Re: Lowndes County Industrial Development Authority Waterline  
Upgrade/Replacement; Lowndes County, Mississippi

Dear Mr. Kelly:

I hope this letter finds you well. I write to you regarding the Waterline Upgrade/Replacement project in Lowndes County, Mississippi. This project is being managed by the Lowndes County Industrial Development Authority (LCIDA).

This project will help with the rehabilitation of an existing 16" and 12" waterline that serves a 500,000-gallon water tank. This tank services numerous industries within the Golden Triangle Industrial Park. This park, home to major manufacturers such as Steel Dynamics, INC and PACCAR Engine Company, supports the employment of approximately 2,500 people. This water tank also serves as the backup water supply to the Rural town of Artesia, Mississippi, home to approximately 350 people. Furthermore, this waterline and water tank are essential to nearly 725 customers of Prairie Land Water Association; a rural water association.

This project is critical in seeing that the day-to-day operation of these employers, along with numerous residents have an abundant supply of water for their operations and their day-to-day lives. I fully support LCIDA and their efforts as they seek funding for this project. Not only will this project help maintain current operations, but it will aid in future development and growth for the area.

If you have any questions or require additional information, please do not hesitate to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Charles A. Younger".
