

National Mapping Program Technical Instructions

Standards for Digital Raster Graphics

Standards for Digital Raster Graphics

PREFACE

This standard describes the general characteristics of digital raster graphics (DRGs) and provides specific information on the production of DRGs made from 1:10,000-, 1:12,000-, 1:20,000, 1:24,000-, 1:25,000-, 1:30,000-, 1:63,360-, 1:100,000-, and 1:250,000-scale USGS topographic quadrangle maps.

This current version 2.0 of the standard replaces the original unnumbered version.

Standards for Digital Raster Graphics

SUMMARY OF CHANGES

Complete Revision 4/01

This complete revision of the Standards for Digital Raster Graphics replaces the original version, issued in 4/96.

Change Notice 8/97

In response to the rapidly changing Internet environment, the National Mapping Program staff have decided to eliminate all references to specific Internet addresses in this standard as they may soon be obsolete.

Standards for Digital Raster Graphics

LIST OF PAGES

A complete and current copy of the preliminary pages for the Standards for Digital Raster Graphics consists of the pages (and most recent creation or revision dates) listed below.

| <u>Page</u> | <u>Date</u> | <u>Page</u> | <u>Date</u> | <u>Page</u> | <u>Date</u> |
|-------------|-------------|-------------|-------------|-------------|-------------|
| ii | 4/01 | | | | |
| iii | 4/01 | | | | |
| iv | 4/01 | | | | |
| v | 4/01 | | | | |
