most effective way to neutralize threats and protect U.S. and coalition forces is to undertake military cyber activities in a clandestine manner. While this section is not meant to identify all or in any way limit other possible military activities in cyberspace, the Secretary of Defense's authority includes the authority to conduct clandestine military activities in cyberspace in support of military operations pursuant to an armed conflict for which Congress has authorized the use of all necessary and appropriate force or to defend against a cyber attack on a Department of Defense asset.

Because of the sensitivities associated with such military activities and the need for more rigorous oversight, this section would require quarterly briefings to the congressional defense committees on covered military activities in cyberspace.

TITLE X—GENERAL PROVISIONS

SUBTITLE A—FINANCIAL MATTERS

Section 1001—General Transfer Authority

This section would allow the Secretary of Defense to make transfers between any amounts of authorizations for fiscal year 2012 in division A of this Act. This section would limit the total amount transferred under this authority to \$4.0 billion. This section would also require prompt notification to Congress of each transfer made.

Section 1002—Budgetary Effects of this Act

This section would specify that the budgetary effects of this Act for purposes of the Statutory Pay-As-You-Go Act of 2010 (Public Law 111-139) will be determined by reference to a statement submitted for printing in the Congressional Record by the chairman of the House Committee on the Budget.

SUBTITLE B—COUNTER-DRUG ACTIVITIES

Section 1011—Extension of Authority for Joint Task Forces To Provide Support to Law Enforcement Agencies Conducting Counterterrorism Activities

This section would extend, by 1 year, the support by joint task forces under section 1022(b) of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108-136), as most recently amended by section 1012 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383).

Section 1012—Extension of Authority of Department of Defense To Provide Additional Support for Counterdrug Activities of other Governmental Agencies

This section would extend, by 2 years, the authority of the Department of Defense to provide additional support to counterdrug activities of other governmental agencies under section 1004 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510).

Section 1013— One-Year Extension of Authority To Provide Additional Support for Counter-Drug Activities of Certain Foreign Governments

This section would extend, by 1 year, the authority to provide support for counter-drug activities of certain foreign governments under subsection (a)(2) of section 1033 of the National Defense Authorization Act for Fiscal Year 1998 (Public Law 105-85), as most recently amended by section 1014(a) of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383).

Section 1014—Extension of Authority To Support Unified Counter-Drug and Counterterrorism Campaign in Colombia

This section would extend, by 1 years, the unified counter-drug and counterterrorism campaign in the Republic of Colombia under section 1021 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as most recently amended by section 1011 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383). The committee recognizes that, although the Government of Colombia has made significant progress combating narcotics trafficking and designated terrorist organizations such as Revolutionary Armed Forces of Colombia (FARC), National Liberation Army (ELN), and the United Self-Defense Forces of Colombia (AUC), these authorities are still required to consolidate the strategic gains made over the past decade.

SUBTITLE D—COUNTERTERRORISM

Section 1031—Definition of Individual Detained at Guantanamo

This section defines the term “individual detained at Guantanamo” for purposes of subtitle D.

Section 1033—Clarification of Right To Plead Guilty in Trial of Capital Offense by Military Commission

This section would clarify an accused’s right to plead guilty to a capital offense before a military commission.

The committee believes that a guilty plea should only be accepted if the military judge addresses the accused personally and determines that the plea is knowing and voluntary. The committee also believes that the parties should be required to disclose the terms of any plea agreement in open court at the conclusion of sentencing, unless the military judge for good cause allows the parties to disclose the plea agreement in camera. While the Manual for Military Commissions addresses some of these areas, the Secretary of Defense should ensure that the Manual fully addresses these issues.

Section 1034—Affirmation of Armed Conflict with Al-Qaeda, the Taliban, and Associated Forces

This section would affirm that the United States is engaged in an armed conflict with al Qaeda, the Taliban, and associated forces pursuant to the Authorization for Use of Military Force (Public Law 107-40; 50 U.S.C. 1541 note). This section would also affirm that the President's authority pursuant to the Authorization for Use of Military Force includes the authority to detain certain belligerents until the termination of hostilities.

The committee notes that as the United States nears the tenth anniversary of the attacks on September 11, 2001, the terrorist threat has evolved as a result of intense military and diplomatic pressure from the United States and its coalition partners. However, Al Qaeda, the Taliban, and associated forces still pose a grave threat to U.S. national security. The Authorization for Use of Military Force necessarily includes the authority to address the continuing and evolving threat posed by these groups.

The committee supports the Executive Branch's interpretation of the Authorization for Use of Military Force, as it was described in a March 13, 2009, filing before the U.S. District Court for the District of Columbia. While this affirmation is not intended to limit or alter the President's existing authority pursuant to the Authorization for Use of Military Force, the Executive Branch's March 13, 2009, interpretation remains consistent with the scope of the authorities provided by Congress.

Section 1035—Requirement for National Security Protocols Governing Detainee Communications

This section would require the Secretary of Defense to submit to the congressional defense committees a national security protocol governing communications of each individual detained at U.S. Naval Station, Guantanamo Bay, Cuba. The committee believes that all communications for such individuals should be reviewed for the protection of the Armed Forces and other personnel at Guantanamo Bay as well as to prevent the unauthorized disclosure of classified information.

Section 1036—Process for the Review of Necessity for Continued Detention of Individuals Detained at Naval Station, Guantanamo Bay, Cuba

This section would require the Secretary of Defense to establish a review process to determine whether the continued detention of individuals detained at U.S. Naval Station,

Guantanamo Bay, Cuba, is necessary to protect U.S. national security. This section would not affect the jurisdiction of any Federal court to determine the legality of detention of any individual detained at Guantanamo Bay.

Section 1037—Prohibition on Use of Funds To Construct or Modify Facilities in the United States To House Detainees Transferred from Naval Station Guantanamo Bay, Cuba

This section would prohibit the Secretary of Defense from using any of the funds available to the Department of Defense for fiscal year 2012 to modify or construct any facility in the United States, its territories, or possessions to house any detainee transferred from U.S. Naval Station Guantanamo Bay, Cuba, for the purposes of detention or imprisonment in the custody or under the effective control of the Department of Defense.

Section 1038—Prohibition on Family Member Visitation of Individuals Detained at Naval Station, Guantanamo Bay, Cuba

This section would prohibit the Secretary of Defense from using funds available to the Department of Defense for fiscal year 2012 for the purpose of allowing family members to visit individuals detained at U.S. Naval Station, Guantanamo Bay, Cuba.

Section 1039—Prohibition on the Transfer or Release of Certain Detainees to or within the United States

This section would prohibit the Secretary of Defense from using funds available to the Department of Defense for fiscal year 2012 to transfer or release certain detainees to or within the United States, its territories, or possessions. This prohibition applies to individuals detained at U.S. Naval Station, Guantanamo Bay, Cuba, and to individuals detained by the Department of Defense overseas pursuant to the Authorization for Use of Military Force (Public Law 107-40; 50 U.S.C. 1541 note).

Section 1040—Prohibitions Relating to the Transfer and Release of Certain Detainees to or within Foreign Countries

This section would prohibit the Secretary of Defense from using any of the funds available to the Department of Defense for the fiscal year 2012 to transfer or release individuals detained at U.S. Naval Station, Guantanamo Bay, Cuba, to or within a foreign country or any other foreign entity. This prohibition would apply unless the Secretary of Defense, in consultation with the Secretary of State, certifies to Congress at least 30 days prior to the transfer of any such individual, that the government of the country or the recognized leadership of the entity to which the individual would be transferred:

- (1) is not a designated state sponsor of terrorism or a designated foreign terrorist organization;
- (2) maintains effective control over each detention facility in which an individual is to be detained if the individual is to be housed in a detention facility;
- (3) is not, as of the date of the certification, facing a threat that is likely to substantially affect its ability to exercise control over the individual;

- (4) has agreed to take effective steps to ensure that the individual cannot take action to threaten the United States, its citizens, or its allies in the future;
- (5) has taken such steps as the Secretary of Defense determines are necessary to ensure that the individual cannot engage or reengage in any terrorist activity;
- (6) has agreed to share any information with the United States that is related to the individual or any associates of the individual and could affect the security of the United States, its citizens, or its allies; and
- (7) has agreed to allow appropriate agencies of the United States to have access to the individual, if requested.

This section would also prohibit the Secretary of Defense from using any funds for the transfer of any such individual to the custody or effective control of a foreign country or any other foreign entity if there is a confirmed case of any individual transferred from U.S. Naval Station, Guantanamo Bay, Cuba, to the same country or entity who engaged in terrorist activity subsequent to their transfer. The Secretary of Defense would be authorized to waive this additional prohibition if the Secretary of Defense certifies that such a transfer would be in the national security interests of the United States and certifies that the general requirements relating to other transfers or releases to foreign countries or entities described above have been met.

While this section does not prohibit the transfer of third country nationals detained at theater-level detention facilities in the Islamic Republic of Afghanistan, the committee believes that determinations as to the disposition of such individuals who continue to pose a threat to U.S. national security should be carefully reviewed and evaluated. This is of particular concern as primary responsibility for detention operations transitions to the Government of Afghanistan.

SUBTITLE F—FINANCIAL MANAGEMENT

Section 1061—Amendments Relating to Financial Management Workforce

This section would establish a financial management certification program for the Department of Defense (DOD). The committee concurs with the Department on the need to develop capable financial managers that understand the advanced fiscal concepts incorporated with the management of the United States' scarce monetary resources. More than 60 percent of the DOD financial community exists outside the auditing, accounting, and financial management job classifications. In addition, the committee notes that this program should help facilitate the Department's ability to achieve clean financial audits by 2017, as required by the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84). Furthermore, the committee notes that this program also should ensure that financial managers are able to fully understand total force management issues, and the impact of budget decisions on manpower requirement decisions. Future budget resource managers need to be developed with a broad knowledge base.

However, the committee is concerned that the construction of such a program will create yet another training development track within the financial community. The committee notes that there are similar tracks within each service. For this new initiative to be successful, and to further the efficiency initiatives within the Department, the Under Secretary of Defense for Personnel and Readiness, in consultation with the Office of the Under Secretary of Defense (Comptroller) should look to consolidate these multiple training development programs to

effectively train the financial management community, while considering the unique fiscal structures and management held within each service. Incorporating these multiple tracks into a single defense-wide development strategy would ensure that the Department can develop the most capable financial management cadre for future fiscal success.

Section 1062—Reliability of Department of Defense Financial Statements

This section would amend section 1008(c) of the National Defense Authorization Act of Fiscal Year 2002 (Public Law 107-107; 115 Stat. 1206; 10 U.S.C. 113 note) by striking “Not later than October 31” and inserting “Not later than the date that is 180 days prior to the date set by the Office of Management and Budget for the submission of financial statements”.

Section 1063—Financial Management Personnel Competency Assessment

This section would require the Chief Management Officer (CMO) of the Department of Defense, in coordination with the CMO of each military department, to identify, within 60 days after the date of enactment of this Act, the number of financial management personnel and the financial and budgetary skills required to: (1) effectively perform financial and budgetary accounting, including reconciling fund balances with Treasury; (2) document processes and maintain internal controls for financial and budgetary accounting cycles; and (3) maintain professional certification standards. This section would further require that within 120 days after the date of enactment of this Act, the Under Secretary of Defense (Comptroller) and the Under Secretary of Defense for Personnel and Readiness issue joint guidance regarding the assessment of the competency of the Department of Defense financial management personnel to perform such financial and budgetary accounting skills. Following the issuance of such guidance, this section would require the CMO of the Department of Defense and the CMO of each military department to conduct a competency assessment of the financial management personnel of the defense agencies and military departments, respectively, and to each submit to the Secretary of Defense a report on such an assessment, along with a corrective action plan for any skill gaps identified. This section would require the Secretary of Defense to submit a report to the congressional defense committees regarding the assessment and the corrective action plans of the CMOs within 270 days after the date of enactment of this Act. Finally, this section would require each CMO to designate in the report to the Secretary of Defense which office will be responsible for monitoring progress in the implementation of any corrective action plan submitted.

Section 1064—Tracking Implementation of Department of Defense Efficiencies

This section would require the Comptroller General of the United States, for each fiscal year 2012-16, to assess the extent to which the Department of Defense is tracking and realizing the savings proposed pursuant to the initiative led by the Secretary of Defense to identify at least \$100.0 billion in efficiencies during the period of fiscal year 2012-16. This section would require the Comptroller General to submit an annual report on the prior fiscal year’s assessment and the Comptroller General’s associated recommendations to the congressional defense committees starting on October 30, 2012 and concluding on October 30, 2016.

Sec. 1065—Business Case Analysis for Department of Defense Efficiencies

This section would require the Comptroller General of the United States to carry out an assessment of the extent to which components of the Department of Defense conducted business case analysis prior to recommending and implementing efficiencies initiatives. This section would require that such an assessment: (1) use a case study approach, (2) identify best practices used by components of the Department of Defense; and (3) identify deficiencies in the analysis conducted. This section would further require, within 180 days after the date of enactment of this Act, the Comptroller General to submit a report of such an assessment to the congressional defense committees. This section would require the Comptroller General to include in the report recommendations relating to the appropriate application of business case analysis and best practices that should be adopted by the Department of Defense prior to the implementation of any future effort to identify savings in defense operations.

The committee intends this assessment to be selective and encourages the Comptroller General to choose case studies from each of the four major tracks identified by the Secretary of Defense in his May 8, 2010 speech at the Eisenhower Library in Abilene, Kansas. The committee intends that this retrospective assessment form the basis of the Comptroller General's recommendations, to assist the Department of Defense as the Department responds to any future guidance it receives from the President to identify additional savings for fiscal year 2013 and beyond. While the committee supports the reduction of waste and the improvement of efficiency within the Department of Defense, the committee is concerned that short-sighted decisions may be made to achieve savings targets, unless rigorous analysis is conducted in advance of such decision-making.

Section 1066—Financial Improvement and Audit Readiness Plan

This section would establish a specific subactivity group within each of the operation and maintenance appropriations in section 4301 of this Act to identify funds to be executed in support of the Financial Improvement and Audit Readiness (FIAR) plan. This section would also require additional detail regarding subordinate activities associated with interim milestones for audit readiness, as required to be included in the FIAR plan pursuant to section 881 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383).

SUBTITLE G—STUDIES AND REPORTS

Section 1071—Repeal of Certain Report Requirements

This section would repeal certain report requirements for the Department of the Defense that were deemed to be redundant or no longer relevant.

Section 1072—Biennial Review of Required Reports

This section would require the Secretary of Defense to conduct a review, on a biennial basis, of the Department of Defense reports required to be submitted to Congress. In conducting the review, the Secretary would evaluate the content, quality, cost, and timeliness of the Department of Defense's compliance with the reporting requirements. This section also would provide the Secretary the authority to recommend reports for repeal or modification to the

congressional defense committees based on the results of the biennial review. This section also would require the Secretary to conduct a biennial review of the required reports internal to the Department and to take such steps as necessary to eliminate or modify reports deemed by the Secretary to be redundant, overly burdensome, of limited value, unjustifiably costly, or otherwise determined to unduly reduce the efficiency of the Department.

Section 1073—Transmission of Reports in Electronic Format

This section would amend section 122a of title 10, United States Code, to require the Secretary of Defense to transmit reports required by law in electronic format to the maximum extent practical in order to reduce the printing and reproduction costs of the Department of Defense.

Section 1074—Modifications to Annual Aircraft Procurement Plan

This section would amend section 231(a) of title 10, United States Code, which requires the Secretary of Defense to provide an annual aviation report to the congressional defense committees covering a 30-year time period. This section would require the Secretary of Defense to: provide more fidelity on cost estimates; include the Department of the Army aviation programs in the report; include an inventory of all Department of Defense aircraft; and include remotely piloted vehicles, rotary-wing aircraft, and operational support and executive airlift programs in the report.

Section 1076—Report on Homeland Defense Activities

This section would amend section 908(a) of title 32, United States Code, by adding at the end “For any fiscal year during which no assistance was provided, and no activities were carried out, under this chapter, a report is not required to be submitted under this section.”

Section 1078—Department of Defense Assessment of Industrial Base for Potential Shortfalls

This section would require the Secretary of Defense to conduct an assessment of the United States industrial base to identify potential gaps that might affect military readiness. Such assessment would be required within 180 days after date of enactment of this Act. In addition, the Comptroller General of the United States would be required to review the Secretary of Defense’s assessment, including completeness of the report and the reasonableness of the methodology and recommendations.

The Department of Defense relies on thousands of suppliers to ensure that it has the weapons, supporting equipment, and raw materials it needs to support current and future conflicts against conventional opponents. However, the committee is concerned that increasing globalization in the defense industry presents uncertainty in the ability of the United States to maintain a reliable and sufficient supplier base in the event of such conflicts. In addition, defense industry prime contractors are relying more on subcontractors, including commercial suppliers, which can limit the visibility into the lower tiers of the supplier base. The committee notes that studies by the Government Accountability Office have found that the Department lacks a framework and consistent approach for managing supplier base concerns such as counterfeit parts in the supply chain, and reliance on rare earth materials from the People’s Republic of

China in military equipment and systems. Furthermore, the committee is concerned that the Department has not taken steps to identify supplier-base availability for defense needs beyond a 5-year time frame. Therefore, the committee encourages the Secretary of Defense to address these deficiencies in the required report and to provide a specific assessment of the vulnerabilities posed to defense systems as a result of potential counterfeiting of sub-components manufactured in China.

SUBTITLE H—MISCELLANEOUS AUTHORITIES AND LIMITATIONS

Section 1081—Exemption from Freedom of Information Act for Data Files of the Military Flight Operations Quality Assurance Systems of the Military Departments

This section would amend section 2254 of title 10, United States Code, to allow the Secretary of Defense to exempt data files of the Military Flight Operations Quality Assurance (MFOQA) systems of the Department of Defense from the Freedom of Information Act (5 U.S.C. 552) and would direct the Secretary of Defense to prescribe guidance for implementation of this authority. The committee is concerned that the release of MFOQA data, either when viewed in the aggregate, when combined with other information already in the public domain, or already subject to release under the Freedom of Information Act, could reveal sensitive information regarding the tactics, techniques, procedures, processes, and operational and maintenance capabilities concerning military combat aircraft, units, and aircrew.

Section 1082—Limitation on Procurement and Fielding of Light Attack Armed Reconnaissance Aircraft

This section would require the Secretary of Defense to review the capability of the elements of the Department of Defense to conduct light attack and armed reconnaissance missions, or to fulfill requests of partner nations for training in the conduct of such missions, in the next Quadrennial Roles and Missions Review required by section 118b of title 10, United States Code. This section would also prohibit obligation or expenditure of funds for the start of any new program to procurement of field light attack and armed reconnaissance aircraft until the Joint Requirements Oversight Council validates a requirement for such aircraft and the Under Secretary of Defense for Acquisition, Technology, and Logistics approves the acquisition strategy for such aircraft. This section would allow the Secretary to waive the prohibition should he determine that acquisition of the aircraft is necessary to support contingency operations in Republic of Iraq or Islamic Republic of Afghanistan.

The committee is concerned by the disjointed approach taken by the Department of Defense in its many efforts to acquire and field light attack and armed reconnaissance aircraft. The committee is aware of efforts by the Navy and Marine Corps to field an operational demonstration of light attack and armed reconnaissance aircraft in Afghanistan. The committee has not supported these efforts because there has not been a validated requirement for such aircraft and the Combined Force Air Component Commander has not indicated a need for additional assets to provide light attack and armed reconnaissance capability for the U.S. Central Command theater of operations. The committee is also aware that the budget request contained \$158.5 million for a new program to procure nine Light Attack Armed Reconnaissance (LAAR) aircraft for the Air Force for fiscal year 2012. The LAAR program is proposed to eventually

procure 15 aircraft to provide the Air Force capability to train foreign air forces in light attack aircraft to facilitate building partnership capacity (BPC). The committee is not aware of a validated requirement for such aircraft and is concerned that the use of Air Force procurement funds for the sole purpose of BPC may be in violation of section 1301(a) title 31, United States Code.

Section 1083—Use of State Partnership Program Funds for Civilians and Non-Defense Agency Personnel

This section authorizes the National Guard to use up to \$3.0 million of the funds made available through the State Partnership Program to pay travel and per diem costs associated with the participation of U.S. and foreign civilian and non-defense ministry personnel in authorized National Guard State Partnership Program events.

SUBTITLE I—OTHER MATTERS

Section 1094—Mandatory Implementation of the Standing Advisory Panel on Improving Coordination Among the Department of Defense, the Department of State, and the United States Agency for International Development on Matters of National Security

This section would amend section 1054 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417) to require the Secretary of Defense, the Secretary of State, and the Administrator of the United States Agency for International Development (USAID) to jointly establish a standing advisory panel to advise, review, and make recommendations on ways to improve coordination among the Department of Defense, the Department of State, and USAID on matters relating to national security, including reviewing their respective roles and responsibilities.

The committee believes this panel would provide invaluable, objective information and recommendations to both the agencies and Congress about how to improve interagency coordination and collaboration. The committee encourages the panel to review and make recommendations on coordination among, and the respective roles and responsibilities of, the agencies in activities such as stability operations, foreign assistance, including security assistance, strategic communications, public diplomacy, and countering proliferation of weapons of mass destruction. Further, the committee encourages the panel to review and make recommendations on: the structures and systems used to coordinate policymaking and policy execution among the agencies; efforts to share lessons learned; the coordination of activities conducted abroad by the agencies or their contractors; the processes and systems for providing and incentivizing interagency education, training, and rotational assignment opportunities to agency personnel; and other matters as the panel considers appropriate.

Section 1095—Number of Navy Carrier Air Wings and Carrier Air Wing Headquarters

This section would require the Secretary of the Navy to maintain a minimum force structure of 10 aircraft-carrier air-wings and a dedicated headquarters for each carrier air-wing.

Section 1096—Display of Annual Budget Requirements for Organizational Clothing and Individual Equipment

This section would require the Secretary of Defense to submit a budget justification display that covers programs and activities for procurement of organizational clothing and individual equipment (OCIE). The committee notes that the report on the acquisition strategy of OCIE required by the committee report (H. Rept. 111-491) accompanying the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) has not been delivered. The committee continues to be concerned that the military services are reliant on overseas contingency operation requests to fund OCIE requirements and believes that greater transparency in annual budget justification materials would enhance oversight.

Section 1098—Inclusion of Religious Symbols as Part of Military Memorials

This section would add a new section to chapter 21 of title 36, United States Code, and would authorize the inclusion of religious symbols as part of a military memorial that is established or acquired by the U.S. Government. This section would also authorize the inclusion of religious symbols on certain military memorials that are not established by the U.S. Government.

TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

SUBTITLE A—ASSISTANCE AND TRAINING

Section 1202—Modification and Extension of Authorities Relating to Program To Build the Capacity of Foreign Military Forces

This section would extend, by 1 year, the authorities relating to programs to build the capacity of foreign military forces under section 1206 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163), as most recently amended by section 1207(a) of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383). This section would increase the amount authorized from fiscal year 2011 by \$50.0 million, for a total of \$400.0 million in fiscal year 2012. This section would also increase the limitation on the amount for building capacity to participate in or support military and stability operations from fiscal year 2011 by \$50.0 million, for a total of \$150.0 million in fiscal year 2012.

SUBTITLE B—MATTERS RELATING TO IRAQ, AFGHANISTAN, AND PAKISTAN

Section 1211—Authority To Establish a Program to Develop and Carry Out Infrastructure Projects in Afghanistan

This section would extend for 1 year, through the end of fiscal year 2012, the Afghanistan Infrastructure Fund established under section 1217 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383). The committee further recommends increasing the amount authorized under this provision to \$475.0 million in order to undertake high-priority, large-scale infrastructure projects in support of the civil-military campaign in the Islamic Republic of Afghanistan.

Section 1212—Commanders' Emergency Response Program in Afghanistan

This section would authorize the use of operation and maintenance funds made available to the Department of Defense for fiscal year 2012 to provide funds for the Commanders' Emergency Response Program in the Islamic Republic of Afghanistan. This section would authorize \$425.0 million for activities in fiscal year 2012, and would require the Secretary of Defense to provide quarterly reports to the congressional defense committees.

The committee notes that this section does not authorize the use of the Commanders' Emergency Program in Iraq, as previously authorized by section 1202 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 106-163), as amended most recently by section 1212 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383). The remaining U.S. forces in the Republic of Iraq are operating in a strictly training and advisory capacity to Iraqi Security Force units. The committee believes that any immediate humanitarian needs such units encounter should be addressed through Iraqi funding sources.

Section 1213—Extension of Authority for Reimbursement of Certain Coalition Nations for Support Provided to United States Military Operations

This section would extend, by 1 year, section 1232 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), as most recently amended by section 1213 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383). This section would authorize the Secretary of Defense to reimburse any key cooperating nation for: (a) logistical, military, and other support provided by that nation to or in connection with U.S. military operations in Operation Enduring Freedom; or (b) logistical and military support provided by that nation to confront the threat posed by Al-Qaeda, the Taliban, and other militant extremists in the Islamic Republic of Pakistan. The total amount of reimbursements made under this authority during fiscal year 2012 would not exceed \$2.2 billion. The congressional notification and reporting requirements relating to reimbursement of Pakistan for support provided by Pakistan as required by section 1232 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), as amended by section 1213 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383), would apply to Coalition Support Fund reimbursements authorized by this section.

Section 1214—Extension of Pakistan Counterinsurgency Fund

This section would extend, by 1 year, section 1224(h) of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84), as most recently amended by section 1220 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383), to provide assistance to the security forces of the Islamic Republic of Pakistan to build and maintain those forces' counterinsurgency capability.

Section 1215—Report on Extension of United States-Iraq Status of Forces Agreement

This section would require the Secretary of Defense, in consultation with the Secretary of State, to provide a formal notification to the Committees on Armed Services and Foreign Relations of the Senate and the Committees on Armed Services and Foreign Affairs of the House of Representatives if the United States Government and the Government of the Republic of Iraq

complete an agreement permitting the United States to maintain a force presence in Iraq above that envisioned for the Office of Security Cooperation-Iraq (OSC-I). This section would require the Secretary of Defense to notify the congressional defense committees should no such agreement be reached by December 31, 2011. In the absence of such an agreement, the Secretary of Defense shall submit a report to the Committees on Armed Services and Foreign Relations of the Senate and the Committees on Armed Services and Foreign Affairs of the House of Representatives by January 31, 2012 outlining how Department of Defense participation in OSC-I programs will address the capability gaps of the Iraqi Security Forces, should the Government of Iraq request such assistance. This section would also require the Secretary to submit an update to such a report concurrent with the submission of the President's budget requests for fiscal years 2014-15, submitted to Congress pursuant to section 1105(a) of title 31, United States Code, unless such an agreement is reached. The committee intends for these updates to cover Department of Defense OSC-I efforts for calendar year 2012 and 2013, respectively.

Section 1216—Authority To Support Operations and Activities of the Office of Security Cooperation in Iraq

This section would authorize the Secretary of Defense to utilize funds available for operations and maintenance by the Air Force to support operations and activities of the Office of Security Cooperation in Iraq (OSC-I). This section would fund the life support, transportation, and personal security of Department of Defense personnel in OSC-I. This section would not pay the salaries and expenses of personnel of the Department of State.

SUBTITLE C—REPORTS AND OTHER MATTERS

Section 1221—Review and Report on Iran's and China's Conventional and Anti-Access Capabilities

This section would require the Secretary of Defense not later than 270 days after the date of enactment of this Act to submit to the congressional defense committees, the Senate Foreign Relations Committee, and the House Foreign Affairs Committee, a classified study undertaken by an independent entity outside the Department of Defense assessing the gaps between the conventional and anti-access capabilities of the Islamic Republic of Iran and the People's Republic of China and the U.S. forces' ability to overcome such capabilities. The committee notes that sections 1238 and 1243 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) required a report and a briefing from the Department of Defense on these subjects. However, given the potentially grave threats posed by these capabilities to U.S. national security and stability in the western Pacific and Middle East, the committee believes an additional, independent assessment is warranted to further inform the Department's planning and the committee's oversight of these issues. The committee encourages the Secretary to select an entity with the necessary security clearances and expertise to review the intelligence assessments upon which the Department's findings were based pursuant to the report and briefing required by sections 1238 and 1243.

Section 1222—Report and Consultation on Energy Security of NATO Alliance

This section would express certain findings related to energy security for members of the North Atlantic Treaty Organization (NATO) and would require the Secretary of Defense to direct a federally funded research and development center of the Department of Defense to conduct an assessment of the energy security of the NATO alliance, with an emphasis on the vulnerabilities of NATO alliance members to a sole supplier or distribution network for oil or gas, and how such vulnerabilities could adversely affect the security and cohesion of the alliance. This section would further require the Secretary of Defense, in consultation with the Secretary of State, to submit a report of such assessment not later than 270 days after the date of enactment of this Act. This section would further direct the Secretary of Defense to consult with other NATO member countries and NATO's Emerging Security Challenges Division on other ways the 14 United States as a NATO member country can contribute to the energy security of the NATO alliance and NATO regional partners.

Section 1223—Extension of Report on Progress Toward Security and Stability in Afghanistan

This section would extend the “Report on Progress Toward Stability and Security in Afghanistan,” as required by section 1230(a) of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), as most recently amended by section 1231 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383).

Section 1224—Report on Military and Security Developments Involving the Democratic People's Republic of Korea

This section would require the Secretary of Defense, not later than March 1, 2012 and March 1, 2013 to submit, in both classified and unclassified form, a report on the current and future military power of the Democratic People's Republic of Korea. This section would require the report be submitted to the Committees on Armed Services and Foreign Relations of the Senate and the Committees on Armed Services and Foreign Affairs of the House of Representatives.

Section 1225—National Security Risk Assessment of the United States' Federal Debt Owned by the People's Republic of China

This section would require, within 30 days after the date of enactment of this Act, the Director of the Congressional Budget Office (CBO) to determine and make publicly available the amount of accrued interest on United States Federal debt paid to the People's Republic of China during the five years preceding the date of enactment of this Act. This section would further require the Secretary of Defense, in consultation with the Director of National Intelligence, to carry out an assessment of the national security risks posed to the United States and United States allies as a result of the Federal debt liabilities owed to China and the amount of interest determined to have been paid by the United States to China. This section would require the Secretary to submit a report to the Committees on Armed Services and Foreign Relations of the Senate and the Committees on Armed Services and Foreign Affairs of the House of Representatives within 120 days following the date of enactment of this Act.

Section 1226—Congressional Notification Requirement Before Permanent Relocation of Any United States Military Unit Stationed Outside the United States

This section would amend title 10, United States Code, by inserting a new section 162a, that would require the Secretary of Defense to notify Congress at least 30 days before the relocation of a unit stationed outside the United States. Elements of notification would include how the action supports the national security strategy, commitments undertaken by international security treaties, combatant command's area of responsibility, cost differential between relocation and rotation to maintain the same capabilities, and how it would affect overseas Base Realignment and Closure activities. This section would also waive the notification requirement for relocation of a unit to a contingency operation, for a relocation as a result of a closure of an overseas installation at the request of the government of the host nation, or for the planned reduction of brigade combat teams within the European command area of operations from four to three. Nothing in this section shall be construed to limit the ability of the Secretary of Defense to relocate military units stationed outside the United States.

TITLE XIII—COOPERATIVE THREAT REDUCTION

Section 1301—Specification of Cooperative Threat Reduction Programs and Funds

This section would define the programs and funds that are Cooperative Threat Reduction (CTR) programs and funds as those authorized to be appropriated in section 301 of this Act and specify that CTR funds shall remain available for obligation for 3 fiscal years.

Section 1302—Funding Allocations

This section would allocate specific amounts for each program element under the Department of Defense Cooperative Threat Reduction (CTR) Program from within the overall \$508.2 million that the committee would authorize for the CTR Program. The allocation under this section reflects the amount of the budget request for fiscal year 2012. This section would also require notification to Congress 15 days before the Secretary of Defense obligates and expends fiscal year 2012 funds for purposes other than those specifically authorized. In addition, this section would provide limited authority to obligate amounts for a program element under the CTR Program in excess of the amount specifically authorized for that purpose.

Section 1303—Limitation on Availability of Funds for Cooperative Biological Engagement Program

This section would limit funds that may be obligated or expended for fiscal year 2012 for the cooperative biological engagement program (CBEP) to not more than 75 percent of the amounts authorized or otherwise available for such purpose, until the date on which the Secretary of Defense submits certain information to the appropriate congressional committees. The Secretary would be required to submit a detailed analysis of the effectiveness of CBEP, and either written certification that CBEP results in changed practices and threat reduction, or a detailed list of policy and program recommendations considered by the Secretary to be necessary to modify, expand, or curtail CBEP. This section would require the Secretary to submit the

report to the Senate Committee on Armed Services and the Senate Committee on Foreign Relations and the House Committee on Committee on Armed Services and the House Committee on Foreign Affairs.

TITLE XIV—OTHER AUTHORIZATIONS

SUBTITLE A—MILITARY PROGRAMS

Section 1404—Drug Interdiction and Counter-Drug Activities, Defense-Wide

This section would authorize appropriations for Drug Interdiction and Counter-Drug Activities, Defense-Wide at the level identified in section 4501 of division D of this Act.

SUBTITLE B—NATIONAL DEFENSE STOCKPILE

Section 1411—Authorized Uses of National Defense Stockpile Funds

This section would authorize \$50.1 million from the National Defense Stockpile Transaction fund for the operation and maintenance of the National Defense Stockpile for fiscal year 2012. This section would also permit the use of additional funds for extraordinary or emergency conditions 45 days after Congress receives notification.

Section 1412—Revision to Required Receipt Objectives for Previously Authorized Disposals from the National Defense Stockpile

This section would authorize revisions on limitations in asset sales contained in section 3402(b)(5) of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106-65) as most recently amended by section 1412 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) to increase the Department of Defense's stockpile commodity disposal authority from \$730.0 million to \$_____ million, and extend this authority from 2013 to 2016.

SUBTITLE D—OTHER MATTERS

Section 1433—Mission Force Enhancement Transfer Fund

This section would establish a fund to be known as the “Mission Force Enhancement Transfer Fund”. Funds would be authorized to be appropriated for the fund for fiscal year 2012 as specified in the funding table in section 4501 of this Act. The Secretary of Defense would be authorized to transfer amounts from the fund to another account of the Department of Defense to mitigate unfunded requirements for fiscal year 2012 for any of the following: (1) ballistic and cruise missile defense; (2) Navy shipbuilding; (3) strike fighter shortfalls; (4) mine warfare; (5) intelligence, surveillance, and reconnaissance; (6) capabilities to defeat anti-access/area denial technologies; and (7) basic research. The authority provided to the Secretary of Defense to transfer amounts from the fund to other accounts would be in addition to any other authority provided to the Secretary to transfer funds provided in this Act. This section would specify that the transfer of an amount from the fund to another Department of Defense account would be

deemed an increase to the amount authorized to be appropriated for such account. This section would also prohibit the Secretary of Defense from transferring amounts from the fund until the date that is 15 days after the date on which the Secretary notifies the congressional defense committees in writing of the details of the proposed transfer. Finally, the Secretary of Defense would be required to issue guidance, within 90 days after the date of enactment of this Act, regarding the identification and selection of projects to be funded under this section using merit-based selection criteria.

TITLE XV—AUTHORIZATION OF ADDITIONAL APPROPRIATIONS FOR OVERSEAS CONTINGENCY OPERATIONS

SUBTITLE A—AUTHORIZATION OF ADDITIONAL APPROPRIATIONS

Section 1501—Purpose

This section would establish this title and make authorization of appropriations available upon enactment of this Act for the Department of Defense, in addition to amounts otherwise authorized in this Act, to provide for additional costs due to overseas contingency operations.

Section 1502—Procurement

This section would authorize additional appropriations for procurement at the levels identified in section 4102 of division D of this Act.

Section 1503—Research, Development, Test, and Evaluation

This section would authorize additional appropriations for research, development, test, and evaluation at the levels identified in section 4202 of division D of this Act.

Section 1504—Operation and Maintenance

This section would authorize additional appropriations for operation and maintenance programs at the levels identified in section 4302 of division D of this Act.

Section 1505—Military Personnel

This section would authorize additional appropriations for military personnel at the levels identified in section 4402 of division D of this Act.

Section 1506—Working Capital Funds

This section would authorize additional appropriations for Defense Working Capital Funds at the levels identified in section 4502 of division D of this Act.

Section 1507—Defense Health Program

This section would authorize additional appropriations for the Defense Health Program at the levels identified in section 4502 of division D of this Act.

Section 1508—Drug Interdiction and Counter-Drug Activities, Defense-wide

This section would authorize additional appropriations for Drug Interdiction and Counter-Drug Activities, Defense-wide at the level identified in section 4502 of division D of this Act.

Section 1509—Defense Inspector General

This section would authorize additional appropriations for the Office of the Inspector General at the levels identified in section 4502 of division D of this Act.

SUBTITLE B—FINANCIAL MATTERS

Section 1521—Treatment as Additional Authorizations

This section would state that amounts authorized to be appropriated by this title are in addition to amounts otherwise authorized to be appropriated by this Act.

Section 1522—Special Transfer Authority

This section would authorize the transfer of up to an additional \$3.0 billion of war-related funding authorizations in this title among the accounts in this title.

SUBTITLE C—LIMITATIONS AND OTHER MATTERS

Section 1531—Afghanistan Security Forces Fund

This section would extend, by 1 year, the conditions and limitations on funds made available to the Department of Defense for the Afghanistan Security Forces Fund (ASFF) pursuant to section 1513 of the National Authorization Act for Fiscal Year 2008 (Public Law 110-181), as most recently amended by section 1531 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383).

The committee believes that improving the capabilities of Afghan National Security Forces (ANSF) and the capacity of the Government of the Islamic Republic of Afghanistan's security-related ministries is vital to achieving the stated goal of transitioning responsibility for security in Afghanistan by 2014. Consequently, the committee authorizes the Department of Defense to utilize amounts in the ASFF to construct and operate schools for the purpose of providing literacy instruction to recruits for the ANSF and to civilians entering the Afghan Ministries of Defense.

Section 1532—Continuation of Prohibition on Use of United States Funds for Certain Facilities Projects in Iraq

This section would apply the prohibitions of section 1508(a) of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417) to funds

authorized to this title, to prohibit the acquisition, conversion, rehabilitation, or installation of facilities for use by the Government of the Republic of Iraq, its subdivisions, agencies, departments, or forces, as well as the political subdivisions of Iraq.

Section 1533—One-Year Extension of Project Authority and Related Requirements of Task Force for Business and Stability Operations in Afghanistan

This section would extend by 1 year the project authority and related requirements of the Task Force for Business and Stability Operations (TFBSO) in the Islamic Republic of Afghanistan under section 1535 of the Ike Skelton National Defense Authorization Act for fiscal year 2011 (Public Law 111-383) and provide \$75.0 million for such purposes.

The committee notes that it has still not received the plan required by section 1545 of Public Law 111-383 Act to transition the activities of the Task Force to the United States Agency for International Development (USAID). The committee notes that the function of private sector business development falls outside the core competency of the Department of Defense. Therefore, the committee believes that the mission of TFBSO should eventually fall under the jurisdiction of a different agency, likely USAID or possibly the Department of Commerce. However, the committee notes that the USAID does not appear ready to assume responsibility for the TFBSO by the time the previous authorization expires at the end of fiscal year 2011. The committee understands that developing Afghanistan's private business sector is critical to reviving that nation's economy. Therefore, the committee has provided the authority to extend the TFBSO through fiscal year 2012 in order to support the International Security Assistance Force's comprehensive counterinsurgency strategy to achieve our strategic objectives in Afghanistan.

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

SUBTITLE B—PROGRAM AUTHORIZATIONS, RESTRICTIONS, AND LIMITATIONS

Section 3112—Limitation on Availability of Funds for Center of Excellence on Nuclear Security

This section would limit the Secretary of Energy from obligating or expending more than \$7.0 million for a Center of Excellence on Nuclear Security in the People's Republic of China until the date on which the Secretary of Energy submits two reports to the Senate Committee on Armed Services and the Senate Committee on Foreign Relations, and the House Committee on Armed Services and the House Committee on Foreign Affairs. These two reports would provide additional insight and analysis into the two stated rationales for the Center of Excellence.

The first report would require the Secretary of Energy to report on the existing capacity of China to develop and implement best practices training. The second report would require the Secretary of Energy, in coordination with the Secretary of Defense, to report on the extent to which additional best practices training and relationship building activities would contribute to improving the Chinese record of proliferation with respect to weapons of mass destruction,

missiles, and related technologies and materials, no later than 120 days after the date of enactment of this Act. This report should specifically include an assessment of the potential to improve the Chinese record on the proliferation of these technologies and materials to countries which are currently or have been state sponsors of terrorism.

SUBTITLE C—REPORTS

Section 3121—Repeal of Certain Report Requirements

This section would repeal requirements for several recurring reports from the Secretary of Energy and the Administrator for Nuclear Security. Specifically, it would repeal section 3132 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107-107), which requires an annual report to Congress on the financial and programmatic activities of the Nuclear Cities Initiative Program, which ended in 2006. This section would also modify section 4302(a)(6) of the Atomic Energy Defense Act (50 U.S.C. 2562). The modification would repeal a requirement for the Secretary of Energy to report to Congress each time funds for the Initiatives for Proliferation Prevention Program are used to pay a tax or customs duty levied by the Government of the Russian Federation. No such payments have been made since 2000, and the program ended in 2006.

Section 3122—Progress on Nuclear Nonproliferation

This section would express the sense of Congress that the spread of nuclear and radiological weapons, or weapons-usable material, technology, equipment, information and expertise, poses a short- and long-term threat to the security of the United States, and that the U.S. nonproliferation efforts should prioritize those programs which most directly address this threat. This section would require the Secretary of Energy to submit to the congressional defense committees a report, not less than 180 days after the date of the enactment of this Act, and annually thereafter on March 1 of each year until 2016, on the strategic plans of the Department of Energy (DOE) and the National Nuclear Security Administration (NNSA) to prevent nuclear and radiological proliferation and on the implementation of these plans, including progress and challenges of implementation, an estimate of budget requirements over 10 years, and interagency coordination. This section would also require the Secretary of Energy to submit, no later than 180 days after the date of enactment of this Act and by March 1 annually thereafter until 2016, an assessment of the risk that non-nuclear weapon countries may acquire nuclear enrichment or reprocessing technology, and a classified list of the location and vulnerability of highly-enriched uranium worldwide. Both the report and the assessments should be submitted in unclassified form, with classified annexes.

The committee is concerned about the danger that additional countries or terrorists may acquire nuclear weapons or nuclear weapons-usable materials, and related technology, equipment, and expertise. The committee is aware of the urgency and importance of the efforts necessary to prevent and counter this threat. The committee also notes the findings of the 2009 Congressional Commission on the Strategic Posture of the United States that “success in advancing U.S. nonproliferation interests requires U.S. leadership” and that “the risks of a proliferation ‘tipping point’ and of nuclear terrorism underscore the urgency of acting now.”

DIVISION D—FUNDING TABLES

Section 4001—Authorization of Amounts in Funding Tables

This section would provide for the allocation of funds among programs, projects, and activities in accordance with the tables in division D of this Act, subject to reprogramming guidance in accordance with established procedures.

Consistent with the previously expressed views of the committee, this section would also require that a decision by an Agency Head to commit, obligate, or expend funds to a specific entity on the basis of such funding tables be based on merit-based selection procedures in accordance with the requirements of section 2304(k) and 2374 of title 10, United States Code, and other applicable provisions of law.

2 **FUNDS FOR OHIO-CLASS BALLISTIC MISSILE**
3 **SUBMARINE REPLACEMENT PROGRAM.**

4 (a) FINDINGS.—Congress finds the following:

5 (1) On May 13, 2010, the President submitted
6 to Congress the report required under section 1251
7 of the National Defense Authorization Act for Fiscal
8 Year 2010 (Public Law 111–84; 123 Stat. 2549)
9 that stated, “The Secretary of Defense, based on
10 recommendations from the Joint Chiefs of Staff, has
11 established a baseline nuclear force structure that
12 fully supports U.S. security requirements and con-
13 forms to the New START limits. . . The United
14 States will reduce the number of SLBM launchers
15 (launch tubes) from 24 to 20 per SSBN, and deploy
16 no more than 240 SLBMs at any time.”.

17 (2) On January 10, 2011, the Under Secretary
18 of Defense for Acquisition, Technology, and Logis-
19 tics issued an acquisition decision memorandum for
20 the Ohio-class submarine replacement program
21 whereby the Navy received Milestone A approval to
22 proceed with a replacement design based on 16 mis-
23 sile tubes.

24 (3) Consistent with the reductions and limita-
25 tions established in the New START Treaty, which
26 entered into force on February 5, 2011, more than

1 two-thirds of the deployed nuclear deterrent force of
2 the United States are planned to be carried on bal-
3 listic missile submarines.

4 (4) The Commander of the United States Stra-
5 tegic Command testified on March 2, 2011, that,
6 “The issue of the number of tubes is not a simple
7 black and white answer,” but rather it is comprised
8 of several issues including, “the overall number of
9 tubes we wind up with at the end. . . flexibility and
10 options with how many warheads per missile per
11 tube. . . the overall number of boats. . . and many
12 other factors.”. He further stated that, “Sixteen
13 [missile tubes per submarine] will meet
14 STRATCOM’s requirements, given that we are sit-
15 ting here 20 years in advance.”.

16 (b) SENSE OF CONGRESS.—It is the sense of Con-
17 gress that—

18 (1) the long-term ability of the United States to
19 maintain a nuclear force sufficient to address the
20 range of mission requirements necessary to deter,
21 dissuade, and defeat potential adversaries and as-
22 sure allies and partners must not be comprised sole-
23 ly on the basis of the promise of potential cost sav-
24 ings resulting from the decision of the Secretary of
25 Defense to reduce the planned number of missile

1 tubes per Ohio-class ballistic missile submarine from
2 24 to 16; and

3 (2) because the planned Ohio-class replacement
4 ballistic submarine is expected to be in operation
5 through 2080, near-term design decisions should
6 take into consideration uncertainties in the future
7 threat and strategic environment.

8 (c) LIMITATION.—

9 (1) IN GENERAL.—Of the funds authorized to
10 be appropriated by this Act or otherwise made avail-
11 able for fiscal year 2012 for research, development,
12 test, and evaluation, Navy, for the Ohio-class bal-
13 listic submarine replacement program, not more
14 than 90 percent may be obligated or expended until
15 the date on which the Secretary of Defense submits
16 to the congressional defense committees a report
17 containing—

18 (A) a summary of the analysis conducted
19 to support the acquisition decision memo-
20 randum, including any assessment of the threat
21 and strategic environment and mission require-
22 ments that informed the decision to reduce the
23 planned number of missile tubes per submarine
24 from 20 (as stated in the report submitted to
25 Congress under section 1251 of the National

1 Defense Authorization Act for Fiscal Year 2010
2 (Public Law 111–84; 123 Stat. 2549)) to 16
3 (as stated in the acquisition decision memo-
4 randum);

5 (B) a description of the threat and stra-
6 tegic environment assumed by the Secretary
7 throughout the expected operational lifetime of
8 the program, including how the Secretary would
9 address significant changes to such threat and
10 strategic environment;

11 (C) a description of any other assumptions
12 made by the Secretary throughout the expected
13 operational lifetime of the program that pro-
14 vides the rationale of the Secretary to reduce
15 the planned number of missile tubes per sub-
16 marine to 16, including assumptions regard-
17 ing—

18 (i) changes in nuclear policy and
19 strategy;

20 (ii) changes in the role of ballistic
21 missile submarines as a part of the overall
22 nuclear forces of the United States; and

23 (iii) further nuclear reductions, wheth-
24 er conducted under an international agree-
25 ment or unilaterally;

1 (D) an identification of key risks to mis-
2 sions or requirements that may be increased be-
3 cause of the Secretary's decision to reduce the
4 planned number of missile tubes per submarine
5 to 16, including whether the Secretary plans to
6 accept or mitigate such risks; and

7 (E) a summary of the rigorous cost com-
8 parison of the designs for 16 missile tubes per
9 submarine and 20 missile tubes per submarine,
10 consistent with the direction provided in the ac-
11 quisition decision memorandum, including the
12 accuracy of the cost estimate of the procure-
13 ment cost of each submarine.

14 (2) FORM.—The report under paragraph (1)
15 shall be submitted in unclassified form, but may in-
16 clude a classified annex.

17 (d) DEFINITIONS.—In this section:

18 (1) The term “acquisition decision memo-
19 randum” means the acquisition decision memo-
20 randum regarding the Ohio-class submarine replace-
21 ment program issued by the Under Secretary of De-
22 fense for Acquisition, Technology, and Logistics on
23 January 10, 2011.

24 (2) The term “New START Treaty” means the
25 Treaty between the United States of America and

1 the Russian Federation on Measures for the Further
2 Reduction and Limitation of Strategic Offensive
3 Arms, signed on April 8, 2010, and entered into
4 force on February 5, 2011.

1 **SEC. 252.[Log #521] PRESERVATION AND STORAGE OF CER-**
2 **TAIN PROPERTY RELATED TO F136 PROPUL-**
3 **SION SYSTEM.**

4 (a) PLAN.—The Secretary of Defense shall develop
5 and carry out a plan for the preservation and storage of
6 property owned by the Federal Government that was ac-
7 quired under the F136 propulsion system development
8 contract. The plan shall—

9 (1) ensure that the Secretary preserves and
10 stores such property in a manner that—

11 (A) allows the development of the F136
12 propulsion system to be restarted after a period
13 of idleness;

14 (B) provides for the long-term sustainment
15 and repair of such property; and

16 (C) allows for such preservation and stor-
17 age to be conducted at either the facilities of
18 the Federal Government or a contractor under
19 such contract;

20 (2) with respect to the supplier base of such

5 (a) REVIEW PROCESS.—The Secretary of Defense
6 shall establish a review process to review the detention of
7 each individual detained at Guantanamo. Such review
8 process shall be designed to determine whether the contin-

10 to protect the national security of the United States. The
11 review process shall include, for each such individual, a
12 full review not less than once every three years and a lim-
13 ited file review not less than once every year.

14 (b) RELATIONSHIP TO OTHER LAWS.—The review
15 process established by this section shall not affect the ju-
16 risdiction of any Federal court to determine the legality
17 of the detention of an individual detained at Guantanamo.

18 (c) MILITARY REVIEW PANELS.—The Secretary shall
19 establish military review panels to carry out the reviews
20 required by subsection (a). Each military panel shall be
21 made up of military officers with expertise in operations,
22 intelligence, and counterterrorism matters. Any officer as-
23 signed to a military panel under this subsection must have
24 the necessary security clearances to review all information
25 submitted by the Government in any proceeding before the
26 panel.

1 (d) PROCEDURES FOR FULL REVIEW.—

2 (1) MILITARY PERSONAL REPRESENTATIVES.—

3 In any full review proceeding before a military panel
4 established pursuant to subsection (c), an individual
5 detained at Guantanamo shall be assisted by a mili-

9 cate on behalf of the individual and to introduce in-
10 formation on behalf of the individual.

11 (2) MILITARY PANEL PROCEEDINGS.—During a

2 States or its allies.

3 (3) ADVANCE NOTICE OF SUMMARY OF INFOR-
4 MATION.—Such an individual shall be provided, in
5 writing and in a language the individual under-

21 mine that the military personal representative must
22 receive a sufficient substitute or summary of classi-
23 fied information, rather than the underlying infor-
24 mation.

1 (5) PERMITTED ACTIONS BY OUTSIDE PAR-
2 TIES.—An outside party, including any private coun-
3 sel for such an individual, may file a written submis-
4 sion to the military panel on the question of whether
5 the individual represents a threat to the national se-

7 such a submission must obtain written permission
8 from the individual before filing the submission.

9 (6) TIMEFRAME FOR REVIEW.—A full review of
10 an individual detained at Guantanamo to determine
11 whether the continued military detention of the indi-

13 21 days after the individual first becomes an indi-
14 vidual detained at Guantanamo.

15 (7) FACTORS FOR CONSIDERATION.—In con-
16 ducting a full review of an individual detained at
17 Guantanamo, the panel shall consider whether the
18 individual represents a continuing threat to the
19 United States or its allies, taking into consideration
20 the following factors:

21 (A) The likelihood the individual will re-
22 sume terrorist activity if transferred or re-

9 (E) Any information reviewed by the offi-
10 cials preparing the Government's submission to
11 the panel that tends to mitigate the threat
12 posed by the individual.

13 (8) INTELLIGENCE INFORMATION FACTOR.—In
14 conducting a full review of an individual detained at
15 Guantanamo, the panel shall consider the factor of
16 whether information known to the individual could
17 be of significant intelligence value to the national se-
18 curity of the United States, taking into consider-
19 ation information provided by the intelligence com-
20 munity, including an overall assessment provided by
21 the Director of National Intelligence regarding the
22 intelligence value of the information known by the
23 individual.

24 (9) RECOMMENDATION.—The panel shall evalu-

10 mit to a military panel established under subsection
11 (c) any significant new information regarding the
12 threat posed by the individual to the United States
13 or its allies, including significant mitigating informa-
14 tion reviewed by the officers compiling the material
15 submitted by the Government.

16 (2) INDIVIDUAL WRITTEN SUBMISSION.—The
17 individual receiving the file review may submit to the
18 panel such written information as the individual de-
19 termines appropriate.

20 (3) COMMENCEMENT OF FULL REVIEW.—If,
21 during the course of a file review of an individual,
22 a significant question is raised as to whether the
23 continued military detention of the individual is nec-
24 essary, the Secretary of Defense shall promptly con-

1 vene a full review of the individual in accordance
2 with this section.

3 (f) PREVIOUSLY PROVIDED INFORMATION.—The of-
4 ficers assembling the Government submission to a military
5 panel for a full review under subsection (d) or a file review
6 under subsection (e) shall include in their review to pre-

24 (3) RESPONSIBILITIES.—

1 (A) REVIEW.—The review board shall be
2 responsible for reviewing the recommendations
3 of a military panel in a full review made under
4 subsection (d)(9) for clear error. If the mem-
5 bers of the review board disagree with a rec-
6 ommendation of a military panel by a majority
7 vote, the recommendation shall be rejected. The
8 review board shall seek consensus in such cases
9 to the greatest extent possible.

10 (B) DISPOSITION OF INDIVIDUALS NOT
11 RECOMMENDED FOR CONTINUED DETENTION.—
12 In the case of an individual who the military
13 panel has recommended no longer be subject to
14 military detention, if the review board accepts
15 the recommendation of the military panel, the
16 review board shall identify a suitable location
17 outside the United States to which to transfer
18 the individual. In making such recommendation,
19 the board shall consider whether the country to
20 which the individual is proposed to be trans-
21 ferred—

22 (i) is not a designated state sponsor
23 of terrorism or a designated foreign ter-
24 rorist organization;

18 re-engage in any terrorist activity;

19 (vii) has agreed to share any informa-
20 tion with the United States that—

21 (I) is related to the individual or
22 any associates of the individual; and

TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

Acquisition Involving Federal Prison Industries

The committee continues to be concerned that in implementing section 827 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181) the Department of Defense (DOD) is not complying with the intent of the law. The committee report (H. Rept. 111-491) accompanying the National Defense Authorization Act for Fiscal Year 2011 required the Secretary of Defense to: review the list of product categories used in complying with section 827 of Public Law 110-181 to ensure that these categories contain similar market participants and are consistent with the need to protect the Department’s access to the commercial market; to establish consistent dates for the publication of an updated list; and to notify industry of such dates. In the same report, the committee also directed the Secretary to conduct a comprehensive review of contract awards made to Federal Prison Industries (FPI) to ensure that non-competitive awards are not being made to FPI inappropriately. The committee directs the Secretary to brief the congressional defense committee on the progress of the review and any changes made to DOD policy, regulation or processes determined to be necessary as a result of the review by July 30, 2011.

Competition in Construction Acquisition Programs

The committee is concerned that the Department of Defense has inappropriately advocated a construction acquisition program that values speed in execution over savings. The committee notes that the Naval Facilities Engineering Command has awarded a global Multiple Award Task Order Contract, which may serve to expedite construction processes but also creates barriers to competition, increases the overall cost to construction, and may aggregate the overall risk to the project. While this contracting approach is appropriate in some emergency situations that require speed in execution, the committee believes that this approach is inappropriate for routine construction requirements.

The committee is concerned that construction contracts such as the Navy’s global Multiple Award Task Order Contract impede the Department in receiving the best construction contract pricing because it does not allow consideration of locally based, task order type construction contracts. Furthermore, the committee is concerned that the Department is not complying with the with congressional intent to foster the participation of small business concerns as prime contractors, subcontractors, and suppliers, and may not be in compliance with Federal Acquisition Regulations regarding small business concerns and contract bundling determination and justification.

The committee believes that the Department should minimize barriers to competition and ensure the widest participation of construction contractors to the military construction programs in order to ensure best value for the taxpayer. Therefore, the committee directs the Secretary of Defense to conduct a review of this issue and provide a report on the findings to the congressional defense committees by October 1, 2011. The review shall include, as a minimum:

- (1) A cost benefit analysis of the regional task order construction contracts compared with a locally based, task order contract or a single construction project acquisition process.

Such an assessment should include a review of potential construction contractors that are eliminated from competition and the potential savings that would be expected by an expanded contractor field participating in the construction acquisition process;

- (2) An assessment of the programs or policies to determine if there are statutory or regulatory barriers in providing a locally based construction contract;
- (3) An assessment of the Naval Facilities Engineering Command's Multiple Award Task Order Contract to determine compliance with Federal Acquisition Regulations related to contract bundling and small business considerations; and
- (4) An assessment on the construction contract bundling definitions to determine whether an expansion of the definition is appropriate to ensure small business equities are adequately protected.

Cost Escalators in Major Weapons Systems Life Cycle Cost Estimations

The committee is aware that cost escalators such as inflation, geopolitical risk, and market influences affect long-term cost considerations for major weapons systems. The committee believes that accurate appraisals of life cycle cost escalations, based on current and reliable economic indicators, are critical to effective programmatic evaluation and overall efficiency. The committee is concerned that methods currently employed by the Department of Defense to assess the costs of acquiring, developing, producing, operating, sustaining, and disposing of major weapons systems, their subsystems, and components are insufficient to produce realistic life cycle cost assessments. Therefore, the committee directs the Secretary of Defense to conduct a review of the Department's methods for estimating the life cycle costs of major weapons programs, including its standards and procedures for assessing and maintaining currency of cost escalators, and to brief the congressional defense committees on the findings of that review on, or before, September 30, 2011.

Defense Contract Audit Agency Improvements

The committee is concerned over the continuing staffing shortages and audit backlogs experienced by the Defense Contract Audit Agency (DCAA), which have resulted in significant delays in conducting audits and could negatively impact the acquisition process. Not only do delays hinder the Federal Government's ability to recoup any monies owed to it, the delays also potentially limit competition by limiting the ability of companies to participate in the Federal Government contracting process. The committee has heard from small, medium, and large contractors regarding the lack of timeliness of audits and the decreasing quality of those audits. In particular, contractors have voiced concern over the elimination of "inadequate-in-part" findings in favor of the use of "pass-fail" audits which do not distinguish between minor and major violations. The committee is aware that unintended consequences may result from such actions. Contractors have informed the committee that it may take several months, or years, for DCAA to revalidate the corrections a contractor has taken to fix any inadequacies found in a contractor's business system; such delays affect the ability of contractors to receive payment on current contracts or to submit bids on future contracts, as they may be deemed non-responsive if their systems have not been approved.

The committee believes that improved communication is one step to addressing the problems that contractors have raised and commends DCAA for publishing a revised “rules of engagement” which encourages timely and meaningful communication with contractors regarding scope and any initial findings. In addition, the committee is aware that DCAA has undertaken other efforts aimed at improving the collaboration between DCAA and the Defense Contract Management Agency and to better realign the resources between the two agencies. While the committee commends DCAA for taking these steps to improve its audit capabilities, the committee is concerned that as part of the Secretary of Defense’s efficiencies initiative, DCAA has been tasked to reduce administrative support staff and revalidate its requirement for additional auditors over the next 5 years. The committee cautions the Secretary that although short-term savings may be generated by a reduction in staff support, it may result in hampering efforts to improve DCAA performance and may actually result in an increase of costs to the Department.

Small Business Subcontracting Goals

The committee notes that while current statutes and regulations require set-asides for small business subcontracts, prime contractors are prohibited from accounting for the total dollar amount flowing to small businesses. Currently, if a contractor that is not a small business is identified as the primary first-tier subcontractor, a prime contractor is prevented from reporting any of the other subcontract dollars that may flow to small businesses; this occurs regardless of whether small business subcontractors comprise either the remainder of the first tier or all other subcontracting tiers. The committee believes that allowing prime contractors to report small business subcontracting at all tiers would demonstrate the full extent of small business participation on Department of Defense contracts. Therefore, the committee directs the Secretary of Defense to develop procedures for fully accounting for small business participation at all tiers on a Department of Defense contract, and to publish such procedures in the Defense Federal Acquisition Regulation if the Secretary determines that to be necessary to fully implement such procedures. The Department shall ensure that the procedures fully account for small business participation, but do not permit duplicate reporting of small business participation. The Department shall provide to the Senate Committee on Armed Services and the House Committee on Armed Services with a copy of the subcontracting accounting procedures and any proposed regulation by March 30, 2102.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

Influence of Budget on Quadrennial Defense Review

The committee has previously expressed concern regarding the influence of defense budgets on the “Quadrennial Defense Review” (QDR), conducted pursuant to section 118 of title 10, United States Code. Section 118 requires this comprehensive examination of the national defense strategy, force structure, force modernization plans, infrastructure, budget plans, and other elements of the defense program and policies be conducted every four years. Paragraph (b)(3) of section 118 requires that the QDR identify the budget plan that would be “required to provide sufficient resources to execute successfully the full range of missions called for in that

national defense strategy at a low-to-moderate level of risk.” Likewise, paragraph (b)(4) of section 118 requires that the QDR’s recommendations, “are not constrained to comply with the budget submitted to Congress by the President...”.

The committee notes that in the past representatives of the Department of Defense have indicated that the QDR is not budget constrained; rather, it is budget informed. While the committee acknowledges that ultimately resources must shape any strategy, the committee believes that the QDR should be based upon a process unconstrained by budgetary influences so that such influences do not determine or limit its outcome. Therefore, the committee directs the Secretary of Defense, or his designee, to brief the committee no later than September 30, 2012 on the steps the Department will take during conduct of the QDR in fiscal year 2013 to ensure that the next QDR fulfills all statutory requirements, including those related to budget plans, and in particular the steps that the Department will take to ensure the QDR is not constrained to comply with the budget submitted by the President pursuant to section 1105 of title 31, United States Code.

TITLE X—GENERAL PROVISIONS

Analysis of Nuclear Force Structure Alternatives

The committee is aware that the President is considering further nuclear force reductions and changes in nuclear targeting guidance. The committee believes any decisions about the size and composition of the Nation’s nuclear forces must be informed by robust quantitative analysis, to include wargaming and simulations, force-on-force analysis, scenario-based exchange calculations, and examination of alternative employment policies.

While this type of analysis was done extensively during the cold war, recent reports, including a September 2008 Defense Science Board report on “Nuclear Deterrence Skills” and the December 2008 “Report of the Secretary of Defense Task Force on Department of Defense Nuclear Weapons Management,” reveal that the skills needed to conduct this type of nuclear analysis are in danger of atrophying. Furthermore, the assumptions and scope of cold war-era nuclear analyses are vastly different than what is needed today. Today’s geopolitical environment presents a diverse range of new threats and opportunities that the committee believes must be examined using the same robust quantitative analysis that was done in previous decades as well as new analytical methods appropriate to address emerging challenges.

Therefore, the committee directs the Secretary of Defense to conduct a study on current, proposed, and several alternative nuclear force structures of the United States and brief the congressional defense committees on the methodology, findings, and recommendations of the study by March 1, 2012. In conducting the study, the Secretary of Defense should coordinate, as appropriate, with the Secretary of State, the Director of National Intelligence, and the Administrator, National Nuclear Security Administration.

The study should include an analysis of the effects of various U.S. nuclear force structures and policies on the forces and policies of other nations, as well as the linkages to and effects on nuclear terrorism, nonproliferation, missile defense, and strategic conventional capabilities. The study should examine various scenarios, a broad spectrum of assumptions, and include rigorous quantitative analysis of the potential vulnerability, survivability, and effectiveness of various U.S. nuclear force structures under these scenarios. The committee encourages the Secretary of Defense to use common metrics to examine and compare the

implications of different force structures, and encourages the use of red-teams or competitive analysis to ensure a comprehensive assessment of the options. The committee believes this study will provide the President and Congress with important information needed to inform future decisions regarding U.S. nuclear force structure and policies.

Audit Readiness of the Department of Defense

The committee is concerned that the blended civilian and contractor workforce within the Department of Defense that is responsible for financial improvement and audit readiness lacks the appropriate skill sets required to achieve a clean audit opinion by 2017, as required by the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84). Specifically, the committee is concerned that the Department's audit readiness workforce may be lacking in qualified financial managers, including Certified Public Accountants (CPAs), who have prior experience performing complex financial statement audits for large commercial entities and/or large governmental agencies. The committee believes that such prior experience is an essential attribute to properly guide the Department in building its capacity to produce a clean audit by 2017. Therefore, the committee directs the Chief Management Officer of the Department of Defense to conduct an analysis of its civilian and contractor workforce supporting audit readiness, and provide a briefing to the Senate Committee on Armed Services and the House Committee on Armed Services no later than October 15, 2011. The analysis should include the following information:

- (1) The number and relevant qualifications of Senior Executive Service (SES) personnel currently leading audit readiness efforts for the military services, defense agencies, and the Office of the Secretary of Defense;
- (2) The current number of full-time equivalents, including contractors directly supporting audit readiness efforts, for the military services, defense agencies, and the Office of the Secretary of Defense; and
- (3) The current number of civilian and contractor personnel with prior experience performing large, complex financial statement audits, including the number of CPAs, directly supporting audit readiness efforts for the military services, defense agencies and the Office of the Secretary of Defense.

Evaluation of the Alternative Methods for Titanium Production

The committee directs the Secretary of Defense to evaluate alternative methods for titanium production such as electrochemical processing to determine potential for such production to aid in meeting the Department of Defense's requirements for titanium. The evaluation shall include an assessment of production capability, cost as compared to the cost of traditional methods of titanium production, an assessment of the potential to reduce environmental impact through such processes, and any other items the Secretary deems relevant. The Secretary shall brief the findings of the evaluation to the congressional defense committees not later than December 1, 2011.

Government Accountability Office Assessment of Reporting Cost Data Collection

The committee commends the Secretary of Defense for implementing a process for collecting an estimate of resources required for the Department of Defense to generate both internally and externally required reports. The committee agrees with the Secretary that additional transparency would be useful for decision makers when determining the utility of various reporting requirements. However, the committee observes that any tool used to collect costs is only as useful as the inputs received. In order to ensure that the Secretary's guidance is consistently and appropriately applied across the Department, the committee directs the Comptroller General of the United States to conduct an assessment of the methodology and tools used to collect cost data on both internal and external reporting requirements of the Department of Defense, and to submit a report of the findings to the Senate Committee on Armed Services and the House Committee on Armed Services within 120 days after the date of enactment of this Act. The Comptroller General's report should also include any recommendations the Comptroller General believes are necessary to improve the data collection, transparency, and utility of the tool.

TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

Military and Security Developments Involving the People's Republic of China

The committee commends the Secretary of Defense for delivering a comprehensive report on the "Military and Security Developments Involving the People's Republic of China," in accordance with section 1202 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 106-65), including a discussion of the extent to which China's ballistic and cruise missiles increase its ability to control access to the western Pacific. The committee does not believe, however, that the report sufficiently addressed China's domestic production capabilities or proliferation of these technologies.

The committee directs the Secretary of Defense to include greater detail on the ballistic and cruise missile activities of the People's Republic of China, in subsequent submission of report required by section 1202, including China's domestic development and production of these capabilities, and any Chinese proliferation activities of technologies related to cruise missiles, ballistic missiles, unmanned aerial vehicles, and weapon of mass destruction to other countries. This detail should include, but should not be limited to, the proliferation of missile technologies and components at or near the threshold prohibited by the Missile Technology Control Regime and other multinational export control regimes, in as much unclassified detail as possible.

Finally, the committee encourages the Secretary to submit the next report by March 1, 2012, as required by section 1202.

Report on Deployment of Assets and Personnel to Libya

The committee directs the Secretary of Defense to notify the Senate Committee on Armed Services and the House Committee on Armed Services upon making a decision to task any asset of the Department of Defense (DOD) to Libya, if such asset is currently tasked to support ongoing contingency operations in Afghanistan or Iraq. Any such notification must be submitted no later than 72 hours after the redeployment or tasking of a DOD asset in support of Operation Odyssey Dawn or Operation Unified Protector. Such a notification should include at a

minimum the number and type of assets and associated personnel transferred from supporting operations in Afghanistan or Iraq to supporting operations in Libya, including but not limited to: Intelligence, Surveillance, and Reconnaissance (ISR) assets; close air support assets (to include unmanned platforms); aerial refueling assets; and the diversion of any logistical or other resources used to support operations in Afghanistan or Iraq.

The Secretary of Defense is further directed to report the deployment of any U.S. military personnel or Department of Defense civilians to sovereign Libyan territory, whether held by government or rebel forces.

TITLE XIII—COOPERATIVE THREAT REDUCTION

Cooperative Threat Reduction Biological Surveillance Network

The committee is concerned that the proposed biological surveillance network within the Cooperative Biological Engagement Program (CBEP) could prove insufficient to monitor, detect, and deter manmade pathogens, even if implemented widely. The committee directs the Secretary of Defense to assess whether the biological surveillance network would fall short of addressing the global biological threat. The assessment should examine the potential for dangerous pathogens to be weaponized: (1) By relatively unsophisticated non-state actors, including terrorists, (2) By state or non-state actors in countries that do not fully cooperate with such a network, or (3) By rogue state or sub-state actors who, with modest biological knowledge and equipment, might be able to circumvent such a network even in countries that would participate in such a network. The Secretary should consult with the intelligence community in the conduct of such an assessment. The Secretary is further directed to submit a report to the Senate Committee on Armed Services, Senate Committee on Foreign Relations, House Committee on Armed Services, and House Committee on Foreign Affairs, on any necessary recommendations regarding the modification of the CBEP mission, in unclassified form with a classified annex, as necessary, within 150 days after the date of enactment of this Act.

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

Report on Mixed Oxide Fuel

In light of the earthquake and tsunami in Japan and the resulting damage to nuclear reactors and spent fuel pools at the Fukushima Daiichi nuclear power plant which released radioactivity into the air, soil and sea, the committee seeks additional information on the characteristics of mixed-oxide (MOX) fuel rods in the event of an accident or attack. The committee directs the Secretary of Energy to submit to the defense committees, no later than March 1, 2012 a report on MOX fuel. Such a report should compare the risks to human health and safety of the MOX fuel fabricated at the MOX Fuel Fabrication Facility to the use of low-enriched uranium (LEU) fuel, particularly in the event of an accident or attack on a reactor or spent fuel pond resulting in the release of radioactivity. Specifically, the report should include an analysis of the amount of radiation a MOX fuel rod made at the MOX Fuel Fabrication Facility at Savannah River Site would release relative to an LEU fuel rod; and a description of whether this technical difference from LEU fuel has been factored into the discussions with

potential users of this fuel. The report should be submitted in unclassified form, but may include a classified annex if necessary.
