Subject: Docket Number 04-7984

I am writing regarding Docket Number 04-7984.

I am a paruetic; which means I suffer from shy bladder. Shy bladder is a real medical disorder and those suffering from it deserve a better deal than is available under present urine only testing rules. I object to the rules that equate inability to produce a specimen with refusal to test as these are unjust. SAMHSA needs to mandate the use of alternative tests for anyone who requests these, but especially for those who claim to suffer from shy bladder. I understand the idea behind observed tests, but there are other ways to satisfy your validity requirements.

Thank you for your attention to this situation.
