

**Fact Sheet****Conservation Reserve Program
Vermont Enhancement Program****Overview**

USDA's Farm Service Agency (FSA) and the State of Vermont have launched a \$2 million Conservation Reserve Enhancement Program (CREP) to protect the 490-square-mile Lake Champlain and its tributaries.

CREP uses federal and state resources to safeguard environmentally sensitive land through the Conservation Reserve Program (CRP). Producers enrolled in CRP remove lands from agricultural production and plant native grasses, trees, and other vegetation to reduce sediment runoff and improve the quality of water and wildlife habitat. CRP is authorized by the Food Security Act of 1985, as amended. CREP provides rental payments and other financial incentives to encourage producers to voluntarily enroll in 10- to 15-year CRP contracts.

Benefits

CREP will safeguard cropland or marginal pastureland surrounding streams and rivers that flow into Lake Champlain. Program participants will establish tree buffers, filters strips, grassed waterways, and wetlands. These conservation practices are designed to reduce phosphorus loading to the lake by over 96,000 pounds per year. Phosphorus reduction is a key to restoring the environmental health

of Lake Champlain, a crucial link in the Hudson-Saint Lawrence waterway. The buffers are specifically designed to trap sediment, nutrients, and pollutants and provide wildlife habitat for a wide array of species, including lake sturgeon and upland bird species.

Goals

The goals of the Vermont CREP are to:

- Reduce phosphorus loading to Lake Champlain by 48.3 tons per year.
- Enhance wildlife and aquatic habitat.

Program Cost

The expected combined federal and state obligation is \$2.1 million over 15 years, with \$1.46 million from FSA and \$640,000 from Vermont. This does not include any costs that may be borne by producers. Vermont's share is approximately 20 percent of the total program costs; FSA's share is approximately 80 percent.

Eligible Areas

Producers can offer land in the Lamoille, LaPlatte, Mettawee, Missiquoi, Poultney, Winooski Rivers and Otter Creek areas. To find out if your operation is located within the project area, contact your local FSA office.

Approved Conservation Practices

The following conservation practices may be eligible for enrollment into the Vermont CREP:

- CP8A Grass Waterways
- CP21 Filter Strips
- CP22 Riparian Buffer
- CP23 Wetland Restoration

Signup and Eligibility Requirements

Eligible producers can enroll in 10- to 15 year CRP contracts. Producers may extend the benefits of the program through separate contracts with the state. Applicants must be able to offer eligible acreage and satisfy the basic eligibility criteria for CRP. Land must be cropland that has been cropped 2 out of the past 5 years and is physically and legally capable of being cropped in a normal manner. Marginal pastureland is also eligible provided it is suitable for use as a riparian buffer planted to trees. Applicants must generally have owned or operated the land for at least one year prior to enrollment. Persons with an existing CRP contract or an approved offer with a contract pending are not eligible for CREP until that contract expires.

Fact Sheet

Conservation Reserve Program Vermont Enhancement Program

CREP Payments

Vermont CREP participants are eligible for four types of USDA payments:

1. Signing Incentive Payment - a one-time payment of \$100 to \$150 per acre for land enrolled in a riparian buffer practice, filter strip, or grassed waterway. FSA makes this payment soon after the contract has been signed.
2. Practice Incentive Payment - payment equal to about 40 percent of the total cost for establishing riparian buffers, grass waterways, and filterstrips. This payment is in addition to the 50 percent cost share assistance that FSA provides.
3. Annual rental payment of about 200 percent of the maximum average soil rental rate for the county in which the land is located.
4. Cost share assistance for installing the conservation practices on enrolled land.

Enrollment in Other Programs

Applicants may still enroll in general or continuous signup CRP. However, CREP provides additional benefits not available through the general and/or continuous signup. For instance, the CREP enrollment process is on a continuous basis and payments are at a higher effective rate.

Haying and Grazing

Haying and grazing is not allowed during the CRP contract period unless FSA permits it for emergency purposes under normal CRP rules.

For More Information

For more information on the Vermont CREP, contact your local FSA office, or Soil and Water Conservation District office. Additional information is also available on FSA's web site at: www.fsa.usda.gov

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.
