NOTE FROM THE DIRECTOR, LEGISLATIVE OPERATIONS

This committee print consists of the enrolled text and explanatory material for the National Defense Authorization Act for Fiscal Year 2014 (H.R. 3304; Public Law 113–66).

This Act and the material found in this committee print are the product of an agreement between the Chairman and Ranking Member of the House Committee on Armed Services and the Chairman and Ranking Member of the Senate Committee on Armed Services on the reconciliation of H.R. 1960, as passed by the House of Representatives on June 14, 2013, and S. 1197, as reported out of committee on June 20, 2013. The Senate began consideration of S. 1197 on November 18, 2013, but did not complete consideration of S. 1197 and therefore was unable to initiate a formal conference with the House.

In order to ensure the enactment of an annual defense bill by the end of the calendar year, the Chairman and Ranking Member of the House Committee on Armed Services and the Chairman and Ranking Member of the Senate Committee on Armed Services agreed to reconcile the provisions of H.R. 1960 and S. 1197, including a number of amendments submitted during the Senate’s consideration of its bill which were cleared by both sides, but were not adopted by the Senate due to insufficient time. The negotiated agreement was brought to the House Floor in the form of an amendment to the Senate amendments to H.R. 3304, a Medal of Honor bill referred to the Committee on Armed Services, which had previously passed in the House and was then amended and passed by the Senate. On December 12, 2013, pursuant to H. Res. 441, which provided for the concurrence by the House in the Senate amendments to H.R. 3304, with an amendment, the House considered and passed the negotiated agreement by a vote of 350–69. On December 19, 2013, the Senate agreed to the House amendment to the Senate amendment, and passed the negotiated text, by recorded vote, 84–15. The President signed the legislation on December 26, 2013, and it became Public Law 113–66.

Because the House and Senate negotiators were unable to convene a formal conference committee to reconcile the differences in the respective versions of the bill, there is no conference report and no formal “joint explanatory statement of the conference committee” for H.R. 3304. Instead, Chairman Howard P. “Buck” McKeon submitted a “Joint Explanatory Statement to Accompany the National Defense Authorization Act for Fiscal Year 2014” in the *Congressional Record* on December 12, 2013 (pages H7894–H8037). The text of the joint explanatory statement is included in this committee print. Section 4 of H.R. 3304 specifies that this explanatory material shall have the same effect with respect to the implementation of this legislation as if it were a joint explanatory statement of a committee of conference.

In this committee print, the provisions of H.R. 1960, the House-passed version of the National Defense Authorization Act for Fiscal Year 2014, are generally referred to as “the House bill.” The provisions of S. 1197, the Senate Committee on Armed Services committee-reported version of the National Defense Authorization Act for Fiscal Year 2014, and selected manager’s package amendments, are generally referred to as “the Senate committee-reported bill.” The final form of the agreements reached during negotiations between the House and the Senate are referred to as “the agreement.”

The following pages are organized in the manner of a traditional conference report.

(b) *SENSE OF CONGRESS.*—It is the sense of Congress that—

(1) maintaining a United States shipbuilding base is critical to meeting United States national security requirements;

(2) it is of vital importance that the Ready Reserve Force of the Maritime Administration remains capable, modern, and efficient in order to best serve the national security needs of the United States in times of war or national emergency;

(3) Federal agencies must consider investment options for replacing aging vessels within the Ready Reserve Force to meet future operational commitments;

(4) investment in recapitalizing the Ready Reserve Force may include—

(A) construction of dual-use vessels, based on need, for use in the America’s Marine Highway Program of the De-

partment of Transportation, as a recent study performed under a cooperative agreement between the Maritime Administration and the Navy demonstrated that dual-use vessels transporting domestic freight between United States ports could be called upon to supplement sealift capacity;

(B) construction of tanker vessels to meet military transport needs; and

(C) construction of vessels for use in transporting potential new energy exports; and

(5) the Department of Transportation, in consultation with the Navy, should pursue the most cost-effective means of recapitalizing the Ready Reserve Force, including by promoting the building of new vessels that are militarily useful and commercially viable.

SEC. 3504. TREATMENT OF FUNDS FOR INTERMODAL TRANSPORTATION MARITIME FACILITY, PORT OF ANCHORAGE, ALASKA.

(2) **STRATEGIC SEAPORT DEFINED.**—In this subsection the term “strategic seaport” means a military port or and commercial port that is subject to a port planning order or Basic Ordering Agreement (or both) that is projected to be used for the deployment of forces and shipment of ammunition or sustainment supplies in support of military operations.

(b) **FINANCIAL ASSISTANCE.**—Section 50302(c)(2)(D) of title 46, United States Code, is amended by inserting “and financial assistance, including grants,” after “technical assistance”.

JOINT EXPLANATORY STATEMENT TO ACCOMPANY THE
NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL
YEAR 2014

[Note from the Director, Legislative Operations: The following is the text of the Joint Explanatory Statement to Accompany the National Defense Authorization Act for Fiscal Year 2014, as printed in the Congressional Record on December 12, 2013]

Compliance with rules of the House of Representatives and Senate regarding earmarks and congressionally directed spending items

Consistent with the intent of clause 9 of rule XXI of the Rules of the House of Representatives and rule XLIV of the Standing Rules of the Senate, neither the bill nor the accompanying joint explanatory statement contains any congressional earmarks, congressionally directed spending items, limited tax benefits, or limited tariff benefits, as defined in such rules.

Summary of discretionary authorizations and budget implication

The administration's budget request for national defense discretionary programs within the jurisdiction of the Committees on Armed Services of the Senate and the House of Representatives for fiscal year 2014 was \$625.2 billion. Of this amount, \$526.6 billion was requested for base Department of Defense (DOD) programs, \$80.7 billion was requested for overseas contingency operations (OCO), and \$17.9 billion was requested for national security programs in the Department of Energy (DOE) and the Defense Nuclear Facilities Safety Board (DNFSB).

The bill authorizes \$625.1 billion in fiscal year 2014, including \$526.8 billion for base DOD programs, \$80.7 billion for OCO, and \$17.6 billion for national security programs in the DOE and the DNFSB.

The two tables preceding the detailed program adjustments in Division D of this Joint Explanatory Statement summarize the direct discretionary authorizations in the agreement and the equivalent budget authority levels for fiscal year 2014 defense programs. The first table summarizes the agreement on authorizations within the jurisdiction of the Armed Services Committees. The second table details the budget authority implication of the discretionary authorizations in the agreement when accounting for national defense items that are not in the jurisdiction of the Armed Services Committees.

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE I—PROCUREMENT

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 101)

The House bill contained a provision (sec. 101) authorizing appropriations for fiscal year 2014 for procurement for the Army, the Navy and Marine Corps, the Air Force, and defense-wide activities, as specified in the funding table in section 4101.

The Senate committee-reported bill contained an identical provision (sec. 101).

The agreement includes this provision.

Subtitle B—Army Programs

Limitation on availability of funds for Stryker vehicle program (sec. 111)

The House bill contained a provision (sec. 111) that would limit the availability of funds for the Stryker vehicle program to not more than 75 percent until the Secretary of the Army submits a report on Stryker spare parts inventories.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Study on multiyear, multivehicle procurement authority for tactical vehicles (sec. 112)

The House bill contained a provision (sec. 142) that would authorize the Secretary of Defense to enter into a 5-year pilot program for the multiyear multivehicle procurement of tactical wheeled vehicles.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with an amendment that would express a sense of Congress and require a study and report on multiyear multivehicle procurement.

Subtitle C—Navy Programs

CVN-78 class aircraft carrier program (sec. 121)

The House bill contained a provision (sec. 122) that would amend section 122 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364) by: (1) Adjusting the cap for CVN-78 from \$10,500.0 million to \$12,887.0 million; (2) Adjusting the cost cap for subsequent ships in the class from \$8,100.0 million to \$11,411.0 million; and (3) Adding a new factor for adjustment, allowing increases or decreases in the cost of CVN-78 that are attributable to the shipboard test program.

The Senate committee-reported bill contained a similar provision (sec. 122) that would amend section 122 by: (1) Adjusting the cost cap for CVN-78 from \$10,500.0 million to \$12,887.0 million; (2) Adding a new factor for adjustment, allowing increases or decreases in the cost of the CVN-78 class that are attributable to the

shipboard test program; (3) Requiring quarterly updates on the cost of CVN-79; and (4) Preventing the Navy from paying fees under any cost-type or incentive fee contract if the program manager's estimate of the total cost of CVN-79 exceeds the cost cap for CVN-79.

The agreement includes a provision that would amend section 122 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364) by: (1) Adjusting the cap for CVN-78 from \$10,500.0 million to \$12,887.0 million; (2) Adjusting the cost cap for subsequent ships in the class from \$8,100.0 million to \$11,498.0 million; (3) Adding a new factor for adjustment, allowing increases or decreases in the cost of CVN-78 that are attributable to the shipboard test program, but only when the changes result for urgent and unforeseen testing problems that would delay delivery or initial operating capability of the ship; (4) Requiring quarterly updates on the cost of CVN-79; and (5) Directing the Secretary of the Navy to ensure that each prime contract for CVN-79 includes an incentive fee structure that will, throughout the entire period of performance of the contract, provide incentives for each contractor to meet the portion of the cost of the ship for which the contractor is responsible.

Repeal of requirements relating to procurement of future surface combatants (sec. 122)

The Senate committee-reported bill contained a provision (sec. 123) that would repeal a reporting requirement in section 125 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84). The report submitted by the Secretary of the Navy to Congress of February 2010 provided the Department of the Navy's implementation plan to complete these reports.

The House bill contained no similar provision.

The agreement includes this provision.

Multiyear procurement authority for E-2D aircraft program (sec. 123)

The House bill contained a provision (sec. 121) that would authorize the Secretary of the Navy to buy E-2D aircraft and E-2D mission equipment under one or more multiyear procurement contracts.

The Senate committee-reported bill contained a provision (sec. 121) that would authorize the Secretary of the Navy to buy E-2D aircraft under one or more multiyear procurement contracts.

The agreement includes the Senate provision.

Limitation on availability of funds for Littoral Combat Ship (sec. 124)

The Senate committee-reported bill contained a provision (sec. 125) that would require that the Chief of Naval Operations (CNO), in coordination with the Director of Operational Test and Evaluation, to submit a report to the congressional defense committees on the current concept of operations and expected survivability attributes of each of the Littoral Combat Ship (LCS) sea frames when they would be employed according to the concept of operations.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would fence funding for LCS-25 and LCS-26 until: (1) The Navy provides certain reports about the LCS program; and (2) The Joint Requirements Oversight Council makes certain certifications about the LCS program.

Subtitle D—Air Force Programs

Repeal of requirement for maintenance of certain retired KC-135E aircraft (sec. 131)

The Senate committee-reported bill contained a provision (sec. 133) that would repeal section 135(b) of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364). Section 135(b) requires that the Secretary of the Air Force maintain at least 74 of the KC-135E aircraft retired after September 30, 2006 in a condition that would allow recall of the aircraft to future service in the Air Force Reserve, Air National Guard, or active forces aerial refueling force structure.

The House bill contained no similar provision.

The House bill, however, contained a provision (sec. 133) that would require that the Secretary of the Air Force maintain any retired KC-135R aircraft in a condition that would allow recall of the aircraft to future service in the Air Force Reserve, Air National Guard, or active forces aerial refueling force structure.

The agreement includes the Senate provision with a technical/clarifying amendment.

Multiyear procurement authority for C-130J aircraft (sec. 132)

The House bill contained a provision (sec. 131) that would authorize the Secretary of the Air Force to enter into one or more multiyear contracts to procure multiple variants of the C-130J aircraft.

The Senate committee-reported bill contained a similar provision (sec. 151) that would allow the Secretary of the Air Force to enter into one or more multiyear contracts to procure C-130J aircraft.

The agreement includes the Senate provision.

Prohibition on cancellation or modification of avionics modernization program for C-130 aircraft (sec. 133)

The House bill contained a provision (sec. 132) that would prohibit the Secretary of the Air Force from terminating the legacy C-130H Avionics Modernization Program (AMP). The House report accompanying H.R. 1960 (H. Rept. 113-102) of the National Defense Authorization Act for Fiscal Year 2014 recommended an increase of \$47.3 million in Aircraft Procurement, Air Force (APAF), to fund modifications of legacy C-130 with the original AMP upgrade.

The Senate committee-reported bill contained no similar provision. The Senate report accompanying S. 1197 (S. Rept. 113-44) of the National Defense Authorization Act for Fiscal Year 2014 recommended an increase of \$47.3 million in APAF to fund modifications of legacy C-130 with either: (1) the original AMP upgrade; or (2) an alternative program that would upgrade and modernize the

legacy C-130 airlift fleet using a reduced scope program for avionics and mission planning systems.

The agreement includes the House provision with an amendment that would add a requirement that the Comptroller General conduct a sufficiency review of the cost-benefit analysis conducted under section 143(b) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239), including any findings and recommendations relating to such review. The agreement also recommends an increase of \$47.3 million for Research, Development, Test, and Evaluation, Air Force, in PE 41115F for C-130 Airlift Squadrons, pending completion of that sufficiency review. This is in lieu of a recommendation for additional procurement funding in fiscal year 2014, since procurement funding for modernizing C-130 avionics would be premature.

Prohibition of procurement of unnecessary C-27J aircraft by the Air Force (sec. 134)

The Senate committee-reported bill contained a provision (sec. 134) that would prevent the Secretary of the Air Force from obligating or expending any funds for the procurement of C-27J aircraft not on contract as of June 1, 2013.

The House bill contained no similar provision.

The agreement includes the provision with an amendment that would narrow the prohibition to the use of funds authorized in fiscal year 2012, since all C-27J funds except the fiscal year 2012 funds have been obligated or transferred to other programs.

Subtitle E—Defense-Wide, Joint, and Multiservice Matters

Personal protection equipment procurement (sec. 141)

The House bill contained a provision (sec. 144) that would require the Secretary of Defense to ensure that within each military service procurement account, a separate procurement budget line item is designated for personal protection equipment (PPE) investment and funding transparency.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with an amendment that would direct the Secretary of Defense to submit with the annual budget request a consolidated budget display that describes and justifies all programs and activities, in the appropriations accounts for operation and maintenance as well as research, development, test, and evaluation, associated with the development and procurement of PPE.

After 12 years of war and billions of dollars spent to develop, produce, and field the best available individual PPE, such as body armor and helmets, the Department of Defense should not lose momentum in its search for better protection at lower weight and cost for individual soldiers, marines, airmen, and sailors. One of the most important lessons of the wars in Iraq and Afghanistan is that research, development, and acquisition (RDA) of improved ballistic protection for our troops must anticipate, not react, to likely threats. In this regard, budget visibility must be sufficient to allow for comprehensive oversight of the Department's RDA efforts as re-

flected in the annual budget request accompanied by spending estimates projected over the subsequent 5 years. Subject to the completeness and usefulness of the information provided in the budget exhibits that would be required by this provision, Congress may consider other budgetary methods for ensuring the Department's investments over time sustain the importance of and momentum for achieving technological improvements in PPE into the future.

We also note that the Department categorizes PPE, including body armor, as an "expendable" item consistent with current acquisition and financial management policy definitions. Nonetheless, given the military's experiences during operations in Iraq and Afghanistan, the significant RDA investment for body armor, and the fact that body armor is now an essential part of individual combat equipment, one could question whether the categorization of PPE, and body armor in particular, should change from "expendable" to another category that could improve resource stability and provide for better management throughout the RDA process. Accordingly, the Secretary of Defense is encouraged to reassess the Department's categorization of PPE and body armor as "expendable" items.

Repeal of certain F-35 reporting requirements (sec. 142)

The House bill contained a provision (sec. 145) that would amend section 122 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) to eliminate the requirement to provide an annual update to the F-35 system maturity matrix.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Limitation on availability of funds for retirement of RQ-4 Global Hawk unmanned aircraft systems and A-10 aircraft (sec. 143)

The House bill contained a provision (sec. 143) that would limit the use of funds to retire Global Hawk Block 30 unmanned aircraft systems and would require the Secretary of the Air Force to take all actions necessary to maintain the operational capability of the RQ-4 Block 30 Global Hawk through December 31, 2016.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would: (1) Prohibit spending funds authorized to be appropriated or otherwise made available during fiscal year 2014 to retire Global Hawk Block 30 unmanned aircraft systems or A-10 aircraft (except for A-10s planned for retirement on or before April 9, 2013); (2) Modify the prohibited spending to include making significant changes to Global Hawk and A-10 manning levels during fiscal year 2014; (3) Prohibit the Secretary of the Air Force from retiring or planning to retire A-10 aircraft (except for A-10s planned for retirement on or before April 9, 2013) between October 1, 2014 and December 31, 2014; and (4) Add a requirement that the Secretary of Defense provide a report on all high-altitude intelligence, surveillance, and reconnaissance systems that the Department of Defense is operating or plans to operate in the future.

We intend that the prohibition on making additional A-10 aircraft retirements before December 31, 2014, be to provide breathing space for Congress to conduct oversight and to consider what actions to take on any force structure changes the Air Force may propose in fiscal year 2015.

MC-12 Liberty Intelligence, Surveillance, and Reconnaissance aircraft (sec. 144)

The Senate committee-reported bill contained a provision (sec. 934) that would require the Secretary of Defense to develop and carry out a plan for the transfer of Air Force MC-12 aircraft to the Army. The provision would also prohibit the Army from acquiring the Enhanced Medium Altitude Reconnaissance and Surveillance System (EMARSS) in fiscal year 2014.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that directs the Secretary of Defense to develop a plan for the potential transfer of MC-12 Liberty aircraft from the Air Force to the Army. In addition, the provision prohibits the Army from using fiscal year 2014 funds to procure additional aircraft under the EMARSS program, but does allow the Army to use fiscal year 2014 funds to complete conversion efforts of existing aircraft that have already been procured, and to convert transferred Liberty aircraft to the EMARSS configuration.

Competition for evolved expendable launch vehicle providers (sec. 145)

The House bill contained a provision (sec. 134) that would require the Secretary of the Air Force to develop and implement a plan to ensure the fair evaluation of competing contractors in awarding a contract to a certified evolved expendable launch vehicle provider. This plan would include descriptions of how the following areas would be addressed in the evaluation: the proposed cost, schedule, and performance; mission assurance activities; the manner in which the contractor will operate under the Federal Acquisition Regulation; the effect of other contracts in which the contractor is entered into with the Federal Government, such as the Evolved Expendable Launch Vehicle (EELV) launch capability and the space station commercial resupply services contracts; and any other areas determined appropriate by the Secretary.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that requires the plan at the same time that the Secretary issues a draft request for proposals for a contract on the EELV with respect to how the Secretary will conduct competition in awarding the contract in addition to the specific areas listed in the original House bill.

We note that the Government Accountability Office (GAO) is conducting ongoing work regarding the EELV competition. We request that GAO conduct a review of the Air Force EELV acquisition strategy, which should include an assessment of the methodology, potential challenges, gaps, and acquisition planning process of the Air Force for evaluating competitors, and that GAO brief the de-

fense and intelligence committees on its review. We request that this briefing be provided before a draft request for proposal is released by the Air Force.

This legislative provision should not be construed as direction regarding ongoing procurement or any aspect of source selection criteria.

Reports on personal protection equipment and health and safety risks associated with ejection seats (sec. 146)

The House bill contained a provision (sec. 146) that would require the Secretary of Defense to enter into a contract with a federally-funded research and development center (FFRDC) to conduct a study to identify and assess alternative and effective means for stimulating competition and innovation in the personal protection equipment industrial base.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with an amendment that would also require the Secretary of the Air Force to conduct a study to assess the safety of ejection seats currently in operational use by the Air Force.

LEGISLATIVE PROVISIONS NOT ADOPTED

Modification of requirements to sustain Navy airborne intelligence, surveillance, and reconnaissance capabilities

The Senate committee-reported bill contained a provision (sec. 124) that would amend section 112 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) to require the Secretary of the Navy to maintain sufficient numbers of EP-3 Airborne Reconnaissance Integrated Electronic System II (ARIES II) Spiral 3 aircraft and Special Projects Aircraft (SPA) version P909 to support the wartime operational plans of U.S. Pacific Command (PACOM), and to maintain the capacity to support five EP-3s for allocation to the combatant commands under the Global Force Management Allocation Plan (GFMAP), until the Navy's multi-intelligence (Multi-INT) Broad Area Maritime Surveillance (BAMS) System TRITON aircraft with signals intelligence (SIGINT) capabilities reaches initial operational capability (IOC). The provision also would require the Secretary to upgrade the final (12th) EP-3 ARIES II aircraft to the Spiral 3 configuration, and to correct electronic intelligence (ELINT) obsolescence problems on both the EP-3 and the SPA aircraft. Finally, the provision would require the Chairman of the Joint Requirements Oversight Council (JROC) to coordinate with the Commanders of PACOM and the U.S. Special Operations Command (SOCOM) to determine requirements for the special capabilities provided by the SPA aircraft, and would require the Secretary to sustain sufficient numbers of SPA aircraft to meet those requirements until the Navy achieves IOC of a system with capabilities greater than or equal to the SPA.

The House bill contained no similar provision.

The agreement does not include this provision.

Section 112 of Public Law 111-383 is intended to prevent a capacity decline in capabilities as the Navy developed replacements

for the EP-3 and the SPA intelligence, surveillance, and reconnaissance (ISR) systems. The Navy budget request, which is counter to congressional intent, creates a plan for transitioning from the EP-3/SPA systems to the TRITON Multi-INT and P-8 Quick Reaction Capability (QRC) that would result in a capacity decline beginning in fiscal year 2015.

The Navy also informed Congress that the JROC supports the Navy's transition plan, but in fact the JROC Memorandum (JROCM) on this issue expresses concern about the Navy's plan and requires numerous follow-up actions. In addition, the JROCM instructs the Navy to develop requirements for the Multi-INT TRITON prior to the program's next acquisition milestone review. Congressional review of the TRITON Capabilities Development Document confirms that a robust SIGINT capability is documented only as a "potential future capability," and not a validated requirement as implied by Navy officials to Congress.

The Navy also proposes to prematurely remove highly-skilled personnel from the EP-3/SPA programs, resulting in a reduction of the number of available aircraft to support GFMAP and wartime requirements. Congress is concerned that harvesting these personnel to support an early version of TRITON that provides only optical and radar sensing, but little or no SIGINT capability, does not maximize utilization of highly-skilled personnel with perishable skill sets. Furthermore, the lack of a validated requirement for a robust SIGINT capability for TRITON raises concerns that the capacity and capability decline will turn out to be a permanent ISR capability loss.

We have serious concerns about the Navy's non-compliant EP-3/SPA to P-8 QRC/TRITON Multi-INT transition plan. Therefore, we direct that:

- (1) The JROC review and report to Congress the combatant commander requirements for the simultaneous ISR collection capability provided by EP-3/SPA assets under current Operational Plans and for the GFMAP;
- (2) The Joint Staff and the Under Secretary of Defense for Intelligence (USDI) identify and report to Congress alternative EP-3/SPA to P-8 QRC/TRITON Multi-INT transition options that do not result in a capacity decline or capability gap, including such options as using Navy reserve personnel to stand up the baseline TRITON system;
- (3) The JROC collaborate with the Navy to develop and document a formal requirement for TRITON Multi-INT;
- (4) The USDI develop, and report to Congress, a mitigation plan to address the ELINT obsolescence issues identified in the Senate report accompanying S. 1197 (S. Rept. 113-44) of the National Defense Authorization Act for Fiscal Year 2014; and,
- (5) The JROC and USDI to determine, and report to Congress, the force structure quantity and type of federated ISR systems and sensors required to wholly replace the EP-3/SPA force structure of aircraft to meet or exceed the current capacity and diversity of ISR collection capability inherently resident on the EP-3/SPA aircraft.

Multiyear procurement authority for Ground-Based Interceptors

The House bill contained a provision (sec. 141) that would provide multi-year procurement authority and advance procurement authority to the Director of the Missile Defense Agency for the procurement of 14 Ground-Based Interceptors.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Sense of Senate on the United States helicopter industrial base

The Senate committee-reported bill contained a provision (sec. 152) that would express the sense of Senate on the health of the helicopter industrial base.

The House bill contained no similar provision.

The agreement does not include this provision.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 201)

The House bill contained a provision (sec. 201) authorizing appropriations for fiscal year 2014 for the use of the Department of Defense for research, development, test, and evaluation as specified in the funding table in section 4201.

The Senate committee-reported bill contained an identical provision (sec. 201).

The agreement includes this provision.

Subtitle B—Program Requirements, Restrictions, and Limitations

Modification of requirements on biennial strategic plan for the Defense Advanced Research Projects Agency (sec. 211)

The Senate committee-reported bill contained a provision (sec. 212) that would modify the biennial strategic plan requirement for the Defense Advanced Research Projects Agency (DARPA) to make more explicit the linkages between the strategic objections of the agency with the missions of the armed forces. Additionally, the provision would reassign responsibility for submission of the plan from the Secretary of Defense to the Director of DARPA, in coordination with the Under Secretary of Defense for Acquisition, Technology, and Logistics.

The House bill contained no similar provision.

The agreement includes this provision.

We recognize the value that DARPA brings to the Department of Defense, especially in terms of high risk research that can be potentially game changing. We believe that such research has the highest probability of successful transition when it is linked early with the operational defense community.

For example, DARPA's Phoenix program has the potential to change radically how the United States approaches space systems development and servicing. As the only program looking at satellite servicing and advanced robotics for geosynchronous earth orbit systems, this program has significant national security, civil, and as

well as, commercial potential. However, we note that the development of such capabilities may raise complex policy issues, as well as pose as a disruptive technology to established approaches and operations. We encourage DARPA to not only continue its technical leadership in this field, but to also work with other entities in the Department of Defense—such as the Air Force, the National Reconnaissance Office, and the Under Secretaries of Defense for Policy and Intelligence—to ensure the development of operational concepts for this capability.

Limitation on availability of funds for ground combat vehicle engineering and manufacturing phase (sec. 212)

The House bill contained a provision (sec. 211) that would prohibit the Army from obligating post-Milestone B funds for the Ground Combat Vehicle (GCV) program until the Secretary of the Army submits a report to the congressional defense committees.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with technical and clarifying amendments.

Additionally, the Comptroller General of the United States is directed to submit to the congressional defense committees a report setting forth an assessment by the Comptroller General of the study of the Army on the Bradley Fighting Vehicle industrial base submitted to Congress pursuant to the Conference Report to accompany H.R. 4310 (112th Congress), the National Defense Authorization Act for Fiscal Year 2013 (House Report 112–705). The report required shall include an assessment of the reasonableness of the study's methods including, but not limited to, the sufficiency, validity, and reliability of the data used to conduct the study, and include findings and recommendations, if any, on the combat vehicle industrial base. In conducting this review the Comptroller General should not replicate the Army study.

Limitation and reporting requirements for unmanned carrier-launched surveillance and strike system program (sec. 213)

The House bill contained a provision (sec. 212) that would prohibit the Under Secretary of Defense for Acquisition, Technology, and Logistics from approving a Milestone. A technology development contract award for the Unmanned Carrier-Launched Airborne Surveillance and Strike (UCLASS) program until 30 days after the Under Secretary certifies to the congressional defense committees that the software and system engineering designs for the control system and connectivity segment and the aircraft carrier segment of the UCLASS system can achieve, at a low level of integration risk, successful compatibility and operability with the air vehicle segment planned for selection at Milestone A contract award.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would modify the language to require that: (1) The Navy to limit the number of air vehicle segments acquired prior to receiving Milestone B approval for UCLASS; (2) The Navy provide periodic reports on cost, schedule and requirements changes for UCLASS;

and (3) The Comptroller General conduct annual reviews of the UCLASS program.

Limitation on availability of funds for Air Force logistics transformation (sec. 214)

The House bill contained a provision (sec. 213) that would restrict the obligation and expenditure of Air Force procurement and research, development, test, and evaluation funds for logistics information technology programs until 30 days after the date on which the Secretary of the Air Force submits to the congressional defense committees a report on the modernization and update of Air Force logistics information technology systems following the cancellation of the expeditionary combat support system.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical amendment.

Limitation on availability of funds for defensive cyberspace operations of the Air Force (sec. 215)

The House bill contained a provision (sec. 214) that would limit the funds the Air Force may obligate or expend for Defensive Cyberspace Operations in PE 0202088F to not more than 90 percent until a period of 30 days after the date on which the Secretary of the Air Force submits a report to the congressional defense committees detailing the Air Force's plan for sustainment of the Application Software Assurance Center of Excellence (ASACOE) across the Future Years Defense Program.

The Senate committee-reported bill contained no similar provision but included elsewhere in the committee-reported bill is \$10.0 million in PE 33140F for sustainment of the ASACOE.

The agreement includes this provision.

Limitation on availability of funds for precision extended range munition program (sec. 216)

The House bill contained a provision (sec. 215) that would limit funds for the precision extended range munition program until the Under Secretary of Defense for Acquisition, Technology, and Logistics provides the congressional defense committees with certain written certifications and a sufficient business case analysis.

The Senate committee-report bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Long-range standoff weapon requirement; prohibition on availability of funds for noncompetitive procedures for offensive anti-surface warfare weapon contracts of the Navy (sec. 217)

The House bill contained a provision (sec. 218) that would require the Secretary of the Air Force to develop a follow-on air-launched cruise missile, Long Range Stand Off (LRSO) weapon to the AGM-86 that achieves initial operating capability for both conventional and nuclear missions by not later than 2030 and is certified for internal carriage and employment for both conventional

and nuclear missions on the next-generation long-range strike bomber by not later than 2034.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that requires the LRSO to achieve initial operating capability for conventional missions prior to the retirement of the AGM-86, for nuclear missions prior to the retirement of the nuclear armed AGM-86 and is capable of internal carriage and employment for both missions in the long-range strike bomber. The amendment provides that the Secretary may carry out the consecutive development of the nuclear and conventional capabilities, with the nuclear capability first, if it is determined to be cost effective.

The amendment further includes a provision that would prohibit, during fiscal year 2014, using available funds to contract for Navy offensive anti-surface warfare weapons using other than through competitive procedures. Development, testing, and fielding of aircraft-launched offensive anti-surface warfare weapons would be exempted from that prohibition. Included in the provision is a waiver of the prohibition by the Secretary of Defense if the Secretary determines that waiving this prohibition is in the national security interests of the United States.

Review of software development for F-35 aircraft (sec. 218)

The House bill contained a provision (sec. 219) that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) to establish an independent team consisting of subject matter experts to review the development of software for the F-35 aircraft program and to report on the results of that review.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the USD(AT&L) to provide a plan for the sustainment of the Autonomic Logistics Information System for the F-35 aircraft.

Evaluation and assessment of the distributed common ground system (sec. 219)

The House bill contained a provision (sec. 220) that would require that: (1) Beginning with the budget request for fiscal year 2015, future budget submissions include separate project codes for each capability component within each program element for each service version of the Distributed Common Ground System (DCGS); (2) The Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) conduct an analysis of commercial link analysis tools that could be used to meet the requirements of each of the service versions of the DCGS; and (3) If one or more commercial link analysis tools were found to meet the requirements of the program, the responsible service secretary would be required to initiate a request for proposals to purchase those tools.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would include the requirement that: (1) The services' budget submissions include separate project codes for each capability component within each program element for each service version of the DCGS; and (2) The USD(AT&L) conduct an analysis of capability components of DCGS that are compliant with the intelligence community data standards and could be used to meet the requirements of the DCGS program. The provision would require the USD(AT&L) to submit a report of that analysis within 180 days of enactment of this Act. We expect that the USD(AT&L) will adjust the acquisition plans for DCGS if his analysis of the competitive acquisition options for capability components within DCGS shows that expanded competition shows promise.

Operationally responsive space (sec. 220)

The House bill contained a provision (sec. 225) that would prohibit expending more than 50 percent of the funds authorized or expended for the space-based infrared system modernization initiative wide field of view test bed until the Executive Agent for Space certifies to the congressional defense committees that the Secretary of Defense is carrying out the Operationally Responsive Space program office in accordance with 10 U.S.C. 2273a.

The Senate committee-reported bill contained no similar provision.

The agreement includes an amendment requiring a report no later than 60 days from the date of enactment regarding a potential mission that would seek to leverage all the policy objectives of the Operationally Responsive Space Program in a single mission.

Sustainment or replacement of Blue Devil intelligence, surveillance, and reconnaissance capabilities (sec. 221)

The Senate committee-reported bill contained a provision (sec. 216) that would require the Secretary of the Air Force to procure the currently deployed Blue Devil intelligence, surveillance, and reconnaissance (ISR) system or to develop a plan to replace that system with a comparable or improved system.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require the Secretary of the Air Force to develop a plan to sustain the operational capabilities of the Blue Devil I ISR Systems, including precision signal geolocation, by procuring the existing Blue Devil I aircraft, developing a new system, or adapting and integrating capabilities from existing and development programs. The Secretary is required to submit a report that addresses the cost of procuring, operating, and sustaining Blue Devil I aircraft system; the ability of other platforms to provide similar intelligence capabilities; and a listing of related U.S. Air Force and Defense Advanced Projects Research Agency (DARPA) programs. The report should be coordinated with the Commander of U.S. Special Operations Command and the Director of DARPA.

We agree that the necessary capability to sustain is both wide-area motion imagery combined with precision signal geolocation. The integration of these two capabilities provides significant operational utility.

Subtitle C—Missile Defense Programs

Improvements to acquisition accountability reports on ballistic missile defense system (sec. 231)

The House bill contained a provision (sec. 234) that would require the Director of the Missile Defense Agency (MDA) to make certain improvements to the cost estimates included in its annual acquisition accountability reports on the ballistic missile defense system (BMDS), and to provide a report on the plans and schedule for making such improvements.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would clarify that each cost estimate shall include all of the operation and sustainment (O&S) costs for which the Director is responsible, and also include a summary description of the O&S functions and costs for which the military departments are responsible, consistent with the Deputy Secretary of Defense Memorandum of June 10, 2011, on funding responsibilities for BMDS elements.

We note that, although the MDA is required to provide life-cycle cost estimates of its acquisition programs—including O&S costs—it does not include in those cost estimates the O&S costs for which the military departments that own and operate elements of the BMDS are responsible. As the Government Accountability Office has noted, this makes it difficult to understand the comprehensive life-cycle costs of BMDS elements. Therefore, we direct the Director of the MDA to work with the military departments that own or operate elements of the BMDS to make a recommendation for how those functions and related costs should be reported in either future annual BMDS Accountability Reports or other similar reports to Congress, including annual budget submission justification materials. We believe that the military departments should provide to the congressional defense committees the life-cycle cost estimates for the O&S functions of the BMDS elements for which they are responsible, and urge them to do so as soon as possible. Furthermore, we expect the Director of the MDA to take steps to ensure that the cost estimate improvements required by the provision are made in a manner as consistent as practicable with the guidance issued pursuant to section 832 of Public Law 112–81, relative to O&S costs, and with the guidance issued pursuant to section 2334(d) of title 10, United States Code, relative to confidence levels of baseline cost estimates.

Prohibition on use of funds for MEADS program (sec. 232)

The House bill contained a provision (sec. 231) that would prohibit the obligation or expenditure of fiscal year 2014 funds for the Medium Extended Air Defense System (MEADS), and would also place conditions on the harvesting of MEADS technology.

The Senate committee-reported bill contained a similar provision (sec. 236) that would prohibit the use of fiscal year 2014 funds for MEADS.

The agreement includes the Senate provision.

We note that the Department of Defense has invested more than \$2.5 billion in the development of MEADS technology, and has a

substantial interest in making constructive use of any MEADS data and technology owned by the United States. We direct the Secretary of Defense to submit a report to the congressional defense committees, not later than 180 days after the enactment of this Act, providing: (1) An explanation of who owns the technology and data developed under the tri-national MEADS development program; (2) How the Secretary intends to ensure that the Department gets the maximum benefit from the U.S. investment in MEADS, including by making such technology and data appropriately available for “technology harvesting” for improvements to the Integrated Air and Missile Defense (IAMD) system program of record, taking into account the report required by House Report 113–102, “Technology harvesting of the Medium Extended Air Defense System”; and (3) U.S. policy regarding 3rd Party Sales of such technology, which we believe could be of benefit to the United States and its allies.

Prohibition on availability of funds for integration of certain missile defense systems; report on regional ballistic missile defense (sec. 233)

The Senate committee-reported bill contained a provision (sec. 232) that would express the sense of Congress regarding regional ballistic missile defenses and would require the Secretary of Defense to submit to the congressional defense committees a report on the status and progress of regional missile defense programs and efforts.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would clarify the elements of the required report. It would also include a prohibition on the use of fiscal year 2014 funds to integrate missile defense systems of the People’s Republic of China into U.S. missile defense systems.

We are concerned that the Government of Turkey made an initial decision to purchase a Chinese air and missile defense system for its territorial use. Such a system would not be compatible with, and should not be integrated with, missile defense systems of the North Atlantic Treaty Organization.

We direct that, not later than 60 days after submission of the report required by the provision, the Government Accountability Office shall provide a briefing to the congressional defense committees providing its views on the report.

We further direct that, not later than 90 days after the enactment of this Act, the Joint Staff and Joint Force Component Command for Integrated Missile Defense (JFCC-IMD) shall provide a briefing to the congressional defense committees with respect to any significant changes in the regional missile defense environment since the April 2011 Joint Capability Mix (JCM) III Study was completed, and whether and how the study could be updated to provide useful insights for future force structure levels and employment plans. The briefing should be based on updated intelligence information, updated missile defense systems efficacy and reliability information, and current and planned future budget levels, and any other matters the Joint Staff and JFCC-IMD consider useful.

Availability of funds for co-production of Iron Dome short-range rocket defense system in the United States (sec. 234)

The House bill contained a provision (sec. 237) that would authorize \$15.0 million to enhance the capability for producing the Iron Dome short-range rocket defense system in the United States.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would authorize up to \$15.0 million for non-recurring engineering costs associated with establishing the capacity for United States industry to produce parts and components of the Iron Dome system in the United States, subject to an agreement between the United States and Israel for co-production of Iron Dome parts and components. The provision would also require the Director of the Missile Defense Agency to submit a report to Congress on the plan to implement such agreement, including the estimated costs, schedule, and steps to minimize costs to the government of the United States to implement the agreement. The provision would also clarify that it is not intended to alter the planned Iron Dome procurement schedule or numbers, and would express the sense of Congress on the importance of a second production source in the United States. The provision would also require the Secretary of Defense to submit to the congressional defense committees a report on the status of missile defense cooperation between the United States and Israel.

We believe it is important for industry to pay for a substantial share of the cost of establishing a co-production capacity in the United States. Further, we direct that the Missile Defense Agency not use funds from other programs of record to pay for establishing an Iron Dome production capacity in the United States.

Additional missile defense radar for the protection of the United States homeland (sec. 235)

The Senate committee-reported bill contained a provision (sec. 234) that would require the Missile Defense Agency to deploy an additional missile defense radar for homeland missile defense, and would authorize \$30.0 million for initial costs toward such deployment.

The House bill contained no similar provision.

The agreement includes a provision that would require the Missile Defense Agency to deploy a missile defense radar at a location optimized to support defense of the homeland against long-range missile threats from North Korea, and would authorize \$30.0 million for initial costs toward such deployment. The provision would also require the Secretary of Defense to ensure that the United States is able to deploy additional tracking and discrimination sensor capabilities to support defense of the United States from future long-range ballistic missile threats that emerge from Iran. The provision would require the Secretary to submit a report on what sensor capabilities will be available for deployment on the Atlantic side of the United States by 2019, or sooner if Iran flight tests long-range missiles before then, and the manner in which such capabilities will be maintained to ensure they can be deployed in time to support the missile defense of the United States from long-range ballistic missile threats from Iran. We note that the sea-

based X-band radar platform and the Cobra Judy ship-based radar platform could serve as interim or surge sensor capabilities in the Atlantic region to support homeland defense against future long-range missile threats that emerge from Iran.

The agreement also authorizes an additional \$50.0 million for the Missile Defense Agency to develop enhanced discrimination capability for the Ballistic Missile Defense System, as reflected in the tables in section 4201. The Missile Defense Agency and the missile defense operational community have identified such discrimination enhancement as a priority for improving the future effectiveness of missile defenses, particularly for homeland missile defense.

Evaluation of options for future ballistic missile defense sensor architectures (sec. 236)

The Senate committee-reported bill included a provision (sec. 235) that would require the Secretary of Defense to evaluate options for future ballistic missile defense sensor architectures and to report to the congressional defense committees the results of the evaluation.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would include consideration of options for maximizing the use of various sensors for missile defense and for other missions.

Plans to improve the ground-based midcourse defense system (sec. 237)

The House bill contained a provision (sec. 236) that would require the Director of the Missile Defense Agency and the Commander of the U.S. Northern Command to develop options and a plan to improve the kill assessment capability and the hit assessment capability of the Ground-based Midcourse Defense (GMD) system, and to submit a report on the development of such capabilities.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would also require the Director of the Missile Defense Agency to submit a plan for the use of fiscal years 2013 and 2014 funds to develop, test, and deploy an upgraded enhanced exo-atmospheric kill vehicle for the GMD system.

If the report required by the provision is not submitted by April 1, 2014, we direct the Department of Defense to provide a briefing to the congressional defense committees on the subject matter required in the report not later than April 1, 2014.

The agreement authorizes \$100.0 million for design and development of common kill vehicle technology for an upgraded enhanced exo-atmospheric kill vehicle for the GMD system, an increase of \$30.0 million above the budget request, to accelerate design and development efforts, as reflected in the tables in section 4201.

Report on potential future homeland ballistic missile defense options (sec. 238)

The Senate committee-reported bill contained a provision (sec. 231) that would express the sense of Congress concerning the importance of homeland ballistic missile defense against the threat of limited ballistic missile attack from North Korea and Iran, and would require the Secretary of Defense to submit a report on potential future options for enhancing homeland ballistic missile defense.

The House bill contained no similar provision.

The agreement includes the Senate provision requiring the report, with a clarifying amendment.

The agreement authorizes an additional \$80.0 million for the Missile Defense Agency to continue efforts to understand the cause of the problem that resulted in the Ground-based Midcourse Defense system flight test failure on July 5, 2013, using the Capability Enhancement-I (CE-I) kill vehicle, and take the necessary steps to correct the problem and demonstrate the correction in an intercept flight test.

The CE-I flight test failure occurred after the budget was submitted, and no funds were planned or budgeted to analyze and correct the problem, or to conduct another intercept flight test to demonstrate the correction of the problem. The Missile Defense Agency has stated that its highest priority is correcting the problems associated with the flight test failures of the CE-II and CE-I kill vehicles, and demonstrating the successful corrections through additional intercept flight tests.

We direct that, not later than 60 days after the submission of the report required by the provision, the Government Accountability Office provide a briefing to the congressional defense committees providing its views on the report.

Briefings on status of implementation of certain missile defense matters (sec. 239)

The House bill contained a provision (sec. 232) that would require the Missile Defense Agency to construct and make operational in fiscal year 2018 an additional homeland missile defense site, designed to complement the existing sites in Alaska and California, to deal more effectively with missile threats from the Middle East.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would require the Secretary of Defense to provide, not later than 180 days after the completion of the site evaluation study required by section 227(a) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239), and 1 year later, a briefing to the congressional defense committees on the status of current efforts and plans to implement the requirements of section 227, including progress and plans toward preparation of the Environmental Impact Statement required by section 227(b), and the development of the contingency plan for the deployment of an additional homeland missile defense interceptor site, in case the President determines to proceed with such an additional deployment, as required by section 227(d).

The agreement authorizes an additional \$20.0 million for the Missile Defense Agency to continue activities relative to the site evaluation study, the Environmental Impact Statement, and planning activities consistent with the requirements of section 227(d) of the National Defense Authorization Act for Fiscal Year 2013, including the development of the contingency plan for the deployment of an additional homeland missile defense interceptor site. Such planning activities should include efforts to update the relevant planning documents from the deployment of missile fields at Fort Greely, Alaska, and plans for the possible deployment of a ground-based-interceptor site in Europe, to prepare for the potential deployment of an additional missile defense site in the continental United States, as well as such other preliminary planning activities as can practicably be commenced prior to site selection, or updated upon site selection.

Sense of Congress and report on NATO and missile defense burden-sharing (sec. 240)

The House bill contained a provision (sec. 238) that would require the President to seek specific levels of funding from the North Atlantic Treaty Organization (NATO) for various phases of the European Phased Adaptive Approach (EPAA) to missile defense.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would express the sense of Congress concerning the increasing importance of burden-sharing among the NATO allies for missile defense, and would require the Secretary of Defense to submit a report to the congressional defense committees providing: (1) The estimated costs for the EPAA; (2) A description of the level of NATO burden-sharing for the costs of NATO missile defense, including the EPAA; and (3) An assessment of, and recommendations for, areas where the Secretary believes NATO and its members could make additional burden-sharing contributions to NATO missile defense, including the EPAA.

We note that, as declared at the 2010 Lisbon Summit, the United States and its NATO allies share a strong interest in developing and deploying an operationally-effective and cost-effective missile defense capability to defend the territory, population, and military forces of NATO—including forward deployed United States forces—in Europe. The United States and its NATO partners are making a variety of contributions, both individually and collectively, to NATO missile defense, including through national contributions, host-nation basing agreements, and collective funding arrangements. The United States is contributing to the EPAA as its national contribution to NATO missile defense, and a number of NATO allies are providing important support for the EPAA, as well as other support for NATO missile defense. The cancellation of Phase 4 of the EPAA eliminated the contribution that the EPAA would have made toward augmenting U.S. homeland missile defenses against potential Iranian intercontinental ballistic missiles.

We believe that burden-sharing is an important NATO principle, and is important to the recently adopted NATO mission of missile defense of NATO territory, population, and military forces. There-

fore, while recognizing the important support provided by a number of NATO allies for key aspects of the EPAA, we believe the U.S. Government should encourage other NATO members to provide additional support for NATO missile defense, including the EPAA, to ensure an appropriate level of burden-sharing.

Sense of Congress on deployment of regional ballistic missile defense capabilities (sec. 241)

The House bill contained a provision (sec. 233) that would limit the use of funds to remove United States missile defense equipment in East Asia until after certain conditions are met.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would express the sense of Congress concerning the deployment of regional ballistic missile defense capabilities.

Sense of Congress on procurement of capability enhancement II exoatmospheric kill vehicle (sec. 242)

The House bill contained a provision (sec. 239) that would express the sense of Congress that the Secretary of Defense should not procure additional Capability Enhancement II (CE-II) exo-atmospheric kill vehicles for deployment until after the date on which a successful operational flight test of the CE-II has occurred.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical amendment.

Subtitle D—Reports

The Senate committee-reported bill contained a provision (sec. 251) that would require the Comptroller General to produce an annual report on the VXX presidential helicopter program until the program enters full-rate production or is cancelled, whichever comes first.

The House bill contained no similar provision.

The agreement includes the Senate provision with a technical/clarifying amendment.

Report on strategy to improve body armor (sec. 253)

The House bill contained a provision (sec. 252) that would require the Secretary of Defense to submit to the congressional de-

fense committees a comprehensive research and development strategy for achieving significant weight reductions for body armor components.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with a technical amendment.

Subtitle E—Other Matters

Establishment of Communications Security Review and Advisory Board (sec. 261)

The House bill contained a provision (sec. 261) that would require the Secretary of Defense to establish a senior-level body, to be known as the Cryptographic Modernization Review and Advisory Board, to assess and advise the cryptographic modernization activities of the Department of Defense.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the Chief Information Officer to chair the Board, with the Board monitoring overall communications security, cryptographic modernization, and key management efforts of the Department.

Extension and expansion of mechanisms to provide funds for defense laboratories for research and development of technologies for military missions (sec. 262)

The House bill contained a provision (sec. 263) that would extend section 219 of the National Defense Authorization Act of 2009 (Public Law 110–417) to September 2020. In addition, this provision would allow for funds to be accumulated for not more than 5 years for individual Department of Defense laboratory revitalization projects with costs up to \$4 million, provided prior notification of the total project cost is provided to the congressional defense committees.

The Senate committee-reported bill contained a provision (sec. 215) that extended section 219 of the National Defense Authorization Act of 2009 (Public Law 110–417) to September 2020.

The agreement includes the House provision with an amendment that requires an annual report on the use of the authority granted by this provision, as well as some other clarifying elements.

Extension of authority to award prizes for advanced technology achievements (sec. 263)

The House bill contained a provision (sec. 264) that would extend the authority of the Department of Defense to award prizes for advanced technology achievements until September 2018.

The Senate committee-reported bill contained a similar provision (sec. 213) that would extend this authority until September 2017.

The agreement includes the House provision.

Five-year extension of pilot program to include technology protection features during research and development of certain defense systems (sec. 264)

The House bill contained a provision (sec. 265) that would extend the Defense Exportability Features pilot program until October 1, 2020.

The Senate committee-reported bill contained an identical provision (sec. 214).

The agreement includes this provision.

Briefing on biometrics of the Department of Defense (sec. 265)

The House bill contained a provision (sec. 216) that would place limitations on the Department of Defense to obligate or expend more than 75 percent of funds for future biometric architectures or systems until 30 days after the Secretary of Defense submits a report to the congressional defense committees assessing the future program structure and architectural requirements for biometrics enabling capability.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would remove the funding limitation and request a briefing, including an assessment of the governance process for requirements across the Department of Defense, as well as interagency and international partners.

Sense of Congress on importance of aligning common missile compartment of Ohio-class replacement program with the United Kingdom's Vanguard successor program (sec. 266)

The House bill contained a provision (sec. 223) that would make a series of findings and express the sense of Congress regarding the importance of aligning the common missile compartment of the Ohio-class ballistic missile submarine program with the Vanguard-class successor program of the United Kingdom of Great Britain and Northern Ireland.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision with an amendment that eliminates the findings contained in the House provision.

Sense of Congress on counter-electronics high power microwave missile project (sec. 267)

The House bill contained a provision (sec. 224) that expressed a sense of Congress urging the Air Force to consider the Counter-electronics High Power Microwave Advanced Missile Program (CHAMP) technology capability demonstration as a potential weapon option available to combatant commanders by 2016.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment clarifying the need to complete developmental planning for such weapons systems if requirements are established by the combatant commanders in the future.

LEGISLATIVE PROVISIONS NOT ADOPTED

Conventional Prompt Global Strike Program

The Senate committee-reported bill contained a provision (sec. 211) that would prohibit the Department of Defense from executing any funds for the Conventional Prompt Global Strike (CPGS) program until 60 days after they deliver a report to the congressional defense committees addressing the policy consideration concerning the ambiguity problems regarding the launch of CPGS missiles from submarine platforms.

The House bill contained no similar provision.

The agreement does not include this provision.

We agree that no more than 75 percent of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2014 for the Department of Defense for research, development, test and evaluation and available for the Prompt Global Strike Capability Development program (PE#64165D8Z) for the CPGS program should be obligated or expended for any activities relating to the development of a submarine-launched capability under that program until 60 days after the date on which the Secretary of Defense submits to the congressional defense committees a report that addresses the policy considerations concerning any potential ambiguity problems regarding the launch of a conventionally-armed missile from submarine platforms, potential verification measures, any target sets the Secretary believes a submarine-launched conventionally-armed missile could reach that a missile on board another platform could not reach, the comparative cost considerations of submarine-launched conventional missiles and such systems launched by other platforms.

We also note that in congressional testimony, the Commander, U.S. Strategic Command, stated that “[t]oday, the only prompt global strike capability to engage potentially time-sensitive, fleeting targets continues to be ballistic missile systems armed with nuclear weapons. We continue to require a deployed conventional prompt strike capability to provide the President a range of flexible military options to address a small number of highest-value targets, including in an anti-access and area denial environment.”

Unmanned combat air system demonstration testing requirement

The House bill contained a provision (sec. 217) that would require the Secretary of the Navy to demonstrate unmanned, autonomous aerial refueling within the X-47B aircraft testing and evaluation program. The X-47B is an unmanned aircraft being tested under the Unmanned Combat Air System (UCAS) demonstration program.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We understand that the Chief of Naval Operations has decided that, unlike the original Navy plan, the Navy will continue flying the X-47B during fiscal year 2014, and will pursue a number of risk reduction activities. We support these Navy plans for continuing risk reduction activities for UCAS, and encourage the Navy

to consider performing the aerial refueling demonstration as part of these additional risk reduction activities.

Requirement to complete individual carbine testing

The House bill contained a provision (sec. 221) that would require the Department of the Army to complete planned testing for an individual carbine.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain this provision.

We understand that during the Army's testing of eight candidate carbines under the individual carbine program that none of the carbines met the Army's target for improved reliability requirements. We further understand that these results may be attributable to the interactions between the carbines and the recently introduced M855A1 standard 5.56mm rounds that were used during the test and evaluation. These test results suggest the Army may have used an unrealistically high reliability standard.

Accordingly, we urge the Army to re-evaluate the reliability standard used for this test, as well as other standards as appropriate. We encourage the Secretary of the Army to consider a process for continuous test and evaluation of alternatives to the M4A1 carbine that is based on realistic operational requirements and with significantly improved, but reasonably achievable, performance and reliability. We note that, while the Army may have reduced needs and limited funds to procure large numbers of new rifles or carbines in the near future, maintaining research and development efforts for new small arms in this class is essential to ensure that the industrial base can respond to sudden increases in demand as it did during Operation Iraqi Freedom and Operation Enduring Freedom. In this regard, the Secretary of the Army, or designee, is directed to provide the congressional defense committees a briefing that details the Army's long range standard rifle and carbine modernization strategy. This briefing shall be provided not later than April 1, 2014, and shall include the Army's plans, including where appropriate, schedules and funding profiles, for requirements development, technology research and development, procurement, and test and evaluation of commercially available and militarily suitable alternatives.

Establishment of funding line and fielding plan for a Navy laser weapon system

The House bill contained a provision (sec. 222) that would establish a funding line and fielding plan for a Navy laser weapon system for fiscal year 2018 and beyond.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We are supportive of accelerating the development and transition of directed energy weapons to programs of record, in the Navy as well as the other military departments. However, we believe that it is premature to create such a funding line. We also note that many of the current activities supporting development of directed energy weapons are already embedded in existing research and de-

velopment program elements, and therefore the creation of a consolidated funding line at this stage could be disruptive to those efforts and potentially detrimental to overall efforts to develop and field a militarily-relevant system.

Analysis of alternatives for successor to Precision Tracking Space System

The House bill contained a provision (sec. 235) that would require the Director of the Missile Defense Agency to perform an analysis of alternatives for a successor sensor system to the Precision Tracking Space System.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Sense of Congress on 30th anniversary of the Strategic Defense Initiative

The House bill contained a provision (sec. 240) that would express the sense of Congress concerning the 30th anniversary of the Strategic Defense Initiative.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Sense of Congress on negotiations affecting the missile defenses of the United States

The House bill contained a provision (sec. 242) that would express the sense of Congress concerning negotiations with the Russian Federation that would affect the missile defenses of the United States.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Report on main battle tank fuel efficiency

The House bill contained a provision (sec. 253) that would require the Secretary of the Army to submit a report to the congressional defense committees on an investment strategy to accelerate fuel efficiency improvements to the engine and transmission of the M1 Abrams tank.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that the Army and Marine Corps currently have no plan to replace the M1A2 or M1A1 Abrams main battle tank. We are also aware that the Army intends to proceed with a series of engineering change proposals that will incrementally enhance the platform's capabilities. We believe that the Army should accelerate the next series of Abrams upgrades where warranted by capability gaps or opportunities, technological maturity, and affordability. In this regard, the Army and Marine Corps should consider replacement of the current engine with a modern, fuel efficient power train. Therefore, the Secretary of the Army, in consultation with the Secretary of the Navy, is directed to submit a report to the con-

gressional defense committees, not later than June 1, 2014, on a business case analysis and an investment strategy that could accelerate the technology development and engineering change proposal processes to include a modern fuel efficient engine and transmission for the M1 Abrams series main battle tank.

Report on powered rail system

The House bill contained a provision (sec. 254) that would require the Secretary of Defense to provide a report to the congressional defense committees that comprehensively reviews and compares powered rail systems for the M4 Carbine system.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

The Secretary of the Army, or designee, is directed to provide a report to the congressional defense committees not later than April 1, 2014 on an assessment of the current M4/M16-mounted battery requirements associated with a 3-day dismounted mission for an Army infantry platoon compared to the same unit and mission if the members were equipped with an integrated weapon-mounted power source. The assessment should compare the battery requirements, numbers, weight, costs, as well as the likely impact on the operational functionality of the M4/M16 configured with an integrated power source, including weapons system effectiveness, efficiency, ergonomics, maintainability, reliability, and related risk. The assessment should also include a business case analysis of the potential acquisition and sustainment costs and savings associated with transitioning to an integrated M4/M16-mounted power technology to replace batteries for individual weapon-mounted components. Finally, the assessment should address the potential utility, if any, of incorporating a data link via such a weapon-mounted power source between soldier communications systems and soldier and weapon sensors. The Director, Operational Test and Evaluation is also directed to oversee the Army's live fire or other operational testing, if any, conducted as part of gathering data for this report.

Report on science, technology, engineering, and mathematics scholarship program

The House bill contained a provision (sec. 255) that would require the Secretary of Defense to assess whether the Department of Defense Science, Mathematics and Research for Transformation (SMART) scholarship program, or similar programs, could meet the undergraduate and graduate science, technology, engineering and mathematics (STEM) workforce needs of the intelligence community (IC).

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We note that the national security community, in general, faces growing challenges with meeting its STEM workforce needs, in particular, attracting top-level U.S. citizens that are eligible for security clearances. The SMART program was established by the Department of Defense to attract and retain promising candidates

and STEM leaders into the Department, including components of the IC. SMART provides scholarships to students pursuing technical degrees in disciplines of interest to the Department and the IC. We recognize that the SMART program has been useful in meeting its intent and believe that data provided on the program shows that the SMART program could be used by a broader community within the IC, but any further expansion would require further socialization to increase participation, as well as additional resources to fund any additional students supporting the needs of the IC.

Clarification of eligibility of a State to participate in defense experimental program to stimulate competitive research

The House bill contained a provision (sec. 262) that would modify the eligibility requirements for the Defense Experimental Program to Stimulate Competitive Research (DEPSCOR) to bring it more in line with the eligibility requirements of the Experimental Program to Stimulate Competitive Research (EPSCOR) under the National Science Foundation (NSF).

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that while the Department of Defense maintains the statutory authority for DEPSCOR, the Department has not included funds to support the program since 2009 due to changing research needs and priorities. Additionally, even should funds be made available for DEPSCOR in the future, we would be concerned about potential duplication with NSF's EPSCOR. DEPSCOR was originally established as a separate activity from EPSCOR in section 257 of the National Defense Authorization Act of Fiscal Year 1995 (Public Law 103-337) because the needs of the Department were not being met by the EPSCOR. Should the Department choose to revitalize the DEPSCOR activity, we believe it should maintain a separate and distinct eligibility requirement to ensure that it is able to meet the separate and distinct research needs of the Department of Defense.

Briefing on power and energy research conducted at university-affiliated research centers

The House bill contained a provision (sec. 266) that would require the Secretary of Defense to brief the congressional defense authorizing committees on power and energy research conducted at university-affiliated research centers.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Approval of certain new uses of research, development, test, and evaluation land

The House bill contained a provision (sec. 267) that would prohibit the Secretary of Defense or the head of any other department or agency of the Federal Government from finalizing any decision regarding new land use activity on ranges, test areas, or other land used by the Department of Defense (DOD) for activities related to

research, development, test, and evaluation and determined to be critical to national security unless the secretary concerned approves such activity in writing.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that the DOD Siting Clearinghouse was created to preserve military readiness and protect DOD capabilities from incompatible energy infrastructure development by collaborating with DOD components and external stakeholders to prevent, minimize, or mitigate adverse impacts on military operations, readiness, and testing. The Clearinghouse is intended to be the single point of contact and principal advocate for DOD equities in all such deliberations.

We understand that as a result of the Clearinghouse review of the Sun Zia Southwest Transmission Project, DOD raised significant concerns and identified potential impacts on the capabilities of the White Sands Missile Range (WSMR) in New Mexico. According to an August 7, 2013, letter from the Acting Deputy Under Secretary of Defense for Installations and Environment to the Principal Deputy Director of the Bureau of Land Management (BLM), the route of the proposed transmission line, without mitigation, “would result in an unacceptable risk to national security. If a bulk power transmission line is constructed along the selected route, it would preclude our capability to fully test the Joint Integrated Air and Missile Defense Architecture and other weapon systems under realistic threat environments at WSMR. This testing is absolutely necessary and it should be clearly understood that no other location exists in the United States where it is possible to conduct flight tests with the footprint requirements these weapons systems present. Critical to fully testing joint military weapons are the preservation of the restricted airspace (from the surface to unlimited) on the range area on WSMR, and the permanently-designated and specially-allocated restricted airspace in the northern extension area.”

We expect that as the Sun Zia Southwest Transmission project approval request proceeds, DOD concerns will be addressed by the executive branch to preserve this critical resource. We expect that appropriate mitigation measures will be included concurrent to the issuance of a Record of Decision by BLM.

Should DOD concerns not be addressed in this case, we direct the Secretary of Defense to review the processes and effectiveness of the DOD Siting Clearinghouse and to provide a report to the congressional defense committees not later than 90 days after a Record of Decision with proposals that will improve the ability of the Clearinghouse to assess impacts to national security in a timely manner and ultimately preserve military readiness and protect DOD capabilities from incompatible energy infrastructure development.

Canines as stand-off detection of explosives and explosive precursors

The House bill contained a provision (sec. 268) that would require the Department of Defense (DOD) to provide a report on the

capability and infrastructure required to support canines as stand-off detection of explosives and explosive precursors.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We direct the Secretary of Defense to provide a report to the Committees on Armed Services of the Senate and the House of Representatives no later than 180 days after the date of enactment of this Act. The report shall make a determination based on requirements if the DOD, and each military service, intends to develop and maintain the capability and infrastructure required to support canines as stand-off detection of explosives and explosive precursors. If deemed appropriate by the Secretary, the report shall also detail: (1) The acquisition process with respect to canines as stand-off detection of explosives and explosive precursors; (2) The procedures established by the DOD to ensure that canines reach or exceed the appropriate performance standards; (3) A plan to ensure that the latest data and information regarding canine capabilities are distributed throughout the DOD; (4) Any technologies capable of replacing the canine as a stand-off detection capability; and (5) A determination of the relevant office to oversee the above elements.

TITLE III—OPERATION AND MAINTENANCE

Subtitle A—Authorization of Appropriations

Operation and maintenance funding (sec. 301)

The House bill contained a provision (sec. 301) authorizing appropriations for fiscal year 2014 for the use of the armed forces and agencies of the Department of Defense for expenses, not otherwise provided for, for operation and maintenance, as specified in the funding table in section 4301.

The Senate committee-reported bill contained an identical provision (sec. 301).

The agreement includes this provision.

Subtitle B—Energy and Environment

Deadline for submission of reports on proposed budgets for activities relating to operational energy strategy (sec. 311)

The House bill contained a provision (sec. 311) that would amend section 138c(e) of title 10, United States Code, to revise the date of submission for the report on the proposed budgets that were not certified for that fiscal year.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Facilitation of interagency cooperation in conservation programs of the Departments of Defense, Agriculture, and Interior to avoid or reduce adverse impacts on military readiness activities (sec. 312)

The House bill contained a provision (sec. 312) that would amend section 2684a of title 10, United States Code, to permit a recipient

of funds under the Sikes Act to be able to use the funds for matching funds or cost-sharing requirements of conservation programs. This section would also expire the authority on October 1, 2019, but permit any agreements that were entered into prior to September 30, 2019, to continue according to its terms and conditions.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Reauthorization of Sikes Act (sec. 313)

The House bill contained a provision (sec. 313) that would extend the authority of the Sikes Act through 2019.

The Senate committee-reported bill amendment contained no similar provision.

The agreement includes the House provision.

Clarification of prohibition on disposing of waste in open-air burn pits (sec. 314)

The House bill contained a provision (sec. 317) that would codify the definition of covered waste as it relates to the requirements established by section 317 of the National Defense Authorization Act for Fiscal Year 2010, title 10 of United States Code 2701 note (Public Law 111-84).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical amendment.

Limitation on availability of funds for procurement of drop-in fuels (sec. 315)

The House bill contained a provision (sec. 319) that would limit the Department of Defense's (DOD) ability to purchase or produce biofuels until the earlier of either the date on which the Budget Control Act of 2011 is no longer in effect, or the date on which the cost of biofuel is equal to the cost of conventional fuels. The provision would provide an exception for biofuel test and certification and research and development.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment that would prohibit DOD funds to be used for bulk purchases of drop-in fuel for operational purposes during fiscal year 2014, unless the cost of that drop-in fuel is cost competitive with traditional fuel, subject to a national security waiver. We note that the phrase "cost competitive" in this section generally refers to prices that are equal to or lower than prices offered by competitors for similar goods or services. However, we note that terms and conditions for particular purchases may vary; in particular, long-term energy purchases are likely to have different pricing structures from short-term or spot-market purchases. Accordingly, some flexibility in the application of this phrase is anticipated, where necessary to address such differences. We understand that average prices over the period of a long-term contract would be cost competitive.

Subtitle C—Logistics and Sustainment

Strategic policy for prepositioned materiel and equipment (sec. 321)

The Senate committee-reported bill contained a provision (sec. 312) that would direct the Secretary of Defense to develop an overarching strategy, along with an implementation plan, to integrate and synchronize at a Department-wide level, the services' prepositioning programs. The strategy and implementation plan would ensure that the Department of Defense (DOD) prepositioning programs, both ground and afloat, align with national defense strategies and new DOD priorities, and emphasize joint oversight to maximize effectiveness and efficiencies in prepositioned materiel and equipment across the DOD.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Department of Defense manufacturing arsenal study and report (sec. 322)

The House bill contained a provision (sec. 322) that would require the Secretary of Defense to review current and expected manufacturing requirements across the Department of Defense to identify critical manufacturing capabilities which could be executed by the government-owned arsenals, and to brief the results of the review to the congressional defense committees.

The Senate committee-reported bill contained a similar provision (sec. 311) that would require the Secretary of Defense, in consultation with the military services and defense agencies, to review current and expected manufacturing requirements for which there is no or limited domestic commercial source and which are appropriate for manufacturing within an arsenal owned by the United States in order to support critical manufacturing capabilities.

The agreement includes the Senate provision with an amendment that would require the Secretary of Defense to review arsenals owned by the United States in order to support critical manufacturing capabilities. The agreement also directs the Government Accountability Office to report and assess the Department's review with recommendations.

Consideration of Army arsenals' capabilities to fulfill manufacturing requirements (sec. 323)

The House bill contained a provision (sec. 323) that would require program executive officers and program managers to solicit information from government-owned arsenals when undertaking a make-or-buy analysis, notify government-owned arsenals of the requirement, and allow arsenals that have the capability to fulfill a manufacturing requirement to submit a proposal for the requirement.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Strategic policy for the retrograde, reconstitution, and replacement of operating forces used to support overseas contingency operations (sec. 324)

The Senate committee-reported bill contained a provision (sec. 322) that would direct the Secretary of Defense to establish a policy setting forth the program and priorities of the Department of Defense for the retrograde, reconstitution, and replacement of units and materiel used to support overseas contingency operations. The provision directed that the policy shall take into account national security threats, the requirements of the combatant commands, the current readiness of the operational forces of the military departments, and risk associated with strategic depth and the time necessary to reestablish required personnel, equipment, and training readiness in such operating forces.

The House bill contained no similar provision.

The agreement includes the Senate provision with a technical amendment.

Littoral Combat Ship Strategic Sustainment Plan (sec. 325)

The House bill contained a provision (sec. 321) that would require the Secretary of the Navy to submit a strategic sustainment plan for the Littoral Combat Ship (LCS) program to the congressional defense committees.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would clarify that the strategic sustainment plan would have to identify specifically any contractor support needed by the LCS vessels when they are forward deployed.

Strategy for improving asset tracking and in-transit visibility (sec. 326)

The House bill contained a provision (sec. 836) that would direct the Secretary of Defense to improve the management of defense equipment and supplies throughout their lifecycles by adopting and implementing item unique identification, radio frequency identification, biometrics, and other automated information and data capture technologies for the tracking, management, and accountability for deployed assets.

The Senate committee-reported bill contained a similar provision (sec. 331) that would direct the Secretary of Defense to complete a comprehensive strategy and implementation plan for improving asset tracking and in-transit visibility across the Department of Defense.

The agreement includes the Senate provision with a clarifying amendment that would include an operational security assessment to ensure all DOD assets are appropriately protected during the execution of the comprehensive strategy and implementation plan.

We recognize the challenges in supply chain management, including asset tracking and in-transit visibility capabilities. We see this posing an acute near-term challenge, especially in light of the experience with retrograde operations from the Republic of Iraq and the on-going operations in the Islamic Republic of Afghanistan.

Furthermore, we note that supply chain management challenges have been an on-going source of concern for the Department of Defense, from the emergence of the Government Accountability Office's high risk list in 1990, to the current need to achieve auditability and financial management goals set by the Secretary of Defense and Congress.

We believe that the strategy called for by this provision is an important step to improving the Department's supply chain management shortfalls. In developing and implementing this strategy, we urge the Department to look at how it can better leverage new technologies. For example, item unique identification, radio frequency identification, and biometrics could be more effectively used to interface with enterprise resource planning systems and improve the tracking, management, and accountability for all Department assets.

Subtitle D—Reports

Additional reporting requirements relating to personnel and unit readiness (sec. 331)

The House bill contained a provision (sec. 331) that would amend the report required under section 482 of title 10, United States Code, to require the Secretary of Defense to report to the congressional defense committees on the ability of the geographic and functional combatant commanders to successfully meet their respective contingency and operational plans and key mission essential tasks.

The Senate committee-reported bill contained a similar provision (sec. 332) that would amend section 482 of title 10, United States Code, to update and streamline the quarterly readiness report to Congress.

The agreement includes the House provision with a clarifying amendment that would combine both provisions and would amend section 482 of title 10, United States Code.

Modification of authorities on prioritization of funds for equipment readiness and strategic capability (sec. 332)

The House bill contained a provision (sec. 332) that would repeal the requirement that the Comptroller General of the United States report on the Army's progress in moving to a modular force design.

The Senate committee-reported bill contained a similar provision (sec. 321) that would repeal the requirement for modularity reports by both the Army and the Government Accountability Office and would also add a requirement that the Marine Corps report budget information regarding funding for the reset of equipment and reconstitution of prepositioned stocks.

The agreement includes the Senate provision.

Revision to requirement for annual submission of information regarding information technology capital assets (sec. 333)

The House bill contained a provision (sec. 333) that would amend the National Defense Authorization Act for Fiscal Year 2003 (Public Law 107-314; 10 U.S.C. 221 note) to align Department of Defense high-threshold information technology Capital Asset report-

ing with the Department's Major Automated Information Systems reporting and its Exhibit 300 reporting to the Office of Management and Budget.

The Senate committee-reported bill contained an identical provision (sec. 333).

The agreement includes this provision.

Modification of annual corrosion control and prevention reporting requirements (sec. 334)

The Senate committee-reported bill contained a provision (sec. 334) that would amend section 903(b)(5) of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (P.L. 110-417; 10 U.S.C. 2228 note) to update the military departments' strategic plans with performance measures and show clear linkage to the Department of Defense's overarching goals and objectives as described in the Department's strategic plan for corrosion control and prevention.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Subtitle E—Limitations and Extensions of Authority

Certification for realignment of forces at Lajes Air Force Base, Azores (sec. 341)

The House bill contained a provision (sec. 341) that would restrict the Secretary of the Air Force from reducing the force structure at Lajes Air Force Base, Azores, (Lajes) until 30 days after the European Infrastructure Consolidation Assessment is completed and is briefed to the congressional defense committees.

The Senate committee-reported bill contains no similar provision.

The agreement includes a provision requiring that, prior to taking any action to realign forces at Lajes, the Secretary of Defense must certify to the congressional defense committees that the realignment is supported by a European Infrastructure Consolidation Assessment.

Limitation on performance of Department of Defense flight demonstration teams outside the United States (sec. 342)

The House bill contained a provision (sec. 342) that would prohibit the Secretary of Defense from using any fiscal year 2014 or 2015 funds to allow flight demonstration teams to perform at any location outside the United States.

The Senate committee-reported bill contained no similar provision. The Senate report accompanying S. 1197 (S. Rpt. 113-44) of the National Defense Authorization Act for Fiscal Year 2014 commented on Department of Defense (DOD) guidance prohibiting all aerial demonstrations, including flyovers, jump team demonstrations, and participation in civilian air shows and military open houses. The report observed that: (1) There may be certain circumstances where an exception to this general policy could provide some level of community engagement as a no-cost addition to activities that are required for training or readiness; and (2) DOD should reconsider whether this policy should be enforced on a blanket basis or whether the policy should allow for community engage-

ment if that engagement can be completed as a no-cost adjunct to missions fulfilling other required operational or training activities.

The agreement includes the House provision with an amendment that would prohibit spending funds for performances of flight demonstration teams outside the United States if the Department has cancelled any performances of flight demonstration teams inside the United States by reason of insufficient funds due to a sequestration. We are intending that this provision cover the Air Force Thunderbirds, the Navy Blue Angels and the Army Golden Knights.

Limitation on funding for United States Special Operations Command National Capital Region (sec. 343)

The Senate committee-reported bill contained a provision (sec. 341) that would prohibit the expenditure of any funds for the U.S. Special Operations Command National Capital Region (USSOCOM–NCR) until 30 days after the Secretary of Defense provides the congressional defense committees a report which describes, at a minimum: (1) The purpose of the USSOCOM–NCR; (2) The activities to be performed by the USSOCOM–NCR; (3) An explanation of the impact of the USSOCOM–NCR on existing activities at USSOCOM headquarters; (4) A detailed breakout, by fiscal year, of the staffing and other costs associated with the USSOCOM–NCR over the future years defense program; (5) A description of the relationship between the USSOCOM–NCR and the Office of the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict (ASD SOLIC); (6) The role of the ASD SOLIC in providing oversight of USSOCOM–NCR activities; and (7) Any other matters the Secretary deems appropriate.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Limitation on availability of funds for Trans Regional Web Initiative (sec. 344)

The Senate committee-reported bill contained a provision (sec. 343) that would prohibit the Secretary of Defense from expending any funds in Operation and Maintenance, defense-wide (OMDW), for the Trans Regional Web Initiative (TRWI).

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would prohibit the Secretary of Defense from expending more than \$2.0 million in OMDW for TRWI and restrict the use of such funds for the termination of the program as managed by U.S. Special Operations Command or for purposes of transitioning appropriate TRWI capabilities to other agencies.

In light of budget concerns for the U.S. Government, resource constraints for the Department of Defense, and shifts in the geopolitical environment and security strategies, we note our concern with regard to the Department's direction for strategically engaging in the information environment. We remain skeptical of the effectiveness of the websites established under the TRWI and believe that available resources may better be used to support tactical and operational military information support activities. We believe strategic information operations activities, like TRWI, may more appro-

privately be managed by other relevant U.S. Government agencies, with the Department of Defense focused on contributing to an interagency approach that is responsive to military-specific operational requirements.

If the Secretary of Defense deems it to be in the national security interests of the United States and appropriate under current fiscal pressures, we note the Department of Defense may use funds authorized by this Act for TRWI to conduct a pilot project using existing authorities with an appropriate U.S. Government agency, such as the Broadcasting Board of Governors. Such a pilot could be used to demonstrate the transition of appropriate TRWI capabilities to such agency and support the strategic information operations requirements of the Geographic Combatant Commanders. We believe that any such pilot should seek to demonstrate responsiveness to the time sensitive needs of the Department of Defense while integrating such activities with broader U.S. strategic communications objectives. Consistent with this provision, we expect that the Department of Defense will not request additional funding for TRWI in fiscal year 2015 and beyond.

Subtitle F—Other Matters

Gifts made for the benefit of military musical units (sec. 351)

The House bill contained a provision (sec. 599) that would amend section 974 of title 10, United States Code, to require that any gift made on the condition that the gift be used for the benefit of a military musical unit be credited to the appropriation or account providing the funds for such musical unit.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would authorize service secretaries to accept contributions of money, personal property, or services on the condition that such money, property, or services be used for the benefit of a military musical unit, and requiring that such contributions be credited to the appropriation or account for that musical unit.

Revised policy on ground combat and camouflage utility uniforms (sec. 352)

The House bill contained a provision (sec. 351) that would establish as national policy a requirement for all the U.S. military services to use a joint combat camouflage uniform by October 1, 2018, with certain exceptions.

The Senate committee-reported bill contained a similar provision (sec. 351) that would direct the Secretary of Defense to reduce the separate development and fielding of service-specific combat and camouflage utility uniforms in order to collectively adopt and field the same combat and camouflage utility uniforms for use by all members of the Armed Forces.

The agreement includes the Senate provision with a clarifying amendment that would combine both provisions and eliminate the 2018 deadline.

We note the provision adopted makes it the policy of the United States for the Secretary of Defense to eliminate the development

and fielding of Armed Force-specific combat and camouflage utility uniforms and families of uniforms, in order to adopt and field a common combat and camouflage utility uniform, or family of uniforms, for specific combat environments, to be used by all members of the Armed Forces. Each Armed Force will be prohibited from adopting new combat and camouflage utility uniforms unless: (1) All the Armed Forces adopt the same uniform or family of uniforms; (2) An Armed Force adopts a uniform currently in use by another Armed Force; or (3) The Secretary of Defense grants an exception, based on unique circumstances or operational requirements.

We note that exceptions granted to this policy include: (1) Combat and camouflage utility uniforms and families of uniforms for use by special operations personnel; (2) Engineering modifications to existing combat and camouflage utility uniforms and families of uniforms such as power harnessing or generating textiles, fire resistant fabrics, and anti-vector, anti-microbial, and anti-bacterial treatments; (3) Ancillary uniform items such as headwear, footwear, body armor, and other items designated by the secretaries of the military departments; (4) Vehicle crew uniforms; (5) Service-specific cosmetic modifications; or (6) existing Service-specific uniforms that meet operational requirements.

We note that a secretary of a military department may not prevent the secretary of another military department from authorizing the use of any combat or camouflage utility uniform or family of uniforms approved for use by an Armed Force under the jurisdiction of the secretary. Furthermore, the secretary of a military department shall formally register with the Joint Clothing and Textiles Governance Board all current and future combat uniforms, camouflage utility uniforms, and families of uniforms.

We also note that 60 days after the enactment of this Act, the Secretary of Defense shall issue implementation guidance that requires the secretaries of the military departments to: (1) Establish joint performance criteria for the design, development, fielding, and characteristics of combat and camouflage utility uniforms and families of uniforms and include that criteria in all new requirements documents; (2) Continue to work together to assess and develop new technologies that could be incorporated into future combat and camouflage utility uniforms and families of uniforms to improve warfighter survivability; (3) Ensure that new combat and camouflage utility uniforms and families of uniforms meet the geographic and operational requirements of the commanders of the combatant commands; and (4) Ensure that all new combat and camouflage utility uniforms and families of uniforms achieve interoperability with all components of individual warfighter systems, including body armor, organizational clothing and equipment, and other individual protective systems.

We fully expect the Secretary of Defense to enforce this policy and not deviate from its intent to reduce the separate development and fielding of Armed Force-specific combat and camouflage uniforms and families of uniforms.

This section would also permit the cooperative agreements to be used to acquire property or services for the direct benefit or use of the U.S. Government, and sets limitations on agreements that are not on military installations. Finally, this section would also expire the authority on October 1, 2019, but permit any agreements that were entered into prior to September 30, 2019, to continue according to its terms and conditions.

The Senate committee-reported bill amendment contained no similar provision.

The agreement does not contain this provision.

Military readiness and southern sea otter conservation

The House bill contained a provision (sec. 320) that would amend section 631 of title 10, United States Code, by adding a provision permitting the Secretary of the Defense to establish "Southern Sea Otter Military Readiness Areas." This provision would exempt southern sea otters from the Endangered Species Act of 1973 (16 U.S.C. 1533, 1538) and the Marine Mammal Protection Act of 1972 (16 U.S.C. 1371, 1372).

The Senate committee-reported bill contained no similar provision.

The agreement does not contain this provision.

Assessment of outreach for small business concerns owned and controlled by women and minorities required before conversion of certain functions to contractor performance

The House bill contained a provision (sec. 324) that would forbid a Department of Defense function performed by Department of Defense civilian employees and tied to a military base from being converted into a contractor function until the Secretary of Defense conducts an assessment to determine if the Department of Defense has carried out sufficient outreach programs to assist small businesses owned and controlled by women and socially and economically disadvantaged individuals.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain this provision.

Ordnance related records review and reporting requirement for Vieques and Culebra Islands, Puerto Rico

The Senate committee-reported bill contained no similar provision.

The agreement does not contain this provision.

We note that the Department of Defense, for land and water sites on Culebra Island for which the Department is responsible, has completed historical research under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) process and issued Preliminary Assessment reports concerning the Department's former use of sites on Culebra Island for live-fire training.

We also note that for these sites, the Army has completed site inspections and is currently conducting remedial investigations that will determine whether an environmental response action is required at specific sites.

Finally, we note that the Department of Defense is in the process of cleaning up portions of the former operational ranges on Vieques and also is conducting preliminary assessments, site inspections, and remedial investigations to determine whether a response action is required under CERCLA at Vieques. Therefore, we encourage the Department of Defense to work with the Commonwealth of Puerto Rico to ensure the documents and reports from the historical records reviews and investigations that the Department of Defense and the Army completed for those former military sites on Culebra and Vieques are made available to the public.

Authorization to institute a centralized, automated mail redirection system to improve the delivery of absentee ballots to military personnel serving outside the United States

The Senate committee-reported bill contained a provision (sec. 352) that would authorize the Secretary of Defense to transfer up to \$4.5 million from defense-wide operation and maintenance to the Postal Service Fund for purposes of implementing the modernization of the U.S. Postal Service's mail delivery system to improve the delivery of absentee ballots to military personnel serving outside the United States.

The House bill contained no similar provision.

We understand that alternate funding has been used to modernize the U.S. Postal Service's mail delivery system to improve the delivery of absentee ballots to military personnel serving outside the United States.

TITLE IV—MILITARY PERSONNEL AUTHORIZATIONS

Subtitle A—Active Forces

End strengths for active forces (sec. 401)

The House bill contained a provision (sec. 401) that would authorize the following end strengths for active duty personnel of the armed forces as of September 30, 2014: Army, 520,000; Navy, 323,600; Marine Corps, 190,200; and Air Force, 327,600.

The Senate committee-reported bill contained an identical provision (sec. 401).

The agreement includes this provision.

End strength levels for the active forces for fiscal year 2014 are set forth in the following table:

Service	FY 2013 Authorized	FY 2014		Change from	
		Request	Recommendation	FY 2014 Request	FY 2013 Authorized
Army	552,100	520,000	520,000	0	- 32,100
Navy	322,700	323,600	323,600	0	900
Marine Corps	197,300	190,200	190,200	0	- 7,100
Air Force	329,460	327,600	327,600	0	- 1,860
DOD Total	1,401,560	1,361,400	1,361,400	0	- 40,160

Revisions in permanent active duty end strength minimum levels and in annual limitation on certain end strength reductions (sec. 402)

The House bill contained a provision (sec. 402) that would establish the following minimum end strengths for active-duty personnel as of September 30, 2014: Army, 520,000; Navy, 323,600; Marine Corps, 190,200; and Air Force, 327,600.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would establish minimum active-duty end strengths for the Army of 510,000 and the Marine Corps of 188,000, and would amend section 403 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) to increase the maximum annual reduction in end strength authorized by that section for the Army to 25,000 and for the Marine Corps to 7,500.

Minimum end strength levels for active-duty personnel for fiscal year 2014 are set forth in the following table:

Service	FY 2013 Authorized	FY 2014 Recommendation	Change from
			FY 2013
Army	542,700	510,000	- 32,700
Navy	322,700	323,600	900
Marine Corps	193,500	188,000	- 5,500
Air Force	329,460	327,600	- 1,860
DOD Total	1,388,360	1,349,200	- 39,160

We note that continued fiscal constraints have forced the Army and the Marine Corps to alter their end strength reduction plans to reach their pre-sequester end strength targets of 490,000 for the Army and 182,100 for the Marine Corps by the end of fiscal year 2015, 2 years before originally anticipated. In order to maintain a balance between end strength, readiness of the force, and modernization, we will support this altered reduction plan. However, we remain concerned that unfettered reductions in end strength will have a detrimental impact on force structure and, ultimately, operational mission capability and capacity among the services, and harm the morale of the force. The services should be very cautious in their efforts to further reduce the force to ensure that we do not break faith with those who continue to serve in the current conflicts, and those who have served our nation in war.

Subtitle B—Reserve Forces

End strengths for Selected Reserve (sec. 411)

The House bill contained a provision (sec. 411) that would authorize the following end strengths for Selected Reserve personnel, including the end strengths for reserves on active duty in support of the reserves, as of September 30, 2014: the Army National Guard of the United States, 354,200; the Army Reserve, 205,000; the Navy Reserve, 59,100; the Marine Corps Reserve, 39,600; the Air National Guard of the United States, 105,400; the Air Force Reserve, 70,400; and the Coast Guard Reserve, 9,000.

We note that section 534 of the National Defense Authorization Act for Fiscal Year 2013, Public Law 112–239, required the Services, along with the Coast Guard, to review the treatment of hazing and report the results of the reviews to the appropriate congressional committees. As a result of the review, the Marine Corps revised its hazing policy on May 20, 2013, to prohibit all forms of hazing. The Army established a Hazing Policy Assessment Team to review all hazing cases from 2006 through 2013, and the Navy established the Office of Hazing Prevention.

In addition, the Services are either tracking or in the process of tracking hazing incidents, and are continuing efforts to address prevention of hazing in their force. We believe that members of the armed forces and their families make great sacrifices on behalf of the country, and their transition from military to civilian life should be as seamless as possible by providing them opportunities to earn civilian occupational credentials and licenses. State and local governments and industries should streamline methods for assessing the equivalency of military training and experience, and accelerate occupational and professional licensure and certifications for members and spouses. Further, we believe that private employers should, to the extent practicable, do their utmost to educate and inform their managers, supervisors, and human resource departments on the advantages of hiring qualified veterans who have service-connected permanent total disabilities, as well as qualified surviving spouses of service members killed in action.

We note that the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81) required the Department of Defense to carry out a pilot program to assess the feasibility and advisability of permitting enlisted members of the armed forces to obtain civilian credentialing or licensing for skills required for military occupational specialties or qualification for duty specialty codes. The Department recently successfully completed the initial phase which had selected five civilian occupations for the pilot, which included aircraft mechanics, automotive mechanics, healthcare support, logistics and supply, and truck drivers. These occupations were chosen because the labor market outlook projects medium to high wages, high employment, and significant growth for civilian jobs in these occupations. As a result of the initial results, the Department recommends continuing and expanding the pilot program, expanding credentialing opportunities to military occupational codes in law enforcement, and including greater participation by the reserve components as well as wounded, ill, or injured service members.

ative to the division of retired pay under section 1408 of title 10, United States Code.

The House bill contained no similar provision.

The agreement does not include this provision.

We understand that a retiree's decision to receive CRSC may have significant consequences on a former spouse who has been receiving a division of retired pay, including a division of CRDP. Such a decision can leave a former spouse with a sizable debt to the Federal Government for the past divisions of CRDP already paid. We remain concerned about reports that predatory lenders continue to prey on service members and their families using forms of credit designed specifically to evade coverage of the MLA under the rules promulgated by the Department of Defense. We strongly encourage agencies with either explicit or implied enforcement authority over the MLA to enforce the MLA to the maximum extent possible. In the conference report accompanying the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239), the conferees expressed concern over the evolution of these predatory products and practices since 2006. The conferees thus directed the Secretary of Defense to review the evolution of predatory products and practices since 2006 and “to determine if changes to rules implementing section 987 are necessary to protect covered borrowers from continuing and evolving predatory lending practices, and to report to the Committees on Armed Services of the Senate and House of Representatives” by January 2, 2014, on the results of this review. In furtherance of this effort, the Department issued an advanced notice of proposed rulemaking on June 17, 2013. We expect the Department to issue its report by the end of the year together with new rules implementing the MLA that will address lending products crafted to evade coverage under existing MLA regulations, and all agencies with enforcement powers over the MLA to exercise those powers under these new rules to protect service members and their families from predatory lending practices.

We note that each of the military departments has embedded behavioral health care providers in certain operational and deployable units whose purpose is to provide increased access to behavioral health care for service members in theater.

Periodic mental health assessments for members of the Armed Forces

The House bill contained a provision (sec. 702) that would require the Secretary of Defense to provide periodic person-to-person mental health assessments to each member of the armed forces serving on active duty.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

Behavioral health treatment of developmental disabilities under TRICARE

The House bill contained a provision (sec. 703) that would amend section 1077 of title 10, United States Code, to authorize behavioral health treatment, including applied behavior analysis therapy, for all developmental disabilities as defined by section 15002(8) of title 42, United States Code, including autism spectrum disorders, when prescribed by a physician to be covered under the basic TRICARE program for certain beneficiaries.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Cooperative health care agreements between the military departments and non-military health care entities

The House bill contained a provision (sec. 712) that would authorize the secretaries of the military departments to establish cooperative health care agreements between military installations and local or regional non-military health care entities.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We note that the Secretary of Defense was provided the authority to enter into cooperative health care agreements under section 713 of the National Defense Authorization Act for Fiscal Year 2010 (10 U.S.C. 1073 note), and that the Secretary may delegate this authority. We believe that in circumstances where the Secretary deems it appropriate, the Secretary should utilize or delegate this authority.

Limitation on availability of funds for integrated electronic health record program

The House bill contained a provision (sec. 713) that would limit the amount of funds the Secretary of Defense may obligate or expend for procurement or research, development, test and evaluation for the integrated electronic health record program until 30 days after the date that the Secretary submits a report detailing an analysis of alternatives for the plan.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Mental health support for military personnel and families

The House bill contained a provision (sec. 723) that would authorize the Secretary of Defense to carry out collaborative programs to: respond to suicide and combat stress-related arrest rates of service members; train active-duty members to recognize and respond to combat stress disorder, suicide risk, substance addiction, risk-taking behaviors, and family violence; and determine the effectiveness of Department of Defense (DOD) efforts to reduce military suicide rates.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that in December 2012, the Drug Enforcement Administration (DEA) published in the Federal Register a Notice of Proposed Rulemaking to implement the Secure and Responsible Drug Disposal Act of 2010 (Public Law 111-273). We believe that the proposed rule severely hampers DOD efforts to collect and safely dispose of unused prescription drugs. The Assistant Secretary of Defense for Health Affairs has expressed concern that DEA's proposed rule will "limit DOD's ability to accept unused patient medications in a routine setting and reduce the potential effectiveness of efforts to eliminate opportunities for medication misuse, abuse and tragic adverse events." We understand that the DEA has been in discussions with the Department to develop workable, accessible, readily-available means for service members, retirees, and their dependents to dispose of unused or unwanted controlled substances efficiently, but we are discouraged that substantial progress has not yet been made. We expect that the DEA's final rule, once published, will provide the Department with the means to establish a meaningful drug take-back program for its beneficiaries to reduce

prescription drug misuse, abuse and potential tragic adverse events.

Research regarding hydrocephalus

The House bill contained a provision (sec. 724) that would authorize the Secretary of Defense, in conducting the Peer Reviewed Medical Research Program, to consider selecting medical research projects relating to hydrocephalus.

We encourage the Secretary of Defense to consider including medical research on hydrocephalus in Department of Defense research efforts.

Traumatic brain injury research

The House bill contained a provision (sec. 725) that would require the Secretary of Defense to carry out research, development, test, and evaluation activities with respect to traumatic brain injury and psychological health, including activities regarding drug development to halt neurodegeneration following traumatic brain injury.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Increased collaboration with NIH to combat triple negative breast cancer

The House bill contained a provision (sec. 727) that would require the Department of Defense to work in collaboration with the National Institutes of Health to identify specific genetic and molecular targets and biomarkers for triple negative breast cancer and to provide information that will enable triple negative breast cancer patients to be identified earlier and aid the development of therapies for the disease.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We urge the Secretary of Defense to consider conducting research to identify specific genetic and molecular targets and biomarkers for triple negative breast cancer.

Sense of Congress on mental health counselors for members of the Armed Forces and their families

The House bill contained a provision (sec. 728) that would express the sense of Congress that the Secretary of Defense should develop a plan to ensure a sustainable flow of qualified counselors to meet the long-term needs of service members and their families for counselors, to include the participation of accredited schools and universities, health care providers, professional counselors, family service or support centers, chaplains, and other appropriate Department of Defense resources.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Preliminary mental health assessments

The House bill contained a provision (sec. 730) that would require the Secretary of Defense to provide a mental health assessment to any individual enlisting or being commissioned as an officer in the armed forces prior to such enlistment or commissioning, and to use the results of such an assessment as a baseline for any subsequent mental health examinations.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Sense of Congress on the traumatic brain injury plan

The House bill contained a provision (sec. 731) that would express the sense of Congress that section 739(b) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239) requires the Secretary of Defense, not later than 180 days after the enactment of such Act, to submit a plan to Congress to improve the coordination and integration of Department of Defense programs that address traumatic brain injury and the psychological health of service members, and that the Secretary should deliver the report within the required time frame.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We expect the Secretary of Defense to submit the plan required by section 739(b) to the Committees on Armed Services of the Senate and the House of Representatives as soon as possible.

TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

Subtitle A—Acquisition Policy and Management

Enhanced transfer of technology developed at Department of Defense laboratories (sec. 801)

The House bill contained a provision (sec. 802) that would establish a pilot program to allow Department of Defense (DOD) laboratories to license DOD-owned intellectual property that may or may not be patented, and to retain associated royalties consistent with existing statutes on patent licensing.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Extension of limitation on aggregate annual amount available for contract services (sec. 802)

The House bill contained a provision (sec. 803) that would extend limitations on contract services under section 808 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 111–84), through 2015.

The Senate committee-reported bill contained no similar provision.

The agreement contains the provision with an amendment that would require the Department to work with contractors or other sources of supply to identify obsolete parts and replace them through an expedited engineering change process.

Subtitle B—Amendments to General Contracting Authorities,
Procedures, and Limitations

Government-wide limitations on allowable costs for contractor compensation (sec. 811)

The House bill contained a provision (sec. 813) that would amend section 2324(e)(1)(P) of title 10, United States Code, and section 4304(a) of title 41, United States Code, to replace the current statutory benchmark compensation formula used to determine the amount of contractor compensation that is considered an allowable cost for a federal contract, with the current compensation benchmark amount for fiscal year 2013 of \$763,209. This section would also make unallowable the entire cost of compensation for the five most-highly compensated employees of a contractor that was awarded more than \$500.0 million in federal contracts in the previous fiscal year.

The Senate committee-reported bill contained a similar provision (sec. 841) that would reduce the cap on allowable costs of compensation of contractor employees to an amount consistent with the original legislative cap, adjusted for inflation, and provide for future annual adjustments by reflecting the change in the Employment Cost Index for all workers, as calculated by the Bureau of Labor and Statistics. According to this calculation, the cap for fiscal year 2014 would be at \$487,325.

The agreement contains the provision with an amendment that would revise the cap on compensation of contractor employees and provide for future annual adjustments.

Inclusion of additional cost estimate information in certain reports (sec. 812)

The House bill contained a provision (sec. 814) that would amend section 2432 of title 10, United States Code, to require that the program's baseline cost estimate, along with the associated risk curve and sensitivity of that estimate be provided in the quarterly selected acquisition reports. In addition, this section would require

that the reports include the current point estimate bounded by the low-end and high-end estimates and the associated sensitivity of those estimates, and identification of the primary risk parameters associated with the estimate. Furthermore, this section would require reporting of estimated termination liability remaining on the contract. Finally, this section would amend section 2334(f) of title 10, United States Code, to require the Director, Cost Assessment and Program Evaluation, to review the information required by this section and to include trend information, a summary of findings and recommendations to improve the cost estimates of the Department of Defense in the annual report to Congress on cost assessment activities.

The Senate committee-reported bill contained no similar provision.

The agreement contains the provision with a technical amendment. We encourage the Secretary of Defense to include at least three programs designated as Acquisition Category I programs in the December 2014 reporting period.

Amendment relating to compelling reasons for waiving suspension or debarment (sec. 813)

The House bill contained a provision (sec. 815) that would amend section 2393(b) of title 10, United States Code, by requiring the Secretary of Defense to make available on a publicly accessible website any determination that there is a compelling reason to solicit an offer from, award a contract to, extend a contract with, or approve a subcontract with an offeror or contractor that has been debarred or suspended by a federal agency.

The Senate committee-reported bill contained no similar provision.

The agreement contains the provision with a technical amendment.

Extension of pilot program on acquisition of military purpose non-developmental items (sec. 814)

The House bill contained a provision (sec. 831) that would amend section 866 of the National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383), by extending the program authority to December 31, 2019. Furthermore, the committee encouraged the Under Secretary of Defense for Acquisition, Technology, and Logistics to review the military purpose non-developmental items implementation guidance and to exercise the authority provided in section 866.

The Senate committee-reported bill contained no similar provision.

The agreement contains the provision.

Subtitle C—Provisions Relating to Major Defense Acquisition Programs

Synchronization of cryptographic systems for major defense acquisition programs (sec. 821)

The Senate committee-reported bill contained a provision (sec. 821) that as part of a milestone B decision for a major defense ac-

quisition program, would require that there be a plan in place to mitigate and account for costs in connection with decertification of cryptographic equipment during production and procurement of the system. The provision includes a waiver based on national security needs.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that changes the date of applying this provision to 6 months after the date of enactment.

Assessment of dedicated ground control system before Milestone B approval of major defense acquisition programs constituting a space program (sec. 822)

The Senate committee-reported bill contained a provision (sec. 822) that would implement a recommendation from the Government Accountability Office (GAO) report, Satellite Control Operations, GAO-13-315, concerning the use of dedicated satellite control systems.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that modified title 10, United States Code, and requires the Secretary of Defense to develop a long-term plan for satellite ground control systems. The plan must be submitted to the congressional defense committees 1 year after the date of enactment.

We expect that the cost-benefit analysis be based on life-cycle cost estimates found within the DOD 5000 directive and instructions.

The Comptroller General of the United States shall review the implementation plan and submit its views no later than 90 days after the plan is submitted to the congressional defense committees.

Additional responsibility for product support managers for major weapon systems (sec. 823)

The Senate committee-reported bill contained a provision (sec. 823) that would amend section 2337 of title 10, United States Code, and section 823 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239), to provide an assurance that all product support arrangements explicitly state how the arrangement will maximize use of government-owned inventory before obtaining inventory from commercial sources. This provision is a result of a Department of Defense Inspector General investigation into the Defense Logistics Agency.

The House bill contained no similar provision.

The agreement contains the provision with a technical amendment.

Comptroller General review of Department of Defense processes for the acquisition of weapons systems (sec. 824)

The Senate committee-reported bill contained a provision (sec. 824) requiring the Comptroller General to carry out a comprehensive review of the processes and procedures of the Department of Defense for the acquisition of weapon systems. The objective of the review is to identify processes and procedures for the acquisition of

weapon systems that provide little or no value or for which any value added is outweighed by cost or schedule delays without adding commensurate value.

The House bill contained no similar provision.

The agreement contains this provision with a clarifying amendment.

We direct the Comptroller General to provide the congressional defense committees with the required report no later than January 31, 2015.

Subtitle D—Provisions Relating to Contracts in Support of Contingency Operations in Iraq or Afghanistan

Prohibition on contracting with the enemy (sec. 831)

The House bill contained a provision (sec. 821) that would amend section 841 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81), regarding the authority of the Secretary of Defense to void a contract that is directly or indirectly funding a person or entity who actively supports an insurgency or otherwise actively opposes the United States or its coalition partners in a contingency operation in the United States Central Command theater of operations, to: (1) Lower the threshold for covered contracts from \$0.1 million to \$0.05 million; (2) Provide the authority to certain other geographic combatant commands during a contingency operation as defined by section 101(a)(13) of title 10, United States Code; and (3) Make the authority permanent.

The Senate committee-reported bill contained a similar provision (sec. 861) that would amend section 841 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81) by striking “the date that is three years after the date of the enactment of this Act” and inserting “December 31, 2016.”

The Senate committee-reported bill contained an additional similar provision (section 862) that would expand section 841 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81) to all combatant commanders.

The agreement contains that provision with an amendment that would amend section 841 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81), making the authorities provided in section 841 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81) available to certain other combatant commanders.

We intend that the definition of a “covered person or entity” would not mean a person or entity that is engaged in speech activities but rather actions involving hostile opposition to United States or coalition forces.

Extension of authority to acquire products and services produced in countries along a major route of supply to Afghanistan (sec. 832)

The House bill contained a provision (sec. 832) that would extend through December 31, 2015, the authority under section 801 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84), as amended, to procure products and services produced in countries along a major route of supply to Afghanistan.

The Senate committee-reported bill contained a similar provision (sec. 802).

The agreement includes the Senate provision.

LEGISLATIVE PROVISIONS NOT ADOPTED

Modification of reporting requirement for Department of Defense business system acquisition programs when initial operating capability is not achieved within 5 years of Milestone A approval

The House bill contained a provision (sec. 801) that would amend the reporting requirement imposed on defense business systems (DBS) acquisition programs by section 811 of the National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364) by clarifying the separate treatment of Major Automated Information Systems (MAIS) DBS and non-MAIS DBS. Specifically, this section would clarify that section 811 is inapplicable to MAIS DBS acquisition programs because such programs are independently subject to critical change reporting under section 2445c of title 10, United States Code. This section would also modify the requirement for non-MAIS DBS reporting a failure to achieve initial operational capacity (IOC) within 5 years of milestone A approval from a critical change report to a report to the Department of Defense pre-certification authority explaining the causes and circumstances surrounding the failure to achieve IOC within the required time.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

Restatement and revision of requirements applicable to multiyear defense acquisitions to be specifically authorized by law

The Senate committee-reported bill contained a provision (sec. 801) that would clarify and reorganize the reporting and certification requirements of the Department of Defense when requesting specific authorization for multiyear contract authority.

The House bill contained no similar provision.

The agreement does not contain the provision.

Report on program manager training and experience

The Senate committee-reported bill contained a provision (sec. 803) that would require the Secretary of Defense to submit an updated version of the 2009 Department of Defense report titled: “OSD [Office of the Secretary of Defense] Study of Program Manager Training and Experience” not later than 120 days from enactment of this Act.

The report found senior military officers, including general officers, and civilians in charge of acquisition programs did not believe their acquisition training was “sufficiently practical and comprehensive” regarding a number of fundamental areas of acquisition management. For example, the following is a partial list of responses showing the percent of program managers polled at that time who believed their acquisition training was sufficiently practical and comprehensive:

Overseeing Contractor Performance	31%
Cost Estimating Challenges	27%
Software Management Challenges	25%
Cost Control Challenges	25%
Unexpected Cost Growth	14%

The House bill contained no similar provision.

The agreement does not contain this provision.

We direct the Secretary of Defense to provide to the congressional defense committees a comprehensive update of the 2009 report not later than 120 days after the date of enactment of this Act.

The update should also identify, describe, and analyze trends in the training and experience of personnel acquisition program management since the issuance of the 2009 report, and should provide recommendations for improving the training and experience of personnel performing acquisition program management functions.

We further direct the Secretary to specifically examine the training, qualifications, and experience of personnel performing acquisition program management functions on programs designated as Acquisition Category I, IA, and II and provide recommendations on the ways to improve the practicality and comprehensiveness of the acquisition training provided to such personnel.

Additional contractor responsibilities in regulations relating to detection and avoidance of counterfeit electronic parts

The House bill contained a provision (sec. 811) that would amend section 818 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81) to provide that the costs associated with the use of counterfeit electronic parts, and the subsequent cost of rework or corrective action that may be required to remedy the use of inclusion of such parts, are allowable costs under Department of Defense contracts if the counterfeit electronic parts were procured from an original manufacturer or its authorized dealer, or from a trusted supplier.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain this provision.

Requirement that cost or price to the Federal Government be given at least equal importance as technical or other criteria in evaluating competitive proposals for defense contracts

The House bill contained a provision (sec. 816) that would amend section 2305(a)(3) of title 10, United States Code, to require that the head of an agency of the Department of Defense, in prescribing the evaluation factors to be included in each solicitation for competitive proposals, assign importance to cost or price at least equal to all evaluation factors other than cost or price when combined. This section would allow the head of an agency to waive the requirement, and it would require the Secretary of Defense to submit to Congress, not later than 180 days after the end of each fiscal year, a report containing a list of each waiver issued during the preceding fiscal year.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

The Federal Acquisition Regulation Part 15 permits the use of several best value competitive source selection techniques. Within the best value continuum, the government should utilize the technique that is most advantageous to its interests.

The government may choose to use the lowest price technically acceptable source selection process for acquisitions in which best value can be expected to result from the selection of the technically acceptable proposal with the lowest evaluated price.

The government may also choose to use a trade-off source selection process for acquisitions in which it may be in the best interest of the government to grant an award to an offeror other than the lowest priced offeror or the highest technically rated offeror. In such cases, non-cost or price evaluation factors may be weighed against cost or price factors in competitive source selections.

We are concerned that best value competitive source selection processes are not always properly implemented. Therefore, we direct the Comptroller General of the United States to conduct a study on Department of Defense procurements that use best value competitive source selection techniques. The study shall include, at a minimum, an assessment of:

- (1) The frequency with which evaluation factors other than cost or price, when combined, are given more weight than cost or price in solicitations for competitive proposals;
- (2) The types of contracts for products or services for which such evaluation factors are most frequently used;
- (3) The reasons why the Department of Defense chooses to use such evaluation factors;
- (4) The extent to which the use of such factors is or is not in the interest of the Department of Defense;
- (5) The efficacy with which the Department of Defense's acquisition workforce implements best value competitive source selection techniques;
- (6) The Department of Defense's guidance and directives on the appropriate use of best value competitive source selection techniques; and
- (7) The extent to which budgetary constraints affect the use of best value competitive source selection techniques.

We direct the Comptroller General to submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the results of this study not later than 180 days after the date of the enactment of this Act.

Requirement to buy American flags from domestic sources

The House bill contained a provision (sec. 817) that would amend section 2533a(b) of title 10, United States Code, to include "a flag of the United States of America" to the list of items that the Department of Defense may not procure unless the item is grown, processed, reused, or produced in the United States.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

We note that flags of the United States procured by the Department of Defense are procured in accordance with section 2533a(b)(1)(D) of title 10, United States Code.

Collection of data relating to contracts in Iraq and Afghanistan

The House bill contained a provision (sec. 822) that would amend section 861 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181), as amended, to allow contracts in Afghanistan entered into after the enactment of this Act to include a clause requiring the imposition of a penalty on any contractor that does not comply with the policies, guidance, or regulations issued pursuant to that section. This section would also amend section 863 of Public Law 110–181 to require that the Annual Joint Report on Contracting in Iraq and Afghanistan include information on any penalties imposed on contractors for failing to comply with requirements under section 861(e) of Public Law 110–181.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

We are concerned about reports of contractor noncompliance with relevant policies, guidance, and regulations in Afghanistan, including contractor noncompliance with requirements to provide information for the common databases identified by section 861(b)(4) of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181), as amended.

We direct the Secretary of Defense, in consultation with the Secretary of State and the Administrator for the United States Agency for International Development, to submit to the Committees on Armed Services of the Senate and the House of Representatives, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives, not later than 180 days after enactment of this Act, a report on contractor compliance in Iraq and Afghanistan.

At a minimum, the report shall include a detailed discussion of any outstanding contractor compliance issues or concerns, including any issues or concerns pertaining to the provision of information to common databases or the management thereof; a discussion of any lessons learned in Iraq or Afghanistan for improving contractor compliance in a contingency environment; and best practice recommendations for ensuring contractor compliance in future contingency contracting operations.

Report on procurement supply chain vulnerabilities

The House bill contained a provision (sec. 833) that would require the Secretary of Defense to submit a report regarding how sole source suppliers of components to the Department of Defense procurement supply chain creates vulnerabilities to military attack, terrorism, natural disaster, industrial shock, financial crisis, or geopolitical crisis, such as an embargo of key raw materials or industrial inputs.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

Study on the impact of contracting with veteran-owned small businesses

The House bill contained a provision (sec. 834) that would require the Secretary of Defense to submit a report regarding impacts of the Department of Defense contracting with small businesses owned and controlled by veterans and service-disabled veterans on veteran entrepreneurship and unemployment; impact on veteran suicide and homelessness; and the feasibility and expected impacts of implementation of the small business goals and preferences detailed in section 8127, title 38, United States Code.

The Senate committee-reported bill contained no similar provision.

The provision does not contain the agreement.

Revisions to requirements relating to justification and approval of sole-source defense contracts

The House bill contained a provision (sec. 835) that would modify the provisions of the Department of Defense Supplement to the Federal Acquisition Regulation that implement section 811 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84), clarifying the delegable authority of the head of an agency to make an award.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

Revision of Defense Supplement to the Federal Acquisition Regulation to take into account sourcing laws

The House bill contained a provision (sec. 837) that would revise the Department of Defense Supplement to the Federal Acquisition Regulation to implement requirements imposed by sections 129, 129a, 2330a, 2461, and 2463 of title 10, United States Code.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

Prohibition on purchase of military coins not made in the United States

The House bill contained a provision (sec. 838) that would prohibit the purchase of any military coins not produced in the United States.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

We note military coins are generally purchased with unit-level morale funds or funds personally contributed by the members of the unit and not with appropriated funds.

Compliance with domestic source requirements for footwear furnished to enlisted members of the Armed Forces upon their initial entry into the Armed Forces

The House bill contained a provision (sec. 839) that would amend section 418 of title 37, United States Code, by requiring the Department of Defense to issue athletic footwear compliant with the

requirement detailed in section 2533a of title 10, United States Code, to members of the Armed Forces upon their initial entry in lieu of a cash allowance.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

We note that Congress passed the Berry Amendment in 1941 to ensure that American soldiers train and operate, to the greatest extent practicable, in American-made materials. The Berry Amendment specifically covers footwear listed in Federal Supply Class 8430 or 8435.

The Army, in 2001, and the Air Force, in 2008, have moved away from issuing athletic footwear to new recruits. Instead, new recruits are given an allowance to acquire athletic footwear from the service exchange.

During this period of time, no athletic footwear was available that could have met the requirements of the Berry Amendment without a waiver. It has been reported that at least one domestic contractor is now producing such footwear.

Therefore, we direct the Under Secretary of Defense for Acquisition, Technology and Logistics to issue a Sources Sought to determine whether there are any domestic manufacturers of Berry Amendment-compliant athletic footwear that meets the Department's requirements.

We further direct that any responses to the Sources Sought be evaluated by the Defense Logistics Agency and an independent entity to determine whether (1) such offered athletic footwear meets the requirements of the Berry Amendment and (2) whether Department requirements are actually met. Such review should consider the various sizes and fits of athletic shoes offered, cost, and capacity of suppliers to meet military requirements.

Implementation by Department of Defense of certain recommendations of the Comptroller General of the United States on oversight of pensions offered by Department contractors

The Senate committee-reported bill contained a provision (sec. 842) that would require the Secretary of Defense to assign responsibility within the Department of Defense (DOD) for oversight of the reasonableness of the pension plans offered by Department contractors and issue certain guidance on pension benefits.

The House bill contained no similar provision.

The agreement does not contain the provision.

We note that, according to the Government Accountability Office (GAO), DOD contractors are among the largest sponsors of defined benefit pension plans in the United States and also factor pension costs into the price of DOD contracts. We also note that in its January 2013 report, GAO made the following recommendations to the Secretary of Defense in order to improve oversight, management, and accountability of such pension plans:

(1) Assign responsibility within the DOD for oversight of the reasonableness of the pension plans offered by Department contractors, specifically the value of benefits earned by participants in such pension plans;

(2) Issue guidance on the measurement of the value of pension benefits that participants earn in a given year, in order to permit the Department to obtain a comprehensive understanding of the total compensation provided to employees by Department contractors;

(3) Issue guidance on the extent to which defined benefit pension plans will be included in assessments of the reasonableness of compensation for executives of Department contractors; and

(4) Issue guidance for the acquisition organizations of the Department, including the Defense Contract Management Activity and Defense Contract Audit Activity, in regards to the discount rate or rates that are acceptable for Department contractors to use in calculating person costs for forward pricing purposes.

We are pleased that the Director, Defense Procurement and Acquisition Policy, concurred with all such recommendations in his January 2, 2013 response letter and note that he also expressed clear intent to implement them. However, we are concerned that according to GAO, all four recommendations are yet to be closed. Therefore, we encourage the Secretary of Defense to move expeditiously to close out implementation of the recommendations, and to keep the Committees on Armed Services of the Senate and the House of Representatives informed of the progress.

Report on the elimination of improper payments

The Senate committee-reported bill contained a provision (sec. 863) that would require the Secretary of Defense to report on the department's plan to implement the recommendations of the Comptroller General regarding the elimination of improper payments.

The House bill contained no similar provision.

The agreement does not contain the provision.

Federal Information Technology Acquisition Reform Act

The House bill contained a set of provisions (sec. 5001–5506) that would increase the authority of Chief Information Officers (CIO) regarding information technology (IT) investment practices for the 16 major civilian agencies, including the Department of Defense. The purpose of these provisions was to increase efficiencies government-wide by streamlining the acquisition process, increasing transparency, eliminating duplication and waste, and strengthening public-private partnerships by empowering the CIO with greater responsibility for IT systems within a government agency.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that the acquisition of information technology is a challenge across the Federal Government and that reform of the information technology acquisition process remains a priority in the defense committees and the Congress. We expect to continue working on improvements in this area and hope to bring a set of comprehensive reforms forward in the next fiscal year.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND
MANAGEMENT

Subtitle A—Department of Defense Management

Revisions to composition of transition plan for defense business enterprise architecture (sec. 901)

The House bill contained a provision (sec. 902) that would revise the definition for legacy systems in section 2222 of title 10, United States Code, to align with the updated business systems investment review process.

The Senate committee-reported bill contained no similar provision.

The agreement does contain the provision.

Comptroller General report on potential relocation of Federal Government tenants onto military installations in the United States (sec. 902)

The House bill contained a provision (sec. 904) that would require the Comptroller General of the United States to submit a report to Congress regarding potential consolidation of federal agency facilities onto military installations, with specific consideration of installations that support Arctic missions.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment.

Clarification of authority for the command acquisition executive of the United States Special Operations Command (sec. 903)

The Senate committee-reported bill contained a provision (sec. 902) that would make the U.S. Special Operations Command (USSOCOM) Acquisition Executive subject to the direction of the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD (AT&L)). The provision would also require the USD (AT&L) to designate an appropriate official within the Office of the USD (AT&L) to provide such oversight and direction for those programs.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would modify the provision to make clear that the USSOCOM Acquisition Executive is responsible to the Commander of USSOCOM for the acquisition of special operations-peculiar equipment and subordinate to the USD (AT&L) for all acquisition matters. The provision would not alter the relationship between the USSOCOM Acquisition Executive and the Commander of USSOCOM. Further, it is not the intent of the provision to delay, unnecessarily impede, or undermine the flexibility of USSOCOM development and acquisition efforts.

We remain supportive of USSOCOM's unique acquisition authorities to provide for the special operations-peculiar requirements of its forces, including rapid acquisition of urgently needed capabilities for deployed or deploying special operations forces. Further, we note that the flexibility inherent in these authorities is important

to ensuring that special operations forces can adapt to the rapidly evolving nature of global threats. However, given the significant growth in USSOCOM's budget in recent years and current fiscal pressures, we believe it is necessary to clarify civilian oversight of USSOCOM investment programs, particularly the development and acquisition of special operations-peculiar platforms.

We note that the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364), as amended, requires the Secretary of Defense to designate a senior acquisition official within USD (AT&L) to oversee the exercise of acquisition authority by USSOCOM, among others. Additionally, section 138 of title 10, United States Code, states that the "principal duty" of the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (ASD SOLIC) is "overall supervision (including oversight of policy and resources) of special operations activities." We believe appropriate civilian oversight by USD (AT&L) and ASD SOLIC of USSOCOM acquisition activities is critical to ensuring effective use of taxpayer funds, particularly with regard to the development and acquisition of special operations-peculiar platforms and advanced technology programs that are at greatest risk of incurring delays and additional costs. Therefore, we direct the Secretary of Defense to provide the congressional defense committees, not later than 90 days after enactment of this act, a directive type memorandum outlining the respective roles and responsibilities of the USD (AT&L) and ASD SOLIC with regard to the oversight of USSOCOM acquisition activities and the mechanisms through which such oversight will occur.

Streamlining of Department of Defense management headquarters (sec. 904)

The Senate committee-reported bill contained a provision (sec. 905) that would require the Secretary of Defense to develop a plan for streamlining Department of Defense management headquarters by reducing the size of staffs, eliminating tiers of management, cutting functions that provide little or no added value, and consolidating overlapping and duplicative program offices. The objective is to reduce aggregate spending for management headquarters by not less than \$100.0 billion over a 10 fiscal-year period beginning with fiscal year 2015.

The House bill contained no similar provision.

The agreement contains the provision with an amendment that would remove the savings objective from bill language. We note the Secretary of Defense's recent announcement that he is seeking \$40.0 billion in savings in these areas. We expect that the Secretary's goal will be met.

We also note that section 113 of title 10, United States Code, requires the Secretary of Defense to submit to Congress each year a report that contains a comprehensive net assessment of the defense capabilities and programs of the armed forces of the United States and its allies as compared with those of their potential adversaries.

We are concerned that in the course of a review intended to identify potential efficiencies and cost savings in the Office of the Secretary of Defense (OSD) the recommendation has been made to make the net assessment function subordinate to another OSD of-

ficie. Such a change would risk compromising the independence of the Office of Net Assessment without achieving significant efficiencies.

Accordingly, we direct the Secretary of Defense to provide to the congressional defense committees, not later than March 1, 2014, a report that identifies the estimated savings and efficiencies that would be achieved through the reorganization or realignment of the Office of Net Assessment and explains how the Secretary of Defense would ensure the continuing independence of net assessment and the ability to report directly to the Secretary, in the event that a decision were made to modify the organizational structure or reporting arrangements of the office.

Update of statutory statement of functions of the Chairman of the Joint Chiefs of Staff relating to doctrine, training, and education (sec. 905)

The Senate committee-reported bill contained a provision (sec. 906), as requested by the Department of Defense, that would codify the responsibility of the Chairman of the Joint Chiefs of Staff (CJCS) by amending section 153 of title 10, United States Code, to reflect the current joint training, doctrine, education, and force development functions that are overseen by the CJCS.

The House bill contained no similar provision.

The agreement includes the Senate provision.

Modification of reference to major Department of Defense headquarters activities instruction (sec. 906)

The Senate committee-reported bill contained a provision (sec. 907) that would amend section 194(f) of title 10, United States Code, to update the reference to Department of Defense Instruction 5100.73, titled "Major DOD Headquarters Activities."

The House bill contained no similar provision.

The agreement contains the provision.

Personnel security (sec. 907)

The Senate committee-reported bill contained a provision (sec. 931) that would require major reform of the personnel security clearance investigation, adjudication, and transfer processes to improve security and reduce costs. Specifically, the provision would require:

(1) The Director of Cost Analysis and Program Evaluation to conduct a comprehensive, comparative analysis of the cost, schedule, and performance of personnel security investigations acquired through the Office of Personnel Management (OPM) and through components of the Department of Defense (DOD);

(2) The Secretary of Defense to develop a plan by October 1, 2014, to acquire investigations through the approach most advantageous to DOD;

(3) The Secretary and the Director of National Intelligence (DNI) to develop a joint strategy to modernize all aspects of personnel security to lower costs and improve security, and to develop and report annually on metrics that will demonstrate progress in achieving those objectives;

(4) The Secretary and the DNI to consider, and allow them to adopt, a series of innovations in security investigation methods and data sources that have been shown to be effective through analysis and/or demonstrations;

(5) The Secretary and the DNI to ensure, to the maximum extent practicable, reciprocal acceptance of clearances; and

(6) Development of benchmarks by which to measure the current level of reciprocity in clearance transfers and the costs imposed by delays.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would (1) include the Director of the Office of Management and Budget along with the Secretary of Defense and the DNI in the requirement to develop and implement a strategy to modernize the personnel security process; (2) require the Secretary and the Directors to consider the results of ongoing reviews occasioned by unauthorized disclosures of classified information and by the events at the Washington Navy Yard; (3) require the strategy to include a risk-based monitoring approach based on the responsibilities and accesses of cleared personnel; require the Comptroller General to conduct a review of the personnel security process; and require the Suitability and Security Performance Accountability Council to convene a task force to examine access to State and local public records of Federal Government and contractor investigators.

Subtitle B—Space Activities

National security space satellite reporting policy (sec. 911)

The House bill contained a provision (sec. 911) that would amend chapter 135 of title 10, United States Code, to add a notification, required of the Secretary of Defense, of each attempt by a foreign actor to disrupt, degrade, or destroy a U.S. national security space capability. The notification shall be submitted to the appropriate congressional committees not later than 48 hours after the Secretary determines that there is reason to believe such an attempt occurred. Not later than 10 days after the date on which the Secretary determines that there is reason to believe such an attempt occurred, further information should be provided including the name and a brief description of the national security space capability that was impacted by such an attempt; a description of the attempt, including the foreign actor, the date and time of the attempt, and any related capability outage and the mission impact of such outage; and any other information considered relevant by the Secretary.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that strikes the sense of Congress, provides that the Commander of U.S. Strategic Command (STRATCOM) provide the notice instead of the Secretary, and adds other information the Commander considers relevant to the notice.

We note that the notice is not intended to be a duplicative process and should leverage existing STRATCOM anomaly processes. We further note that this notice is not intended to be notification

of every anomaly instance; this is only notification when there is reason to believe that there was an intentional attempt to disrupt, degrade, or destroy a national security space capability.

National security space defense and protection (sec. 912)

The House bill contained a provision (sec. 912) that would require the Secretary of the Air Force to enter into an arrangement with the National Research Council to conduct a review in response to the near-term and long-term threats to the national security space systems of the United States.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the Secretary of Defense and the Director of National Intelligence to enter into an arrangement with the National Research Council while requiring, in addition to other elements of the study, the Council take into account the affordability and technical risk of recommended courses of action.

Space acquisition strategy (sec. 913)

The House bill contained a provision (sec. 913) that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics, in consultation with the Chief Information Officer of the Department of Defense, to establish a strategy for the multi-year procurement of commercial satellite services.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that changes the report to a briefing within 90 days after the date of enactment with an interim briefing at the time of the fiscal year 2015 budget submission.

Consistent with the Defense Business Board report, "Taking Advantage of Opportunities for Commercial Satellite Services," Report FY13-02, February 2013, we direct the Executive Agent for Space to report back to the congressional defense committees before March 1, 2014, on how this office will take a more active role in implementing recommendation 10 of the report titled, "Facilitate future governance by designating a single DoD organization for procuring all SATCOM assets and services."

We understand the U.S. Strategic Command, through the Defense Information Systems Agency, is involved with developing a long-term strategy for satellite communications titled, "Mix of Media Study." We direct the Director of the Defense Information Systems Agency to brief the congressional defense committees on this study.

We are concerned about the Department's reliance on 1-year high-cost commercial satellite communications leases, and encourage the Department to continue to pursue innovative acquisition approaches, including multi-year leases and the procurement of government-owned transponders and payloads on commercial communication satellites.

Space control mission report (sec. 914)

The House bill contained a provision (sec. 914) that would require the Secretary of Defense to submit a report to the congressional defense committees on the space control mission of the Department of Defense.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that requires an additional element of the report regarding force levels and structure of the future space control missions.

We believe the nature of the Department's space control mission is fundamentally changing from purely collision avoidance and cataloging space objects, to additionally ensuring that the United States has, according to section 4(b) of the October 18, 2012, Department of Defense Directive on Space Policy, "the capabilities to respond at the time and place of our choosing" to "purposeful interference with U.S. space systems, including their supporting infrastructure" in ensuring the right of "free access and use of space." Consistent with the space policy directive, it is incumbent upon the Department to ensure there is a clear and concise concept of operations which supports the directive and that the congressional defense committees are updated on any significant developments as this additional mission evolves.

Responsive launch (sec. 915)

The House amendment contained a provision (sec. 915) that would require a study by the Department of Defense

Executive Agent for Space on responsive, low-cost launch efforts to include a review of existing and past operationally responsive, low-cost launch capabilities; a technology assessment of various methods to develop an operationally responsive, low-cost launch capability; and an assessment of the viability of any other innovative methods, such as secondary payload adapters on existing launch vehicles. In addition, this section would require a report from the Executive Agent for Space regarding the results of the above mentioned study, as well as a consolidated plan for development within the Department of an operationally responsive, low-cost launch capability.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would add as one of the factors the Executive Agent for Space to consider as part of the study to be the identification of the conditions or requirements for responsive launch, which would provide the necessary military value, such as the requisite payload capacity, timelines for responsiveness, and the target launch costs. The amendment would also require a Government Accountability Office (GAO) review of the report by the Executive Agent for Space. The GAO may present the results of their review in the form of a briefing to the congressional defense committees.

Limitation on use of funds for Space Protection Program (sec. 916)

The Senate committee-reported bill contained a provision (sec. 921) that would limit the amount of money able to be obligated or

expended for the Space Protection Program by \$10 million until the Secretary of Defense submitted to the congressional defense committees a copy of all materials presented to inform the decision of the Deputy Secretary of Defense on the counter space strategy of the Department of Defense during the 3-year period ending on the date of the enactment of this Act that resulted in significant revisions to said strategy.

The House bill contained no similar provision.

The agreement includes this provision.

We agree that the Secretary of Defense should provide the briefing, report, or other materials that were presented to the Deputy Secretary of Defense, which includes the Deputy Secretary Management Action Group briefing materials. We do not expect new work product to be produced. We expect the Department of Defense to submit only the materials that were presented to the Secretary to inform his decision on the way forward for the counterspace strategy, which would not include preliminary or background materials.

Eagle Vision system (sec. 917)

The Senate committee-reported bill contained a provision (sec. 1065) that would require the Chief of Staff of the Air Force, within 180 days of the enactment of this Act, to submit to the congressional defense committees a report on the Eagle Vision imagery ground station. The report elements would include a description and assessment of the Department of Defense organizations to which the Eagle Vision system could be transferred, as well as the actions that would need to be taken prior to a transfer; the potential schedule for a transfer; and the possible effects of a transfer on the capabilities or use of the system. The provision would prohibit the Air Force from making changes to the organization and management of the program until 90 days after the submission of the report to Congress.

The House bill contained no similar provision.

The agreement includes the Senate committee-reported provision.

Subtitle C—Defense Intelligence and Intelligence-Related Activities

Revision of Secretary of Defense authority to engage in commercial activities as security for intelligence collection activities (sec. 921)

The House bill contained a provision (sec. 921) that would modify current statutory authority for the Secretary of Defense to conduct commercial activities that are necessary to provide security for authorized intelligence collection activities abroad undertaken by the Department of Defense. The provision would remove the requirement that the Secretary of Defense designate a single office within the Defense Intelligence Agency to be responsible for the management and supervision of all commercial activities authorized by the intelligence commercial activity statute; change the annual audit requirement to a biennial audit requirement; and add the congressional defense committees to the reporting requirement.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would maintain the annual audit requirement.

Department of Defense intelligence priorities (sec. 922)

The House bill contained a provision (sec. 922) that would require the Secretary of Defense to establish a written policy governing the internal coordination and prioritization of intelligence priorities of the Office of the Secretary of Defense, the Joint Staff, the combatant commands, and the military departments to improve identification of the intelligence needs of the Department of Defense. This section would also require the Secretary of Defense to identify any significant intelligence gaps of the Office of the Secretary of Defense, the Joint Staff, the combatant commands, and the military departments.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Defense Clandestine Service (sec. 923)

The House bill contained a provision (sec. 923) that would prohibit the use of 50 percent of the funds authorized to be appropriated by this Act or otherwise available to the Department of Defense (DOD) for fiscal year 2014 for the Defense Clandestine Service (DCS) to be obligated or expended for the DCS until such time as the Secretary of Defense certifies to the congressional defense committees, the Permanent Select Committee on Intelligence of the House of Representatives, and the Select Committee on Intelligence of the Senate, that the DCS is designed primarily to fulfill priorities of the DOD that are unique to the DOD or otherwise unmet; and provide unique capabilities to the intelligence community (as defined in section 3(4) of the National Security Act of 1947 (50 U.S.C. 401a(4))).

This section would also require the Secretary of Defense to design metrics that will be used to ensure that the DCS is employed in the manner certified; provide annual assessments for 5 years based on the metrics established; submit prompt notifications of any significant changes; and provide quarterly briefings on deployments and collection activities.

The Senate committee-reported bill contained a provision (sec. 932) that would require the Secretary of Defense, acting through the Director of Cost Analysis and Program Evaluation, and in consultation with the Director of National Intelligence, acting through the Cost Analysis Improvement Group, and the Director of the Central Intelligence Agency (CIA), to assess the potential cost savings and effectiveness improvements from consolidating clandestine human intelligence collection in the National Clandestine Service managed by the CIA.

The agreement includes the House provision.

Prohibition on National Intelligence Program consolidation (sec. 924)

The House bill contained a provision (sec. 924) that would prohibit the Secretary of Defense from using any of the funds authorized to be appropriated or otherwise available to the Department of Defense during the period beginning on the date of the enactment of this Act and ending on December 31, 2014, to execute: the separation of the portion of the Department of Defense budget designated as part of the National Intelligence Program from the rest of the Department of Defense budget; the consolidation of the portion of the Department of Defense budget designated as part of the National Intelligence Program within the Department of Defense budget; or the establishment of a new appropriations account or appropriations account structure for such funds. The provision would also require the Secretary of Defense and the Director of National Intelligence to jointly brief the congressional defense and intelligence committees not later than 30 days after enactment of this Act on any planning relating to future execution that has occurred during the past 2 years and any anticipated future planning and related efforts.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Subtitle D—Cyberspace-Related Matters

Modification of requirement for inventory of Department of Defense tactical data link systems (sec. 931)

The House bill contained a provision (sec. 931) that would amend section 934 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239) to include a requirement that the vulnerabilities of data link systems be assessed in anti-access or area-denial environments.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Authorities, capabilities, and oversight of the United States Cyber Command (sec. 932)

The House bill contained a provision (sec. 932) that would require the Defense Science Board to conduct an independent assessment of the organization, missions, and authorities of U.S. Cyber Command (CYBERCOM).

The Senate committee-reported bill contained a similar provision (sec. 941) that would require the Secretary of Defense to delegate signals intelligence (SIGINT) collection authorities to CYBERCOM; provide CYBERCOM with the infrastructure and equipment to operate independently of the National Security Agency (NSA) to conduct operations in cyberspace; provide range capabilities to meet CYBERCOM's unique requirements for wartime offensive operations; designate an official within the Office of the Under Secretary of Defense for Policy to serve as the Secretary's principal advisor on offensive military cyber operations and to supervise the organization, manning, and equipping of such forces; and to establish

appropriate training facilities for cyber personnel. In addition, the provision would express the sense of Congress that CYBERCOM personnel assigned to support offensive cyber missions should be funded and managed outside of the Military Intelligence Program (MIP) and Information Systems Security Program (ISSP).

The agreement includes the Senate committee-reported provision with an amendment. The amendment would assign to the principal advisor responsibility for the overall supervision of cyber activities in the Department, including oversight of policy and operational matters, resources, personnel, acquisition, and technology. In carrying out these responsibilities, the principal advisor shall create a full-time cross-functional team of subject-matter experts from the Office of the Secretary of Defense, the Joint Staff, the military departments, defense agencies, and combatant commands.

We stress that this construct of an interdepartmental team under the direction of the principal advisor for cyber is not intended to be merely a coordinating committee, but will provide strong leadership through a joint mechanism to achieve a common purpose and unity of effort in policy, planning, programming, and oversight to support a complex mission that spans the entire Department of Defense. We believe there are good models for effective cross-functional teams, such as the Joint Inter Agency Task Force-South, which successfully brings stakeholders together, including their specific authorities and capabilities, under a single organization. This team concept requires that members operate and think holistically, without regard to home institution loyalties, and receive training in team dynamics and conflict resolution.

With regard to cyber acquisitions, we note that there is an existing congressionally-mandated joint entity, the Cyber Investment Management Board, which is chaired by the Under Secretary of Defense for Acquisition, Technology, and Logistics, the Under Secretary of Defense for Policy, and the Vice Chairman of the Joint Chiefs of Staff. We believe such organizations should be leveraged to the extent possible in organizing this cross functional team.

The amendment does not include the requirement for the Secretary of Defense to delegate SIGINT authority to CYBERCOM, because the NSA Director has already made such a delegation. If a decision is made in the future to separate the positions of NSA Director and Commander of CYBERCOM, it would be appropriate for this delegation to come directly from the Secretary of Defense.

The amendment also does not include the sense of the Congress that CYBERCOM personnel assigned to support offensive missions should be funded and managed outside of the MIP and ISSP. We expect the Secretary of Defense to devise means to ensure that CYBERCOM personnel include non-career intelligence and cybersecurity officers and enlisted personnel with experience in combat arms.

We are aware that there are renewed deliberations about the potential of elevating U.S. Cyber Command from a sub-unified command to a full unified command. As noted by section 940 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239), we expect to be briefed and consulted on any such proposal at the time when the Secretary of Defense makes such a decision. As these policy discussions progress, we expect the Depart-

ment to keep the Committees on Armed Services of the Senate and the House of Representatives informed, upon request, during the quarterly cyber operations briefings, particularly as they relate to the estimated costs and policy implications associated with making the U.S. Cyber Command a unified command.

Mission analysis for cyber operations of Department of Defense (sec. 933)

The House bill contained a provision (sec. 933) that would require the Secretary of Defense to conduct a mission analysis of Department of Defense cyber operations and to provide a report on the results of the mission analysis to the congressional defense committees. It would also require the Chief of the National Guard Bureau to provide an assessment of the role of the National Guard in supporting Department of Defense cyber missions.

The Senate committee-reported bill contained a similar provision (sec. 945) that would require the Secretary of Defense to develop a strategy for using the reserve components of the armed forces to support the cyber missions of U.S. Cyber Command, including in support of civil authorities, and to report to the congressional defense committees on this strategy within 180 days of the enactment of this Act.

The agreement merges these provisions with minor modifications to each.

Modification of requirement for Report on Department of Defense Progress in Defending the Department and the Defense Industrial Base from Cyber Events (sec. 934)

The House bill contained a provision (sec. 934) that would require that the Secretary of Defense provide written notification to the congressional defense committees within 30 days of the initiation of any investigations carried out related to the potential compromise of Department of Defense critical program information related to weapon systems and other developmental activities, and within 30 days of the completion of any such investigations. Additionally, the provision would require a report to be submitted to the congressional defense committees within 60 days after the date of the enactment of this Act, on all of the known network cyber intrusions from January 1, 2000, until August 1, 2013, resulting in compromise of critical program information.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would modify section 935(b)(3) of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) to include an element in the existing reporting requirement to address the economic impacts of reported network intrusions.

Additional requirements relating to the software licenses of the Department of Defense (sec. 935)

The House bill contained a provision (sec. 935) that would require the Chief Information Officer of the Department of Defense to revise the reporting requirements of section 937 of the National Defense Authorization Act for 2013 (Public Law 112-239) to in-

clude new elements that would verify that the format of the process was verified by an independent third party, implement processes for validating and reporting registration and deregistration of new software, and update the timeline for implementation based on these new requirements.

The Senate committee-reported bill contained no similar provision.

The agreement contains the provision with a technical amendment.

Cyber outreach and threat awareness for small businesses (sec. 936)

The House bill contained a provision (sec. 938) that would require the Secretary of Defense to establish an outreach and education program to assist small businesses to help them understand the cyber threat, and develop plans to protect their intellectual property and networks.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require a briefing to the congressional defense committees within 60 days of the enactment of this Act on options for strengthening outreach and threat awareness activities for small businesses.

We recognize the challenges faced by industry, especially small businesses, when it comes to understanding and defending against advanced cyber threats. There are a number of initiatives and mechanisms within the Department that address aspects of this challenge, such as the Defense Industrial Base Information Assurance/Cyber Security program. Because these other efforts exist, we believe that new programs are not needed. We believe, though, that inadequate attention has been paid to effectively coordinate those initiatives, focus them on supporting the needs of small businesses, or attempt to measure the strategic effectiveness of those programs.

Joint Federated Centers for Trusted Defense Systems for the Department of Defense (sec. 937)

The Senate committee-reported bill contained a provision (sec. 942) that would require the Secretary of Defense to establish a joint software assurance center to serve as a resource for securing the software acquired, developed, maintained, and used in the Department of Defense (DOD). The provision would require the Secretary to consider whether an existing center could fulfill the purposes of the required center.

The provision would require the Secretary, within 180 days after the date of enactment of this Act, to issue a charter for the center that lays out: (1) The center's role in supporting program offices in implementing DOD's supply chain risk management strategy and policies; (2) The center's expertise and capabilities; (3) The center's management, in coordination with the Center for Assured Software (CAS) of the National Security Agency, of a research and development program to improve the capability of automated software analysis tools; and (4) The center's management of the procurement and distribution of enterprise licenses for such analysis tools.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would create a federation of capabilities, rather than a single center, as well as link existing resources and centers of excellence, for hardware as well as software assurance. Additionally, the amendment would emphasize supporting the trusted defense systems strategy, which includes both software assurance activities, as well as assurance of hardware components. In assessing the capabilities that exist throughout the Department that could be used to support the trusted defense strategy, the Department shall only create new centers or new resources when it has conducted a gap analysis that indicates the need for new resources or capabilities.

We believe that the trusted defense systems strategy provides a good foundation for guiding the work of these centers in supporting the acquisition and testing community. As it relates specifically to software assurance, we further note that the DOD is in the process of developing a baseline software assurance policy for the entire life cycle of covered systems in response to section 933 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239). We believe that any such guidance and direction for Department program managers should, where possible, and where consistent with adequate security for covered systems and the national security, be consistent with recognized standards, and should explore options for accepting self-certification or third-party certification for compliance purposes.

Furthermore, we believe that this software assurance policy should, where possible, and where consistent with adequate security for covered systems and the national security, be developed in compliance with the Office of Management and Budget Memorandum for Chief Information Officers and Senior Procurement Executive's titled "Technology Neutrality," dated January 7, 2011. We also believe that any future software assurance policy that includes requirements concerning Federal participation in the development and use of voluntary consensus standards should be conducted in accordance with the National Technology Transfer and Advancement Act of 1995, section 272 of title 15, United States Code, and the Office of Management and Budget Circular A–119.

Supervision of the acquisition of cloud computing capabilities (sec. 938)

The Senate committee-reported bill contained a provision (sec. 943) that would require the Secretary of Defense, through the Under Secretary of Defense for Acquisition, Technology, and Logistics, the Under Secretary of the Defense for Intelligence, the Chief Information Officer of the Department of Defense, and the Chairman of the Joint Requirements Oversight Council, to supervise the development and implementation of plans for the acquisition of cloud computing capabilities for intelligence, surveillance, and reconnaissance data analysis in the military services and defense agencies.

The House bill contained no similar provision.

The agreement contains the provision with an amendment that would make the supervisory requirements apply to all cloud computing acquisition decisions in excess of \$1.0 million.

Cyber vulnerabilities of Department of Defense weapon systems and tactical communications systems (sec. 939)

The Senate committee-reported bill contained a provision (sec. 944) that would require the Secretary of Defense to provide an assessment of the cyber threats to major weapons systems and tactical communications systems that could emerge within the next years; an assessment of the cyber vulnerabilities of major weapons systems and tactical communications systems; a description of the current strategy to defend against battlefield cyber attacks; and an estimate of the costs to correct the vulnerabilities in the future. That report would be required within 180 days.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require the report within 1 year.

Control of the proliferation of cyber weapons (sec. 940)

The Senate committee-reported bill contained a provision (sec. 946) that would require the President to establish an interagency process to develop policy to control the proliferation of cyber weapons through unilateral and cooperative export controls, law enforcement activities, financial means, diplomatic engagement, and other means that the President considers appropriate. The provision would also require the President to develop a statement of principles regarding U.S. positions on controlling the proliferation of cyber weapons to create new opportunities for bilateral and multilateral cooperation to address this shared threat. The provision would require the interagency process to produce recommendations within 270 days of the enactment of this Act.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require the President, to the extent practicable, to provide for industry participation in the interagency process.

Integrated policy to deter adversaries in cyberspace (sec. 941)

The Senate committee-reported bill contained a provision (sec. 947) that would require the President to establish an interagency process to develop an integrated policy to deter adversaries in cyberspace. The provision would require the President to provide a report to the congressional defense committees on this policy within 270 days after the enactment of this Act.

The House bill contained no similar provision.

The agreement includes this provision.

National Centers of Academic Excellence in Information Assurance Education matters (sec. 942)

The Senate committee-reported bill contained a provision (sec. 948) that would ensure that Centers of Academic Excellence (CAEs) in Information Assurance do not lose their certification as CAEs in fiscal year 2014 as a result of recent changes in the certification criteria developed by the National Security Agency (NSA).

The provision also would require the President, in consultation with the Secretary of Education and with the advice of the National Advisory Committee on Institutional Quality and Integrity, to: (1) Determine whether information assurance has matured to the point where the Federal Government should no longer serve as the accrediting authority for information assurance programs at institutions of higher education; and (2) Based on that determination, reform the current practice of NSA developing the criteria to guide the curricula and certifying the status of the CAEs.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would: (1) Extend the period through which the current CAEs would preserve their designation to June 30, 2015; (2) Task the Secretary of Defense to thoroughly assess the CAEs program, the maturity of cybersecurity as an academic discipline, the role that the Federal Government should continue to play in developing curricula and accrediting programs, and the alignment of current processes with the National Initiative for Cybersecurity Education; (3) Require the Secretary to make recommendations for improving the curricula and designation process and for transitioning that process from the sole administration of NSA; (4) Require the Secretary to assess the Department's scholarship for service program with the CAEs; and (5) Require the Secretary to submit to Congress a plan for implementing his recommendations and the results of his assessments. The provision requires the Secretary to consult with the Secretary of Homeland Security, a wide variety of others, including the Director of NSA, and other government organizations, academia, and the private sector.

Subtitle E—Total Force Management

Reviews of appropriate manpower performance (sec. 951)

The House bill contained a provision (sec. 942) that would require the Secretary of Defense to certify that all contractor positions performing inherently governmental functions have been eliminated.

The Senate committee-reported bill contained no similar provision.

The agreement contains the provision with an amendment that would extend the requirement contained in section 803(c) of the National Defense Authorization Act for fiscal year 2010 (P.L. 111-84) for 3 years and require the Department of Defense (DOD) Inspector General to report to the congressional defense committees the Inspector General's assessment of DOD's efforts to compile the inventory, including the actions taken to resolve the findings of the reviews, pursuant to section 2463 of this title.

Six years beyond the original requirement to implement an inventory of contracted services, DOD has taken its first steps to implement a November 2011 plan to collect contractor manpower data from contractors. These steps included directing components to start collecting direct labor hours and associated costs from contractors and initiating efforts to develop and implement a department-wide data collection system based on the Army's Contractor Manpower Reporting Application (CMRA) to collect and store in-

ventory data, including contractor manpower data. Reportedly, DOD officials estimate that the new system will be available in fiscal year 2014, with DOD components reporting on most of their contracted services by fiscal year 2016.

We expect DOD to continue to make progress towards implementing these goals, and therefore, have continued the reporting requirements in section 803(c) of the National Defense Authorization Act for fiscal year 2010 (P.L. 111-84) for 3 years. We expect the Comptroller General to submit a report consistent with that section including a review of progress made to develop and implement a department-wide data collection system based on CMRA.

LEGISLATIVE PROVISIONS NOT ADOPTED

Redesignation of the Department of the Navy as the Department of the Navy and Marine Corps

The House bill contained a provision (sec. 901) that would redesignate the Department of the Navy as the Department of the Navy and Marine Corps, and redesignate the position of the Secretary of the Navy as the Secretary of the Navy and the Marine Corps.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Under Secretary of Defense for Management

The Senate committee-reported bill contained a provision (sec. 901) that would convert the position of Deputy Chief Management Officer (DCMO) to Under Secretary of Defense for Management (USD(M)) and to designate that position as the Chief Information Officer (CIO) of the Department of Defense. This provision would mandate the USD(M) exercise authority, direction, and control over the Information Assurance Directorate of the National Security Agency. Additionally, this provision would unify roles and functions traditionally formed by the CIO and strengthen the office by making it a Senate-confirmed position again, but without creating a new position.

The House bill contained no similar provision.

The agreement does not contain the provision.

We note that the Department has recently made the congressional defense committees aware of a proposal that addresses the concerns raised by the Senate committee-reported bill. We will evaluate this proposal before making a decision on elevating the DCMO and designating that new position as responsible for the CIO roles.

Report on strategic importance of United States military installation of the U.S. Pacific Command

The House bill contained a provision (sec. 903) that would require the Secretary of Defense to submit a report on the strategic value of each major installation that supports operations in the U.S. Pacific Command area of responsibility.

The Senate committee-reported bill contained no similar provision.

Transfer of administration of Ocean Research Advisory Panel from Department of the Navy to National Oceanic and Atmospheric Administration

The Senate committee-reported bill contained a provision (sec. 904) that would transfer responsibility for administration of the Ocean Research Advisory Panel from the Department of the Navy to the National Oceanic and Atmospheric Administration.

The House bill contained no similar provision.

The agreement does not include this provision.

Navy broad-area maritime surveillance aircraft

The Senate committee-reported bill contained a provision (sec. 933) that would require the Secretary of Defense to take appropriate actions to modify the Navy's Broad Area Maritime Surveillance (BAMS) aircraft fleet to provide a ground moving target indicator (GMTI) collection, processing, and dissemination capability that is comparable to the performance of the Air Force's Global Hawk Block 40 Multi-Platform Radar Insertion Program. The provision would also require the Secretary to designate the BAMS aircraft fleet as a joint asset available to support the operational requirements of the unified combatant commands.

The House bill contained no similar provision.

The agreement does not include this provision.

We agree, however, that the Department of Defense should determine whether a GMTI capability should be integrated into the Navy's BAMS aircraft fleet, and whether this system should be a joint asset for the combatant commands. Therefore, we direct the Vice Chairman of the Joint Chiefs of Staff, in his capacity as the Chairman of the Joint Requirements Oversight Council (JROC), to conduct a study and provide a report to the appropriate congressional committees on the JROC's assessment of whether adding a GMTI capability to the Navy's BAMS aircraft fleet is feasible, affordable, and advisable by June 2, 2014. For this report, the appropriate congressional defense committees are the Committee on Armed Services, the Committee on Appropriations, and the Select Committee on Intelligence of the Senate; and the Committee on Armed Services, the Committee on Appropriations, and the Permanent Select Committee on Intelligence of the House of Representatives.

office to assist small businesses in providing cybersecurity solutions to the Federal Government.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We recognize the challenges faced by the government in gaining access to truly innovative solutions for cybersecurity threats. Many of the most innovative technologies available to the government come from small businesses. However, it is also clear that the defense acquisition system, which can be difficult to navigate even for large businesses, can pose acute difficulties for small businesses to be able to find opportunities, respond effectively to lengthy contracting paperwork, and maintain compliance with arcane acquisition regulations. Within the Department of Defense, there exist offices for small and disadvantaged businesses which have been established to help support small businesses specifically to navigate these problems. We recognize the value these organizations already provide in supporting small businesses, and believe it would be redundant to create new offices to focus solely on cybersecurity solutions.

Requirement to ensure sufficient levels of government oversight of functions closely associated with inherently governmental functions

The House bill contained a provision (sec. 941) that would amend sections 129a and 2330a of title 10, United States Code, to ensure that sufficient levels of government oversight are in place for contracted services and aligns current Department of Defense policies related to Total Force Management.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

The House bill contained no similar provision.

The agreement includes the Senate provision with a technical/clarifying amendment.

Clarification of sole ownership resulting from ship donations at no cost to the Navy (sec. 1022)

The House bill contained a provision (sec. 1021) would amend subsection (a) of section 7306 of title 10, United States Code, to clarify that ship donations would be only to operate the vessel as a museum or memorial for public display in the United States. This language would provide the Navy with the flexibility to oversee a vessel donee's actions, without any implication that the Navy retains ownership of the vessel. The provision would also prevent the Federal Government from providing funding for any improvement, upgrade, modification, maintenance, preservation, or repair to a vessel donated under this section.

The Senate committee-reported bill contained an identical provision (sec. 1024).

The agreement includes this provision, but with modifications that would prevent the Department of Defense from providing additional funding for any donated vessel, not the Federal Government as a whole. These modifications would allow other federal departments to contribute to ship museums or ship memorials to the extent that the departments have authorization to do so.

Availability of funds for retirement or inactivation of Ticonderoga class cruisers or dock landing ships (sec. 1023)

The House bill contained a provision (sec. 1022) that would limit the obligation and expenditure of funds authorized to be appropriated or otherwise made available for fiscal year 2014 for the retirement, inactivation, or storage of a cruiser or dock landing ship. The provision would also require the Secretary, prior to extending or renewing such a lease, to submit to the congressional defense committees a notification of the proposed extension or renewal, along with a detailed description of the term of the proposed contract and a justification for extending or renewing the lease, as opposed to obtaining the capability through purchase of such vessels.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would allow the Secretary of the Navy to accept and retain payment-in-kind in lieu of monetary payment for purposes of settling the litigation arising from the default termination on contract number N00019-88-C-0050 for development and production of the A-12 aircraft. Also, it is understood that the Secretary of the Navy is authorized to enter into agreements to modify contracts in order to effect a settlement to the litigation.

The CNO should produce an unclassified report, as well as a classified annex to that report.

The House bill contained a similar provision (sec. 1024) that would express the sense of Congress that additional funding should be prioritized toward shipbuilding efforts and that Department of the Navy budget projections should realistically anticipate the true investment to meet force structure goals.

The agreement includes the Senate provision with an amendment that would add several items to the list of issues to be addressed in the report, including an assessment by the Commandant of the Marine Corps of: (1) The operational risk associated with the current and the planned number of ships of the amphibious assault force; and (2) The capabilities required to meet the needs of the Marine Corps for future ships of the amphibious assault force. The amendment would also delay the required date for the report until 30 days after the Secretary of Defense submits the annual naval vessel construction plan required by section 231 of title 10, United States Code.

Modification of policy relating to major combatant vessels of the strike forces of the Navy (sec. 1027)

The Senate committee-reported bill contained a provision (sec. 1023) that would repeal section 1012 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181). That section requires that the Navy build any new class of major surface combatant and amphibious assault ship with an integrated nuclear power system, unless the Secretary of the Navy notifies the congressional defense committees that, as a result of a cost-benefit analysis, it would not be practical for the Navy to design the class of ships with an integrated nuclear power system.

The agreement includes the House provision.

The House bill contained a provision (sec. 1033) that would restrict the Secretary of Defense from transferring or releasing individuals detained at U.S. Naval Station, Guantanamo Bay, Cuba, (GTMO) to a foreign country or foreign entity unless the Secretary makes certain specified certifications to Congress not later than 30 days prior to any such transfer or release. The restrictions of this provision would apply through December 31, 2014.

The Senate committee-reported bill contained a provision (sec. 1031) that would authorize two procedures for the transfer or release of Guantanamo detainees to their country of origin or another country other than the United States. The first part of the provision would authorize such transfers or releases under certain specified circumstances, specifically: (1) If following a review by a Periodic Review Board, the detainee is determined to no longer be a threat to U.S. national security; (2) In order to effectuate a court order; or (3) If a detainee has been tried and acquitted or tried, convicted, and has served his sentence. The second part of the provision would allow the Secretary of Defense to authorize the transfer of Guantanamo detainees overseas only if he determines, following a rigorous assessment of a number of specified factors, that

The provision would require the Secretary of Defense to notify Congress of a determination to transfer or release a Guantanamo detainee not later than 30 days prior to the transfer or release, and specifies the information that must be provided as part of such notifications.

The agreement includes the Senate provision with an amendment that would:

(a) narrow the specified circumstances under which transfers or releases are authorized under the first part of the provision to only (1) and (2) above;

(b) expand the factors that the Secretary of Defense must specifically evaluate and consider in making his determination whether to transfer a Guantanamo detainee overseas, including the security situation in the country to which the detainee would be transferred, the presence of foreign terrorist groups in the recipient country, whether the recipient country is a state sponsor of terrorism, and whether the detainee has been tried and acquitted or tried, convicted, and completed his sentence; and

(c) expand the information that must be included in the congressional notification provided not later than 30 days prior to the transfer, including information on any actions taken to address the risk of reengagement by the detainee in terrorist activities, a copy of any Periodic Review Board findings, an assessment of the capacity of the receiving country, and a description of the Secretary of Defense's evaluation of the factors to be considered in making the Secretary's determination in support of the transfer.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would require the Secretary of Defense to submit to the congressional defense committees a classified report containing certain specified information relating to detainees at Parwan that have been designated as enduring security threats. The Secretary would also be required to review the classified report to determine what summary information, if any, can be declassified and made publicly available, to the maximum extent practicable consistent with national security.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require that for purposes of any such military commission trial, the chief defense counsel and the chief prosecutor must have the same grade. The amendment would also provide that the Secretary of Defense may temporarily waive this requirement if the Secretary determines that compliance with the requirement either would be infeasible due to the non-availability of qualified officers of the same grade to fill the billets or would cause significant disruption to the trial proceedings. The amendment would also require the Secretary of Defense to issue guidance to ensure that the offices of the chief defense counsel and the chief prosecutor receive equitable resources, personnel support, and logistical support for conducting their duties in connection with any such military commission trial. We note that the intent of this requirement is to ensure fairness and impartiality in the resources and support provided to each of these offices.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment replacing the provisions with a sense of Congress regarding reductions or consolidations of dual-capable aircraft. The amendment also requires a notification 90 days before the date on which the Secretary reduces or consolidates dual capable aircraft that includes the reason for the reduction or consolidation, any effects from such action on the extended deterrence mission of the United States, the manner in which the military requirements of the NATO will be met following such actions, a statement by the Secretary on the response of NATO to such actions, and whether there is any change in the force posture of Russia from such actions including nonstrategic nuclear weapons.

The Senate committee-reported bill contained a provision (sec. 903) that would establish a council to coordinate activities related to national leadership command, control, and communications systems, including the nuclear command, control, and communications system.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would change the co-chairs of the Council to the Under Secretary of Defense for Acquisition, Technology, and Logistics, the Vice-Chairman of the Joint Chiefs of Staff, and would add the Director of the National Security Agency to the Council. The amendment requires an annual report by the Commander, U.S. Strategic Command, through the Chairman of the Joint Chiefs of Staff on the adequacy of the President's budget to meet required capabilities of the nuclear command and control communications system for national leadership of the United States and the impact, if any, if annual appropriations do not meet the President's budget request. The amendment would also seek to add more transparency to the budget for Nuclear Command and Control activities. A clerical amendment is made transferring a provision from 10 U.S.C. 491 regarding anomalies in the Nuclear Command and Control system to this new provision.

Modification of responsibilities and reporting requirements of Nuclear Weapons Council (sec. 1053)

The Senate committee-reported bill contained a provision (sec. 1041) that would amend section 179 of title 10, United States Code, by striking the responsibilities for nuclear command, control, and communications since another section of this Act establishes a Council on Oversight of the National Leadership Command, Control, and Communications System. The Senate committee-reported bill also contained a provision adding a new requirement to report on joint activities between the Department of Defense and the Department of Energy on nuclear security.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that clarifies the nature of the joint report by the Department of Defense and the Department of Energy. We believe the information required to be provided in this joint report should be substantially similar as that provided in the Joint Surety Report pursuant to National Security Presidential Directive 28.

Modification of deadline for report on plan for nuclear weapons stockpile, nuclear weapons complex, nuclear weapons delivery systems, and nuclear weapons command and control system (sec. 1054)

The Senate committee-reported bill contained a provision (sec. 1042) that would amend section 1043 of the National Defense Authorization Act for Fiscal year 2012 (Public Law 112–81), which provides for a report to the congressional defense committees with a 10-year funding profile for the Department of Energy’s (DOE) and the Department of Defense’s (DOD) strategic deterrent modernization program. Specifically, the provision would give both departments 60 days after budget submission to deliver the section 1043 report. If a delay is anticipated that is greater than 60 days, DOE and DOD must notify the congressional defense committees before the President’s budget submission and provide a briefing no later than 30 days after budget submission.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would move the report deadline to 30 days after the President’s budget submission. The amendment would also provide that, if it is determined that the report submission will require longer than 30 days, a briefing will be provided to the congressional defense committees within 30 days after submission of the budget request. Regardless of any such determination or briefing, the report would be required to be submitted no later than 60 days after submission of the budget request.

Prohibition on elimination of nuclear triad (sec. 1055)

The House bill contained a provision (sec. 1051) that would prohibit any of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2014 for the Department of Defense from being obligated or expended to reduce, convert, or decommission any strategic delivery system of the United States if such reduction, conversion, or decommissioning would eliminate a leg of the nuclear triad. This section defines “nuclear triad” as: (1)

land-based intercontinental ballistic missiles; (2) submarine-launched ballistic missiles and their associated ballistic missile submarines; and (3) nuclear-certified strategic bombers.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment containing technical corrections.

Implementation of New START Treaty (sec. 1056)

The Senate committee-reported bill contained a provision (sec. 132) that would amend section 131(a)(1) of the John Warner National Defense Authorization Act for Fiscal Year 2007 (P.L. 109–364) by striking the term in a common capability configuration.

The House bill (section 241) contained a provision that requires the Secretary of Defense to keep each Minuteman III silo as of the date of enactment of this Act in a warm status and that it remains a functioning element of the missile field and can be made functional with a deployed missile.

The Senate committee-reported bill contained a similar provision (sec. 1045) that states the Secretary of Defense may, in a manner consistent with international obligations, retain missile launch facilities currently supporting up to 800 deployed and non-deployed strategic launchers, maintain intercontinental ballistic missiles (ICBM) on alert or operationally deployed status, and preserve ICBM silos in operational or warm status.

The House bill contained a provision (sec. 1052) that would provide that none of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2014 for the Department of Defense or the National Nuclear Security Administration may be obligated or expended to carry out reductions to the nuclear forces of the United States required by the New START Treaty until the Secretary of Defense provides the plan required by section 1042(a) of the National Defense Authorization Act of Fiscal Year 2012 (Public Law 112–81) and the President certifies that any reductions to U.S. nuclear forces below the level required by the New START Treaty will be carried out only pursuant to a treaty or international agreement approved according to the Treaty Clause of the Constitution of the United States or an affirmative act of Congress.

The agreement includes a provision that would authorize the use of fiscal year 2014 funds for the purpose of preparing to implement reductions in nuclear forces necessary to meet the levels required by the New START Treaty subject to additional limitations as found in subsection (b) of the agreement. The agreement requires the Secretary of Defense to include with the defense budget materials a consolidated budget justification display that covers each activity associated with implementation of the New START Treaty. Subsection (b) of the provision would limit amounts spent for an environmental assessment for any proposed reduction in ICBM silos to 50 percent subject to receiving the nuclear force structure plan required by section 1042(a) of the Fiscal Year 2012 National Defense Authorization Act, which is unacceptably almost 2 full years late. That plan would be required to include the various options under consideration for treaty implementation, along with a

preferred final force structure option, which may be modified upon the conclusion of the environmental assessment. That plan would be accompanied by a report from the Commander of U.S. Strategic Command on his assessment of the force structure options provided by the Secretary of Defense, including the preferred final force structure option. Lastly, the Chairman of the Joint Chiefs of Staff would be required to certify to the congressional defense committees that conducting the environmental assessment will not imperil the ability of the military to comply with the deployed or non-deployed force levels of the New START Treaty by February 2018.

The agreement would prohibit the conversion of nuclear capable B-52 aircraft to conventional aircraft until the information required under subsection (b) is submitted, and requires that all B-52s in the inventory remain in a common conventional weapons employment capability configuration once nuclear decertification and modification commences for currently an undetermined quantity of B-52 aircraft.

The agreement would further require a report on collaboration between the Army, Navy, and Air Force on activities related to strategic systems to improve efficiencies, technology sharing, and other benefits.

The agreement would also express a sense of the Congress that the force structure required by the New START Treaty should preserve Minuteman III ballistic missile silos in a warm status and any non-deployed missiles and silos should be spread amongst the three missile wings in the Air Force ICBM force.

Finally, the agreement would also include, in another section of this report accompanying section 4201, an explanatory statement on the budget for activities to prepare for the implementation of the New START Treaty.

Retention of capability to redeploy multiple independently targetable reentry vehicles (sec. 1057)

The House bill contained a provision (sec. 1056) that would require the Secretary of the Air Force to ensure that the Air Force is capable of deploying multiple independently targetable reentry vehicles to Minuteman III intercontinental ballistic missiles (ICBM) and any ground-based strategic deterrent follow-on to such missiles. This section would require the Secretary to ensure that the Air Force is capable of commencing such deployment not later than 270 days after the date on which the President determines such deployment is necessary.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that changes the 270 days to 180 days and narrows the requirement to apply only to the Minuteman III ICBM system.

Report on New START Treaty (sec. 1058)

The House bill contained a provision (sec. 1059) that would require the Secretary of Defense and the Chairman, Joint Chiefs of Staff to jointly submit to the congressional defense committees, the Committee on Foreign Affairs of the House of Representatives, and the Committee on Foreign Relations of the Senate, a report on

whether the New START Treaty is in the national security interests of the United States.

Sense of Congress on further strategic nuclear arms reductions with the Russian Federation (sec. 1060)

The House bill contained a provision (sec. 1054) that would provide a statement of policy concerning implementation of further nuclear arms reductions below the levels of the New START Treaty, and would limit funds to make such reductions unless certain conditions are met.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would express the sense of Congress that, if the United States seeks further strategic nuclear arms reductions with the Russian Federation that are below the levels of the New START Treaty, such reductions should: (1) Be pursued through a mutually negotiated agreement; (2) Be verifiable; (3) Be pursued through the treaty-making power of the President; and (4) Take into account the full range of nuclear weapon capabilities that threaten the United States and its allies, including non-strategic nuclear weapon capabilities.

Sense of Congress on compliance with nuclear arms control treaty obligations (sec. 1061)

The House bill contained a provision (sec. 1055) that would express the sense of Congress that the President should consider not seeking further nuclear arms reductions with a foreign country that is in noncompliance with its nuclear arms control treaty obligations.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would express the sense of Congress that, if the President determines that a foreign nation is in substantial noncompliance with its nuclear arms control treaty obligations in a manner that adversely affects the national security of the United States or its allies or alliances, the President should take certain specified steps. These steps include informing

Congress of the President's assessment of the effect of such non-compliance and the President's plans to resolve such noncompliance. They also include considering whether, in light of the non-compliance, the United States should engage in future nuclear arms control negotiations with the noncompliant government, and considering the potential effect of the noncompliance on the consideration by the Senate of a future nuclear arms reduction treaty with the noncompliant government.

Senses of Congress on ensuring the modernization of the nuclear forces of the United States (sec. 1062)

The Senate committee-reported bill contained a provision (sec. 1044) that states it is the policy of the United States to modernize the nuclear triad and sustain the nuclear stockpile, its production facilities, and science base, and a sense of Congress expressing that Congress is committed to providing the resources needed for this modernization and that Congress supports the modernization or replacement of the triad of strategic nuclear delivery systems.

The House bill contained no similar provision.

The agreement includes an amendment that includes an additional sense of Congress supporting continued upgrades of the existing B-1B, B-2, and B-52 bomber aircraft, and that the Air Force should continue to prioritize the continued development and acquisition of the long-range strike bomber program.

Subtitle G—Miscellaneous Authorities and Limitations

Enhancement of capacity of the United States Government to analyze captured records (sec. 1071)

The House bill contained a provision (sec. 1061) that would provide the statutory authority to the Secretary of Defense to establish a Conflict Records Research Center to facilitate research and analysis of records captured from countries, organizations, and individuals, now or once hostile, to the United States.

The Senate committee-reported bill contained no similar provision, but recommended funding of the current center, which already exists at the National Defense University, for \$1 million in the budget request for fiscal year 2014.

The agreement includes the House provision.

We note that while such a center currently exists, additional statutory authorization would allow the center to be funded collectively by the Department of Defense, the Office of the Director of National Intelligence, and other departments and agencies, rather than rely on discrete partner funding for each activity. This authorization would also allow the center to receive funding from other agencies, states, or other foreign and domestic entities, including academic and philanthropic organizations, to support important research in international relations, counterterrorism, conventional warfare and unconventional warfare.

The plan shall include an inventory of the electromagnetic spectrum uses for national security and other purposes, an estimate of the need for electromagnetic spectrum over the time periods of the Senate committee-reported provision, and any additional matters the Secretary of Defense, in consultation with the Director of National Intelligence and the Secretary of Commerce, considers appropriate.

Extension of authority to provide military transportation services to certain other agencies at the Department of Defense reimbursement rate (sec. 1073)

The DOD currently uses this authority to: (1) provide transportation support to other departments and agencies to increase peacetime business, and (2) promote the improved use of airlift by filling excess capacity with paying cargo.

The two secretaries and the Administrator would also be required to submit a report on the status of the plans within 270 days of the date of enactment of this Act.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would express the sense of Congress that simulators offer cost savings to DOD, can contribute to training members of the armed services for combat, and highlights the need for synergy between the DOD and private sector.

LEGISLATIVE PROVISIONS NOT ADOPTED

Department of Defense Readiness Restoration Fund

The Senate committee-reported bill contained a provision (sec. 1002) that would establish a Department of Defense (DOD) Readiness Restoration Fund in order to provide the DOD with increased flexibility to transfer funds that may be available to high priority readiness accounts, where necessary to address significant shortfalls in funding otherwise available for the training activities of the armed forces (including flying hours and steaming days) and the maintenance of military equipment.

The House bill contained no similar provision.

The agreement does not include this provision.

We note that the reductions in discretionary appropriations and direct spending accounts under section 251A of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901a) were never intended to take effect, the readiness of the Nation's military is weakened by sequestration, sequestration has budgetary and cost impacts beyond the programmatic level, and there is limited information about these indirect costs to the Federal Government. It is the sense of Congress that the Government Accountability Office should report on the long-term budgetary costs and effects of sequestration, including on procurement activities and contracts with the Federal Government.

Sense of Congress regarding the National Guard Counter-Narcotic Program

The House bill contained a provision (sec. 1014) that would express the sense of Congress regarding the importance of the National Guard Counterdrug Program (CDP) as a tool in combating drug trafficking into the United States and the need for continued support and funding of such programs, especially along the Southwest border.

We note that the Department of Defense requests funding annually to support the National Guard CDP. We believe that the CDP plays an important role in providing military-specific capabilities and expertise resident within the National Guard to support the counterdrug activities of federal, state, and local authorities. We believe this support has proven effective in helping to meet national counterdrug objectives.

Assessment of affiliates and adherents of Al-Qaeda outside the United States

The House bill contained a provision (sec. 1036) that would require an assessment of any group operating outside the United States that is an affiliate or adherent of, or otherwise related to, Al Qaeda; a summary of relevant information relating to each such group; an assessment of whether each group is part of or substantially supporting Al Qaeda or the Taliban, or constitutes an associated force that is engaged in hostilities against the United States or its coalition partners; and the criteria used to determine the nature and extent of each group's relationship to Al Qaeda.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We direct the Secretary of Defense, not later than 120 days after the enactment of this Act, to provide a briefing to the Committees on Armed Services of the Senate and the House of Representatives that provides definitions and the processes to determine if an entity is an affiliate, associated force and/or an adherent of al Qaeda or the Taliban; and an assessment of the groups or entities that the Department considers to be affiliates or adherents of al Qaeda.

In consultation with the committees of jurisdiction over the Authorization for Use of Military Force (Public Law 110-40), we direct the Secretary of State to provide the same briefing to the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives on the aforementioned matters.

Designation of Department of Defense senior official for facilitating the transfer of individuals detained at United States Naval Station, Guantanamo Bay, Cuba

The House bill contained a provision (sec. 1037) that would require the Secretary of Defense to designate a senior official within the Department of Defense (DOD) with principal responsibility for the coordination and management of the transfer of individuals detained at U.S. Naval Station, Guantanamo Bay, Cuba.

Under the provisions of section 118(f)(9)(A) of title 10, United States Code, the heads of departments and agencies of the Department of Defense are required, upon request, to cooperate with the NDP to ensure that information it considers necessary to carry out its duties is promptly provided to the maximum extent practical. It is particularly important for the NDP to have access, upon request, to information, including appropriate access to previous studies, data, assumptions, scenarios, analysis, and recommendations related to the Department's series of recent strategy and program reviews such as the Defense Strategic Guidance, Strategic Choices and Management Review, and Chairman of the Joint Chiefs of Staff Risk Assessment.

Last year's statement of managers to accompany the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) directs the Secretary of Defense, upon request, to provide the congressional defense committees with a briefing that describes the defense planning guidance, as required by section 113 of title 10, United States Code, and from which the budget request submitted was developed. Such a briefing is particularly important now given the significant changes in the strategic and fiscal plans currently under consideration by the Department. For this reason we expect the Department to provide the required briefing, upon request, with regard to existing defense policy guidance used for the Department's fiscal year 2014 budget request. This briefing will serve as a baseline to help the committees understand any changes to the guidance that may be adopted in the course of the current review and to assist with the oversight and assessment of any subsequent strategic or budgetary changes.

Report on air transportation of supplies for the United States

The House bill contained a provision (sec. 1082) that would: (1) Modify section 2631a of title 10, United States Code, to provide a preference for Civil Reserve Air Fleet (CRAF) aircraft for the transportation of Department of Defense (DOD) supplies; (2) Require the

DOD to submit an annual report regarding use of outsize and over-size cargo flights; and (3) Amend chapter 401 of title 49, United States Code, to direct at least 50 percent of the gross tonnage of the equipment, materials, or commodities that are procured, contracted, or subcontracted for by the U.S. Government to be transported by CRAF aircraft.

(2) The percentages of the gross tonnage of the equipment, materials, or commodities transported on fixed wing aircraft broken out by organic airlift and specific commercial carriers;

(4) The volume of outsize and oversize cargo flights, to include requirements and procedures;

(5) The ability of CRAF carriers to meet requirements to transport any equipment, materials, or commodities for the use of U.S. military operations and respond to a humanitarian disaster; and

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

The Secretary of Defense informed us that he already has the authority to accept donations and gifts for the benefit of our armed forces, but that the Department of Defense has very limited resources to receive, screen, and transport donations and gifts.

Protection of tier one task critical assets from electromagnetic pulse and high-powered microwave systems

The House bill contained a provision (sec. 1086) that would require the Secretary of Defense to certify to the congressional defense committees that certain defense critical assets are protected from the adverse effects of electromagnetic pulses (EMP) and high-powered microwave (HPM) systems, and to prepare a plan to en-

sure protected electrical power for any such assets that are not certified.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We note that the Department of Defense (DOD) has in place well-documented policies and practices for the protection of defense critical infrastructure against a wide variety of potential threats and hazards. This all-hazards risk mitigation and protection approach covers both natural phenomena and man-made hazards and attacks, including EMP and potential electrical power disruption, and considers both the probability and severity of potential hazards.

The Department's Defense Critical Infrastructure Protection (DCIP) program is focused on mission assurance to meet DOD needs. It performs recurring analyses of infrastructure vulnerability and risk mitigation options to reduce vulnerability and enhance mission assurance in a cost-effective manner. These assessments result in prioritized plans to mitigate risks to defense critical infrastructure, which changes as mission requirements change and as additional redundancy is established. The Department then takes appropriate risk mitigation steps according to these prioritized plans.

In reviewing the methodology supporting this prioritization, we believe DCIP has institutionalized a process that can address the type of certification process called for in the House provision, without injecting unwarranted redundant assessment or planning processes. We expect the DOD to continue using the DCIP program to review its assets against EMP and other emerging threats to ensure ongoing protection efforts supporting mission assurance. We expect the Department to keep the congressional defense committees apprised of any significant updates or changes to the DCIP program, as well as to the status of any specific infrastructure assets assessed to have a critical vulnerability to EMP, as they conduct future assessments.

While we believe the Department has a good process for evaluating the risks and mitigation measures for EMP through the DCIP program, we believe that a better understanding of the intelligence community's views on the threats posed by EMP or HPM systems would be helpful in understanding what more might be done by DOD to enhance its protective posture. Therefore, we direct the Director of the Defense Intelligence Agency to provide a briefing to the Committees on Armed Services of the Senate and the House of Representatives, within 60 days of the enactment of this Act, on the threats posed to DOD infrastructure by the natural occurrence or intentional use of EMP or HPM effects.

Compliance of military departments with minimum safe staffing standards

Determination and disclosure of transportation costs incurred by Secretary of Defense for congressional trips outside the United States

The House bill contained a provision (sec. 1089) that would require the Secretary of Defense to determine the cost of the transportation provided in the case of a trip taken by a member, officer, or employee of the House of Representatives or Senate in carrying out official duties outside the United States for which the Department of Defense provides transportation and to provide a written statement of the cost not later than 10 days after completion of the trip to the member, officer, or employee involved and to the Committee on Armed Services of the Senate or the House of Representatives.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We support public disclosure of official foreign travel by members, officers, and employees of the House of Representatives and Senate. To this end, we note that section 1754 (b) of title 22, United States Code, contains reporting and disclosure requirements for congressional travel outside the United States, including a requirement for reports to be open to public inspection and published in the Congressional Record. We recognize there are circumstances under which transportation provided by the Department of Defense best meets the needs of congressional delegations, ranging from protecting the safety and security of the delegation to expediency and accessing destinations that have little to no commercial air service. We further note that the Committees on Armed Services of the Senate and the House of Representatives each maintain policies and processes to provide further oversight of travel requests by members and employees of the committees.

Transfer to the Department of Homeland Security of the Tethered Aerostat Radar System

The House bill contained a provision (sec. 1091) that would authorize the Secretary of Defense to transfer to the Department of Homeland Security the Tethered Aerostat Radar System (TARS).

The House bill contained a provision (sec. 1092) that would amend section 2576a of title 10, United States Code, to permit the Secretary of Defense to transfer personal property to border security activities in consultation with the Secretary of Homeland Security.

The Senate committee-reported bill contained no similar provision.

The agreement does not contain the provision.

We note that that the Department of Homeland Security can participate in the sale or donation of excess personal property for border security activities under the current law.

We direct the Comptroller General of the United States to conduct a study of the Department of Defense's process for disposing of surplus personal property, focusing on: (1) an overview of how the disposal process works in practice; (2) the means used to dispose of surplus property; and (3) recommendations to improve the efficiency and effectiveness of the current disposal process.

Unmanned aircraft systems and National Airspace

The House bill contained a provision (sec. 1093) that would authorize the Secretary of Defense to enter into a memorandum of understanding with a non-Department of Defense entity that is engaged in the test range program authorized under section 332(c) of the FAA Modernization and Reform Act of 2012 (Public Law 112-95) to allow such entity access to non-regulatory special use airspace if such access: (1) is used by the entity as part of such test range program; and (2) does not interfere with the activities of the Secretary or otherwise interrupt or delay missions or training of the Department of Defense (DOD). The underlying Act authorized the Federal Aviation Administration (FAA) to identify up to six test ranges at which interested parties could develop and test procedures under which the FAA might allow access to the National Airspace System on a routine basis.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

However, we agree that: (1) developing established procedures to integrate unmanned aircraft systems into the National Airspace System will be very important in allowing both DOD and non-DOD entities to train with and operate these systems on a routine basis; and (2) developing these procedures could include the use of FAA-designated DOD non-regulatory special use airspace.

Days on which the POW/MIA flag is displayed on certain federal property

The House bill contained a provision (sec. 1094) that would require that, on federal installations, the National League of Families POW/MIA Flag be displayed on all days on which the flag of the United States is displayed.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Sense of Congress to maintain a strong National Guard and Military Reserve force

The House bill contained a provision (sec. 1096) that would express the sense of Congress that (1) the Secretary of Defense should make every effort to ensure the Military Reserve and National Guard forces are sustained by a fully-manned and fully-funded force and that the United States fulfill its longstanding commitment to unyielding readiness in terms of defense; (2) the Secretary of Defense should act with the knowledge that the National Guard and Reserves are critical components of the armed forces, particularly as a means of preserving combat power during a time of budget austerity; and (3) Congress repudiates proposals to diminish the National Guard or Reserves and affirms the growth of these components as circumstances warrant.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

The House bill contained a provision (sec. 1098) that would require the Department of Defense to post on its public web site the costs of the wars in Afghanistan and Iraq.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that reports on the costs of the wars in Afghanistan and Iraq have been published by the Congressional Budget Office (CBO) and the Congressional Research Service (CRS). We further note that CBO reports are publicly available and published on the Internet, and CRS reports are available to Members of Congress.

The House bill contained a provision (sec. 1099) that would express the sense of Congress that the Department of Defense (DOD) should take into consideration foreign languages and cultures in DOD's training, tools and methodologies for military-to-military activities and building partner capacity.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision. We encourage the DOD to incorporate the consideration of foreign languages and cultures into its training and procedures for engaging in and benefiting from military-to-military cooperation and building partner capacity activities.

Sense of Congress regarding preservation of second amendment rights of active duty military personnel stationed or residing in the District of Columbia

The House bill contained a provision (sec. 1099A) that would express the sense of Congress that active duty military personnel who are stationed or residing in the District of Columbia should be permitted to exercise fully their rights under the Second Amendment to the Constitution of the United States and therefore should be exempt from the District of Columbia's restrictions on the possession of firearms.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

The Senate committee-reported bill contained a provision (sec. 1107) that contained a number of similar elements of the House provision, namely the direct hiring authority for qualified candidates possessing a bachelor's degree as well as qualified veteran candidates.

The agreement includes the House provision with an amendment that removes elements relating to students, SESs, and STs.

We note that there have been concerns raised about the management of the senior scientific and technical workforce within DOD laboratories. Therefore, we direct the Under Secretary of Defense for Personnel and Readiness to submit a briefing to the Committees on Armed Services of the Senate and the House of Representatives within 90 days of the enactment of this Act on challenges to the management of the scientific and technical workforce of the Department, and recommendations for possible actions to improve such management. In preparing this briefing, the Under Secretary shall work with the relevant science and technology executives and personnel leadership in the Services to identify challenges to this workforce and examine opportunities to change policies and practices to improve the effectiveness and efficiencies of management procedures and practices. We note that DOD laboratories need to have streamlined, effective, and efficient personnel system practices in order to be competitive employers of world-class scientific and technical talent.

Furthermore, as a subset of this review, we believe that the Department should also examine the mechanisms for bringing in interns and other undergraduate students from cooperative education programs into the Department's laboratories to determine if existing means are effective, and to propose any changes that might be necessary to improve those programs.

Compliance with law regarding availability of funding for civilian personnel (sec. 1108)

The House bill contained a provision (sec. 1108) that would require the Secretary of Defense to prescribe regulations, no later than 45 days after the enactment of this Act, implementing the authority provided in subsection (a) of section 1111 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84).

LEGISLATIVE PROVISION NOT ADOPTED

Flexibility in employment and compensation of civilian faculty at certain additional Department of Defense schools

The Senate committee-reported bill contained a provision (sec. 1106) that would amend section 1595(c) of title 10, United States Code, to add the Defense Institute for Security Assistance Management and the Joint Special Operations University to the list of Department of Defense schools at which the Secretary of Defense may employ and compensate civilian faculty as the Secretary considers necessary.

The House bill contained no similar provision.

The agreement does not include this provision.

We note that the Department of Defense and the military departments have proposed changes over the past several years to extend the use of civilian faculty employed under title 10, United States Code, at Department of Defense schools and Professional Military Education (PME) programs that provide less than 10 months of academic instruction. We believe the Department and the Services have not applied adequate rigorous analysis of and justification for

these requests. Section 1124 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101–189) expanded the authority to employ civilian faculty at PME schools beyond the Naval War College to the National Defense University, the Army War College and United States Army Command and General Staff College, the Marine Corps Command and Staff College and Air University for principal courses of instruction of at least 10 months. As stated in the Report of the Panel on Military Education of the One Hundredth Congress of the Committee on Armed Services, House of Representatives, the intent of the expansion was that intermediate and senior PME schools were graduate level programs of instruction and civilian instructors were key to maintaining a high quality of instruction. The panel believed competitive civilian faculty could help attract other quality faculty from civilian education institutions and add depth to the curriculum, thus improving the quality of instruction. We believe this principle still applies in today's environment and that the employment of civilian faculty under title 10, United States Code, at PME institutions and schools should be reserved for courses of instruction that are graduate level in nature.

Therefore, we direct the Secretary of Defense to review the civilian faculty requirements for all Department of Defense and PME schools, universities, and institutes to determine if there are graduate level courses of instruction that are less than 10 months in duration that may be authorized the employment of civilian faculty under title 10, United States Code. The review should include by-program justification for the utilization of civilian instructors rather than military instructors or contract instructors, and an accompanying cost-benefit analysis. The Secretary of Defense shall submit the findings of the review and any recommendations for changes to the employment of civilian faculty to the Committees on Armed Services of the Senate and the House of Representatives no later than March 1, 2015.

TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

Subtitle A—Assistance and Training

Modification and extension of authorities relating to program to build the capacity of foreign military forces (sec. 1201)

The House bill contained a provision (sec. 1201) that would extend and modify the authority under section 1206 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163), as amended, to conduct a program to build the capacity of foreign military forces to conduct counterterrorism operations or stability operations (the “global train and equip program”). The provision would expand the purposes for which train and equip assistance may be provided under this program, and expand the types of security forces that may receive such assistance. The provision would also require that information be submitted, as part of the annual budget justification materials, on the planning and execution of the global train and equip program for the coming fiscal year. The limitation on funds available for the program would be increased from \$350.0 million to \$425.0 million per fiscal year, and

the termination of the program would be extended until September 30, 2016. Finally, the House provision would repeal existing authorities for training and equipping counterterrorism forces in Yemen and East Africa.

The Senate committee-reported bill contained a provision (sec. 1201) that would extend the authority for the global train and equip program through fiscal year 2018 and require a report on counterterrorism-related assistance under the program.

The agreement includes the House provision with an amendment that would maintain the current purposes for which train and equip assistance may be provided under the program, specifically building capability relating to the conduct of counterterrorism operations, and military and stability operations in conjunction with U.S. forces. The amendment would expand the types of forces that may receive assistance under the program to include a foreign country's security forces with a counterterrorism mission. We recognize that in certain countries the lead counterterrorism unit is not located in the Ministry of Defense (MOD).

The provision included in the agreement would also limit the level of funding available annually for the global train and equip program to \$350.0 million and extend the authority for the program through fiscal year 2017. In addition, funds available for fiscal year 2015 would be restricted to no more than \$262.5 million until the Secretary of Defense, with the concurrence of the Secretary of State, submits a non-binding report on the proposed planning and execution of fiscal year 2015 programs intended to be conducted or supported under the authority to build the capacity of a foreign country's security forces, other than MOD forces, to conduct counterterrorism operations.

The provision in the agreement would include the reporting requirement from the Senate provision regarding counterterrorism-related assistance, but would not include the House provision's repeal of existing authorities for training and equipping security forces in Yemen and East Africa.

Global Security Contingency Fund (sec. 1202)

The House bill contained a provision (sec. 1203) that would make certain technical amendments to the authority for the Global Security Contingency Fund (GSCF) under section 1207 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81), including changes to the notification requirements. The provision would also require a report to the specified congressional committees on the guidance and processes for the GSCF.

The Senate committee-reported bill contained a similar provision (sec. 1202) making technical changes to GSCF.

The agreement includes the House provision with a technical and clarifying amendment.

We are concerned about the procedures and processes for implementation of the GSCF program and the coordination of GSCF activities with other programs for building partner capacity. Therefore, the Comptroller General is directed to conduct a review of the procedures and processes established by the Department of Defense (DOD) and Department of State (DOS) to administer and imple-

ment activities funded by GSCF. Specifically, the Comptroller General is directed to review:

(1) The process for the DOS and DOD, including the defense agencies and the combatant commands, to identify proposed GSCF activities;

(2) The extent to which DOD, in conjunction with DOS, has procedures in place to review, prioritize, and approve activities to be funded through GSCF and coordinate those activities with other programs to build partner capacity; and

(3) The extent to which DOD, in conjunction with DOS, has developed a monitoring and evaluation framework to measure the effectiveness of the activities implemented and funded by the GSCF.

The Comptroller General is directed to submit the report containing the findings of this review to the relevant congressional committees by October 1, 2014. For purposes of this requirement, the relevant congressional committees are the Committees on Armed Services, Foreign Relations, and Appropriations of the Senate and the Committees on Armed Services, Foreign Affairs, and Appropriations of the House of Representatives.

Training of general purpose forces of the United States Armed Forces with military and other security forces of friendly foreign countries (sec. 1203)

The Senate committee-reported bill contained a provision (sec. 1203) that would permit the Secretary of Defense to authorize training with the military forces or other security forces of a friendly foreign country in order to prepare the U.S. armed forces to train the military forces or other security forces of a friendly foreign country and enhance interoperability. Training with foreign military forces under this authority must be in the U.S. national interest and consistent with U.S. national security strategy as well as the recent presidential guidance on security sector assistance.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would: (1) Modify elements of the annual reporting requirement; (2) Add a section relating to the types of training authorized; (3) Provide for coordination and concurrence of the Secretary of State; (4) Establish a notification requirement; and (5) Define for purposes of the delivery of the annual report the appropriate congressional committees.

We are concerned about the deteriorating readiness of U.S. general purpose forces, particularly ground forces, to conduct their mission-essential tasks. We intend to monitor the execution of this authority closely and expect activities authorized by this provision to be used in a way that most effectively supports the readiness requirements of U.S. forces.

Authority to conduct activities to enhance the capability of foreign countries to respond to incidents involving weapons of mass destruction (sec. 1204)

The House bill contained a provision (sec. 1205) that would authorize the Secretary of Defense, in concurrence with the Secretary of State, to provide assistance to the military and civilian response

organizations of certain foreign countries in the region around Syria in order for such countries to respond effectively to incidents involving weapons of mass destruction.

The Senate committee-reported bill contained a similar provision (sec. 1206) that would authorize the Secretary of Defense to provide such assistance to foreign nations, without limiting the assistance to countries in the region around Syria.

The agreement includes a provision that would incorporate elements of each bill provision. It would provide the authority for the Secretary of Defense to provide assistance to the military and civilian first responder organizations of the nations that border Syria, and to provide such assistance to other nations if the Secretary notifies the congressional defense committees of the Secretary's intention to do so. The provision would also require reports for each year in which the authority is used, including details on the assistance provided and the costs incurred. The provision would also require the Secretary to provide notification if the Secretary plans to use more than \$4.0 million for the program in a fiscal year. Finally, the authority provided in the provision would expire after September 30, 2017.

Authorization of National Guard State Partnership Program (sec. 1205)

The House bill contained a provision (sec. 1204) that would codify the National Guard State Partnership Program in chapter 1 of title 32, United States Code.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would authorize the Secretary of Defense, in consultation with the Secretary of State, to establish a program for bilateral or multilateral military-to-military exchanges with the National Guard of a State or territory and the national military forces of a foreign nation ("State Partnership Program"). The provision would also require the publication of new regulations to modify existing regulation to conform to this new authority; provide certain authorization for the payment of expenses; require a series of notifications and reports; repeal Section 1210 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84; 123 Stat. 2517; 32 U.S.C. 107 note); and establish a sunset of the underlying authority at the end of fiscal year 2016.

We intend for engagement with other than the military forces to be focused—to the maximum extent—on disaster response or emergency response. For military-to-military engagement, we anticipate that annual reporting may be done in tabular format, but that the Department of Defense should provide a sufficient level of information so that extensive follow-up is not required. This authority is in no way intended to preclude National Guard personnel from engaging with partnered forces under other Department of Defense and State Department authorities, for example, Joint Combined Exchange Training (10 U.S.C. 2011) and implementation of Foreign Military Financing programs (22 U.S.C. 2752).

United States security and assistance strategies in Africa (sec. 1206)

The Senate committee-reported bill contained a provision (sec. 1204) that would direct the Secretary of Defense to develop a strategic framework for U.S. counterterrorism assistance and cooperation in North Africa, including but not limited to programs conducted under the Trans-Sahara Counter Terrorism Partnership, Operation Enduring Freedom-Trans Sahara, and other related security assistance activities. The provision would also require the Secretary of Defense to submit a report to Congress on the details of this framework, as well as on lessons-learned from recent developments in Mali and the region.

The House bill contained no similar provision.

The agreement includes the Senate provision with a technical and clarifying amendment. The agreement also includes provisions that would: (1) Require an interagency strategy that supports the recent security and political gains in Somalia; (2) Require a classified intelligence assessment on al Shabaab; and (3) Designate an existing senior U.S. Government official with existing interagency authority for export policy for Africa to coordinate among various U.S. Government agencies existing export strategies with the goal of significantly increasing U.S. exports to Africa.

We also acknowledge that the number of armed robbery at sea and piracy attacks in the Gulf of Guinea are increasing, with an ongoing pattern of cargo thefts and robbery, often occurring in the territorial waters of West and Central African states. Ongoing piracy and armed robbery at sea in the Gulf of Guinea pose a threat to international navigation, security, and the economic development of states in the region. It has been the U.S. strategy to improve the region's trade competitiveness and encourage the diversification of exports beyond natural resources. No later than 90 days after enactment of this Act, we direct the Secretary of Defense to provide a briefing to the Committees on Armed Services of the Senate and the House of Representatives on the Department of Defense strategy to use its existing authorities to build capacity to combat armed robbery at sea, piracy, and other maritime threats.

We further note the importance of bringing to justice those individuals who committed, conspired to commit, attempted to commit, or aided or abetted in the commission of the September 11–12, 2012, terrorist attack on the Special Mission Compound and Annex in Benghazi, Libya. We note that, in January 2013, the Secretary of State has authorized a reward of up to \$10 million for information leading to the arrest of those individuals.

Assistance to the Government of Jordan for border security operations (sec. 1207)

The Senate committee-reported bill contained a provision (sec. 1205) that would authorize the Secretary of Defense, upon a determination from the President that it is in the national security interests of the United States, to use up to \$75.0 million of amounts authorized for the Coalition Support Fund account in fiscal years 2013 and 2014 to support the border security operations of the Jordanian Armed Forces.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would authorize the Secretary of Defense, with the concurrence of the Secretary of State, to provide assistance—on a reimbursable basis—to the Government of Jordan for purposes of supporting their armed forces efforts to increase security along the border between Jordan and Syria. Prior to any reimbursement, the provision would require the Secretary of Defense that the Government of Jordan is continuing to support and maintain efforts of the armed forces of Jordan to increase security or sustain increased security along the border between Jordan and Syria. Upon such certification, the Secretary of Defense may provide up to \$150.0 million from fiscal year 2014 funds, to be expended in fiscal years 2014 and 2015.

Support of foreign forces participating in operations to disarm the Lord's Resistance Army (sec. 1208)

The Senate committee-reported bill contained a provision (sec. 1207) that would authorize the Department of Defense to obligate not more than \$50.0 million in each fiscal year in operation and maintenance funding to provide logistical support, services and supplies, and intelligence support to: (1) The national military forces of Uganda participating in operations to mitigate or eliminate the threat posed by the Lord's Resistance Army (LRA); and (2) The national military forces of any other countries determined by the Secretary of Defense, with the concurrence of the Secretary of State, to be participating in operations to mitigate or eliminate the threat posed by the LRA. The Secretary's authority would expire upon the termination of Operation Observant Compass.

The House bill contained a similar provision (sec. 1206).

The agreement includes the Senate provision with an amendment that would: (1) Extend the underlying authority through the end of fiscal year 2017; (2) Require the Secretary of Defense to submit a report relating to various matters associated with the ongoing operation to support foreign forces; and (3) Prohibit utilizing 25 percent of the underlying provision until the Secretary submits the required report to Congress.

We note that the support provided by U.S. military advisors was unnecessarily restricted due to interpretation of a combat exclusion clause and therefore removed it from the existing authority. We believe that U.S. military advisors should assist their partners with the full-range of activities short of direct combat. We note this provision expands the previous authority and increases the authorized funding level to \$50.0 million to provide in-the-field advice, assistance and support to foreign forces searching for Joseph Kony and his senior lieutenants, thereby strengthening the training and capabilities of the foreign forces to counter the LRA's capabilities in the region. With this expanded authority, we expect the Department of Defense to continue their progress towards the mission objectives of Operation Observant Compass. We remain fully supportive of this advise and assist operation.

Subtitle B—Matters Relating to Afghanistan, Pakistan, and Iraq
Commanders' Emergency Response Program in Afghanistan (sec. 1211)

The House bill contained a provision (sec. 1213) that would extend through fiscal year 2014 the authority under section 1201 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81; 125 Stat. 1619), as amended, for the Commanders' Emergency Response Program (CERP). The provision would limit the amount of funds available for the program to \$60.0 million.

The Senate committee-reported bill contained a similar provision (sec. 1211) that would extend the CERP authority for one year and would require a report on lessons learned and best practices from the execution of CERP in Iraq and Afghanistan.

The agreement includes the Senate provision with a clarifying amendment.

One-year extension of authority to use funds for reintegration activities in Afghanistan (sec. 1212)

The House bill contained a provision (sec. 1212) that would amend section 1216 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111–383), as amended, to extend the authority to use Department of Defense funds to support reintegration activities in Afghanistan and authorize the use of up to \$25.0 million for these purposes.

The Senate committee-reported bill contained an identical provision (sec. 1213).

The agreement includes this provision.

Extension of authority for reimbursement of certain coalition nations for support provided to United States military operations (sec. 1213)

The House bill contained a provision (sec. 1211) that would extend for fiscal year 2014 and modify the authority under section 1233 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181), as amended, to provide reimbursements to certain nations for support provided to U.S. military operations in Operation Enduring Freedom. The provision would limit funds available under this authority (“Coalition Support Funds”) for fiscal year 2014 to \$1.5 billion. The provision would also require that, prior to making reimbursements to Pakistan, the Secretary of Defense must make certain certifications to the congressional defense committees, or invoke a national security waiver.

The Senate committee-reported bill contained a similar provision (sec. 1215) that would extend the authority under section 1233 of Public Law 110–181, as amended, for fiscal year 2014. The provision would also extend through fiscal year 2014 the notification requirements, under section 1232(b)(6) of the National Defense Authorization Act for Fiscal Year 2008 (122 Stat. 393) as amended, relating to Coalition Support Funds reimbursements for Pakistan for support provided by Pakistan. The provision would further extend the limitations, under section 1227(d) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239; 126

Stat. 2000), on reimbursements of Pakistan pending certain certifications regarding Pakistan.

The agreement includes the Senate provision with a technical amendment.

Extension and modification of authority to support operations and activities of the Office of Security Cooperation in Iraq (sec. 1214)

The House bill contained a provision (sec. 1214) that would extend for fiscal year 2014 the authority under section 1215 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81), as amended by section 1211 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–329), for the Secretary of Defense to use up to \$209.0 million in funds to support the operations and activities of the Office of Security Cooperation in Iraq (OSC–I). The provision would also authorize the OSC–I during fiscal year 2014 to conduct non-operational training of Iraqi Ministry of Defense (MOD) personnel in an institutional environment to build certain capabilities of the Iraqi security forces.

The Senate committee-reported bill contained a similar provision (sec. 1212) that would extend for fiscal year 2014 the authority to fund the OSC–I under section 1215 of Public Law 112–81, as amended. The provision would also authorize the OSC–I during fiscal year 2014 to conduct non-operational, institution-based training of Iraqi MOD and Counter Terrorism Service personnel. Such training would be required to include elements that promote the observance of and respect for human rights and fundamental freedoms, military professionalism, and respect for legitimate civilian authority within Iraq.

The agreement includes the provision in the Senate committee-reported bill.

An issue of concern is the safety and security of the residents of Camp Liberty (Hurriya), Iraq, and impediments to their resettlement in other countries. We direct the Secretary of State, in coordination with the Secretary of Defense, the Secretary of Homeland Security, and the Attorney General, to submit a report on the current security situation at Camp Liberty and efforts to relocate the camp residents to other countries. The report should include:

(1) A description of the current security situation at Camp Liberty, the disposition of security resources such as T-walls and sandbags, and decisions by camp residents on how to use those resources;

(2) A description of the status review and resettlement process conducted by the United Nations High Commissioner on Refugees (UNHCR), a discussion of the degree of cooperation by camp residents with that process, and an estimate of when that process is expected to be completed;

(3) An estimate as of the date of the report on the number of residents still at Camp Liberty, the number of residents that have received refugee status, the number of residents that have been relocated (including to which countries), and the countries that have indicated a willingness to receive resettled residents; and

(4) A discussion of the steps that would need to be taken by recipient countries, the UNHCR, and the camp residents to relocate the residents to other countries.

The report should be provided not later than 120 days after the date of enactment of this Act to the Committees on Foreign Relations, Armed Services, Homeland Security and Governmental Affairs and Judiciary of the Senate and the Committees on Foreign Affairs, Armed Services, Homeland Security, and Judiciary of the House of Representatives.

One-year extension and modification of authority for program to develop and carry out infrastructure projects in Afghanistan (sec. 1215)

The House bill contained a provision (sec. 1215) that would extend the authority under section 1217 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383), as amended, for the program to build large-scale infrastructure projects funded by the Afghanistan Infrastructure Fund (AIF). The provision would limit the amount available for the AIF in fiscal year 2014 to \$279.0 million. The provision would also amend the reporting elements of the plan that must be submitted to the appropriate congressional committees prior to the use of AIF funds in any given fiscal year.

The Senate committee-reported bill contained a provision (sec. 1214) that would extend the authority under section 1217 of Public Law 111-383 and limit AIF funding during fiscal year 2014 to \$250.0 million. It would also require a report on the plan for transitioning to the Government of Afghanistan, or a utility owned by the Government of Afghanistan, the project management of any projects funded with fiscal year 2014 AIF funds.

The agreement includes the Senate provision with technical and clarifying amendments. We believe that with the drawdown of U.S. troops in Afghanistan and the approaching conclusion of the International Security Assistance Force mission at the end of December 2014, the justification for the Department of Defense funding large-scale infrastructure projects in Afghanistan is increasingly attenuated. We expect that the Department of Defense will cease AIF funding for any new large-scale infrastructure projects after fiscal year 2014.

Requirement to withhold Department of Defense assistance to Afghanistan in amount equivalent to 100 percent of all taxes assessed by Afghanistan to extent such taxes are not reimbursed by Afghanistan (sec. 1216)

The House bill contained a provision (sec. 1217) that would require the withholding of Department of Defense (DOD) assistance for Afghanistan during fiscal year 2014 in an amount equal to the total of all taxes assessed during fiscal year 2013 by the Government of Afghanistan on assistance provided by DOD. The Secretary of Defense would be able to waive this requirement if the Secretary determines that doing so is necessary to achieve U.S. goals in Afghanistan.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would provide that the requirements of this section terminate on the date when the Secretary of Defense notifies the Committees on Armed Services of the Senate and House of Representatives that a bilateral security agreement between the United States and Afghanistan has entered into force.

Extension of certain authorities for support of foreign forces supporting or participating with the United States Armed Forces (sec. 1217)

The Senate committee-reported bill contained a provision (sec. 1216) that would extend through fiscal year 2014 the authority under section 1234 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181), as amended, to provide logistical support to coalition partners in Afghanistan.

The House bill contained no similar provision.

The agreement includes a provision that would extend through December 31, 2014, two authorities for supporting foreign forces participating in coalition operations with U.S. armed forces. First, the provision would extend the authority under section 1234 of Public Law 110–181 to provide logistical support to coalition partners in Afghanistan. Second, the provision would extend the authority under section 1202 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109–364), as amended, to use acquisition and cross-servicing agreements to loan personnel protection equipment to partner nations in coalition operations and in connection with training for deployment to such operations. The Department has requested the extension of both of these authorities in connection with coalition operations in Afghanistan.

Extension and improvement of the Iraqi special immigrant visa program (sec. 1218)

The House bill contained a provision (sec. 1218) that would make certain improvements to the Iraq Special Immigrant Visa program.

The Senate committee-reported bill contained a similar provision (sec. 1217).

The agreement includes the Senate committee-reported bill provision with a technical/clarifying amendment.

Improvement of the Afghan special immigrant visa program (sec. 1219)

The House bill contained a provision (sec. 1219) that would make improvements to Afghan Special Immigrant Visa program.

The Senate committee-reported bill contained a similar provision (sec. 1218).

The agreement includes the Senate committee-reported bill provision with a technical/clarifying amendment.

Subtitle C—Matters Relating to Afghanistan Post 2014

Report on plans to disrupt and degrade Haqqani Network activities and finances (sec. 1221)

The House bill contained a provision (sec. 1221) that would modify the report required under section 1230 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110–181), as amended, to require additional reporting semi-annually on: The re-deployment of U.S. armed forces from Afghanistan; the transfer of Department of Defense tasks and functions to other entities as part of the transition; and the long-term capability of the Afghan National Security Forces (ANSF) to sustain infrastructure projects constructed for the ANSF.

The Senate committee-reported bill contained no similar provision.

The agreement includes a provision that would require the President to submit to the appropriate committees of Congress a report on U.S. Government activities and plans to disrupt and degrade Haqqani Network activities and finances. The provision sets out specific elements of the report, which would be required to be submitted not later than 9 months after the date of enactment of this Act.

Completion of accelerated transition of security responsibility from United States Armed Forces to the Afghan National Security Forces (sec. 1222)

The House bill contained a provision (sec. 1222) that would set out the policy of the United States and a sense of Congress relating to the security transition and the post-2014 U.S. military presence in Afghanistan.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

We expect the Department of Defense to note the cost of any post-2014 presence in its budget request so that Congress can appropriately consider the presence and maintain oversight of U.S. efforts in Afghanistan.

Defense Intelligence Plan (sec. 1223)

The House bill contained a provision (sec. 1223) that would require the Secretary of Defense to submit to the congressional defense and intelligence committees a plan regarding defense intelligence assets in relation to the drawdown of U.S. forces in the Islamic Republic of Afghanistan. The provision would require the plan to include a description of the defense intelligence assets; a description of any such assets that are slated to remain in Afghanistan after December 31, 2014; a description of any such assets that will be, or have been, reallocated to other locations outside of the United States; the defense intelligence priorities that will be, or have been, addressed with the reallocation of such assets; the necessary logistics, and operation and maintenance plans, to operate in the locations where such assets will be, or have been, reallocated, including personnel, basing, and any host country agree-

ments; and a description of any such assets that will be, or have been, returned to the United States.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Limitation on availability of funds for certain authorities for Afghanistan (sec. 1224)

The House bill contained a provision (sec. 1224) that would restrict the availability of funds for certain authorities in Afghanistan until 15 days after the Secretary of Defense certifies that the United States and the Islamic Republic of Afghanistan have concluded a Bilateral Security Agreement (BSA) that meets certain specified criteria.

The Senate committee-reported bill contains no similar provision.

The agreement includes the House provision with an amendment that would limit the availability of funds for certain authorities in Afghanistan to no more than 50 percent of the amount authorized to be appropriated until 15 days after the Secretary of Defense certifies that a BSA has been signed that is in the national security interest of the United States. The Secretary of Defense would be authorized to waive the requirements of this provision if the Secretary determines that doing so is in the U.S. national security interest. If the waiver is invoked, the Secretary of Defense is directed to brief the Committees on Armed Services of the Senate and the House of Representatives on the basis for the determination.

We believe that such a BSA should ensure that:

- (1) the Department of Defense, its military and civilian personnel, and its contractors are protected from liability to pay taxes or other similar charges associated with efforts to carry out missions in Afghanistan that have been mutually agreed to between the U.S. Government and the Afghan Government;
- (2) the United States has exclusive legal jurisdiction over U.S. Armed Forces deployed in Afghanistan;
- (3) the right of self-defense of the U.S. military mission and of U.S. military personnel is not infringed;
- (4) the U.S. military in Afghanistan is able to take the necessary measures to protect other U.S. Government offices and personnel in Afghanistan; and
- (5) the U.S. military has sufficient access to bases and freedom of movement to carry out such missions and activities as the President assigns the military in Afghanistan, including the continuing effort to counter al Qaeda and its associated forces.

Subtitle D—Matters Relating to Iran

Report on United States military partnership with Gulf Cooperation Council countries (sec. 1231)

The House bill contained a provision (sec. 1231) that would require the Secretary of Defense to provide a report to the congressional defense committees, within 90 days after the date of the enactment of this Act, on the United States military partnership with the Gulf Cooperation Council countries.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical/clarifying amendment.

Additional elements in annual report on military power of Iran (sec. 1232)

The House bill contained a provision (sec. 1232) that would amend section 1245 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84) by requiring the Secretary of Defense to provide information on the global Iranian threat network and how the Iranian threat network reinforces the grand strategy of the Islamic Republic of Iran. Additionally, this section would require the Secretary of Defense to provide a list of gaps in intelligence and to prioritize those gaps by operational need.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the report to include a section on Iran’s global network of terrorist and criminal groups and the associated capabilities of those entities.

We urge the Chairman of the Joint Chiefs of Staff to describe the Department of Defense’s gaps in intelligence associated with Iran’s global network of terrorist and criminal groups when the Chairman prepares the report required under section 1231 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239).

Integrated air and missile defense programs at training locations in Southwest Asia (sec. 1233)

The House bill contained a provision (sec. 1234) that would amend Section 544(c)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. 2347c(c)(1)) to allow for multilateral missile defense exercises.

The Senate committee-reported bill included no similar provision. The agreement includes the House provision.

Subtitle E—Reports and Other Matters

Two-year extension of authorization for non-conventional assisted recovery capabilities (sec. 1241)

The House bill contained a provision (sec. 1202) that would extend the authority of the Department of Defense to establish, develop, and maintain non-conventional assisted recovery (NAR) capabilities for 3 additional years.

The Senate committee-reported bill contained a similar provision (sec. 1231) that would extend the authority of the Department of Defense to establish, develop, and maintain non-conventional assisted recovery capabilities for 2 additional years.

The agreement includes the Senate provision.

We remain concerned about the lack of clarity in the reporting of NAR activities to include planning, prioritization, and execution and have included a statement on their concerns in the classified annex accompanying this report.

Element on 5th generation fighter program in annual report on military and security developments involving the People's Republic of China (sec. 1242)

The Senate committee-reported bill contained a provision (sec. 1232) that would add a requirement for the Department of Defense to include information on China's 5th generation fighter programs in the congressionally-mandated Annual Report on Military and Security Developments Involving the People's Republic of China.

The House bill contained no similar provision.

The agreement includes this provision.

To improve insight into the dynamics of the relationship and interactions between the United States and the People's Republic of China and their impact on security, we direct the Chairman of the United States-China Economic and Security Review Commission, not later than March 15, 2014, to submit a report on the mandate and purpose of the Commission to the appropriate congressional committees.

The report shall include: (1) A summary and description of the changes that have occurred in the relationship between the United States and China since December 31, 2000, with respect to those national security and economic issues that would impact the mandate of the Commission; and (2) Recommendations of the Commission for statutory changes to update the mandate and purpose of the Commission, taking into the account changes in the relationship between the United States and China.

The appropriate congressional committees include (1) the Committee on Armed Services, the Committee on Foreign Relations, the Committee on Appropriations, and the Committee on Finance of the Senate; and (2) the Committee on Armed Services, the Committee on Foreign Affairs, the Committee on Appropriations, and the Committee on Ways and Means of the House of Representatives.

Report on posture and readiness of the Armed Forces to respond to an attack or other contingency against United States diplomatic facilities overseas (sec. 1243)

The House bill contained a provision (sec. 1241) that would require the Secretary of Defense, in consultation with the Chairman, Joint Chiefs of Staff, to submit a report, not later than 180 days after the date of the enactment of this Act, to the Senate Committee on Armed Services, the House Committee on Armed Services, the Senate Committee on Foreign Relations, and the House Committee on Foreign Affairs, that assesses the terrorist groups that threaten the United States in Africa and a description of the readiness, posture, and alert status of relevant U.S. Armed Forces in Europe, the Middle East, Africa, and the United States; and any changes implemented since the terrorist attack in Benghazi, Libya.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would make modifications to the required contents of the report.

Limitation on establishment of Regional Special Operations Forces Coordination Centers (sec. 1244)

The House bill contained a provision (sec. 1245) that would prohibit the expenditure of funds for the establishment of Regional Special Operations Forces Coordination Centers (RSCC) or similar regional entities and require a joint report by the Secretary of Defense and the Secretary of State to be submitted to the congressional defense committees and the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives.

The Senate committee-reported bill contained a similar provision (sec. 342) that would prohibit the expenditure of any funds for the RSCCs in fiscal year 2014 and direct the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict, in coordination with the Commander of U.S. Special Operations Command, not later than September 30, 2013, to submit a report to the congressional defense committees outlining, at a minimum: (1) the requirement and justification for the establishment of RSCCs; (2) the number and locations of planned RSCCs; (3) the projected cost to establish and maintain the proposed RSCCs in future years; (4) the relevance to and coordination with other multilateral engagement activities and academic institutes supported by the geographic combatant commanders and State Department; and (5) any legislative authorities that may be needed to establish RSCCs.

The agreement includes the House provision with a clarifying amendment.

We note sequestration and budget restrictions are having a negative impact not only on readiness and modernization accounts, but also on the ability of the Department of Defense (DOD) to carry out ongoing missions.

Budgetary restrictions have drastically reduced the ability of DOD and partner agencies to allocate assets—particularly as it pertains to intelligence capabilities to the JIATF-S mission of countering illicit drug trafficking and disruption of transnational criminal organizations in the SOUTHCOM area of responsibility.

We believe that the across-the-board sequestration cuts to the DOD budget are arbitrary and undermine the national security of the United States. Funding allocations (sec. 1302)

The House bill contained a provision (sec. 1302) that would allocate specific amounts for each program element under the Department of Defense Cooperative Threat Reduction (CTR) Program from within the overall \$528.5 million that the committee would authorize for the CTR program. This section would also require notification to Congress 15 days before the Secretary of Defense obligates and expends fiscal year 2014 funds for purposes other than those specifically authorized. In addition, this section would provide limited authority to obligate amounts for a program element under the CTR program in excess of the amount specifically authorized for that purpose.

This enhanced authority is an extraordinary measure that is without precedent in the CTR program, and we will exercise congressional oversight to ensure the enhanced authority is properly and effectively used. We expect the Department to balance the need for destroying the Syrian chemical weapons stockpile, an urgent national security threat, with the expediency of using the CTR funds to assist in this effort. Given the fluid and urgent nature of this endeavor, the amendment contains enhanced briefing requirements rather than detailed reports. We expect these briefings to provide the appropriate congressional committees with the necessary detailed in-

formation to ensure an accounting of the funding provided under the program while achieving the ultimate goal of destroying Syria's chemical stockpile. We expect the Department to provide, without delay, thorough answers to questions that might arise during these briefings to ensure adequate oversight in the use of this enhanced authority.

The agreement establishes that an Article 32, UCMJ, preliminary hearing has a narrower objective: (1) To determine whether there is probable cause to believe an offense has been committed and the accused committed the offense; (2) Determine whether the convening authority has court-martial jurisdiction over the offense and the ac-

cused; (3) Consider the form of the charges; and (4) Recommend the disposition that should be made of the case.

The Secretary of Defense is directed to recommend changes to Rule 405 of the Rules for Court-Martial and other rules, if appropriate, in the Manual for Courts-Martial to facilitate the purposes of the Article 32, UCMJ, preliminary investigation, as revised by the agreement. TITLE XXI—ARMY MILITARY CONSTRUCTION

Summary

The Department of Defense requested authorization of appropriations of \$1.1 billion for military construction and \$556.9 million for family housing for the Army for fiscal year 2014. The agreement includes authorization of appropriations of \$1.1 billion for military construction and \$556.9 million for family housing for the Army for fiscal year 2014.

The budget request included \$75.0 million for a Command and Control facility for U.S. Army Pacific. While we support the requirement for this facility, we are concerned that the unit cost for this facility is high compared to a standard design even when accounting for Area Cost Factors. Additionally, we believe the full amount requested by the Department is not necessary in light of efforts to reduce the size of headquarters staffs across the Department. Therefore, the agreement includes \$70.0 million, a reduction of \$5.0 million, for this facility.

The budget request included \$33.0 million for Host Nation Support Planning and Design. In light of unobligated balances in the Planning and Design accounts from previous years, the agreement reflects a \$5.0 million reduction.

On May 22, 2013, the Air Force announced McConnell Air Force Base, Kansas, as its preferred alternative for the KC-46A MOB #1 and Altus Air Force Base, Oklahoma, as its preferred alternative for the KC-46A FTU. Concurrent with this announcement, the Air Force also requested an amendment to its budget request specifying location-specific requirements for KC-46A bed down, including \$219.1 million for eight military construction projects at McConnell Air Force Base and \$30.9 million for five military construction projects at Altus Air Force Base. The agreement reflects these amounts.

The budget request included \$12.0 million for a Main Gate Complex at Royal Air Force Station Croughton, United Kingdom. The House bill included no funding for this project and the report accompanying the House bill (H. Rept. 113-102) directed the Secretary of Defense to submit a report to the congressional defense committees by September 30, 2013, regarding the costs and benefits of locating various intelligence functions at the installation. TITLE XXIV—DEFENSE AGENCIES MILITARY CONSTRUCTION

BUDGET ITEMS

Summary

The Department of Defense (DOD) requested authorization of appropriations of \$4.0 billion for military construction for the defense agencies, \$150.0 million for energy conservation projects, \$122.5 million for chemical demilitarization construction, and \$57.6 million for family housing for the defense agencies for fiscal year 2014. The agreement includes authorization of appropriations of \$3.4 billion for military construction, \$150.0 million for energy conservation projects, \$122.5 million for chemical demilitarization construction, and \$57.6 million for family housing for the defense agencies for fiscal year 2014.

The budget request included \$431.0 million for the third increment of the High Performance Computing Center at Fort Meade, Maryland. We understand DOD would be unable to expend the full amount of the budget request in fiscal year 2014 and, therefore, the agreement reflects a \$35.0 million reduction.

The budget request included \$265.0 million for an Ambulatory Health Center at Fort Knox, Kentucky. We understand DOD would be unable to expend the full amount of the budget request in fiscal year 2014 and, therefore, the agreement reflects a \$120.0 million reduction.

The budget request included \$210.0 million for replacement of the Public Health Command Laboratory at Aberdeen Proving Ground, Maryland. We understand DOD would be unable to expend the full amount of the budget request in fiscal year 2014 and, therefore, the agreement reflects a \$135.0 million reduction.

The budget request included \$76.2 million for the second increment of the Ambulatory Care Center at Joint Base Andrews, Maryland. We understand DOD would be unable to expend the full amount of the budget request in fiscal year 2014 and, therefore, the agreement reflects a \$38.1 million reduction.

The budget request included \$251.2 million for the fifth increment of the Hospital Replacement at Fort Bliss, Texas. We under-

stand DOD would be unable to expend the full amount of the budget request in fiscal year 2014 and, therefore, the agreement reflects a \$152.1 million reduction.

The budget request included \$151.5 million for the third increment of the Medical Center Replacement at Rhine Ordnance Barracks, Germany. We understand DOD would be unable to expend the full amount of the budget request in fiscal year 2014 and, therefore, the agreement reflects a \$75.0 million reduction.

The budget request included \$1.8 million for a Tour Bus Drop Off at the Pentagon Reservation, Virginia. We believe this project is unjustified given the current fiscal pressures facing DOD and does little to improve the safety of visitors to the Pentagon and, therefore, the agreement includes no funding for this project.

The budget request included \$85.0 million for the second increment of the Aegis Ashore Missile Defense Systems Complex in Deveselu, Romania. We understand that this project was awarded significantly below the authorized level and, therefore, the agreement reflects a \$5.0 million reduction.

The budget request included \$10.0 million for Contingency Construction. In light of unobligated balances in the Contingency Construction account from previous years, the agreement reflects a \$10.0 million reduction.

U.S. Special Operations Command Military Construction Requirements

The budget request included a total of \$32.9 million for three military construction projects that support Special Operations Forces (SOF) Resiliency and Human Performance Centers.

The House bill did not authorize the three military construction projects because of concerns about duplication of existing physical fitness facilities provided by the military services and potential conflicts with medical care provided by the TRICARE Management Activity.

The Senate committee-reported bill included the requested funds.

The agreement includes the requested funds.

We fully support the intent of the U.S. Special Operations Command (USSOCOM) Preservation of the Force and Families (POTFF) initiative. However, we are concerned about the affordability of USSOCOM's current plan for the POTFF and, specifically, its projected cost of almost \$500.0 million, including \$200.0 million for military construction, across the future year's defense plan (FYDP) in light of current budgetary pressures. We are also concerned about the adverse impact of prioritizing military construction investments to support the POTFF at the expense of other longstanding USSOCOM military construction requirements to recapitalize old and failing facilities. Lastly, we believe that USSOCOM Major Force Program 11 (MFP-11) military construction funds should only be used to fulfill "special operations-peculiar" facility requirements and should not be used to duplicate facilities provided by the military services.

In order to better assess USSOCOM's future military construction requirements, we direct the Secretary of Defense, concurrent with the budget request for fiscal year 2015, to provide the congressional defense committees with an assessment of military construc-

tion requirements for USSOCOM and those necessary to support the USSOCOM POTFF across the FYDP. This assessment shall include, at a minimum, the following:

(1) The definition of “SOF-peculiar” as it applies to the use of USSOCOM MFP–11 funding to meet military construction requirements;

(2) A description of the decision making process for determining whether a military construction project should be funded through MFP–11 or by the military services;

(3) An assessment of the feasibility of military construction investments to support the POTFF initiative, as outlined in the FYDP, in light of current budgetary pressures;

(4) The rationale for funding military construction projects in support of the POTFF initiative, as outlined in the FYDP, through MFP–11 as opposed to the budgets of the military services, including a description of any POTFF military construction requirements that can be satisfied by the military services;

(5) A prioritized list, by component, of military construction projects included in the FYDP that support the POTFF initiative, including cost and location; and

(6) A detailed listing of all military construction facilities within USSOCOM that are failing or have exceeded their lifetime of use by component, by function, and by military base, and a detailed listing of all unfunded USSOCOM military construction requirements by component, function and military base.

The House bill contained a provision (sec. 2711) that would prohibit funds, appropriated pursuant to an authorization of appropriations contained in this Act, to be used to propose, plan for, or execute an additional Base Realignment and Closure (BRAC) round.

The Senate committee-reported bill contained a provision (sec. 2702) that would establish, as a precondition for the authorization of a future BRAC round, a requirement for the Department of Defense to submit to Congress a formal review of overseas military facility structure.

The agreement includes a provision that would make clear that nothing in this Act shall be construed to authorize a future BRAC round.

We note that the agreement also reduces the budget request by \$8.0 million in Operation and Maintenance, defense-wide requested by the Department to “develop recommendations and manage a new BRAC round.”

Elimination of quarterly certification requirement regarding availability of military health care in National Capital Region (sec. 2712)

The House bill contained a provision (sec. 2712) that would repeal a quarterly reporting requirement regarding the capacity of the military health care system in the National Capital Region.

LEGISLATIVE PROVISION NOT ADOPTED

Consideration of the value of services provided by a local community to the Armed Forces as part of the economic analysis in making base realignment or closure decisions

The House bill contained a provision (sec. 2713) that would require the Secretary of Defense to include an accounting of the value of services that are provided by the local community to the military as part of the economic analysis conducted in making any base realignment or closure decision.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We believe that to the extent services provided by a local community directly reduce the cost of Department of Defense operations at a particular installation, such savings should be included in the evaluation of the fiscal consequences of proposed base closures and realignments under sections 993 and 2687 of title 10, United States Code. We note that sections 993 and 2687 of title 10, United States Code, apply to the Department's authorities to carry out base closures and realignments below certain thresholds, not a formal base realignment and closure process which would have to be specifically authorized by Congress.

TITLE XXVIII—MILITARY CONSTRUCTION GENERAL PROVISIONS

Subtitle A—Military Construction Program and Military Family Housing Changes

Modification and extension of authority to utilize unspecified minor military construction authority for laboratory revitalization projects (sec. 2801)

The House bill contained a provision (sec. 2801) that would modify section 2805 of title 10, United States Code, and allow the threshold of the unspecified minor construction (UMMC) project to be adjusted based on area cost factors and modify several unspecified minor military construction thresholds.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would modify the UMMC threshold for the use of Operation and Maintenance funds for laboratory revitalization projects from \$2.0 million to \$4.0 million and extend the underlying authority from 2016 to 2018. The agreement does not include any other changes to UMMC thresholds or area cost factor adjustments.

We note that, historically, the Department of Defense laboratory enterprise has not received adequate attention with regard to the revitalization of its infrastructure. Given that the laboratory enterprise is crucial to the development of future technologies that provide our warfighters a decisive technological edge on the battlefield, we strongly encourage the Department to place a higher priority on the revitalization and modernization of infrastructure across the laboratory enterprise.

Repeal of separate authority to enter into limited partnerships with private developers of housing (sec. 2802)

The House bill contained a provision (sec. 2803) that would repeal the limited authority of the Department of Defense to enter into partnerships with private developers for the purpose of providing family housing construction.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Military construction standards to improve force protection (sec. 2803)

The House bill contained a provision (sec. 2804) that would provide additional latitude to the Department of Defense (DOD) to apply local threat criteria in the design and construction of DOD facilities.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the Secretary of Defense to submit a report to the congressional defense committees on current expeditionary physical barrier systems and new technologies that can be used for force protection and to provide blast protection.

Application of cash payments received for utilities and services (sec. 2804)

The House bill contained a provision (sec. 2805) that would authorize the secretaries of the military departments, beginning fiscal year 2014, to credit cash payments received as compensation for utilities or services provided to eligible entities that operate family or military unaccompanied housing projects to the appropriation or working capital account currently available for the purpose of furnishing such utilities or services.

The Senate committee-reported bill contained a similar provision (sec. 2812).

The agreement includes the Senate provision with a clarifying amendment.

Repeal of advance notification requirement for use of military housing investment authority (sec. 2805)

The House bill contained a provision (sec. 2806) that would repeal a notification required by section 2875 of title 10, United States Code.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision.

Additional element for annual report on military housing privatization projects (sec. 2806)

The House bill contained a provision (sec. 2807) that would provide additional oversight and accountability in the pursuit of military family housing privatization projects to include an assessment of litigation costs that are being pursued by the privatization partners.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Policies and requirements regarding overseas military construction and closure and realignment of United States military installations in foreign countries (sec. 2807)

The Senate committee-reported bill contained a provision (sec. 2801) that would require all future military construction projects

funded using in-kind payments pursuant to bilateral agreements with partner nations be submitted for congressional authorization in the Military Construction Authorization Act. The provision would also require that DOD include operational expenses funded through residual value payments in-kind in the budget justification documents submitted to Congress in connection with the annual budget request.

The House bill contained a similar provision (sec. 2811) that would repeal section 2921 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510) and consolidate the requirements of overseas basing notification process in section 2687a of title 10, United States Code. This section would also remove a redundant reporting requirement associated with the proposed residual value of foreign military closure determinations.

The agreement includes a provision that would combine the two provisions and make other clarifying and technical modifications to sections 2802 and 2867a of title 10, United States Code, relating to overseas basing.

Extension and modification of temporary, limited authority to use operation and maintenance funds for construction projects in certain areas outside the United States (sec. 2808)

The House bill contained a provision (sec. 2808) that would amend section 2808 of the Military Construction Authorization Act for Fiscal Year 2004 (division B of Public Law 108-136) and extend the Department of Defense's ability to use operation and maintenance appropriations for military construction purposes in the United States Central Command (CENTCOM) area of responsibility (AOR) and certain countries in the United States United States Africa Command (AFRICOM) AOR until September 30, 2014.

The Senate committee-reported bill contained a similar provision (sec. 2802) that would extend the authority and revise the list of countries in the AFRICOM AOR in which the authority may be used.

The agreement includes the Senate provision with a clarifying amendment.

Additionally, we note that the process by which the Department of Defense receives an authorization from Congress for military construction projects required to support overseas contingency operations can be cumbersome and extend over a long period of time. We also note that the fast pace of contingency operations, changes in the number of military forces in theater, and the contributions of partner countries may result in a change to or elimination of a military construction requirement in the time between the request to Congress for an authorization and the actual award of a construction contract. In order to ensure that funds are not expended on projects that no longer satisfy a valid military requirement, we believe the Secretary of Defense should review the process by which contracts for military construction projects overseas in connection with a contingency operation, as defined in section 101(a)(13) of title 10, United States Code, are awarded and how such projects are carried out. This review should be conducted with the objective of developing a methodology to ensure that any

changes in military requirements are taken into account when making decisions to construct, or continue constructing, a project.

Limitation on construction projects in European Command area of responsibility (sec. 2809)

The Senate committee-reported bill decreased authorization of appropriations from the budget request for military construction by \$463.3 million for certain new military construction and family housing projects in the U.S. European Command (EUCOM) area of responsibility.

The House bill contained no similar funding cuts.

The agreement contains authorization of appropriations of \$463.3 million for the projects in EUCOM and includes a new provision that would prohibit the Secretary of Defense or a Secretary of a military department from awarding a contract for any new military construction and family housing project, with certain exceptions, in the EUCOM area of responsibility until the Secretary of Defense certifies to the congressional defense committees that the installations and specific military construction requirements authorized in this Act have been examined as part of the ongoing European Infrastructure Consolidation Assessment, have been determined to be of an enduring nature, and most effectively meet military requirements at the authorized location.

Subtitle B—Real Property and Facilities Administration

Development of master plans for major military installations (sec. 2811)

The House bill contained a provision (sec. 2809) that would require the consideration of additional elements as part of master plans for major military installations.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Authority for acceptance of funds to cover administrative expenses associated with real property leases and easements (sec. 2812)

The Senate committee-reported bill contained a provision (sec. 2811) that would amend section 2667 of title 10, United States Code, to allow for the use of proceeds from leases and easements to be used to offset administrative costs incurred by the military departments in entering into and managing such leases and easements.

The House bill contained no similar provision.

The agreement includes the Senate provision with a clarifying amendment.

Modification of authority to enter into long-term contracts for receipt of utility services as consideration for utility systems conveyances (sec. 2813)

The Senate committee-reported bill contained a provision (sec. 2813) that would amend section 2688(d)(2) of title 10, United States Code, by requiring the Secretary of a military department,

prior to conveying a utility system under this section, to obtain an independent estimate of the level of investment that should be required to maintain adequate operation of the utility system over the term of the conveyance.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a clarifying amendment.

Subtitle C—Provisions Related to Asia-Pacific Military
Realignment

Change from previous calendar year to previous fiscal year for period covered by annual report of Interagency Coordination Group of Inspectors General for Guam Realignment (sec. 2821)

The House bill contained a provision (sec. 2831) that would modify the reporting period for the annual Guam realignment report from calendar year to fiscal year.

The Senate committee-reported bill contained a similar provision (sec. 2822).

The agreement includes the House provision.

Realignment of Marine Corps forces in Asia-Pacific Region (sec. 2822)

The House bill contained a provision (sec. 2832) that would repeal section 2832 of the Military Construction Authorization Act for Fiscal Year 2013 (division B of Public Law 112–239).

The Senate committee-reported bill contained a provision (sec. 2821) that would extend the prohibition on funds for construction activities to implement the realignment of Marine Corps forces from Okinawa, Japan, with certain exceptions.

The agreement includes the Senate provision with an amendment that would modify the conditions that must be met before funds may be obligated to implement the realignment of Marine Corps forces, provide specific exceptions for the use of U.S. and

Japanese funds, and direct the Secretary of Defense, as chairperson of the Economic Adjustment Committee (EAC), to convene the EAC to consider assistance necessary to support the preferred alternative for the relocation of Marine Corps forces to Guam.

We note that the agreement includes \$85.7 million for an Aircraft Maintenance Hangar for the Marine Corps at Andersen Air Force Base and provides a specific exception for the use of Japanese funds to carry out the construction of a utility and site improvement project based on assurances from the Navy that both projects have military value independent of the movement of Marines from Okinawa to Guam. Specifically, the construction description of the Aircraft Maintenance Hangar indicates the project “supports an enduring support requirement for 1st MAW [Marine Aircraft Wing] squadrons that frequently deploy to Guam for training as part of the bilateral “Aviation Training Relocation” (ATR) agreement.” With regard to the Japanese-funded utility and site improvement project on the North ramp of Andersen Air Force Base, the Principal Deputy Assistant Secretary of the Navy for Energy, Installations, and Environment indicated in an October 28, 2013, letter that the “project supports current and future training requirements that will increase the operational readiness of units in the Pacific Command Area of Responsibility consistent with the Combatant Commander’s theater objectives and requirements while depressurizing training airspace in Japan.”

We note that the draft Supplemental Environmental Impact Statement for the siting of a cantonment area and training range to support the 4,700 Marines to be stationed or deployed to Guam on a rotational basis should be released in early 2014. As such, we strongly encourage the Department to complete, as quickly as possible, the master plan for Guam, including detailed descriptions of scope, cost estimates, and timing for each military construction project needed to support the relocation of Marines to Guam so that Congress will be able to assess the affordability, feasibility, and strategic value of the plan. Until then, we believe it is important to ensure that any funds provided by the Governments of Japan or the United States are spent on new facilities that will satisfy valid military requirements. We believe this approach mitigates the risk of approving the construction of facilities that have not yet been justified within the context of a master plan or for which an Environmental Impact Statement and Record of Decision have not been rendered.

Subtitle D—Land Conveyances

Real property acquisition, Naval Base Ventura County, California (sec. 2831)

The House bill contained a provision (sec. 2841) that would authorize the Secretary of the Navy to acquire 300 units of military family housing constructed under section 801 of the Military Construction Act of 1984 (Public Law 98–115) at Naval Base Ventura County, California.

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

Overview

Title XXXI authorizes appropriations for atomic energy defense activities of the Department of Energy for fiscal year 2014, including: the purchase, construction, and acquisition of plant and capital equipment; research and development; nuclear weapons activities; nuclear nonproliferation activities; naval nuclear propulsion; environmental cleanup; operating expenses; and other expenses necessary to carry out the purposes of the Department of Energy Organization Act (Public Law 95–91). This title authorizes appropriations in five categories: (1) National Nuclear Security Administration (NNSA); (2) Defense environmental cleanup; (3) Other defense

activities; (4) Defense nuclear waste disposal; and (5) Energy security and assurance.

National Nuclear Security Administration (sec. 3101)

The House bill contained a provision (sec. 3101) that would authorize \$11.8 billion for the National Nuclear Security Administration (NNSA), an increase of \$212.0 million above the budget request. The Senate committee-reported bill contained a similar provision (sec. 3101) that would authorize \$11.5 billion for the NNSA, an increase of \$80.0 million above the budget request.

We agree to include a provision that would authorize \$11.7 billion, an increase of \$72.8 million above the budget request.

Within NNSA, the provision would authorize \$7.9 billion for weapons activities, an increase of \$40.8 million above the budget request; \$2.2 billion for defense nuclear nonproliferation, an increase of \$40.0 million above the budget request; \$1.2 billion for naval reactors, the amount of the budget request; and \$387.7 million for the Office of the Administrator, a decrease of \$8.0 million below the budget request.

Within weapons activities, for directed stockpile work the provision would authorize \$2.5 billion, an increase of \$39.2 million above the budget request. For campaigns, the provision would authorize \$1.7 billion, the amount of the budget request. For nuclear programs, the provision would authorize \$744.5 million, the amount of the budget request.

Within defense nuclear nonproliferation, for nonproliferation and verification research and development the provision would authorize \$388.8 million, the amount of the budget request. For nonproliferation and international security, the provision would authorize \$141.7 million, the amount of the budget request. For international nuclear materials protection and cooperation, the provision would authorize \$369.6 million, the amount of the budget request. For fissile materials disposition, the provision would authorize \$542.6 million, \$40.0 million above the amount of the budget request. For the Global Threat Reduction Initiative, the provision would authorize \$424.5 million, the amount of the budget request.

Defense environmental cleanup (sec. 3102)

The House bill contained a provision (sec. 3102) that would authorize appropriations for fiscal year 2014 defense environmental cleanup activities at \$4.9 billion.

The Senate committee-reported bill contained a similar provision (sec. 3102) that authorized appropriations at \$5.0 billion.

We agree to include a provision that would authorize appropriations at \$5.0 billion.

Other defense activities (sec. 3103)

The House bill contained a provision (sec. 3103) that would authorize appropriations for fiscal year 2014 other defense activities at \$749.1 million.

The Senate committee-reported bill contained a similar provision (sec. 3103) that authorized appropriations at \$749.1 million.

We agree to include a provision that would authorize appropriations at \$758.7 million, \$9.6 million above the budget request.

BUDGET ITEM

Project 99-D-143, mixed oxide fuel fabrication facility

The House bill proposed funding the mixed oxide (MOX) fuel fabrication facility at the fiscal year 2014 request of \$320 million.

The Senate committee-reported bill proposed funding the project at \$80.0 million above the fiscal year budget 2014 request as a way to stabilize the program at the fiscal year 2013 levels while a strategic review is being conducted.

We agree to fund the construction project at \$360.0 million, \$40.0 million above the fiscal year 2014 budget request. We note that this project has been fraught with cost overruns and program delays. In fiscal year 2012, a decision was made to cancel the feedstock facility, which was to reduce old pits from nuclear weapons into feedstock for the MOX fuel plant, at a cost of some \$730.0 million being spent in designing the facility. The MOX fuel plant and related support facilities has risen from an initial cost estimate of \$1.0 billion to \$7.7 billion, and it is projected to be at least 3 years late in its initial operation in 2020. The Government Accountability Office estimates, through fiscal year 2036, that the total life cycle cost will exceed \$24.2 billion, including actual costs of \$5.2 billion for prior years (fiscal year 1999 to fiscal year 2012). Despite years of outreach to the nuclear industry, there is currently no agreement with any utility to use the MOX fuel and it is not yet clear whether commercial nuclear power plants will even accept the MOX fuel at market rates or whether the Department of Energy will have to subsidize, at taxpayers' expense, the sale of the fuel to make it competitive with commercially produced low-enriched uranium.

We believe the rising costs associated with the program, canceled facilities, missed deadlines, and questionable ability to produce fuel at market prices are unacceptable. We caution that further cost increases would undermine the feasibility and affordability of the program. We understand the Department is now undertaking a strategic review of the program and other alternatives. We expect to be fully briefed on this strategic review, including the new cost estimates and projected construction timeline, and what actions the Department is taking or will take to reign in the program costs and, if necessary, consider less costly alternatives for disposing of the plutonium from retired nuclear weapons. If the Department of Energy considers any future increases to the MOX facility, we expect those proposed increases to come from outside of budget function 050, which funds the Nation's critical national security priorities. We believe the Department must make its national security activities its top priority in budgeting, and expect that critical National Nuclear Security Administration programs should not become the source of funds for future increases to the MOX program.

Subtitle A—National Security Programs Authorizations

National Nuclear Security Administration (sec. 3101)

The House bill contained a provision (sec. 3101) that would authorize appropriations for the National Nuclear Security Administration for fiscal year 2014, including funds for weapons activities,

defense nuclear nonproliferation programs, naval reactor programs, and the Office of the Administrator, at the levels identified in section 4701 of division D of this Act. This section would also authorize several new plant projects for the National Nuclear Security Administration.

The Senate committee-reported bill contained a similar provision. The agreement includes the House provision.

Defense environmental cleanup (sec. 3102)

The House bill contained a provision (sec. 3102) authorizing appropriations for the Department of Energy for fiscal year 2014 for defense environmental cleanup activities as specified in the funding table in section 4701.

The Senate committee-reported bill contained an identical provision (sec. 3102).

The agreement includes this provision.

Other defense activities (sec. 3103)

The House bill contained a provision (sec. 3103) authorizing appropriations for the Department of Energy for fiscal year 2014 for other defense activities as specified in the funding table in section 4701.

The Senate committee-reported bill contained an identical provision (sec. 3103).

The agreement includes this provision.

Subtitle B—Program Authorizations, Restrictions, and Limitations

Clarification of principles of National Nuclear Security Administration (sec. 3111)

The House bill contained a provision (sec. 3111) that would amend section 3211 of the National Nuclear Security Administration Act (50 U.S.C. 2401) to clarify the set of principles with which the National Nuclear Security Administration must carry out its operations and activities. Specifically, this section would add the requirement that all operations and activities of the Administration be conducted consistent with the principle of “ensuring the security of the nuclear weapons, nuclear material, and classified information in the custody of the Administration.”

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Cost estimation and program evaluation by National Nuclear Security Administration (sec. 3112)

The House bill contained a provision (sec. 3113) that would amend section 4217 of the Atomic Energy Defense Act (50 U.S.C. 2537) to require that any independent cost estimate carried out pursuant to section 4217 be conducted by the Secretary of Defense, acting through the Director of Cost Assessment and Program Evaluation (CAPE). The Director would be authorized to delegate carrying out such cost estimates to other elements of the Department of Defense. This section would also provide the Secretary of Defense, in consultation with the Administrator for Nuclear Security

and acting through the Director of CAPE, the authority to conduct an independent cost assessment of any initiative or program of the National Nuclear Security Administration (NNSA) that is estimated to cost more than \$500.0 million.

The Senate committee-reported bill contained a provision (sec. 3111) that would amend the National Nuclear Security Administration Act (50 U.S.C. 2401 et seq.) to establish an Office of Cost Estimating and Program Evaluation within NNSA whose director would be Senate-confirmed. The Senate committee-reported bill also contained a provision (sec. 3118) that would require any cost estimates submitted pursuant to section 4217 of the Atomic Energy Defense Act be submitted in unclassified form, with a classified annex if necessary.

The agreement includes the Senate provision with an amendment that changes the Director of the new office from a Senate-confirmed position to a Senior Executive Service position. The amendment eliminates the requirement for two deputy directors, and modifies several of the responsibilities and authorities of the Director, and would require a joint implementation plan for the new office to be submitted by the NNSA Administrator and the Director of DOD's CAPE.

Given the size of the NNSA's Office of the Administrator of approximately 1,800 personnel, we believe that requiring the Director to be a Senior Executive Service officer is adequate to ensure seniority and credibility within the NNSA. Further, we believe that the joint NNSA-DOD implementation plan will be important to standing up this new office. We expect the DOD CAPE to play an active role in not only training personnel of the new NNSA office, but helping shape and ensure quality cost estimates and program evaluations during the early years of the new NNSA office. We understand that the work for cost estimation at the NNSA will have periods between major projects where the personnel from this office can assist the DOD CAPE on subject matter unique to the NNSA that is not present in the DOD CAPE office. We encourage as a matter of good government such collaboration.

The credibility of the NNSA with Congress and other agencies of the Executive Branch has been hurt by high-profile failures in cost estimation and program evaluation. We expect the NNSA to embrace this new Cost Estimation and Program Evaluation office as a means to help regain its credibility.

Enhanced procurement authority to manage supply chain risk (sec. 3113)

The House bill contained a provision (sec. 3115) that would provide the Secretary of Energy, given the critical national security function of the National Nuclear Security Administration and the Department's Office of Intelligence functions, with the authority to take certain actions with regard to the protection of the supply chain of the Department of Energy (DOE). This authority would replicate the authority provided to the Department of Defense in section 806 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) and to the intelligence community in section 309 of the Intelligence Authorization Act for Fiscal Year 2012 (Public Law 112-87).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment containing technical changes. The amendment includes a sunset of the authority 4 years after the date of enactment, a notice to the appropriate committees within 7 days after a supply chain source exclusion determination is made, and a review on an annual basis (for 4 years) by the Comptroller General on the implementation of this section by the Department of Energy, including on the adequacy of resources available to perform supply chain source exclusion determinations.

We note this authority is intended to be used when existing supply chain management authorities are not sufficient to protect the national security of the United States. Use of this authority by DOE is expected to be limited in frequency. We encourage DOE to partner with supply chain sources, to the extent practicable, to implement this authority.

Limitation on availability of funds for National Nuclear Security Administration (sec. 3114)

The House bill contained a provision (sec. 3116) that would limit the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2014 for the National Nuclear Security Administration (NNSA) such that \$139.5 million may not be obligated or expended until the Administrator for Nuclear Security submits to the congressional defense committees a detailed plan to achieve certain planned efficiencies and written certification that the planned efficiencies will be achieved. If the Administrator does not submit the plan or is unable to certify within 60 days of the date of the enactment of this Act that the efficiencies will be achieved, the Administrator would be required to submit a report to the congressional defense committees on the amount of planned efficiencies that will not be realized and any effects caused by planned but unrealized efficiencies in the Directed Stockpile Work and Nuclear Programs accounts. The limitation of funds for NNSA would not apply to funds authorized to be appropriated for Directed Stockpile Work, Nuclear Programs, or Naval Reactors, and should not result in reductions in Laboratory Directed Research and Development funding. Finally, the limitation on obligation of funds would not affect the authority of the Secretary of Energy to reprogram or transfer funding under sections 4702, 4705, and 4711 of the Atomic Energy Defense Act (50 U.S.C. 2742, 2745, and 2751).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that provides a rule of construction that the funds limitation shall not be considered a specific denial of funds relative to the authorities associated with subsection (d)(2). The amendment also provides that the amount of funds limited by this section would be reduced by the amount the Administrator is able to certify has been saved through the planned efficiencies.

Limitation on availability of funds for Office of the Administrator for Nuclear Security (sec. 3115)

The House bill contained a provision (sec. 3117) that would limit the availability of funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2014 for the National Nuclear Security Administration's Office of the Administrator to not more than 75 percent until several statutorily required reports are submitted to Congress in 2013 and 2014.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment containing technical and clarifying changes.

Establishment of Center for Security Technology, Analysis, Response, and Testing (sec. 3116)

The House bill contained a provision (sec. 3119) that would require the Administrator for Nuclear Security to establish a Center for Security Technology, Analysis, Testing, and Response within the nuclear security enterprise. The Center would be responsible for a range of activities, but would primarily serve to provide the Administrator, the Chief of Defense Nuclear Security, and the management and operating contractors of the nuclear security enterprise, a wide range of objective expertise on security technologies, systems, analysis, testing, and response forces.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would modify the name of the organization to the Center for Security Technology, Analysis, Response, and Testing (CSTART) and authorize the Administrator to provide additional duties to the center.

Authorization of modular building strategy as an alternative to the replacement project for the Chemistry and Metallurgy Research Building, Los Alamos National Laboratory, New Mexico (sec. 3117)

The Senate committee-reported bill contained a provision (sec. 3116) that would extend section 3144(c) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) to permit consideration of a modular building strategy for engineering and design if it meets long term stockpile requirements.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would change the notice and wait requirement from 30 to 60 days. The amendment would also add to the notification required by the Nuclear Weapons Council to the congressional defense committees such that it includes notification that the modular strategy: (1) meets requirements for implementation of a responsive infrastructure, including meeting plutonium pit production requirements; and (2) will achieve full operating capability for not less than two modular structures by not later than 2027.

We are aware that further detail on requirements and plans for the modular approach are being developed and refined. We expect the Nuclear Weapons Council to keep Congress informed as the

modular approach is developed and implemented to meet requirements for pit production and a responsive infrastructure. Furthermore, we encourage the Administrator for Nuclear Security and the Nuclear Weapons Council to expeditiously carry out such efforts to both ensure construction of a responsive nuclear infrastructure and to enable a timely transition of nuclear operations out of decaying and increasingly unsafe facilities such as the Chemistry and Metallurgy Research Building. Finally, we note the reprogramming action concerning unobligated funds for the Chemistry and Metallurgy Research Replacement Nuclear Facility is still pending, and look forward to working with the Nuclear Weapons Council to resolve the deferred reprogramming proposal.

Comparative analysis of warhead life extension options (sec. 3118)

The House bill contained a provision (sec. 3121) that would require the Secretary of Defense and the Secretary of Energy, acting through the Nuclear Weapons Council, to include several warhead life extension options through all of Phase 6.2 and all of Phase 6.2A of the Joint W78/88-1 Warhead Life Extension Program. The options are the W78-1 life extension and the W88-1 life extension.

The Senate committee-reported bill contained a similar provision (sec. 1043) that would require the Director of Cost Analysis and Program Evaluation to conduct a similar analysis of alternatives for the Joint W78/88-1 Warhead Life Extension Program.

The agreement includes the House provision with an amendment that none of the funds may be obligated or expended for phase 6.3 of the combined W78/88-1 warhead until 90 days after the Chairman of the Nuclear Weapons Council submits a comparative analysis of the alternative options of life extending the W78-1 and the W88-1 systems individually, so as to compare to the cost to the combined W78/88-1 warhead system.

We encourage the Administrator to leverage, for the purposes of this section, the NNSA Director for Cost Estimating and Program Evaluation created elsewhere in this Act, and, during the transition period when the capabilities of such Director are being stood up, to work jointly with the Department of Defense Office of Cost Assessment and Program Evaluation.

Extension of authority of Secretary of Energy to enter into transactions to carry out certain research projects (sec. 3119)

The House bill contained a provision (sec. 3123) that would extend section 646(g)(10) of the Department of Energy Organization Act (P.L. 95-91, as amended, 42 U.S.C. 7256(g)(10)), from September 30, 2015 to September 30, 2020.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Increase in construction design threshold (sec. 3120)

The Senate committee-reported bill contained a provision (sec. 3117) that would increase the major capital construction design threshold for the National Nuclear Security Administration from \$600,000 to \$1.2 million to account for increased construction costs.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would increase the capital construction design threshold to \$1.0 million.

Subtitle C—Plans and Reports

Annual report and certification on status of security of atomic energy defense facilities (sec. 3121)

The House bill contained a provision (sec. 3131) that would amend section 4506 of the Atomic Energy Defense Act to require that, not later than September 30 of each year, the Administrator of the National Nuclear Security Administration (NNSA) submit to the Secretary of Energy and to the congressional defense committees, a report detailing and certifying the status of the security of the nuclear security enterprise, including the status of the security of special nuclear material, nuclear weapons, and classified information at each nuclear weapons production facility and national security laboratory.

The Senate committee-reported bill contained a similar provision (sec. 3113) that would require the Secretary of Energy to certify the that atomic energy defense facilities of the Department of Energy containing quantities of category I and II special nuclear material meet Department security requirements.

The agreement includes the House provision with an amendment that would require the Administrator to certify to the Secretary of Energy that the NNSA facilities containing quantities of Category I and II special nuclear material meet NNSA and Department of Energy security standards and requirements and for those that do not, actions and timelines to correct any deficiency. The Secretary would be required to transmit this certification to the congressional defense committees with any comments of the Secretary by December 1 of each year. The amendment also requires the Secretary to certify to the congressional defense committees by December 1 each year that atomic energy defense facilities other than those of the NNSA containing quantities of category I and II special nuclear materials shall meet Department security standards and requirements and for those facilities that do not to develop a correction action plan with timelines to correct any deficiency.

Modifications to annual reports regarding the condition of the nuclear weapons stockpile (sec. 3122)

The House bill contained a provision (sec. 3132) that would amend section 4205 of the Atomic Energy Defense Act (50 U.S.C. 2525) to clarify requirements related to the statutorily required annual assessments regarding the condition of the nuclear weapons stockpile.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would modify the date that such assessments are due from the Secretary of Defense and the Secretary of Energy to the President to February 1 of each year. The amendment would also require that, if the report containing such assessments is not be received by the Congress by March 15, the covered officials under section

4205(b) of the Atomic Energy Defense Act (50 U.S.C. 2525(b)) shall provide a briefing to the congressional defense committees to ensure information regarding the status of the stockpile is available to inform congressional oversight and provide timely input to the annual legislative cycle.

Inclusion of integrated plutonium strategy in nuclear weapons stockpile stewardship, management, and infrastructure plan (sec. 3123)

The Senate committee-reported bill contained a provision (sec. 3115) that would amend the Atomic Energy Defense Act (50 U.S.C. 2521 et seq.) to provide for a long-term plutonium strategy for the National Nuclear Security Administration (NNSA) as part of its Stockpile Stewardship and Management Plan. Plutonium sustainment is at the core of the NNSA stockpile mission. This integrated plan would ensure the NNSA remains focused on its plutonium mission.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would eliminate the external review and incorporate the requirement for an integrated plutonium strategy into section 4203 of the Atomic Energy Defense Act (50 U.S.C. 2523).

Modifications to cost-benefit analyses for competition of management and operating contracts (sec. 3124)

The House bill contained a provision (sec. 3120) that would amend section 3121 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) to clarify that, if a management and operating contract awarded by the Administrator for Nuclear Security is protested, the report required by such section to be submitted to Congress shall be submitted not later than 30 days after such protest is resolved. This section would also require any report under section 3121 to include a description of the assumptions used and analysis conducted to determine cost savings expected from the competition of the contract and exempt contracts for managing and operating facilities of the Naval Reactors Program from the requirements of section 3121.

The Senate committee-reported bill contained a provision (sec. 3122) that would amend section 3121(e) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) to reduce the number of reports by the Government Accountability Office (GAO).

The agreement includes the House provision with an amendment that combines the two provisions, changes the existing 90-day reporting requirement for the GAO to 180 days, and provides flexibility to ensure the reporting requirements for both the National Nuclear Security Administration and the GAO do not interfere with any award protests.

Modification of deadlines for certain reports relating to program on scientific engagement for nonproliferation (sec. 3125)

The Senate committee-reported bill contained a provision (sec. 3123) that would amend section 3122(e) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) to re-

quire a 30-day notice for extending the program on scientific engagement for non-proliferation to a new country. The provision gives the Administrator of the National Nuclear Security Administration a national security waiver of the requirement as long as there is a report filed within 30 days.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would add the Comptroller General to the program commencement report with its analysis by the Comptroller General due no later than 18 months after receipt of the report.

Modification of certain reports on cost containment for uranium capabilities replacement project (sec. 3126)

The Senate committee-reported bill contained a provision (sec. 3124) that would amend section 3123(f) of the National Defense Authorization Act for Fiscal Year 2013 (P.L. 112-239) to change the Government Accountability Office reporting requirement from the end of project life to 1 year after the date of enactment in consultation with the congressional defense committees.

The House bill contained no similar provision.

The agreement includes this provision.

Plan for tank farm waste at Hanford Nuclear Reservation (sec. 3127)

The House bill contained a provision (sec. 3114) that would require the Secretary of Energy to submit a comprehensive plan through 2025 to the congressional defense committees by March 1, 2014, for the safe and effective retrieval, treatment, and disposition of nuclear waste contained in the tank farms of the Hanford Nuclear Reservation in Richland, Washington.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would require the Secretary of Energy to submit a plan for tank farm waste at Hanford, including the activities necessary to start operations at the Waste Treatment and Immobilization Plant (WTP) and activities necessary to design, construct, and operate the WTP and any related infrastructure facilities. The amendment would require the Secretary to identify any significant requirements needed to inform such activities and require the Secretary to determine whether such requirements are finalized. The Secretary would be authorized to change any such significant requirements that are determined to be finalized, but would require prompt congressional notification of such changes if they have significant material effect on the schedule or cost of the project. The plan would be required to be submitted to the congressional defense committees by June 1, 2014.

Plan for improvement and integration of financial management of nuclear security enterprise (sec. 3128)

The Senate committee-reported bill contained a provision (sec. 3112) that would require the Administrator of the National Nuclear Security Administration (NNSA) to develop a plan for a common cost structure between activities at different sites with the purpose

of comparing how efficiently different sites within the NNSA complex are carrying out similar activities.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require the Administrator to submit a plan for improving and integrating financial management of the nuclear security enterprise to the congressional defense committees not later than 1 year after the date of enactment of this Act.

We direct the Comptroller General of the United States to review the plan submitted by the Administrator and brief the congressional defense committees within 60 days of submission of such plan by the Administrator on the adequacy of this plan in meeting the objectives set forth in this section and offer recommendations for improvement.

Plan for developing exascale computing and incorporating such computing into the stockpile stewardship program (sec. 3129)

The Senate committee-reported bill contained a provision (sec. 3114) that would add a new section to the Atomic Energy Defense Act (50 U.S.C. 2521 et seq.) requiring the Administrator for Nuclear Security to develop and carry out a plan to incorporate exascale computing in the stockpile stewardship program. Such plan would be required to cover the 20-year period after the date of enactment of this Act, and would be submitted to the congressional defense committees annually.

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment that would require the plan to include information on developing exascale computing, alter the timeframe for the plan to 10 years after enactment of this Act, and require inclusion of milestones to be achieved to mitigate disruptions resulting from the transition to exascale computing. The amendment would also require that the Future-Years Nuclear Security Program, report submitted pursuant to section 3253 of the National Nuclear Security Administration (NNSA) Act (50 U.S.C. 2453), include a description of the costs borne by the NNSA, the Department of Energy's Office of Science, other federal agencies, and industry to develop exascale computing. Finally, the amendment would eliminate the requirement for annual reporting on advances outside the United States in exascale computing and require that the plan required by this section be submitted with each summary of the Stockpile Stewardship and Management Plan submitted to the congressional defense committees in each even-numbered year pursuant to section 4203 of the Atomic Energy Defense Act (50 U.S.C. 2523).

We understand the value of maintaining U.S. leadership in high performance computing and believe achieving exascale computing within the next decade must be a national goal. However, we note that NNSA's top priority must remain sustainment and modernization of the nuclear weapons stockpile. High performance computing is an important capability that underpins these efforts via the stockpile stewardship program, but the costs of achieving exascale computing must not be borne by NNSA alone. Due to the broad benefits exascale would bring to the Federal Government and the U.S. economy in general, we encourage the Administrator to part-

ner with and leverage other stakeholders in government and industry.

Study and plan for extension of certain pilot program principles (sec. 3130)

The House bill contained a provision (sec. 3122) that would make a series of findings related to a pilot program conducted by the National Nuclear Security Administration (NNSA) at the Kansas City Plant (KCP) starting in April 2006, and would require the Administrator for Nuclear Security to extend the principles of such pilot program. The Administrator would be required to implement the principles of the pilot program permanently at the Kansas City Plant and extend the principles of the pilot program, with modifications as the Administrator determines appropriate, to not less than two additional facilities of the nuclear security enterprise within 1 year after the date of the enactment of this Act.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment requiring a study of the feasibility of extending the Kansas City Plant pilot program to other National Nuclear Security Administration (NNSA) sites with a report to Congress within 180 days after enactment on the results of the study and a determination of whether the principles will be extended. We do not mandate extending the principles. We also note the on-going work by Comptroller General of the United States to assess the risks, benefits and applicability of extending the pilot program to other facilities.

Given the success of the pilot program at the Kansas City Plant, we direct the Administrator for Nuclear Security and the Secretary of Energy to ensure, to the greatest extent possible, that these principles are permanently implemented at the Kansas City Plant.

Study of potential reuse of nuclear weapon secondaries (sec. 3131)

The House bill contained a provision (sec. 3142) that would require the Administrator for Nuclear Security, not later than 60 days after the date of the enactment of this Act, to conduct a study of the potential reuse of nuclear weapon secondaries.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

Repeal of certain reporting requirements (sec. 3132)

The House bill contained a provision (sec. 3133) that would repeal two statutes requiring submission of annual, recurring reports: (1) a report on Counterintelligence and Security Practices at National Laboratories required by section 4507 of the Atomic Energy Defense Act (50 U.S.C. 2658); and (2) a report on Advanced Supercomputer Sales to Certain Foreign Nations contained in section 3157 of the National Defense Authorization Act for Fiscal Year 1998 (Public Law 105–85).

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment containing technical corrections.

Subtitle D—Other Matters

Clarification of role of Secretary of Energy (sec. 3141)

The House bill contained a provision (sec. 3143) that would clarify that the amendment made by section 3113 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239) to section 4102 of the Atomic Energy Defense Act (50 U.S.C. 2512) may not be construed to affect the authority of the Secretary of Energy, in carrying out national security programs, with respect to the management, planning, and oversight of the National Nuclear Security Administration, or as affecting the delegation by the Secretary of Energy of authority to carry out such activities, as set forth under subsection (a) of section 4102, as it existed before the amendment made by section 3113.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with a technical amendment.

Modification of deadlines for Congressional Advisory Panel on the Governance of the Nuclear Security Enterprise (sec. 3142)

The House bill contained a provision (sec. 3141) that would amend section 3166 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239) to modify statutory deadlines regarding the Congressional Advisory Panel on the Governance of the Nuclear Security Enterprise. The advisory panel's interim report would be due by October 1, 2013, instead of 180 days after enactment of Public Law 112–239. Also, the advisory panel's full report would be due March 1, 2014, instead of February 1, 2014. Finally, the advisory panel would terminate not later than September 30, 2014, instead of June 1, 2014. This section would also enable the advisory panel to submit a final report on its activities and recommendations prior to termination.

The Senate committee-reported bill contained a provision (sec. 3125) that would amend section 3166(d)(1) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239) to extend the date of the interim report from 180 days after the date of enactment to 180 days after the first meeting of the advisory panel.

The agreement includes the House provision with an amendment that would change the interim report due date to March 1, 2014 with the full report due by July 1, 2014.

Department of Energy land conveyance (sec. 3143)

The House bill contained a provision (sec. 3146) that would convey in fee simple, excess land from the Hanford Reservation to the Hanford Community Re-Use Organization.

The Senate committee-passed bill had no similar provision.

The agreement includes a provision authorizing the transfer of the Bannister Federal Complex, Kansas City Missouri, from the General Services Administration to the National Nuclear Security Administration (NNSA), which may convey for consideration the real property using existing Department of Energy regulations.

We request monthly reports on the status of the conveyance of Hanford land to the Hanford Community Re-Use Organization.

In addition, we request a monthly report on the status of conveying the land at the Hanford reservation to the Hanford Community Re-Use Organization.

Technical amendment to Atomic Energy Act of 1954 (sec. 3144)

The House bill contained a provision (sec. 3144) that would make a technical amendment to chapter 10 of the Atomic Energy Act of 1954 (42 U.S.C. 2131 et seq.).

The House bill contained no similar provision.

The agreement includes the Senate provision with an amendment containing technical and conforming changes.

Sense of Congress on B61–12 life extension program (sec. 3147)

The House bill contained a provision (sec. 3118) that would express the sense of Congress that, particularly in a constrained budget environment, the National Nuclear Security Administration (NNSA) should prioritize its primary mission of sustaining and modernizing the nuclear weapons stockpile and, if required, shift funding from secondary missions to ensure critical nuclear weapons modernization programs stay on schedule and deliver nuclear warheads needed to support military requirements. This section would also require that, of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2014 for the Global Threat Reduction Initiative of the NNSA, not more than 80 percent may be obligated or expended unless, by not later than 60 days after the date of enactment, the NNSA Administrator certifies to the congressional defense committees that the B61 Life Extension Program will deliver a first production unit in fiscal year 2019.

The Senate committee-reported bill contained no similar provision.

The agreement includes the House provision with an amendment that would express a sense of Congress that the B61–12 Life Extension Program is a high priority of the NNSA; that, if necessary to avoid delays, funds should be shifted from other programs to ensure the B61–12 Life Extension Program stays on schedule; and

that further delays to the program would undermine the credibility and reliability of the nation's nuclear deterrent and the extended deterrent provided by the United States to allies.

Sense of Congress on establishment of an advisory board on toxic substances and worker health (sec. 3148)

The House bill contained a provision (sec. 1027) that would express the sense of Congress that the President should establish an Advisory Board on Toxic Substances and Worker Health as part of the Energy Employees Occupational Illness Program.

The Senate committee-reported bill contained no similar provision.

The agreement includes this provision.

LEGISLATIVE PROVISIONS NOT ADOPTED

Energy security and assurance

The House bill contained a provision (sec. 3104) that would authorize appropriations for energy security and assurance programs for fiscal year 2014, at the levels identified in section 4701 of division D of this Act.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision as both budget tables in section 4701 authorized no funding for the program.

Termination of Department of Energy Employees to Protect National Security

The House bill contained a provision (sec. 3112) that would authorize the Secretary of Energy to terminate an employee of the National Nuclear Security Administration (NNSA) or any element of the Department of Energy (DOE) that involves nuclear security if the Secretary determines the employee acted in a manner that endangers the security of special nuclear material or classified information. To exercise such authority, the Secretary would have to consider the termination to be in the interests of the United States and determine that the termination procedures prescribed by other provisions of law cannot be invoked in a manner that the Secretary considers consistent with national security.

The Senate committee-reported bill contained no similar provision.

The agreement does not include the provision.

We understand that, following the July 2012 security breach at the Y-12 National Security Complex by several anti-nuclear activists, including an octogenarian nun, several federal employees were reassigned or allowed to retire. However, no federal employees have been terminated from federal service. We find this lack of robust accountability to be unacceptable and dangerous. Multiple reviews since the incident have found failures at every level contributed to this incident, and that there has been a distinct failure to take corrective actions identified by previous security incidents.

For example, senior leaders in the Department of Energy's Office of Health, Safety, and Security have held top security policy and oversight positions for well over a decade despite repeated security

failures during this tenure. These same senior leaders are now inexplicably being counted on to implement reforms. This is despite the fact that this same office conducted a review of Y-12's physical security systems just 2 months prior to the July 2012 break-in and gave Y-12's security a clean bill of health. This lack of accountability, whether at senior levels or throughout the DOE, is outrageous and must not be tolerated.

It is also contrary to the strong leadership and accountability example set by Secretary of Defense Robert Gates in 2008 when he fired several top Air Force officials for significant and repeated nuclear weapon security failures. Unlike DOE, Secretary Gates sent a strong message to the Air Force that continuation of the failures would not be tolerated and officials at all levels were accountable for failure. Senior officials from the Department of Energy have indicated that federal employment laws and regulations prevented or severely impeded termination of any federal employees in response to the Y-12 incident. If true, we believe the inability of the Secretary of Energy to fire federal employees for major security failures would represent a critical problem and national security risk. Therefore, we direct the Secretary of Energy to submit a report to the congressional defense committees by March 15, 2014, on the authorities available to the Secretary to terminate federal employees. Such report should include a description of the authorities available and describe in detail why such authorities were insufficient to terminate employees in the aftermath of the Y-12 incident. The report should also include a list of the officials in the DOE and NNSA structure that had responsibility for security at Y-12 in July 2012, a description of any disciplinary actions taken with respect to such officials, and such officials' current positions. Finally, the report should also provide a description of the Secretary's views on accountability for security failures, whether actions taken in response to the Y-12 incident conform to these views, and how these views will be applied in the future.

Assessment of nuclear nonproliferation programs of the National Nuclear Security Administration

The Senate committee-reported bill contained a provision (sec. 3121) that would require the National Nuclear Security Administration to undergo a review of their nuclear nonproliferation programs by the National Academies of Science.

The House bill contained no similar provision.

The agreement does not include this provision.

The Comptroller General of the United States is directed to provide a report to the congressional defense committees assessing the existing and future nuclear nonproliferation programs of the National Nuclear Security Administration. The report shall include the following elements:

- (1) An assessment of the threat of nuclear proliferation, including fissile materials, technology and expertise related to nuclear weapons, plutonium reprocessing and uranium enrichment.
- (2) The status of nuclear nonproliferation programs of the National Nuclear Security Administration as of the date of the enactment of this Act.

(3) An assessment of whether those programs are meeting the goals of those programs and reducing the assessed threat of nuclear proliferation including: Preventing nuclear terrorism by securing and removing highly-enriched uranium and plutonium worldwide; converting research reactors from highly-enriched uranium to low-enriched uranium in Russia and other countries; providing radiation detection capability at ports and borders; securing and removing radiological materials worldwide; developing and improving technology to detect nuclear proliferation and nuclear weapons detonation, to verify foreign commitments to treaties and agreements with respect to nuclear weapons, and detect the diversion of materials, including safeguards technology; and preventing and countering the proliferation and use of nuclear weapons (including materials, technology and expertise).

(4) The extent of the work remaining for those programs to meet those goals, including an estimated timeline and costs and what gaps remain in those goals.

(5) The nuclear nonproliferation programs of the National Nuclear Security Administration and nuclear cooperation agreements with countries that have obtained nuclear weapons and are not parties to the Treaty on the Non-Proliferation of Nuclear Weapons, done at Washington, London, and Moscow July 1, 1968, and entered into force March 5, 1970 (21 UST 483) (commonly known as the “Nuclear Non-Proliferation Treaty”).

(6) The nuclear nonproliferation programs of the National Nuclear Security Administration and nuclear cooperation agreements with countries that are non-nuclear weapon state parties to the Nuclear Non-Proliferation Treaty and are acquiring nuclear materials in violation of commitments under the Treaty.

(7) The status, level of, and gaps related to, coordination of the programs of the NNSA and the Department of Energy with other agencies and departments of the Federal Government that have nuclear nonproliferation responsibilities.

(8) In addition, the report shall include an assessment of the budget requirements of the NNSA, including the costs associated with the implementation of nuclear nonproliferation programs, to reduce the threat of nuclear proliferation.

We are cognizant that this report may require a significant effort by the Government Accountability Office. The Comptroller General of the United States shall provide quarterly updates on the status of the report with a final report due no later than August 31, 2015.

Government Waste Isolation Pilot Plant Extension

The House bill contained a provision (sec. 3145) that would permit government owned non-defense transuranic waste to be disposed of in the Waste Isolation Pilot Plant subject to meeting the waste acceptance criteria outlined in “Transuranic Waste Acceptance Criteria for the Waste Isolation Pilot Plant,” dated April 21, 2011, published by the Department of Energy.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

Manhattan Project National Historic Park

The House bill contained a provision (sec. 3147) that would establish as a unit of the National Park System a series of historical sites associated with the Manhattan Project at facilities administered by the Department of Energy.

TITLE XXXII—DEFENSE NUCLEAR FACILITIES SAFETY BOARD

Authorization (sec. 3201)

The Senate committee-reported bill contained an identical provision.

The agreement includes this provision.

LEGISLATIVE PROVISION NOT ADOPTED

Improvements to the Defense Nuclear Facilities Safety Board

The House bill contained a provision (sec. 3202) that would amend section 315 of the Atomic Energy Act of 1954 (42 U.S.C. 2286d) to enable the Secretary of Energy to request an analysis regarding the costs and benefits of any draft or final recommendation of the Defense Nuclear Facilities Safety Board (DNFSB). If the Secretary requests such an analysis, the Board would be required to transmit such an analysis to the Department of Energy (DOE) within 30 days and make such analysis public when the associated recommendation is made available to the public. Additionally, if the Secretary requests such an analysis from the Board, the Secretary would be required to conduct a similar analysis of the costs and benefits of the recommendation and make such analysis available to the public. The provision would also amend section 312 of the Atomic Energy Act of 1954 (U.S.C. 2286a) to clarify that, in making recommendations to the Secretary of Energy, the Board must use rigorous, quantitative analysis and specifically assess the use of various administrative, passive, and engineered controls for implementing the recommended measures.

The Senate committee-reported bill contained no similar provision.

The agreement does not include this provision.

We note that a variety of independent assessments in recent years have indicated that DNFSB oversight, coupled with DOE's history of not challenging DNFSB recommendations, have contributed to increasing costs within the nuclear security enterprise that may achieve comparatively small safety benefits. For instance, a 2011 study of two major DOE defense nuclear facility construction projects by the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD AT&L) found that "the current process involving oversight by the DNFSB is not working well. Differing in-

terpretations of DOE regulations between the DNFSB, and the DOE and its contractors have diverted attention and resources for arguably increased safety.” The study found that, “in certain cases, the DOE has failed to ‘push back’ on DNFSB recommendations that don’t cost-effectively buy down risk, creating conditions in which the DNFSB becomes a de facto program manager.” The USD AT&L report and the 2009 report of the bipartisan Commission on the Strategic Posture of the United States ultimately recommended eliminating DNFSB oversight in favor of regulation of DOE facilities by the Nuclear Regulatory Commission.

In 2005, a report by the Secretary of Energy’s Advisory Board (SEAB) concluded that, although the DNFSB only issues recommendations and not requirements, “their recommendations have the implicit status of requirements because of the current lack of a specific mechanism for implementation assessment.” The SEAB emphasized that an analysis of the costs of implementation, safety benefits, and risks of an idea should drive every decision and recommendation made to and within the enterprise, and suggested the DNFSB use this mechanism every time they make recommendations. In its Phase I report on Managing for High Quality Science and Engineering at the National Nuclear Security Administration (NNSA) laboratories, the National Academies of Science (NAS) concluded that “the role that non-regulatory agencies (particularly the DNFSB) have had on the laboratories is excessive. Although the Board lacks independent regulatory enforcement authority, it has issued more than 30 formal recommendations to the Secretary of Energy since 1990.” In its Phase II report in 2013, the NAS pointed out that “the DNFSB is an advisory body that does not directly impose regulations, although DOE and NNSA usually accept DNFSB recommendations.” The 2013 report also stated that safety assessments by overlapping oversight bodies, including the DNFSB, “adds to the cost of conducting experiments and can slow or deter experimental work . . . Moreover, these assessments generally focus on the safety risks associated with particular experiments rather than weighing those risks against the benefits to be derived from the experiments and the risks to the nuclear weapons program from not conducting the experiments.” Most recently, in September 2013 an assessment of the safety culture at NNSA found a perception among NNSA employees that “NNSA leadership is very reactive to the DNFSB and will make sudden changes rather than question or say no to the Board.” While we do not comment on individual cases or circumstances, we believe it is imperative that the Secretary of Energy assess the costs and benefits of any recommendation made by the DNFSB. We believe it is incumbent upon the Secretary to reject or request modifications to DNFSB recommendations if the costs of implementing the recommendations are not commensurate with the safety benefits gained. We note that existing statute provides the Secretary with this authority, and encourage the Secretary to use it, when appropriate. Risk acceptance, if considered carefully and transparently, is an important risk management practice.

TITLE XXXIV—NAVAL PETROLEUM RESERVES

Authorization of appropriations (sec. 3401)

The House bill contained a provision (sec. 3401) that would authorize \$20.0 million for fiscal year 2014 for the purpose of carrying out activities under chapter 641 of title 10, United States Code, relating to the Naval Petroleum and Oil Reserves.

The provision would change current laws to a permission to transfer the funds, rather than a requirement to transfer the funds.
