Total number of guidelines applied:						44,426			
Total number of cases:						40,739			

)))))))))

⁴Of the 42,436 cases, 1,697 were excluded due to missing information on guideline applied. For cases in which a cross reference was used, the primary guideline is shown. The primary guideline is the guideline that most fully explains the sentence, and may be either the only guideline applied or, when more than one guideline is applicable, the one that yields the highest offense level. Descriptions of variables used in this table are provided in Appendix A.
