

It's to die for.

It starts with "just this once," and it can end there.

Misuse of prescription pain relievers can kill you.

If someone offers you oxy, percs, vics or some other party drug,

think twice—because you only die once.

For information or help, call 1.800.662.HELP.

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES
Substance Abuse and Mental Health Services Administration
Food and Drug Administration

Prescription pain relievers, when used correctly and under a doctor's supervision, are safe and effective.
