

Nuclear Detonation Safety: Food, Drinking Water and Medicine

Food Safety

Food in sealed containers and any unspoiled food in your refrigerator or freezer are safe to eat.

Drinking Water Safety

Stay hydrated. Bottled water or sealed beverages are best. Water from your toilet tank (not bowl) and water heater is also safe. If those are not available, then tap water should be used to stay hydrated.

Medicine Safety

Continue taking your medication. Medicine in sealed containers is free from radioactive contamination. Medicine that is not sealed should be taken if sealed options are unavailable.

Cleaning Instructions

Use a damp towel or cloth to clean all containers, utensils and surfaces. Seal these cleaning cloths and place them away from pets and people. Wash your hands after cleaning.
