

Renée DiResta

Technical Research Manager
Stanford Internet Observatory
Stanford University

Renée DiResta is the technical research manager at the Stanford Internet Observatory, a cross-disciplinary program of research, teaching and policy engagement for the study of abuse in current information technologies. Renée investigates the spread of narratives across social and media networks, with an interest in understanding how platform algorithms and affordances intersect with user behavior and factional crowd dynamics. She studies how actors leverage the information ecosystem to exert influence, from domestic activists promoting health misinformation and conspiracy theories, to the full-spectrum information operations executed by state actors.

She was a 2021 Emerson Fellow and 2018-2019 Mozilla Fellow, a 2017 Presidential Leadership Scholar, a Council on Foreign Relations term member, and a Truman National Security Fellow. She is the author of *The Hardware Startup: Building your Product, Business, and Brand* and has degrees in Computer Science and Political Science from Stony Brook University.
