1 **SEC. 3. SENSE OF CONGRESS ON THE DESIRED TENETS OF**  
2 **THE DEFENSE ACQUISITION SYSTEM.**

3 (a) FINDINGS.—Congress finds the following:

4 (1) The Committee on Armed Services of the  
5 House of Representatives held a series of hearings  
6 in 2013, 2014, and 2015 gathering testimony from  
7 key acquisition leaders and experts. It is clear that  
8 the acquisition reform efforts of the last 50 years  
9 continue to founder because they fail to address the  
10 motivational and environmental factors in which

1 they must be implemented. The acquisition system,  
2 though frustrating to all, is in one sense in equi-  
3 librium. The acquisition system provides enough  
4 benefits to proponents and opponents to continue,  
5 with only minor changes, despite its shortcomings.

6 (2) The Department of Defense still has too  
7 many defense acquisitions and services chasing too  
8 few dollars. Consequently, there remains a vast dif-  
9 ference between the budgeting plans of the Depart-  
10 ment and the reality of the cost of its systems or the  
11 services it acquires. To keep programs alive, the De-  
12 partment develops and Congress accepts fragile ac-  
13 quisition strategies that downplay technical issues  
14 and assume only successful outcomes from high-risk  
15 efforts. As a result, the Department often ends up  
16 with too few weapons, with performance that falls  
17 short, that are difficult and costly to maintain, deliv-  
18 ered late at too high a cost. We have limited insight  
19 into the services acquired or what services need to  
20 be acquired in the future. Furthermore, the conven-  
21 tional acquisition process is not agile enough for to-  
22 day's demands. Finally, the Department of Defense  
23 continues to struggle with financial management and  
24 auditability, affecting its ability to control costs, en-

1       sure basic accountability, anticipate future costs and  
2       claims on the budget, and measure performance.

3               (3) Too often today, all stakeholders in the De-  
4       partment of Defense, Congress, and industry, accept  
5       that—

6                       (A) for the acquisition process, success is  
7       defined as maximizing technical performance or  
8       protecting organizational interests, without re-  
9       gard to funding disruptions and delivery delays  
10      of needed capability or services to the  
11      warfighter; and

12                      (B) the acquisition process is—

13                               (i) reactive, meaning issues are ad-  
14       dressed late and at great cost only after  
15       problems are realized;

16                               (ii) plodding, meaning the bureau-  
17       cratic processes are sclerotic and cum-  
18       bersome;

19                               (iii) opaque, meaning that limiting in-  
20       formation is necessary to protect pro-  
21       grams; and

22                               (iv) traditional, meaning that cus-  
23       tomary approaches and suppliers are pre-  
24       ferred over perceived risk of new or unique  
25       concepts and vendors.

1           (4) Today, the United States is at a cross-  
2 roads, and if changes to the acquisition system are  
3 not made soon, the trend of fewer and more costly  
4 systems and services that fall short of the needs of  
5 the Armed Forces will continue. Congress, the De-  
6 partment of Defense, contractors, and the American  
7 people all have a stake in making positive changes.  
8 Each plays a role in contributing to the current sys-  
9 tem. Each gains benefits from that system, but each  
10 is frustrated by it as well.

11           (5) The acquisition improvement effort of the  
12 Committee on Armed Services of the House of Rep-  
13 resentatives proposes a different approach from pre-  
14 vious efforts by seeking to improve the environment  
15 (i.e., statutes, regulations, processes, and culture)  
16 driving acquisition decisions in the Department of  
17 Defense, industry, and Congress. The Committee  
18 has solicited input from industry and the Depart-  
19 ment of Defense, as well as others in Congress, and  
20 will continue to do so. The Committee recognizes  
21 that there are no “silver bullets” that can imme-  
22 diately fix the current acquisition system in a holis-  
23 tic and long-standing manner. Therefore, the reform  
24 effort will be an ongoing and iterative process that  
25 will result in legislation not only this year, but will

1 be embedded in the Committee’s annual and regular  
2 work.

3 (b) SENSE OF CONGRESS ON THE TENETS OF AN IM-  
4 PROVED ACQUISITION SYSTEM.—It is the sense of Con-  
5 gress that all stakeholders in the acquisition system—the  
6 Department of Defense, Congress, and industry—should  
7 be governed by the following tenets:

8 (1) SUCCESS.—Success in the acquisition sys-  
9 tem means the timely delivering of affordable and ef-  
10 fective military equipment and services.

11 (2) PROACTIVE.—The acquisition system should  
12 be proactive, meaning—

13 (A) the system should recognize that devel-  
14 opment and acquisition problems can occur; and

15 (B) officials at all levels should be empow-  
16 ered to solve problems and reduce risks by sur-  
17 facing issues early and honestly and taking ac-  
18 tion to resolve them.

19 (3) AGILE.—The acquisition system should be  
20 agile, meaning that needed program adjustments  
21 should be proposed and adjudicated quickly.

22 (4) TRANSPARENT.—The acquisition system  
23 should be transparent, meaning that—

1 (A) all decisionmakers should be given use-  
2 ful, relevant, credible, and reliable information  
3 when making commitments;

4 (B) Government and industry communica-  
5 tion should be clear and open; and

6 (C) the Department of Defense should  
7 produce auditable financial management state-  
8 ments.

9 (5) INNOVATIVE.—The acquisition system  
10 should be innovative, meaning that barriers should  
11 be removed that preclude companies from under-  
12 taking defense business or officials from proposing  
13 new approaches.

24          of the Department of Defense related to the defense acqui-  
25          sition workforce. The study shall provide a comprehensive

1 examination of the Department's efforts to recruit, de-  
2 velop, and retain the acquisition workforce with a specific

5 tion Workforce Improvement Act (including chapter  
6 87 of title 10, United States Code).

10 **TITLE II—WEAPON SYSTEMS AC-**  
11 **QUISITION AND RELATED**  
12 **MATTERS**

13 **SEC. 201. SENSE OF CONGRESS ON THE DESIRED CHARAC-**  
14 **TERISTICS FOR THE WEAPON SYSTEMS AC-**  
15 **QUISITION SYSTEM.**

16 (a) FINDINGS.—Congress makes the following find-  
17 ings:

18 (1) CURRENT SITUATION.—Despite significant  
19 and repeated attempts at acquisition reform, the De-  
20 partment of Defense still experiences case after case  
21 of expensive weapon system acquisition failures. The  
22 Department of Defense has a track record of too  
23 many cancellations, schedule slippages, cost over-  
24 runs, and failures to deliver timely solutions to the  
25 requirements of the Armed Forces. This situation is

1 unacceptable. For example, according to the Final  
2 Report of the 2010 Army Acquisition Review, be-  
3 tween 1996 and 2010, the Army expended approxi-  
4 mately \$1 billion to \$3 billion annually on two dozen  
5 programs that were eventually cancelled. No military  
6 service and no type of weapon acquisition has been  
7 immune.

8 (2) PROBLEMS IN ALL PHASES OF ACQUISI-  
9 TIONS.—

10 (A) Despite detailed weapon acquisition  
11 processes and procedures, there is only limited  
12 discipline in starting programs. Many programs  
13 begin without a solid foundation. They have too  
14 many requirements deemed “critical”, which  
15 are driven by too many organizations and indi-  
16 viduals. Approved requirements are often set  
17 with only a limited understanding of the tech-  
18 nical feasibility of achieving them. The resulting  
19 compromises of good program management and  
20 engineering judgment that allow the programs  
21 to proceed are the “spackle” of the acquisition  
22 system that covers up the risks and enables the  
23 system to operate.

24 (B) As these weapon systems proceed into  
25 engineering and manufacturing development,

1 they often encounter development problems  
2 leading to cost growth, schedule delay, and per-  
3 formance reductions. Industry and Government  
4 officials frequently respond by taking additional  
5 development risks to resolve basic performance  
6 issues by reducing the time to analyze and as-  
7 sess development results, overlapping key devel-  
8 opment efforts, and reducing testing. The De-  
9 partment of Defense and Congress disrupt the  
10 planned funding of stable programs to find re-  
11 sources for troubled programs or to fund  
12 across-the-board spending cuts. Funding insta-  
13 bility is the inevitable price that programs pay  
14 for survival because funding disruptions actu-  
15 ally keep more programs alive.

16 (C) Finally, these weapons are often  
17 rushed into production only to encounter pro-  
18 duction problems, and are fielded with many  
19 unknowns or deficiencies leading to significantly  
20 reduced quantities and force structure reduc-  
21 tions. The warfighter faces the challenge of op-  
22 erating weapons with poor reliability, high  
23 maintenance demands, reduced performance,  
24 and many capability shortfalls.

25 (b) SENSE OF CONGRESS.—

1           (1) IN GENERAL.—It is the sense of Congress  
2 that, in accordance with the tenets described in sec-  
3 tion 3, to improve weapon system acquisitions, the  
4 Department of Defense, Congress, and industry  
5 should develop an acquisition system characterized  
6 by highly disciplined program initiation coupled with  
7 agile program execution and balanced oversight, as  
8 described in paragraphs (2), (3), and (4).

9           (2) HIGHLY DISCIPLINED PROGRAM INITI-  
10 ATION.—An acquisition system characterized by  
11 highly disciplined program initiation means that pro-  
12 grams do not begin engineering development until  
13 firm requirements are matched to a flexible acquisi-  
14 tion strategy structured to develop militarily useful  
15 capability that can be delivered in a relevant period  
16 of time with available technologies, funding, and  
17 management capacity. Such a highly disciplined pro-  
18 gram initiation includes—

19                   (A) a workforce with smart requirements  
20                   setters and expert buyers, with the knowledge,  
21                   skills, and experience to successfully plan for  
22                   and execute highly complex acquisitions;

23                   (B) requirements that are well-defined,  
24                   technically feasible, and affordable;

1 (C) acquisition strategies that are designed  
2 to minimize time to market of militarily useful  
3 capability, with the program concerned being  
4 structured so that—

5 (i) lower-risk, technically mature ca-  
6 pabilities are matched to delivering capa-  
7 bility to the warfighter in the near term,  
8 while remaining requirements are aligned  
9 and resources are programmed to support  
10 integration into later increments to meet  
11 the requirements of the Armed Forces;

12 (ii) capabilities are approved for an  
13 increment only when their developmental  
14 risks have been appropriately reduced; and

15 (iii) increments are planned to com-  
16 plete engineering and manufacturing devel-  
17 opment in a reasonable period of time;

18 (D) a science and technology development  
19 enterprise that is responsive to the acquisition  
20 process before engineering and manufacturing  
21 development begins, and sufficiently resourced  
22 to reduce risks and enable programs to make  
23 smart decisions without losing critical funds;  
24 and

1           (E) redtape reduction in order to free up  
2           program and Department officials to focus on  
3           their mission of defining an executable program  
4           and understanding and addressing risks.

5           (3) AGILE PROGRAM EXECUTION.—An acquisi-  
6           tion system characterized by agile program execution  
7           means a system in which acquisition speed and flexi-  
8           bility to make trade-offs are balanced with the need  
9           to achieve desired technical performance. Such agile  
10          program execution includes—

11           (A) program managers and program offi-  
12           cials who are expert buyers and negotiators who  
13           anticipate problems, negotiate solutions, and  
14           are empowered to manage;

15           (B) a preference for fixed price develop-  
16           ment, with program initiation laying the foun-  
17           dation in which fixed price contracting is the  
18           appropriate contract type for product develop-  
19           ment;

20           (C) program managers who avoid increas-  
21           ing program risk by resisting the addition of  
22           new requirements or the reduction of develop-  
23           mental activities;

24           (D) empowering program managers and  
25           senior decisionmakers to make decisions easily

1 in order to move forward with capabilities that  
2 mature quickly, cancel those that encounter  
3 greater difficulties than expected, and trade-off  
4 or reduce requirements to maintain cost and  
5 schedule;

6 (E) enabling program managers to focus

9 pliance with reporting, certifications, and other  
10 redtape; and

12 edge of demonstrated performance as programs  
13 proceed through development, with robust de-

16 decisionmaking.

17 (4) **BALANCED OVERSIGHT.**—An acquisition  
18 system characterized by balanced oversight means  
19 that the focus is on ensuring discipline initiating  
20 programs and that appropriate adjustments are  
21 made during development, so that programs have  
22 the best chance to succeed. Such balanced oversight  
23 includes—

24 (A) involvement by decisionmakers early to  
25 ensure that an understanding of trade-offs,

1 risks, and needs are considered, resourced, and  
2 validated, and that agreement is reached be-  
3 tween the executive and legislative branches;

4 (B) acceptance by decisionmakers that  
5 complex weapon system developments are inher-  
6 ently risky and require expertise and flexibility  
7 to manage effectively;

8 (C) conscious decisions by decisionmakers  
9 regarding where to accept risk, while ensuring  
10 that risk mitigation plans are resourced (with  
11 time, funding, alternatives, and competent gov-  
12 ernment and contractor officials);

13 (D) measuring and monitoring by decision-  
14 makers of the right factors, such as technology  
15 maturation progress and systems engineering  
16 during risk reduction, development cost growth  
17 during engineering and manufacturing develop-  
18 ment, and reliability growth during system  
19 demonstration;

20 (E) work by Congress and the Department  
21 of Defense, once a program has begun, to re-  
22 solve issues by considering trade-offs among  
23 cost, schedule, and performance necessary to  
24 best support the warfighter; and

1 (F) congressional understanding of risks  
2 and efforts to mitigate such risks even if they  
3 are through non-traditional means or other  
4 technological advances.
