Re: FY 2023 Community Project Funding Request

Dear Congressman Guest:

Please accept our Community Project Funding Request for the **North Pearl Interceptor Rehabilitation Project**. This project includes the rehabilitation of approximately 10,700 linear feet of 24-inch through 36-inch diameter wastewater interceptor that serves approximately 7,000 households or 11,000 residents. (map attached)

The existing wastewater interceptor is very old, in poor condition and allows a significant amount of infiltration and inflow (I/I) to enter the system during rainfall events. The proposed project will significantly reduce the amount of I/I entering the system, thereby lowering the overall wastewater treatment cost; and ultimately a cost savings to the citizens of Pearl.

Thank you for your consideration of our funding request. If you have any questions about this project, please do not hesitate to call me.

Sincerely,

Jake Windham  
Mayor
