##Last four digits

#Last three digits of the DSN Number

\* After dialing the access code, a dial tone will provide the 'continue to dial' signal.

\*\*To dial commercial, dial the appropriate access code, 99 or 0, and then the commercial number.

<b>FROM</b>	<b>TO</b>	<b>EUROPE (DSN)</b>	<b>COMM USA/EUROPE</b>
<u>EUROPE</u>	<u>USA (DSN)</u> 312-XXX-XXXX (DSN ACCESS + 7 DIGIT DSN)	XXX-XXXX (7 DIGIT DSN)	(Please see pg. 9, para. 11)
<u>USA</u>	XXX-XXXX (7 DIGIT DSN)	314-XXX-XXXX (314 + 7 DIGIT DSN)	(Please see pg. 9, para .11)
<u>CANADA</u>	312-XXX-XXXX	314-XXX-XXXX (314 + 7 Digit DSN)	

The ability to dial commercial and various DSN locations is determined by the Class of Service (COS) assigned to your phone. Please see your Command Telephone Control Officer (TCO) for details.

## **Global DSN Directory and NSA Naples Area Telephone Directory are available on the following web sites:**

DSN Directory is available at <http://dsnbbs.ncr.disa.mil/telephone.htm>, and enter: dsnbbs.ncr.disa.mil, scroll down and you will find a DSN Directory similar to what the worldwide DSN Operators use.

Naples Area Directory is available at [www.naples.navy.mil/nctams](http://www.naples.navy.mil/nctams), then go to Library and open Naples area directory.

## **GENERAL INFORMATION**

### **1. DIRECTORY PUBLICATION AND AMENDMENTS**

This directory is published by the NCTAMS EURCENT Base Communications Office (BCO) to provide telephone numbers commonly used throughout the Naples military community. Prior to each publication NCTAMS EURCENT canvases Telephone Control Officers (TCO) in the Naples area for inputs. Any authorized organization not listed in the directory and who desires to be included in future editions, should submit a written request to NCTAMS EURCENT, Code N2. If your telephone number changes, or is listed incorrectly, please notify NCTAMS EURCENT through your TCO in writing to ensure it is accurately reflected in the next phone directory. It is the responsibility of each activity's TCO to ensure that accurate listings are provided to the NCTAMS EURCENT BCO. This directory is accessible via NCTAMS EURCENT web page: <http://www.nctams.naples.navy.mil>.

### **2. SECURITY**

Do not discuss classified information on non-secure telephones. Official government telephones are subject to monitoring for communications security purposes at all times. Official government telephones are provided for the transmission of official information only. The use of government telephones constitutes consent to communications security telephone monitoring in accordance with current regulations. Do NOT discuss Essential Elements of Friendly Information (EEFI) on non-secure telephones. If you must discuss classified or sensitive information by telephone, use Secure Telephone Units (STU-III) in the secure mode or other approved devices.

### **3. DIALING INSTRUCTIONS**

Dialing through the Agnano, Capodichino, Gaeta and La Maddalena switches requires seven digits, and depending on your location, may also require using an access code. The dialing matrix on page 3 describes how to make calls. The following steps are helpful in using the dialing matrix:

1. Look down the left-hand column and find your location.
2. Look across the top row and find the location you want to call.
3. Look down this column until you come to the square to the right of the location from which you are calling. This square gives you the appropriate access code and dialing instructions.

### **4. TELEPHONE TROUBLE REPORTING**

If your telephone or associated equipment does not function properly, please notify the Telephone Trouble Desk at "119". You will be issued a Trouble Report (TR) number and the appropriate technician will be notified of your problem. Trouble calls are normally completed within 2-3 working days. TELECOM Italia does not normally work after hours, Italian holidays, or on weekends. For any problems requiring TELECOM Italia assistance, you can expect their assistance only during normal working hours. Any ADSL problems must be reported to 081-246-1868.

### **5. TELEPHONE INSTALLATION/REMOVAL/RELOCATION SERVICES**

Submit requests for new telephone services (installation, removal, or relocation) on a NAVFAC-9 Work Request form to NCTAMS EURCENT, Code N2, via your command TCO. Submit in triplicate with old and new floor plans attached. See NCTAMS EURCENT INST 2305.1 (series) for detailed instructions. NCTAMS EURCENT Base Communications Office will then provide requesting activity with a cost estimate. Before work may begin, the requesting activity must provide the appropriate accounting data on a NAVCOMPT Form 1149, 2276 or MIPR. With this data, NCTAMS EURCENT Comptroller will charge this funding against the appropriate account. For each work request received requiring the local telephone service provider or local exchange carrier (LEC) action, NCTAMS EURCENT Base Communications Office must prepare a Communications Service Agreement (CSA) which is used as an official government contract between the U.S. Government and LEC. Due to this procedure, all requests for new telephone services should be submitted as soon as the requirement is known. Response time for a routine work request once all required documentation and funding is received by NCTAMS EURCENT until its completion can be up to 60 days.

## **6. OPERATOR SERVICE**

All telephone operator services for the Naples and Gaeta areas are provided from Sigonella using a Centralized Attendant Service.

Telephone operators are trained to be alert and courteous at all times. Do not make complaints to or reprimand the operators. The operators are assigned numbers for identification purposes. Refer any dissatisfaction or complaint concerning the telephone operator service to the Sigonella Operator Supervisor at 624-5560.

## **7. CLASS OF SERVICE**

A class of service (COS) is a combination of class markings assigned to each individual telephone number. A classmark is a number assigned to a feature used within the switch, i.e., call forwarding, precedence access and automatic call back. The classmark number has no significance in itself. To determine the class of service your instrument has, simply call the operator. To change your COS submit a work request to NCTAMS EURCENT, code N2, via your command TCO.

## **8. OFFICIAL COMMERCIAL CALLS**

Official calls may be placed to the commercial system directly from a telephone classed for commercial dialing.

**Local/long distance calls** - If your telephone is class marked for local and/or long distance commercial dialing use the dialing matrix on page 3, dial the access code, then dial the desired commercial number.

**Operator assisted calls** - Calls through the operator will be provided only in special situations. If it is necessary to make commercial calls from your phone, contact your command TCO and request the phone be classed for commercial access. The TCO can explain how to acquire an MCI official calling card if needed. Charges will be assessed for all calls made and NCTAMS EURCENT will bill the activity. The MCI card service is only available to U. S. Navy commands. Commands are encouraged to establish their own means of controlling commercial call use. TCO's will review all toll calls for their activity to ensure official phones are being used properly.

### **Per NAVCOMTELCOMINST 2066.1A:**

"Official business calls include personal, local and long-distance calls if they do not adversely affect performance of the employee's official duties or the mission of the employee's organization, are of reasonable duration and frequency, and reasonably cannot be made at another time. Personal calls cannot result in a charge to the government even if the employee intends to reimburse the government. Additionally, calls for information assistance may not be made if a charge results to the government telephone."

"Examples of permissible types of personal calls include: checking on a family member, making or canceling personal appointments, checking on the status of home or auto repairs, and notifying family of overtime requirements or other changes in schedules."

## **9. TELEPHONE BILLING**

All telephone numbers assigned to the Agnano, Capodichino, Gricignano, Gaeta and La Maddalena switches will be monitored by the Station Message Detail Recorder (SMDR). The SMDR provides a sequential listing of all commercial calls made through the switch. Information recorded is very similar to that received on a residential telephone bill in the United States. This SMDR listing of commercial calls allows commands to review their own telephone usage and enforce policy for official phone use.

## **10. DEFENSE SWITCHED NETWORK (DSN)**

The control and use of the Defense Switching Network (DSN) is described in CJCSI 6215.01 (series), OPNAVINST 2305.13 (series), and DISA circulars. Briefly, DSN is a worldwide telephone

communications system providing long haul non-secure voice communications for the Department of Defense (DOD) and certain non-DOD subscribers. DSN is authorized for the most essential elements of commands and agencies operations requiring long distance telephone communications in the support of command and control, operations, intelligence, logistic, diplomatic, administrative and other validated requirements. DSN is for official use only unless the appropriate authority grants an exception.

Restrictions: DSN will not be used for unofficial calls. DSN will not be used within an installation, metropolitan area, or geographical area where existing government provided local telephone service is available. DSN will not be used directly or indirectly to any post, camp, station, or base non-appropriated fund activity. Exceptions are allowed for activities in remote areas when authorized by COMUSNAVEUR.

Length of calls: Calls should be limited to the time required to accomplish the official business; not normally exceeding five minutes.

Precedence level: The precedence levels for DSN are FLASH, IMMEDIATE, PRIORITY, and ROUTINE. (See the Joint Uniform Telephone Communications Precedence System Chart on page 11.) PRIORITY is the highest precedence given to an administrative call. Most calls will have ROUTINE precedence. ROUTINE and PRIORITY calls are subject to preemption by FLASH or IMMEDIATE calls. All calls should be placed at routine precedence initially and only increased to a higher precedence if the situation warrants it.

#### **DSN Direct-dialing Procedures:**

- a. Listen for DSN dial tone.
- b. Dial the seven digit DSN number desired for routine Europe or 312 and the seven-digit DSN number for routine CONUS calls.

## **11. COMMERCIAL CALLS**

### **Commercial Calls to the United States/Long Distance International Calls**

**Personal calls to the United States are not authorized from any official U.S. government phone.** To call commercial from a TELECOM pay phone or residential phone:

A. (No Calling Card, Direct Dial) 00 Country Code + Area Code + phone number. Using this method from a residential phone you are paying Italian rates. Bills are received every two months. Requests for breakdown of individual calls must be made separately, and there is a per call fee for this service.

B. Dial 170 to obtain an International Operator for making person to person, collect or credit card calls. Rates for collect and credit cards are billed at CONUS prices and person to person calls are paid at Italian rates.

C. Dial direct to your long distance carrier. AT&T is 172-1011 or 167-88-0011, MCI is 172-1022 and Sprint is 172-1877. These calls are charged to either your calling card or to the receiving party. Prices are at CONUS rates.

#### D. European Commercial dialing plan

<b>Local Calls</b>	<b>081/xxx-xxxx</b>
<b>Long distance calls</b>	
<b>Within Italy</b>	<b>Area code- xxx-xxxx</b>
<b>Outside Italy</b>	<b>00 /Country Code /Area Code - xxx-xxxx</b>
<b>From USA to Naples dial</b>	<b>011 /39 /081- xxx-xxxx</b>

#### Short List of Major Italian Commercial Area Codes

Aviano	0434
Camp Darby	0586
Gaeta	0771
La Maddalena	0789
Milan	02
Naples	081
Rome	06
Sigonella	095
Vicenza	0444

## 12. SWITCH FEATURES

1. The Agnano, Capodichino, Gaeta and La Maddalena switches are programmed with certain features that allow subscribers to better use the local DSN system. All subscribers, regardless of class of service, can use the following features:

Call Transfer. This function allows the subscribers to forward a call to another extension within the switch. Perform a "hook-flash"; dial the desired extension and hang-up either before or after the call party answers.

Three-Party Conference. This function allows subscribers to conduct a three-way conversation. To enable this feature press "hook-flash" while on-line with a caller and dial the number of the third party desired. Once the third party answers press "hook-flash" again and all three callers will be connected together. The conference call is disconnected by the callers hanging up.

Malicious Caller ID. This function will identify the extension from which a threatening call or bomb threat is received. To enable this function press "hook-flash" while the caller is on-line and press "\*96". Immediately implement SOP's within your command to respond to the situation. This function prints out caller information on the switch equipment located at the various switches in the Naples area.

2. The below listed features are available according to the class of service on your phone. If these features are not available on your extension and you would like them submit a request on a NAVFAC-9 Work Request form to NCTAMS EURCENT, Code N2, via your command TCO.

Call Forwarding. This function allows incoming calls to your telephone number to be automatically forwarded to another telephone number of your choice. This feature can be applied to all calls or selectively applied to "Don't Answer" or "Busy" call situations. To enable this function pick up the handset and dial the feature desired:

- \*70 – Call Forward All Calls
- \*72 – Call Forward Don't Answer
- \*73 – Call Forward Remote Activation
- \*74 – Call Forward Busy

Dial the seven (7) digit number to which you wish to forward your calls.

NOTE: This must be to a number on the same DSN prefix - 625-xxxx cannot be forwarded to a 626-xxxx number or vice versa. If you want to forward your phone to 625-

a) Anytime you pick up your receiver you will hear an interrupted tone, which indicates your line is forwarded. You are still able to place outgoing calls on this extension even though it is forwarded. To cancel this feature dial #70.

Ring Again. This function will cause a busy extension of the same DSN prefix to call back the calling party's extension when it becomes idle. To enable this function press "hook-flash" after receiving the busy signal and you will get a unique tone. Dial \*78. After receiving the acknowledgment tone, hang-up. When the called extension becomes idle, you will receive a special ringing. When you lift the handset, the system will automatically dial the station. To cancel Ring Again, lift the handset and dial the feature code \*78.

### 13. FRAUD, WASTE AND ABUSE

The Base Communications Office at NCTAMS EURCENT routinely monitors monthly itemized call data to protect against fraud, waste abuse on government phone lines. Disciplinary action can be taken against those individuals who fraudulently use any government phone.

### 14. COMMERCIAL ACCESS TO BASE TELEPHONES

All on base telephone extensions can be reached from the commercial network by dialing the appropriate commercial prefix.

NSA Agnano:	081-724-XXXX	(625-extensions)
NSA Capodichino:	081-568-XXXX	(626-extensions)
Navy Support Site	081-811-XXXX	(629-extensions)
AFSOUTH Bagnoli:	081-721-XXXX	(640-extensions)
AFSOUTH Bagnoli:	081-724-XXXX	(625-extensions)
NSA Gaeta	0771-709-XXX	(627-extensions)
NSA La Maddalena	0789-798-XXX	(623-extensions)
NSA Sigonella	095-86-XXXX	(624-extensions)

XXXX /XXX– Last four digits/last three digits of the DSN Number

### 15. GOVERNMENT CELLULAR TELEPHONES

All cellular telephones purchased by the U.S. Government are to be for OFFICIAL USE ONLY. The purchasing command is responsible for accounting and use of cellular telephone equipment.

If the equipment should be lost or stolen it is the responsibility of the command to insure that a police report is filed both with the NSA Security Department and the Italian State Police (Carabinieri). The report is necessary for filing a deactivation Work Request with the Italian telephone service provider.

## **ESSENTIAL ELEMENTS OF FRIENDLY INFORMATION (EEFI)**

**Be aware of the information you discuss on your unsecure phone. The topics below are of interest to information gathering agencies. They should be discussed on a STU-III in secure mode or other approved device for security's sake.**

### **1. OPERATIONS**

- a. Friendly intentions, plans, task force organization.
- b. Locations, reports, capabilities or the alert posture of forces or their movements.
- c. Rules of engagement (ROE), succession of command, manning capabilities, locations or activation times of the primary or alternate war headquarters.
- d. Reinforcements, augmentation, replacement of forces casualties or damage resulting from enemy actions.

### **2. INTELLIGENCE**

- a. Enemy locations, plans, capabilities, intentions, strengths or activities.
- b. Intelligence reports, assessments or sources.

### **3. COMMUNICATIONS**

- a. Station/system outages, primary and alternate routing of systems and circuits.
- b. Netting, capabilities, equipment, cryptographic materials, systems and usage within the military.

### **4. LOGISTICS**

- a. Petroleum supplies, pipelines or storage areas.
- b. Quantities and locations of supply stocks, shortages of supplies, equipment or ammunitions.
- c. Re-supply operations or movements, seaport capabilities or availability.
- d. Maintenance shortfalls.

### **5. NUCLEAR, BIOLOGICAL AND CHEMICAL (NBC) WARFARE**

- a. Location, movements, status, quantity, command, control or release of NBC assets/weapons.
- b. Casualties or damage.

### **6. PERSONNEL**

- a. Critical skills shortages, manpower shortages, replacements or key personnel movements.

### **7. SECURITY**

- a. Reaction plans, physical security, anti-terrorist activities, OPSEC.
- b. VIP's movements, itineraries, plans/measures taken to protect VIP's.

### **8. POLITICAL**

- a. Disagreements within the alliance, economic plans, national position.
- b. Information that could be detrimental to national security.

**JOINT UNIFORM TELEPHONE COMMUNICATIONS PRECEDENCE SYSTEM CHART**  
**DSN PRECEDENCE TRANSMISSION PREEMPTION APPLICATIONS**

- 1. FLASH**                    **TRANSMISSION PREEMPTION:** Has precedence over any other telephone call of lower precedence. Pre-empt lower precedence calls.  
**APPLICATIONS:** Reserved for alerts, warnings, or emergency actions having immediate bearing on national, command or area security.
- 2. IMMEDIATE**            **TRANSMISSION PREEMPTION:** Has precedence over priority and routine calls. Pre-empt lower precedence calls.  
**APPLICATIONS:** Reserved for vital communications: having an immediate operational effect on tactical operations, which directly concerns safety or rescue operations affecting the intelligence community.
- 3. PRIORITY**              **TRANSMISSION PREEMPTION:** Has precedence over routine. Pre-empt lower precedence calls.  
**APPLICATIONS:** Reserved for calls, which need prompt completion for national defense and security, successful conduct of war or to safeguard life or property, which do not require higher precedence. Priority will be the highest precedence, which may be used for administrative matters for which speed of handling is of paramount importance.
- 4. ROUTINE**                **TRANSMISSION PREEMPTION:** Has no precedence over any other call is handled subsequently as placed by the calling party. No pre-empt capability.  
**APPLICATIONS:** ROUTINE precedence is reserved for all OFFICIAL communication not appropriate for priority, immediate or flash precedence.
