**FLIS PROCEDURES MANUAL  
MATERIEL MANAGEMENT  
DECISION RULE TABLES  
JULY 2004**

## CHAPTER 1 INTRODUCTION

### 13.1.1 Purpose and Scope

a. The Materiel Management Decision Rule Tables reflect Service/Agency (S/A) supply management responsibilities and interrelationships, Federal Supply Class (FSC) assignments, and the control dissemination of descriptive and supply data.

b. This volume is applicable to the Defense Logistics Agency (DLA), the Military Services, the Defense Special Weapons Agency (DSWA), the Defense Intelligence Agency (DIA), the General Services Administration (GSA), the Coast Guard, the National Security Agency (NSA), the Federal Aviation Administration (FAA), Veterans Administration (VA), National Imagery and Mapping Agency (NIMA), National Weather Service (NWS), North Atlantic Treaty Organization (NATO) and other foreign countries.

### 13.1.2 Responsibilities

a. Each participating Service/Agency is responsible for:

(1) Establishing a central activity as a FLIS Materiel Management Decision Rule Table contact point authorized to submit changes to the tables. The contact points are listed in paragraph [13.1.2.e](#).

(2) Establishing coordination channels for assuring that any changes to the tables that impact other Services/Agencies are fully coordinated before submission to the Defense Logistics Information Service (DLIS).

b. The Service/Agency contact point is responsible for submitting to DLIS any changes to its Materiel Management Decision Rule Table(s) or other information in this volume. Changes will be submitted in accordance with paragraph [13.1.3.a](#).

c. Headquarters Defense Logistics Agency (DLA-MMSLP) is responsible for:

(1) Acting as the DLA contact point for matters concerning the FLIS Materiel Management Decision Rule Tables.

(2) Resolving conflicts that cannot be resolved at the DLIS/Service/Agency level.

d. The Defense Logistics Information Service (DLIS-SB) is responsible for:

(1) Receiving and processing Service/Agency prepared correspondence to change this volume.

(2) Determining whether the requested change is in accord with published policy, and attempting to resolve identified conflicts directly with the Service Agency requesting the change.

(3) Referring unresolved conflicts to HQ DLA for resolution. Correspondence will be addressed to Director, Defense Logistics Agency, ATTN: DLA-MMSLP, Cameron Station, Alexandria, VA 22314.

(4) Maintaining this volume in a current status through interim issuances, changes, and revisions in accordance with section [13.1.3](#).

### **13.1.3 Maintenance**

#### **a. Submission of Changes:**

(1) A S/A may request additions, deletions, or changes to this volume by submitting

such requests through the authorized contact point to the DLIS program manager. Correspondence will be addressed to:

Commander  
Defense Logistics Information Service  
ATTN: DLIS-SB  
Federal Center  
Battle Creek, MI 49017-3084

(2) Emergency changes may be requested by calling:

Commercial: Area Code 616, 961-4446.  
DSN: 932-4446.

b. Each request for change will include the following information:

(1) The required effective date of the change. To meet the 30-day requirement set forth in paragraph [13.1.3.c\(1\)](#), DLIS must receive the request 60 days prior to the effective date.

(2) A statement that the requested change has been fully coordinated (if applicable). All changes to chapters [13.3](#) and [13.4](#) require effective date coordination. Changes to the Standard FSC Table, [appendix 13-2-A](#), require effective date coordination except for Data Record Numbers (DRNs) [3428](#) (Hi-Dollar Breakout Commodity Category Code), [2611](#) (DoD Commodity Materiel Management Category Code), [0478](#) (Distribution Activity Code Segment M) and [8905](#) (File Maintenance Receiver Code). Changes to the Major Organizational Entity (MOE) Rules contained in [appendix 13-6-B](#) require effective date coordination except for:

(a) Primary Inventory Control Activity MOE Rules when the PICA Level of Authority (LOA) is 07, 08, 26, 48, or 81.

(b) Secondary Inventory Control Activity (SICA) MOE Rules providing the change does not affect a table in [chapter 13.3](#).

(c) Authorized Item Identification Data Collaborator/Receiver Codes (DRNs [2533](#) and [2534](#)).

(d) DoD Commodity Materiel Management Category Codes and/or Military Service Materiel Management Category Codes.

(3) Identification of the specific table line entry (e.g., MOE Rule Number A111) or other information to be changed, and the type of change required.

c. Announcement of Changes:

(1) Any addition/deletion/change required for this volume may be announced by interim issuance, change, or revision, providing it is distributed to all interested activities a minimum of 30 days in advance of the effective date. If the 30-day requirement cannot be met, DLIS will announce the change by telephone or teletype as appropriate, with subsequent confirmation by interim issuance.

(2) Emergency additions/deletions/changes to this volume that require rapid publication and distribution to all interested activities will be announced by means of interim issuances. These will be issued in letter form on an as-required basis.

(3) All interim issuances and any other additions/deletions/changes required, except those for [appendix 13-6-C](#), Activity-MOE Rule Cross Reference Table, will be accumulated on a quarterly basis and published as a formal change.

(4) If any scheduled quarterly change affects more than 25 percent of the data contained in this volume, a complete revision will be issued instead of a change. This rule will also apply to the specific Service/Agency segments.

d. The Change Indicator Code (DRN [0122](#)) identifies the most current action taken on a FSC or MOE Rule Record. These codes are indicated as follows:

A NEW	IDENTIFIES THE ADDITION OF A FSC OR MOE RULE AND RELATED DATA ELEMENTS TO THE DATA BASE.
C CANCELLED	IDENTIFIES PENDING REPLACEMENT OR DELETION OF A FSC OR MOE RULE AND RELATED DATA ELEMENTS FROM THE DATA BASE BEFORE THE EFFECTIVE DATE IS REACHED.
D DELETION	IDENTIFIES DELETION OF A FSC OR MOE RULE AND RELATED DATA ELEMENTS FROM THE DATA BASE AFTER THE EFFECTIVE DATE IS REACHED.
R REVISED	IDENTIFIES THE REVISION OF ONE OR MORE DATA ELEMENTS OF A FSC OR MOE RULE PROFILE IN THE DATA BASE.
- BLANK	IDENTIFIES A FSC OR MOE RULE, WITH RELATED DATA ELEMENTS, WHICH IS AUTHORIZED FOR USE BASED ON THE ASSIGNED STATUS CODE AS DEFINED IN FLIS, VOLUME 10, TABLE <a href="#">116</a> .

### 13.1.4 Contents

Following is an explanation of the contents of this volume and its purpose in FLIS.

a. The Standard Federal Supply Classification Table ( [appendix 13-2-A](#)) contains the FSCs listed in Cataloging Handbook H2, Groups and Classes. Additional information is contained in [volume 2, section 2.1.7](#) and [volume 4, section 4.2.1](#). Arrangement of the FSCs in the table is in numerical order from the lowest to the highest. The Standard FSC Table will be used to:

Validate functional assignments by FSC in accordance with published directives.  
Validate FSC codes.

Determine which activities will receive output distribution on an FSC basis.

b. Registration of Activity Interest by Integrated Materiel Managers (IMMs) (chapter

13.3) contains instructions for the registration of Service/Agency interest on items accepted for management by a IMM. The chapter consists of individual sections for IMM use under the conditions cited therein (e.g., Provisioning and Item Management Coding).

c. Registration of Activity Interest by Integrated Materiel Managers (IMMs) (chapter 13.4) contains instructions for the registration of Military Service interest on items managed by Integrated Materiel Managers. The chapter consists of individual sections for IMM use under the conditions cited therein (e.g., recording user interest).

d. MOE Rule Development for NATO and Other Foreign Countries (chapter 13.5) contains criteria and examples for MOE Rule development in conjunction with Foreign Military Sales (FMS) cases.

e. Major Organizational Entity (MOE) Rules (chapter 13.6):

(1) The MOE Rule Table, [appendix 13-6-B](#), reflects management responsibilities within participating Military Services, Civil Agencies, and NATO and other foreign countries. The information included in the MOE Rules is a combination of Department of Defense (DoD) and Service/Agency cataloging/supply management assignments which are made on the basis of organizational responsibilities. Additional information is contained in [volume 2, chapter 2.1](#) and [volume 6, section 6.3.11](#). The MOE Rule Table is used to:

(a) Display, in a tabular format, functional materiel management assignments made by Services/Agencies for computer and manual applications. The data against each MOE Rule Number is consistent throughout the DoD and Services/Agencies and may be applied against many National Stock Numbers (NSNs).

(b) Provide uniform criteria for validating materiel management assignments.

(c) Reduce the frequency of change to the system when a change in functional assignments is made. This can be accomplished by revising the appropriate element in the MOE Rule without changing the MOE Rule Number and without generating mass output.

(d) Minimize the input of predetermined information, since redundant data (applicable to many items) will be recorded against a single entry in the System Support Record (SSR) table and not against the FLIS data base.

(e) Provide a flexible base for accumulation of management statistics.

(2) MOE Rules will be established for existing and potential items of supply.

(3) MOE Rules for nuclear ordnance items will be processed and applied in accordance with [volume 4, chapter 4.16](#).

(4) The Activity to MOE Rule Cross-Reference Table, [appendix 13-6-C](#), lists MOE Rules sequentially by activity code, PICA, SICA, PICA Level of Authority, SICA Level of Authority, submitter, collaborator, and receiver.

### 13.1.5 FLIS Data Base File Maintenance

a. MOE Rules and related data codes denote managerial and operational responsibilities exercised by supply activities and techniques of materiel management employed by the activity having principal supply control responsibility. The date an approved MOE Rule and related data are recorded against an NSN will be the reference point for development of management statistics.

b. MOE Rule and related data elements are input to the DLIS FLIS data base through the use of the following three segments:

(1) Segment B, which consists of the elements of data necessary to portray an individual Service/Agency management profile in relation to a specific item identification.

(2) Segment R, which is used when adding, changing, or deleting single data elements or a combination of data elements. The permissible data elements are reflected with the input formats for Document Identifier Codes (DICs) using this segment.

(3) Segment T, which is used to delete an entire MOE Rule and its related segment B data elements.

c. The related data elements, excluding supplementary type activity registrations, are added, changed, or deleted as reflected by applicable input formats in volumes 8 and 9 except as follows:

(1) The Acquisition Method Code and Acquisition Method Suffix Code are assigned by the:

(a) Primary Inventory Control Activity (PICA) for each item Service-managed or retained.

(b) IMM for the first MOE Rule established. No other MOE Rule requires these codes except when a Civil Agency is not supported by the IMM. In such an instance the Civil Agency assigns these codes to the Civil Agency MOE Rule. On the IMM items, DLIS will automatically record the data in the FLIS against the applicable SICA MOE Rules.

(2) The Item Management Code (IMC) and Item Management Coding Activity (IMCA) are required only for items subject to IMM, and are input by the IMM. (See volume 6, chapters [6.3](#) and [6.8](#).)

d. Item identification data collaborators/receivers may be recorded as supplemental to a given MOE Rule on an item-by-item basis when authorized by the controlling PICA and/or SICA, subject to the following limitations:

(1) The data collaborator/receiver must be recorded against the parent Service/Agency MOE Rule.

(2) The data collaborator/receiver must not duplicate activities contained within the MOE Rule.

e. Input formats for MOE Rule and related data DICs are contained in [volume 8, chapter 8.1](#) and [volume 9, chapter 9.1](#).

Add Data Element(s) (DIC LAD)  
Add Moe Rule and Related Data (DIC LAU)  
Change Data Element(s) (DIC LCD)  
Change MOE Rule and Related Data (DIC LCU)  
Delete Data Element(s) (DIC LDD)  
Delete MOE Rule and Related Data (DIC LDU)  
Multiple DIC Input (DIC LMD)

f. SSR MOE Rule/FLIS data base file maintenance and/or mass-change updates require that:

(1) When file maintenance to SSR/FLIS data base data is required by a Service/Agency due to a FLIS System Change Request (SCR) (e.g., logistics transfer), DLIS-S will monitor the results through the Item Management Statistical Series section 21 report, MOE Rule Distribution (IMSS-21).

(2) If a Service/Agency has not input the transaction(s) necessary to update pending erroneous segment B or future effective dated file records to the FLIS data base, DLIS-S will interrogate the FLIS data base for those MOE Rules recorded on items and output the results to the responsible Service/Agency for initiation of corrective action.

(3) Upon completion and notification of the updated transaction(s), the affected Service/Agency focal point will provide DLIS-S with the required information for retention, cancellation, and/or deletion of specific MOE Rule(s) from the FLIS.

**CHAPTER 2**  
**STANDARD FEDERAL SUPPLY CLASSIFICATION (FSC)**  
**TABLE**

**13.2.1 Purpose**

Uses of the Standard FSC Table include: validation of FSCs, listing of classifications subject to integrated material management and item management coding procedures and classifications subject to single submitter criteria. FSCs relating to any of these conditions, list the appropriate managing activity. The table also shows the Army and Air Force Federal Supply Class Managers and activities authorized to receive file maintenance and decoded characteristics data.

NOTE: All activity codes listed in the table are found in volume 10, table [104](#).

**13.2.2 Definitions**

The following data elements and related Data Record Numbers (DRNs) appear within the table. Included within the data element definitions are the volume 10 tables, shown in parenthesis, which provide a complete list of the possible entries for each DRN.

<u><b>Data Element</b></u>	<u><b>DRN</b></u>
<p>a. FSC/MOE Rule Change Indicator Code</p> <p>(volume 10, table <a href="#">166</a>) A computer generated code, resulting from an input transaction which changes any portion of the FSC or MOE Rule record.</p>	0122
<p>b. Assigned FSC</p> <p>A code identifying the supply classification of an item under the Federal Catalog Program. It also identifies items of production and homogeneous areas of commodities with respect to their physical or performance characteristics. The first two positions of the code denote the Federal Supply Group (FSG), with the last two positions identifying the FSC within the specified group. The combination of the four digits constitute the complete Federal Supply Classification.</p>	3990
<p>c. Integrated Material Manager (IMM)</p> <p>The material manager responsible for the completion of assigned management functions specific to selected items or specific Federal Supply Classification (FSC) classes.</p>	9090
<p>d. Item Management Classification Activity (IMCA)</p>	4075

**Data Element**

**DRN**

The General Services Administration or appropriate Defense Supply Center responsible for determining the DoD method of management for each item in a FSC assigned for integrated management.

- DoD 4140.26-M defines these responsibilities.

e. Single Submitting Activity Code 9255

An activity having sole responsibility for submittal of catalog data proposals to the Federal Logistics Information System. Management responsibility includes all items of supply in a given FSC class (Category A Single Submitters); or, where management responsibility is determined on a by-item basis within a given FSC class, (Category B Single Submitters).

f. Standardization Submitting Activity Code 0749

A code that identifies an activity having sole responsibility for submittal of standardization data, to the Federal Logistics Information System, in a given FSC class.

g. Army Federal Supply Class Manager 8831

(AR 708-1, Chapter 5) The inventory control point designated to perform assigned material management functions, within the U.S. Army, on a FSC basis for those classes not assigned to the Defense Logistics Agency.

h. Air Force Federal Supply Class Manager 8860

(AFM23-110, Volume 1, Part 2 and AFMCM 23-3, Appendix 10) The Air Force activity designated to perform, on a FSC management basis, a group of logistics functions which include: item cataloging, preparation of Air Force catalogs, catalog supplements, simplifications, characteristics screening, standardization, interchangeability and substitutability family groupings, specification management and engineering support related to these activities.

i. Hi-Dollar Breakout Commodity Category Code 3428

DLAM 4105.2, volume 10, table 78) A code used by DoD activities to identify the commodity category of spare parts, including components and related spares.

j. Commodity Material Management Category Code, DoD 2611

(volume 10, table 48) A code used to classify items into categories by material commodity for management information purposes.

k. Subject to Weapons Integrated Material Management 0090

**Data Element**

**DRN**

An alpha “W” or “Blank” that specifies whether or not an assigned FSC is subject to Weapons Integrated Material Management (WIMM).

l. Effective Date

2128

A seven position, numeric code representing the century and julian date a FSC table maintenance action becomes effective.

m. Distribution Activity Code

0478

A code in the Standard FSC Table used to identify the activities desiring decoded characteristics data.

n. File Maintenance Receiver Code

8905

The activity code of an activity receiving file maintenance data by FSC.

NOTES:

\*1. Air Force - Multiple manager assignments by weapons systems are possible in these classes. FSCs where this note appears require a MMAC that must coincide with applicable system. (See AFMCPD 90-706 and Mission Workload Assignment System (D086 <https://www.msg.wpafb.af.mil/d086/>)).

\*2. Activity AX is the Integrated Materiel Manager for items in these classes, except when the item is a component of a combat or tactical vehicle. Activity AZ is the Integrated Materiel Manager for parts peculiar to combat and tactical vehicles of Army design regardless of FSC. Appropriate secondary control activities for supported Services are determined by selection and use of the applicable MOE Rule from the MOE Rule Table.

\*3. Army-These FSCs are assigned to DSCP medical KX. The army class manager for medical items is AS, and for the non-medical items CD is the class manager.

\*4. Air Force-These FSCs are assigned to DSCP medical, KX. The Air Force class manager for medical items is SS, and for non-medical items, TG is the class manager.

\*5. All codes appearing in this class apply to the limited data and pseudo codes in DLIS files ( [See paragraph 13.1.4.e\(3\)](#)).

\*6. Activity CX is the Integrated Manager for packaged petroleum items. Activity KY is the assigned Integrated Materiel Manager for bulk petroleum items within that class.

\*7. These FSCs are managed by the Defense Supply Center Philadelphia (DSCP) for the Department of Defense (DoD) activities and by the Veterans Administration (VA) for Civil Agencies. Activity KX is the single submitter for FSG 65 (Medical) and Activity CZ is the single submitter for FSG 89 (subsistence) except where activity 54 (VA) is the authorized submitter. The VA may submit or retain NSNs in the FLIS data base as a single submitter for item in those classes.

GENERAL NOTE:

\*\* Activity XP is the Single Submitter for NSA design controlled items with CAGE Code 98230 and Reference Number Category Code (RNCC, DRN [2910](#)) of 1 or 3.

**13.3.1 Instructions for Registering Department of Army Activities**

a. These instructions apply to items submitted by the IMM for:

(1) Provisioning and non-provisioning supply support and Integrated Materiel Management as a result of Item Management Coding (IMC) in accordance with DoD 4140.26-M, Defense Integrated Materiel Management Manual for Consumable Items.

(2) Medical items FSG 65, FSCs 6630 and 6640, and items in other FSCs in accordance with this manual.

(3)Clothing and textile items in accordance with this manual.

b. Upon receipt and acceptance of a SSR or IMM resulting from IMC, the IMM will prepare and submit the appropriate data to register Army activities in the FLIS

c. The Army Inventory Control Point (ICP) which submitted the SSR or IMC will be recorded as a supplementary data receiver when not included in the Major Organizational Entity (MOE) Rule established for the applicable FSC. The ICP which submitted the SSR must be recorded as the IMCA.

### 13.3.2 Instructions for Registering Department of Navy Activities

a. These instructions apply to items submitted by the Navy and accepted by the Integrated Materiel Manager (IMM) for:

(1) Provisioning and non-provisioning supply support and Integrated Materiel Management as a result of IMC coding in accordance with DoD 4140.26-M; or

(2) Medical items in FSG 65, FSCs 6630 and 6640, and items in other FSCs in accordance with this manual.

(3) Clothing and textile items in accordance with this manual.

b. Upon receipt and acceptance of a SSR or IMM resulting from IMC, the IMM will prepare and submit the appropriate data to register Navy activities in the FLIS.

c. The Navy Retail Office (Navy Ships Parts Control Center, Code 054, activity code GH) and predetermined collaborators will be recorded in accordance with MOE Rules established for the Navy as listed below. The submitting Navy ICP will be recorded as a collaborator supplemental to the MOE Rule.

d. Navy MOE Rules for IMM are:

CY is a category A single submitter for FSC 7210 and FSGs 83 and 84 (except FSC 8475)

NOTES:

1. NAVAIR (activity KA) should be registered as a collaborator supplemental to the MOE Rule on items in FSG 67.

2. Subsequent to initial registration, the Navy Secondary Inventory Control Activity (SICA) may add other Navy activity codes as supplementary collaborators or data receivers and will be responsible for intra-Navy collaboration.

**13.3.3 Instructions for Registering Department of Air Force Activities**

a. These instructions apply to items submitted by the Air Force and accepted by the Integrated Materiel Manager (IMM) for provisioning and non-provisioning supply support and Integrated Materiel Management as a result of Item Management Coding (IMC) in accordance with DoD 4140.26-M.

b. Medical items, clothing and textile items, subsistence items, fuels, ammunition, nuclear ordnance, and nonconsumable items are exceptions to the SSR or automatic recordation processes of DoD 4140.26-M. For reference, the Air Force Activities and MOE Rules appropriate to these commodities are included in the list below.

c. Upon receipt and acceptance of a Supply Support Request (SSR) or Integrated Materiel Management resulting from IMC, the IMM will prepare and submit to DLIS the appropriate data to register the Air Force activity in the FLIS using the provided SIASCN in the transaction document control number.

d. The appropriate Air Force MOE Rule will accompany the Supply Support Request (c.c.21-24). The SICA of the MOE Rule reflects the Engineering Support Authority (ESA) and must also be the Activity Code From (ACF) (c.c.67-68) of the request. The following are the Air Force MOE Rules for IMMs:

#### **13.4.6 Instructions for Registering Defense Logistics Agency (DLA) Activities**

a. This instruction applies to items required by the Defense Logistics Agency which are subject to Integrated Materiel Management by a Service IMM.

b. Upon receipt and acceptance of a Supply Support Request (SSR) submitted in accordance with DoD 4140.26-M, volume II, appendix LL, the IMM will prepare and submit to DLIS the appropriate catalog data to record HQ DLA Retail Office (activity code U5) in the FLIS as follows:

<u>IMM</u>	<u>SICA</u>	<u>DoD MMC</u>	<u>MOE Rule</u>
AJ	U5	C	DAJ1
BF	U5	C	DBF1
CL	U5	C	DCL1
CT	U5	C	DCT1
HD	U5	C	DHD1
PA	U5	C	DPA1
SU	U5	C	DSU1
SX	U5	C	DSX1
TG	U5	C	DTG1

c. In addition, when the SSR is submitted in accordance with DoD 4140.26-M, volume II, appendix LL, the Inventory Control Point (ICP) reflected in card columns 67-68, Activity Code (from), of the SSR will be recorded in FLIS as a supplementary data receiver.

#### **13.4.7 Instructions for Registering National Security Agency (NSA) Activities**

a. This instruction applies to items required by the National Security Agency which are subject to Integrated Materiel Management by a Service IMM.

b. NSA MOE Rules for IMM are:

<u>IMM</u>	<u>SICA</u>	<u>MOE Rule</u>

NOTE: If the catalog submitter is not the IMM, the submitter is indicated to the right of the IMM.

**CHAPTER 5**  
**MOE RULE DEVELOPMENT FOR NATO AND OTHER**  
**FOREIGN COUNTRIES**

**13.5.1 Purpose**

This chapter provides the criteria for Major Organizational Entity (MOE) Rule development when a FMS case(s) (DoD Letter of Offer and Acceptance (DD Form 1513)) exists. Policy/Proceduarl guidance for Federal Catalog data and services furnished under FMS agreement is contained in [volume 1, chapter 1](#) of this Manual.

**13.5.2 Criteria for MOE Rule Development**

a. If a foreign government has a FMS case with DLIS for cataloging services and data the MOE Rule profile for recording foreign government interest will be constructed with the country code in the first two positions and “01” in the last two positions (as outlined in [appendix 13-6-B](#), Foreign MOE Rules).

b. If a foreign government has a FMS case for cataloging data and services with a U. S. Military Service, the MOE Rule profile for recording U. S. Military Service interest (if not already recorded on the item as a manager) will be constructed as in the following example:

<u>Military Service</u>	<u>MOE Rule</u>	<u>MOE</u>	<u>PICA</u>	<u>PICA LOA</u>	<u>Authorized</u>		
					<u>Sub</u>	<u>Col</u>	<u>Rec</u>
Air Force	FMSU	DF	SU	99	TU	TU	TU
Army	A098	DA	AJ	99	AJ	AJ	AJ
Navy	ZHHD	ZH	ZH	81	HD	HD	HD

c. The U. S. Military Service responsible for adding a FMS MOE Rule is also responsible for deleting the FMS MOE Rule when the agreement is terminated.

**13.5.3 Input and Output Data Submitters and Receivers**

An input transaction which contains a MOE Rule number with an “I” or “O” in the first position must also contain the Originating Activity Code “TU” (AFMC/LGIS), Submitting Activity Code 9Z (DLIS-SD) and Related Transaction Submitting Activity Code 9Z. The resulting output, notification of return or unprocessable package (KRE/KRU) will be forwarded to Activity 9Z whereas notification of approval (KNA) will be forwarded to activities “TU” and “9Z”.

## CHAPTER 6

### MAJOR ORGANIZATIONAL ENTITY (MOE) RULES

#### 13.6.1 MOE Rule Tables

a. The Wholesale-Retail Grid, ( [appendix 13-6-A](#)), lists the various levels of service/agency supply management responsibility. Information is provided for the Primary Inventory Control Activity (PICA) and Secondary Inventory Control Activity (SICA), Integrated and Non-Integrated Material Managers and for all the related levels of authority specific to each.

b. The MOE Rule Table ( [appendix 13-6-B](#)) reflects the various profiles of management responsibility within the participating service/agencies, NATO and other foreign governments. The information included in the MOE rules is a combination of Department of Defense (DoD) and service/agency cataloging and/or supply management assignments, which are made on the basis of organizational responsibilities. MOE rule assignments, within the table, are established for both existing and potential items of supply. The table is displayed in tabular format and is listed in MOE rule order.

c. The Activity to MOE Rule Cross-Reference Table, ( [appendix 13-6-C](#)), is designed to provide the user with a reference for determining which MOE rules apply to a specific service, agency, NATO or other foreign countries. The table is listed sequentially by activity and by MOE rule within each activity.

d. The following data elements and related Data Record Numbers (DRNs) appear within the tables. Included within the data element definitions are the FLIS, Volume 10 tables, shown in parenthesis, which provide a complete list of the possible entries for each DRN.

<b><u>Data Element</u></b>	<b><u>DRN</u></b>
1. FSC/MOE Rule Change Indicator Code (volume 10, table <a href="#">166</a> ) A code which is computer generated as the result of an input transaction changing any portion of a FSC or MOE rule record.	0122
2. MOE Rule Number A code which represents a specific MOE rule that applies to the management of an item or a group of items of supply. The first position identifies the service/agency responsible for establishing and maintaining the MOE rule. The remaining three positions are non-significant and are used for sequencing purposes only.	8290
3. MOE Code	2833

<b><u>Data Element</u></b>	<b><u>DRN</u></b>
(volume 10, table <a href="#">51</a> ) A code representing the subdivision of a U.S. governmental organization, or an agency of the North Atlantic Treaty Organization nations, or other friendly governments and international organizations participating in the Federal Catalog Program.	
4. MOE Rule Status Code	8458
(volume 10, table <a href="#">116</a> ) A code designating the status of a MOE rule as active, cancelled with or without replacement, or with the replacement pending, as reserved or as being an effective dated new MOE rule or a MOE rule with a pending change.	
5. Future MOE Rule Status Code	0297
(volume 10, table <a href="#">116</a> ) A code which represents the forth coming status code to be assigned based on a future effective dated MOE rule action.	
6. Effective Date	2128
A seven position, numeric code representing the century and Julian date a MOE rule table maintenance action becomes effective.	
7. Primary Inventory Control Activity (PICA)	2866
(volume 10, table <a href="#">104</a> ) A code indicating the principal supply control activity responsible for establishing and controlling stockage objectives, and maintaining item accountability for an item of supply. (Formerly, the wholesale inventory manager)	
8. PICA Level of Authority	3505
(volume 10, table <a href="#">74</a> ) A code that identifies the level of authority of a PICA. The code indicates logistics material management, level of responsibility and basis of categorization. The codes are used internally for statistics and general management data, and are based on material management responsibilities assigned by service/agency directives.	
9. Secondary Inventory Control Activity (SICA)	2938
(volume 10, table <a href="#">104</a> ) A code that identifies a supply control activity responsible for controlling stock levels and maintaining item accountability when supply support is furnished by a different service/agency; or, in the case of a Defense Supply Center, responsible for residual supply management actions not transferred to the General Services Administration (GSA). (Formerly, the retail inventory manager)	
10. SICA Level of Authority	9547
(volume 10, table <a href="#">74</a> ) A code that identifies the level of authority of a SICA. The code indicates the logistics material management level of responsibility and basis of categorization. The codes are used internally for statistics and general management data, and are based on material management responsibilities assigned by service/agency directives.	
11. Authorized Item Identification Data Submitter Code	2535

<u>Data Element</u>	<u>DRN</u>
(volume 10, table 104) A code identifying the single activity authorized to submit item identification data, to the Defense Logistics Information Service (DLIS), for a specific item of supply.	
12. Authorized Item Identification Data Collaborator Code	2531
(volume 10, table 104) A code identifying the activity or activities designated to collaborate on proposed revisions to the item identification data recorded at DLIS, for a specific item of supply.	
13. Authorized Item Identification Data Receiver Code	2532
(volume 10, table 104) A code identifying the activity or activities designated to receive automatic distribution of recorded item identification data.	
14. Commodity Material Management Category Code, DoD	2611
(volume 10, table 48) A code employed to classify items into categories by material commodity for management information purposes.	
15. Military Material Management Codes:	
- Major Material Category Code, Army (Volume 10, table 65) A code which identifies the major material categories or principal and secondary items to the CONUS inventory managers, National Inventory Control Point, or in the case of DLA/GSA managed items, the Army SICA which exercises managerial responsibility.	9256
- Cognizance Code, Navy (Volume 10, table 62) A code which identifies the Inventory Control Point office or agency which exercises supply management. The first position is numeric and identifies the stores account. The entire code identifies the combined technical bureau, command and inventory managers having jurisdiction over the item.	2608
- Material Management Aggregation Code (MMAC), Air Force (volume 10, table 66) A two position alphabetic code authorized to identify specific items, (National Stock Numbers), to be managed by a specific manager. These codes apply to systems, programs, selected Federal Supply Classifications and to the aggregation of related pieces of equipment.	2836
- Material Management Code, Marine Corps (volume 10, table 54) A code employed by the Marine Corps in classifying items into material categories. An Alpha code designates the agency within the DoD which has been assigned responsibility for integrated material management control. A numeric code designates internal Marine Corps material management responsibility for items not assigned to another service.	9257
16. Management Exception Rule Notes	9542
A notation entered against a specific MOE rule which denotes the properties, materials and conditions governing the MOE rule.	

e. The following table contains the valid combinations of PICA/SICA Level of Authority (LOA) codes to be used in MOE rule assignment (e.g. A PICA with a LOA of 01 can be entered without SICAs, or can have SICAs with LOAs of 5D or 9D only):

f. The following table lists the activity codes recorded in volume 10, table [104](#) and the various Levels of Authority each is authorized to be recorded at in the MOE Rule Table, (e.g. Activity code “AJ” can be entered in the table as a PICA LOA of 06, 22 or 99, it can also be entered on a MOE rule as a SICA with a LOA of 67 or 8D):

### 13.6.2 The MOE Rule FSG/FSC Management Exception Table

a. The table provides a complete listing of Federal Supply Classifications (FSCs) and/or Federal Supply Groups (FSGs) upon which specific MOE rules are limited to submitting. When an “E” appears in the “All Others” indicator column, the entries listed in the FSG/FSC column, are the only groups and classifications on which the MOE rule can submit. All others are excluded. When an “I” appears in the “All Others” indicator column, the entries appearing in the FSG/FSC column are the only groups and classifications upon which the MOE rule cannot submit. All other FSGs/FSCs can be submitted on. When an entry in the FSG/FSC column appears as two positions, the entry indicates that all the classes within the group are included (e.g., 67 -- means all of group 67). All other entries are four positions and denote the complete Federal Supply Classification. The table is listed in MOE rule order.

b. The following data elements and related Data Record Numbers (DRNs) appear within the table:

<b>1. Inclusive/Exclusive Code</b>	4497
A code which designates whether “all other” FSGs and FSCs than those listed for a specific MOE rule are included for, or excluded from use by the MOE rule.	
<b>2. Assigned Federal Supply Group</b>	3994
The Federal Supply Classification allows 99 segments called groups. Each of these groups is assigned a two digit code, (e.g. Group 10-Weapons, Group 13-Ammunition and Explosives).	
<b>3. Assigned Federal Supply Class within Federal Supply Group</b>	3996
The Federal Supply Classification allows the Federal Supply Group to be subdivided into 99 classes. The classes within any group are considered to be closely related. The combination of the Federal Supply Group and the specific class within the group, constitute the four digit Federal Supply Classification.	
<b>4. Assigned Federal Supply Classification</b>	3990
A code which identifies the supply classification of an item of supply under the Federal Catalog Program, or an item of production and/or a homogeneous area of commodities with respect to their physical or performance characteristics.	
The first two digits identify the Federal Supply Group and the last two digits identify the class within the specified group. The combination of these four digits constitute the Federal Supply Classification.
