

Engineering Plant C₁ Metabolism

- **Preface** - ME, genomics & pathway discovery
- **Background** - Why plant C₁ metabolism is crucial
- **Objectives & personnel** - 3 aims, 5 PIs & labs
- **Progress** - Emphasizing the unexpected
- **Project output** - Publications, workshops, websites

Genomics & Pathway Discovery

“Pathway modification and **discovery** are part of the flux determination process”

Gregory Stephanopoulos, *Metabolic Engineering* 1: 1(1999)

Background on Plant C₁ Metabolism

- Provides C₁ units (methyl, methylene, formyl) for biosyntheses - all are essential
- Engineering hi-methyl products (e.g. lignin, alkaloids, osmoprotectants) competes with other metabolism for C₁ units
- Massive photorespiratory C₁ fluxes

Plant C₁ Metabolism

High-Methyl Engineered Products

Glycine betaine
(osmoprotectant)

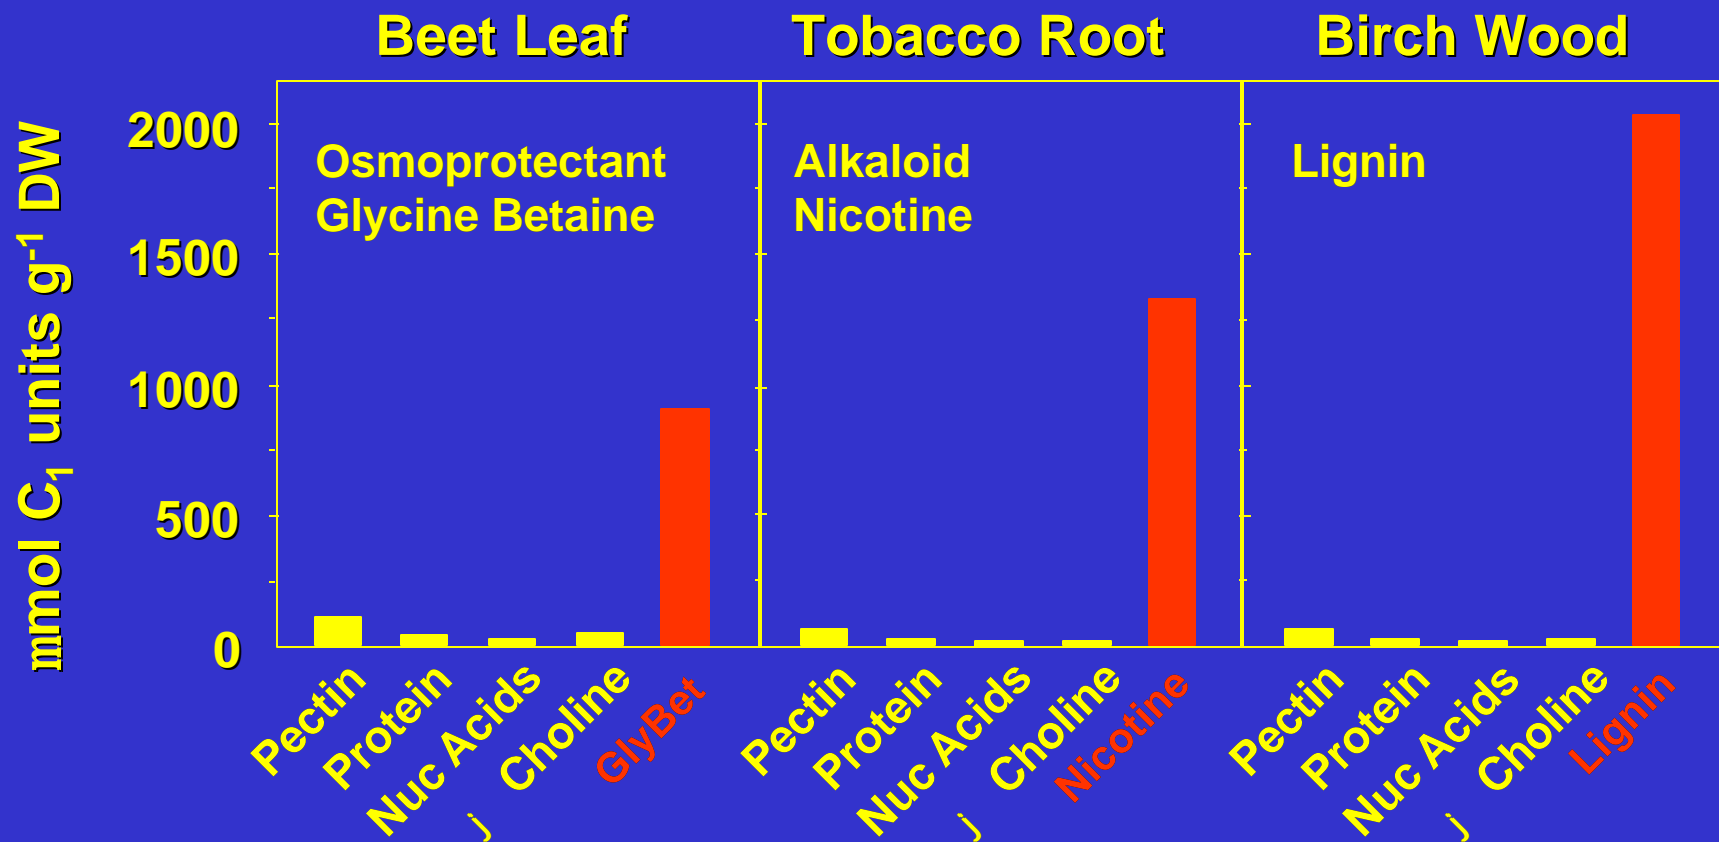

Caffeine
(alkaloid)

Syringyl lignin

The scale of C₁ demands in plants

C₁ Metabolism in Photorespiration

»25% of CO₂ fixed

Plant C₁ Metabolism

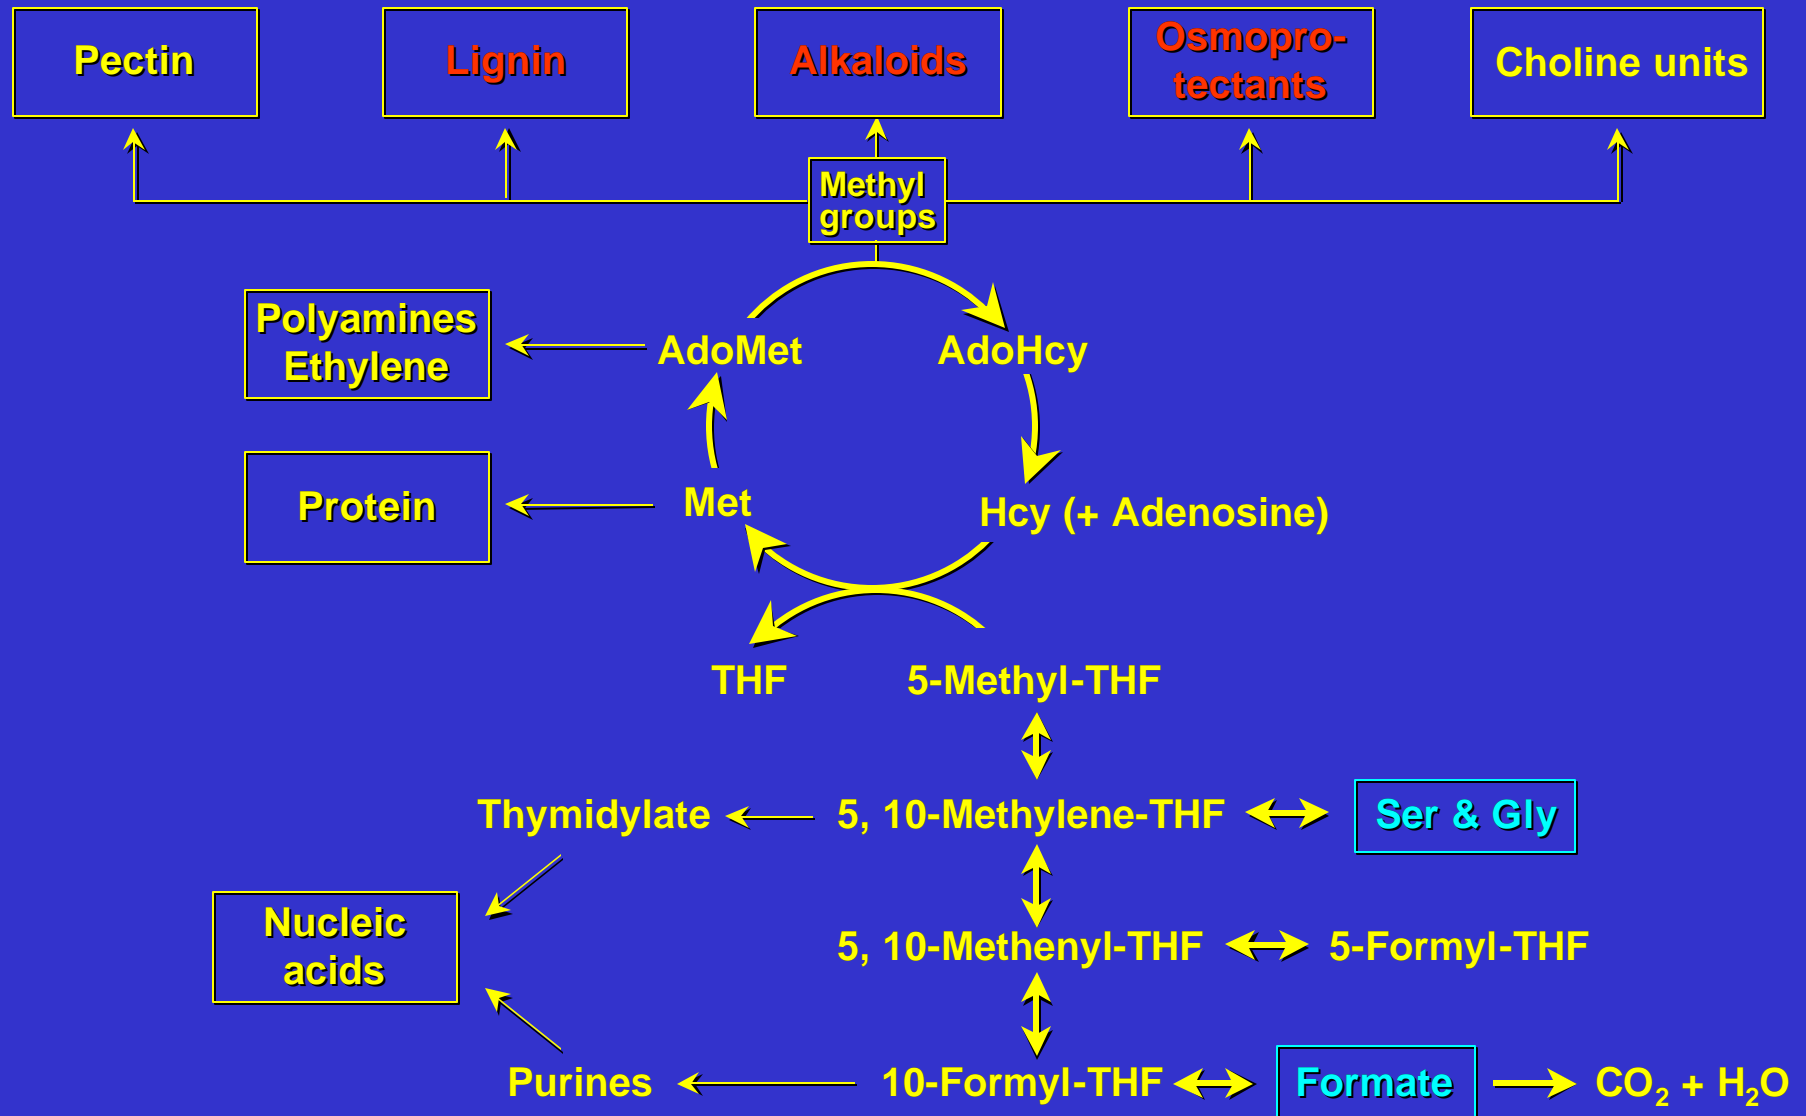

Engineering Questions

- **System response to C_1 demand - or $\bar{}$?**
 - **Metabolic flux**
 - **Gene Expression**
- **Enzymes exerting major flux control ?**
- **Relative importance of C_1 sources ?**
- **More pathways ? Compartmentation ?**

Engineering Objectives (Tobacco and maize)

- Essential preliminary cloning, build DNA arrays
 - MTHFR de novo
 - » 20 genes by homology
- Raise or lower C_1 demand and supply
 - Antisense/sense
 - Mutants
- Measure fluxes (MS, NMR, radiolabeling) & gene expression (DNA arrays), integrate by modeling

Plant C₁ Metabolism

Plant C₁ Metabolism Group

PI	(Univ)	Expertise	GAs/PDFs
Hanson	(UF)	Biochem/Mol Biol	1.5
Bohnert	(UA)	Mol Biol	1
Rhodes	(Purdue)	Models/Biochem	1
Gage	(MSU)	An-Biochem/MS	1
Shachar-Hill	(NMSU)	NMR/P-Biochem	1

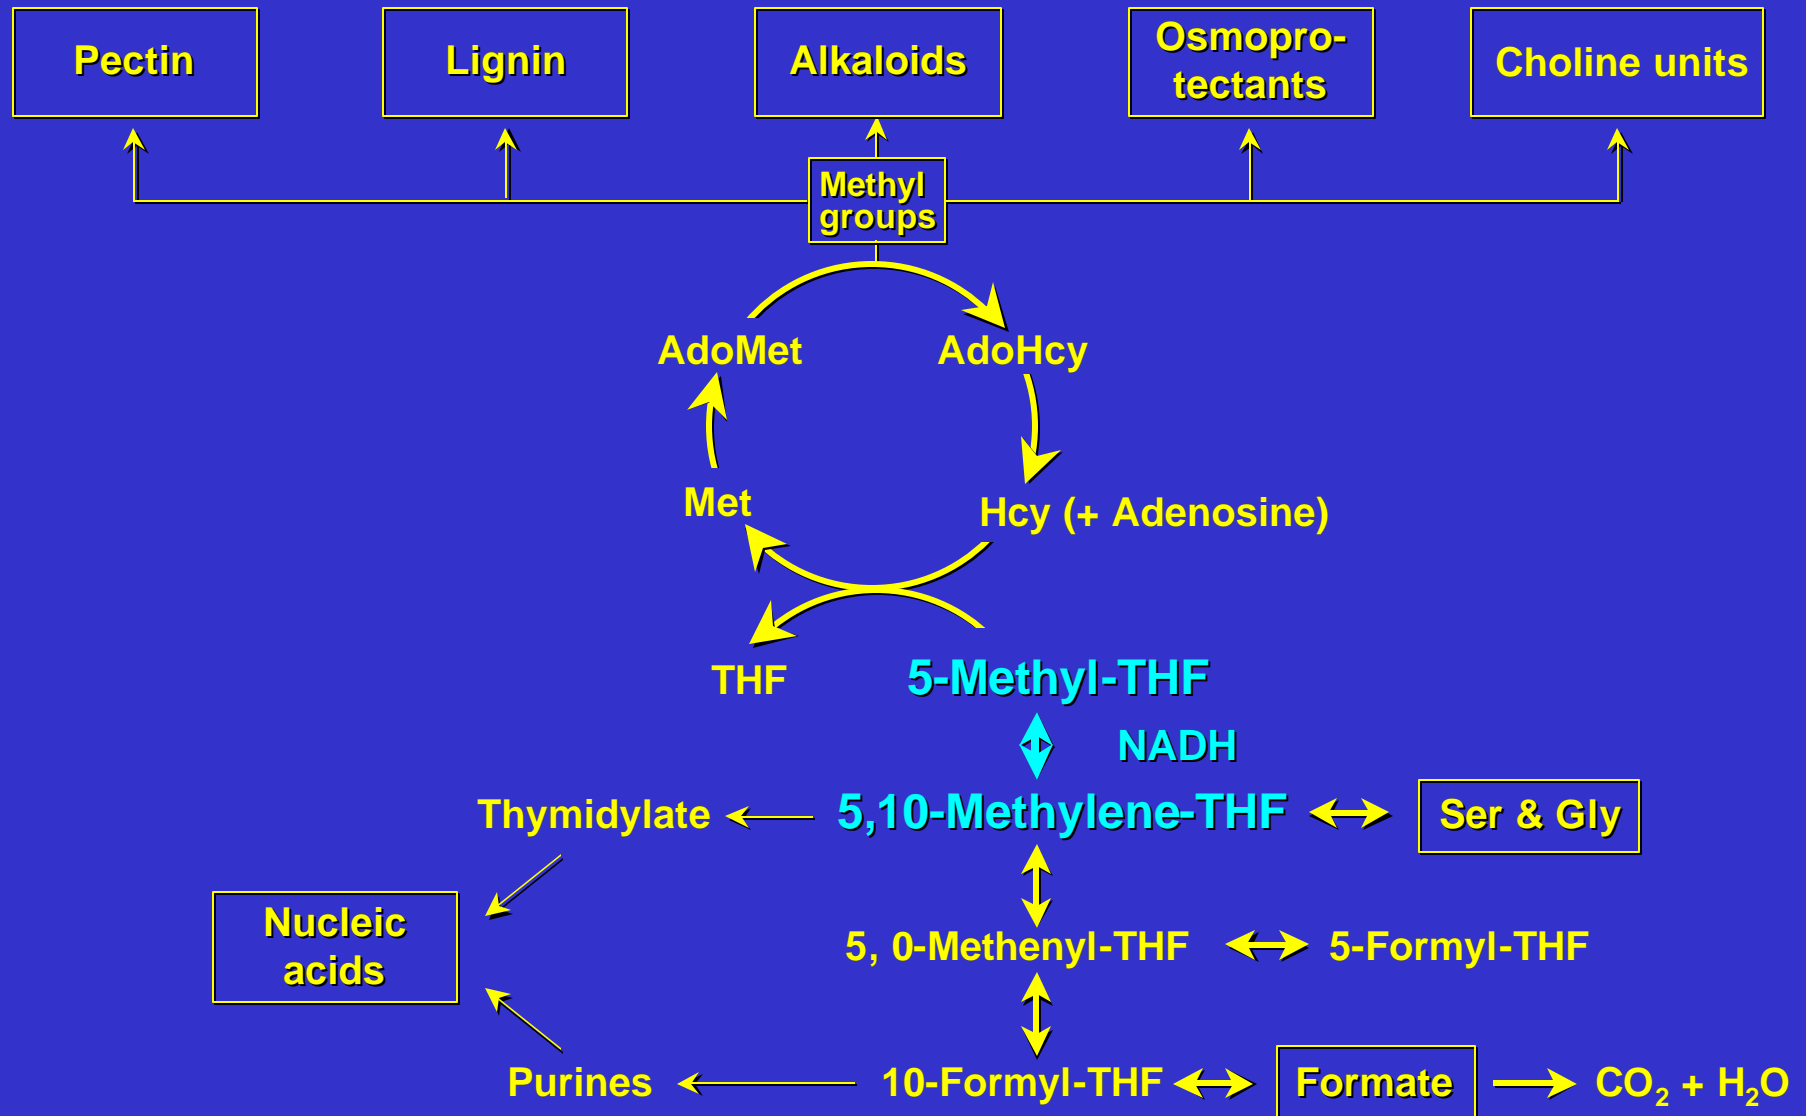

Progress - Highlighting the Unexpected

- **Methylene-THF reductases**
- **Maize DNA arrays**
- **Engineering glycine betaine synthesis**
- **Genomics & pathway discovery - PurU**

MTHFR: What was surmised

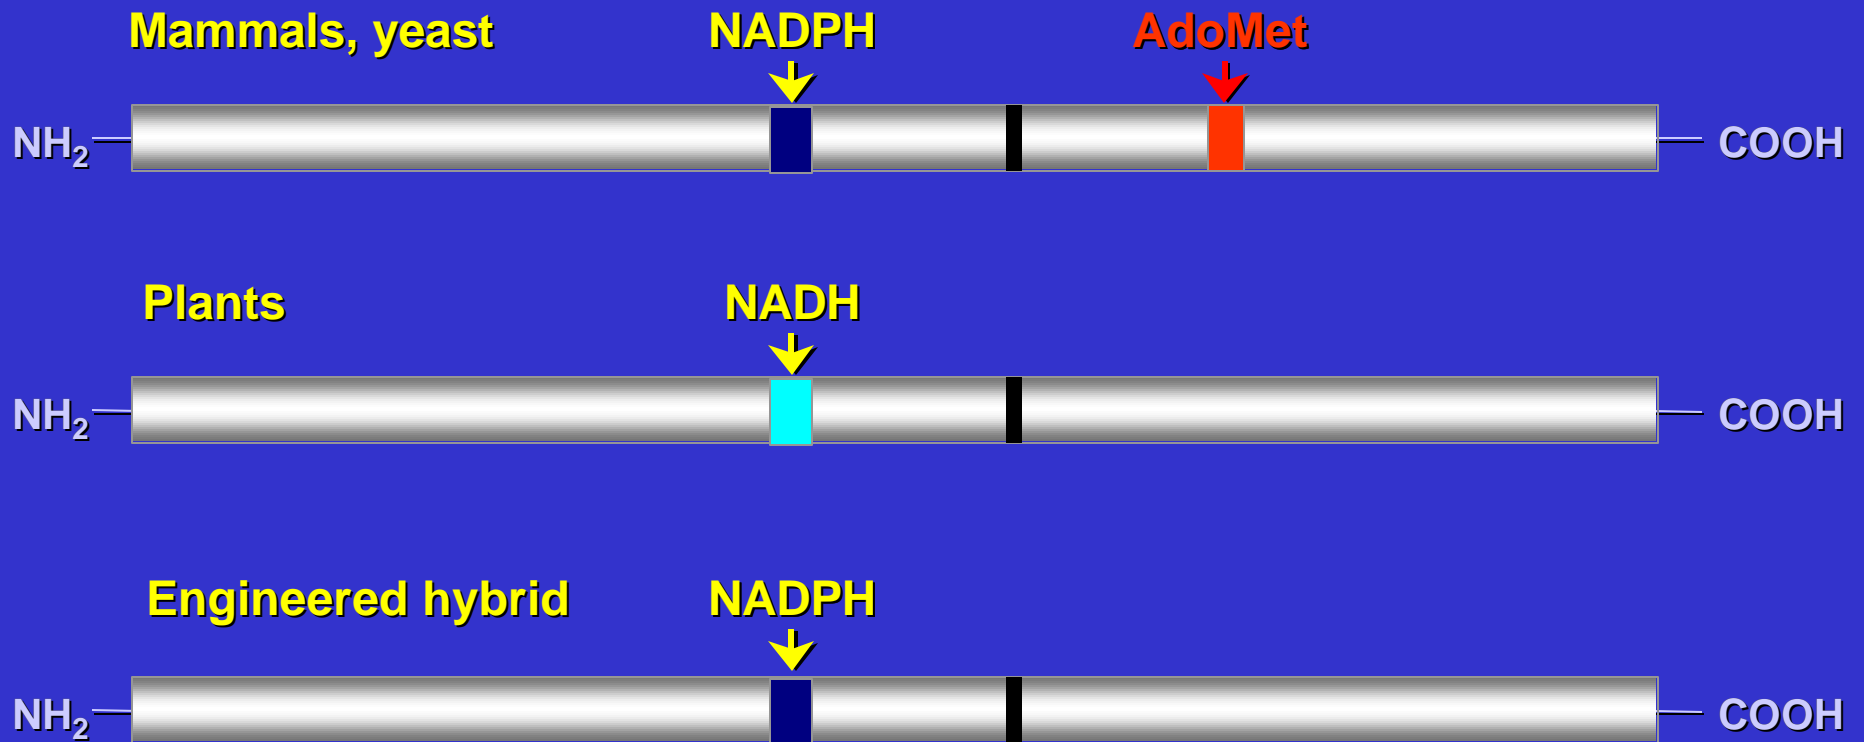

MTHFR: What we observed

Methylene-THF Reductases (>600 residues)

Catalytic domain

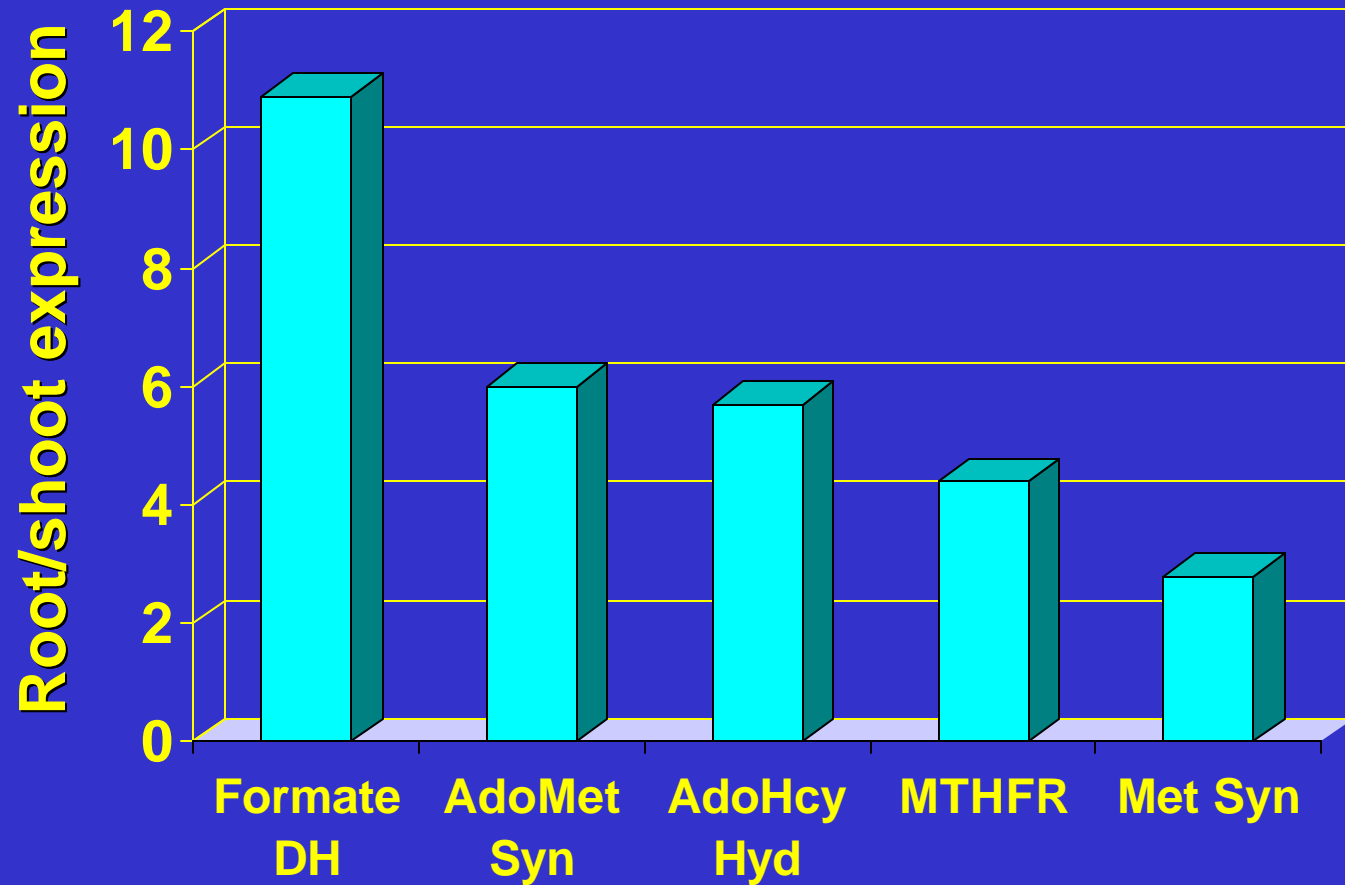

Regulatory domain

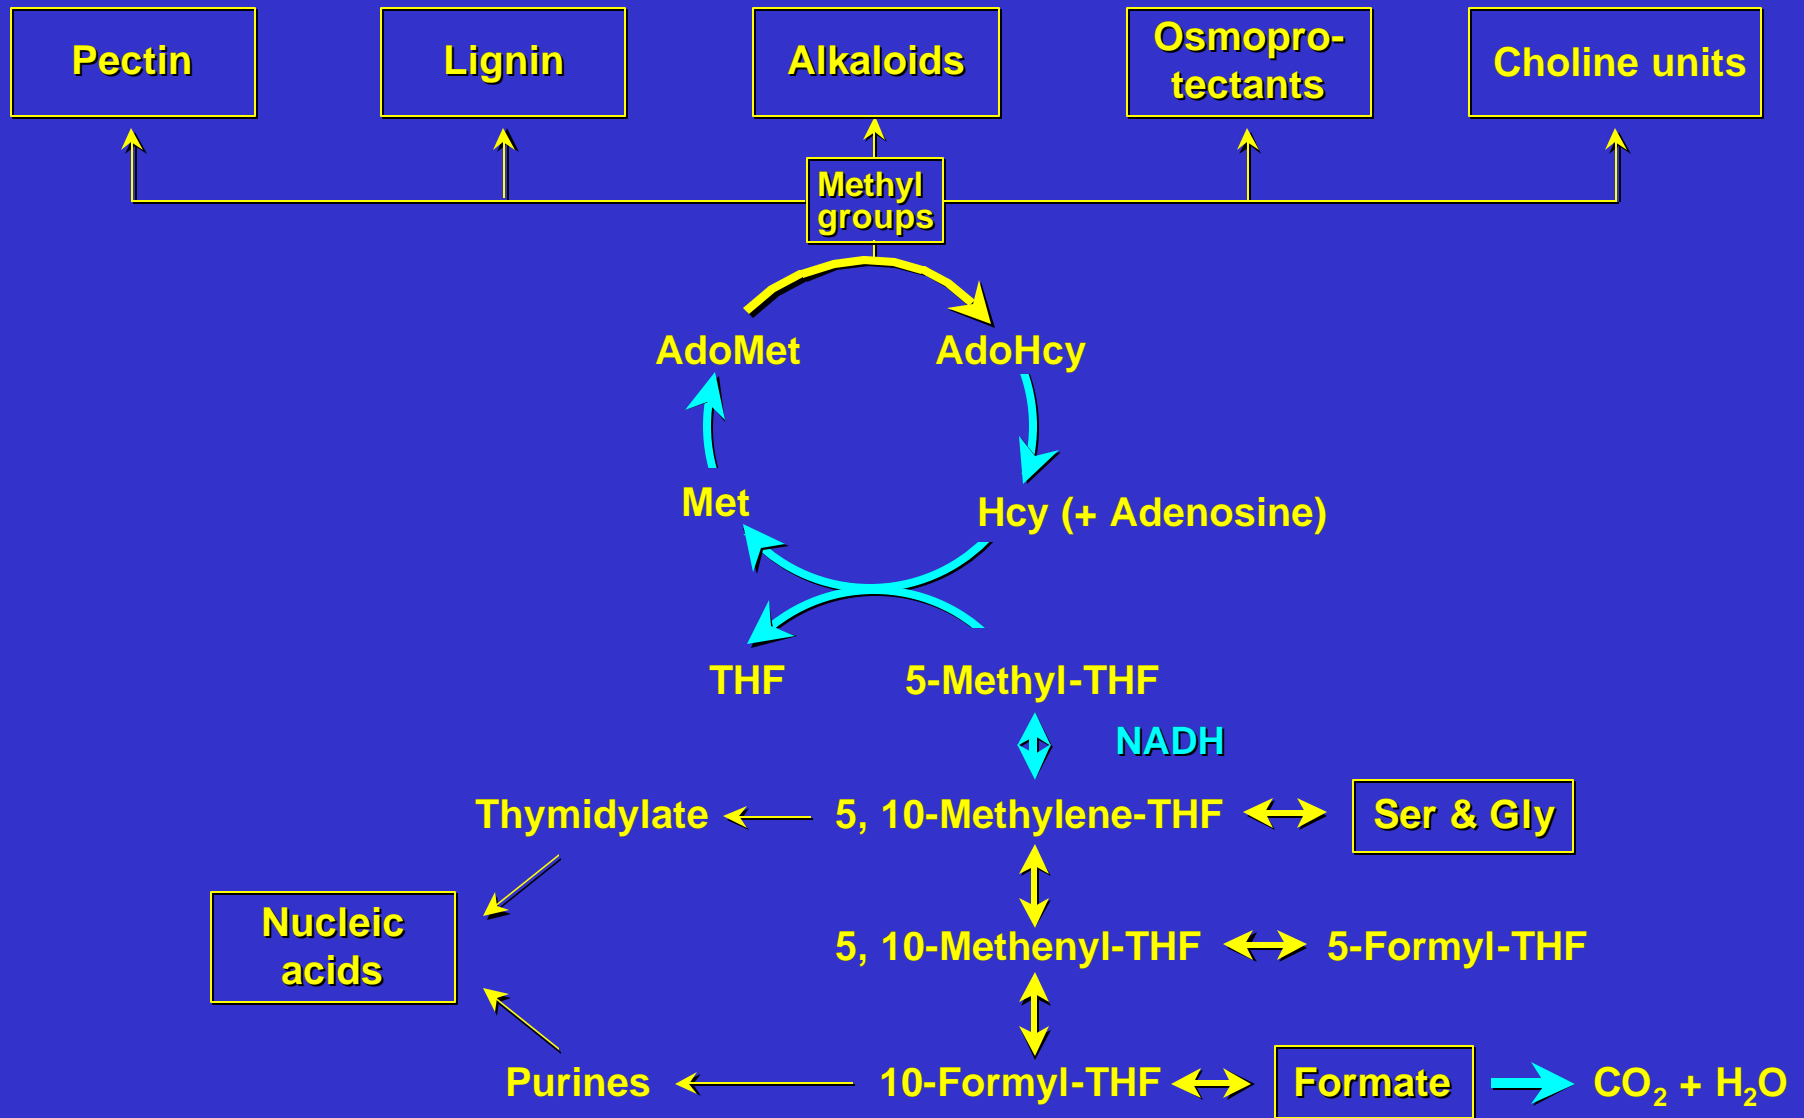

Plant C₁ Metabolism

First maize DNA array data

Plant C₁ Metabolism

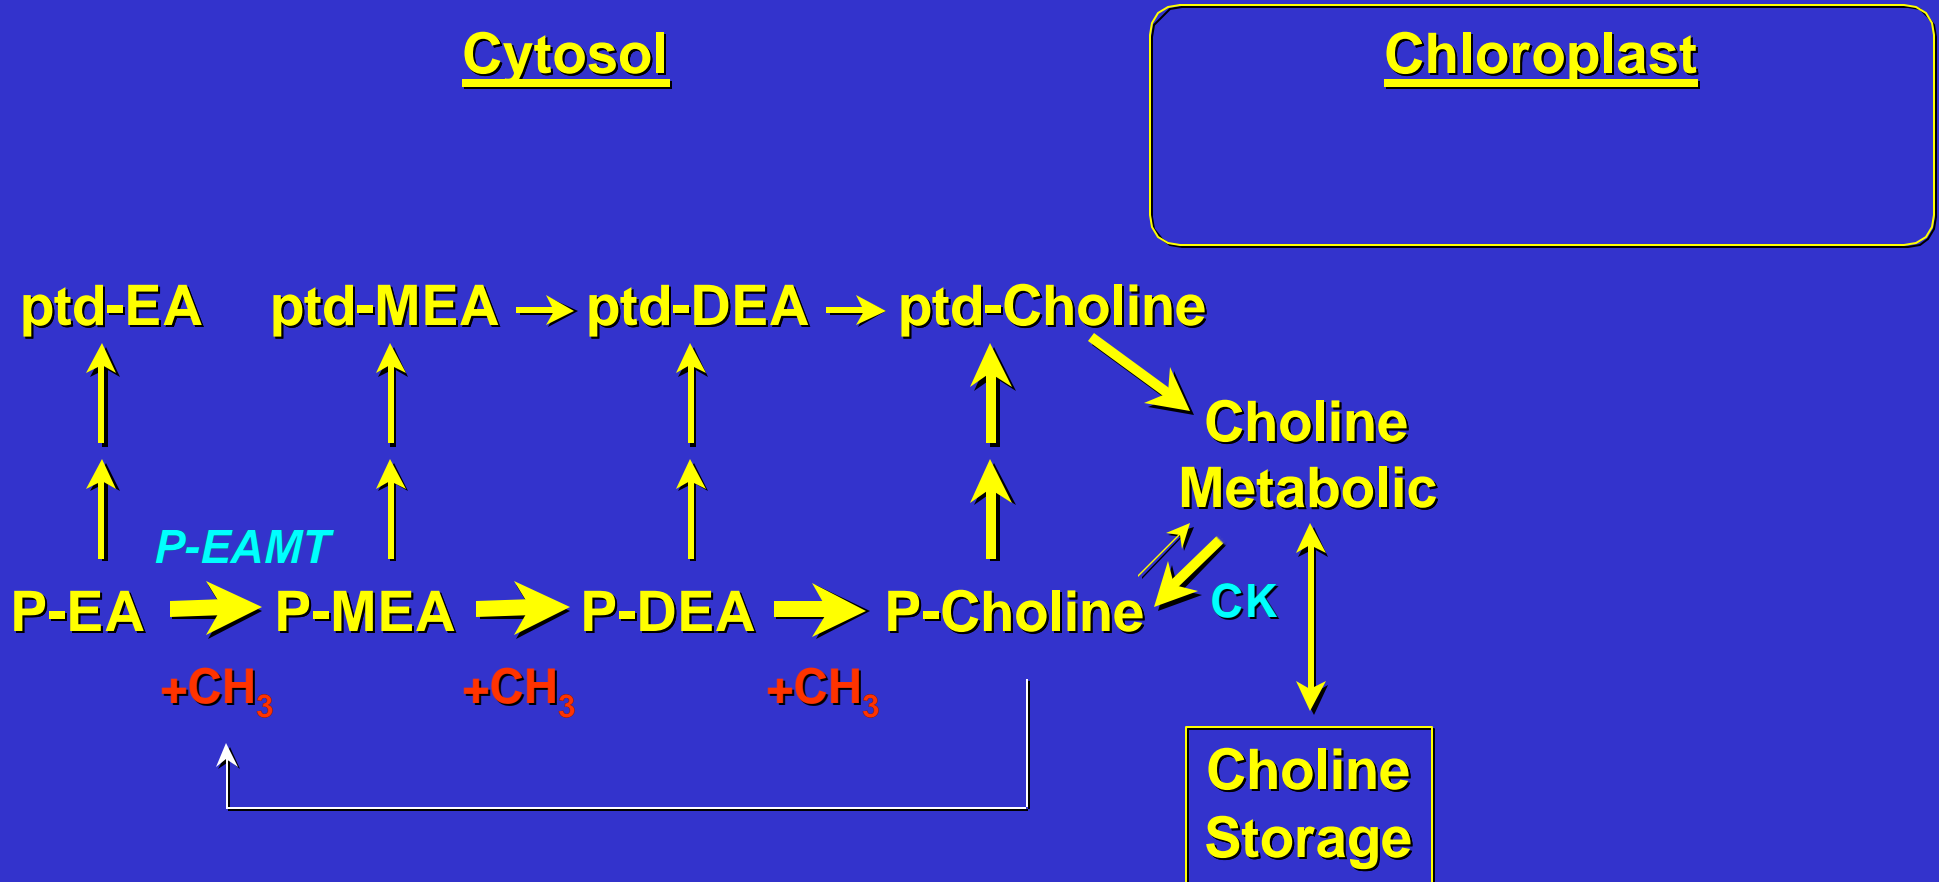

Glycine betaine synthesis

Cytosol

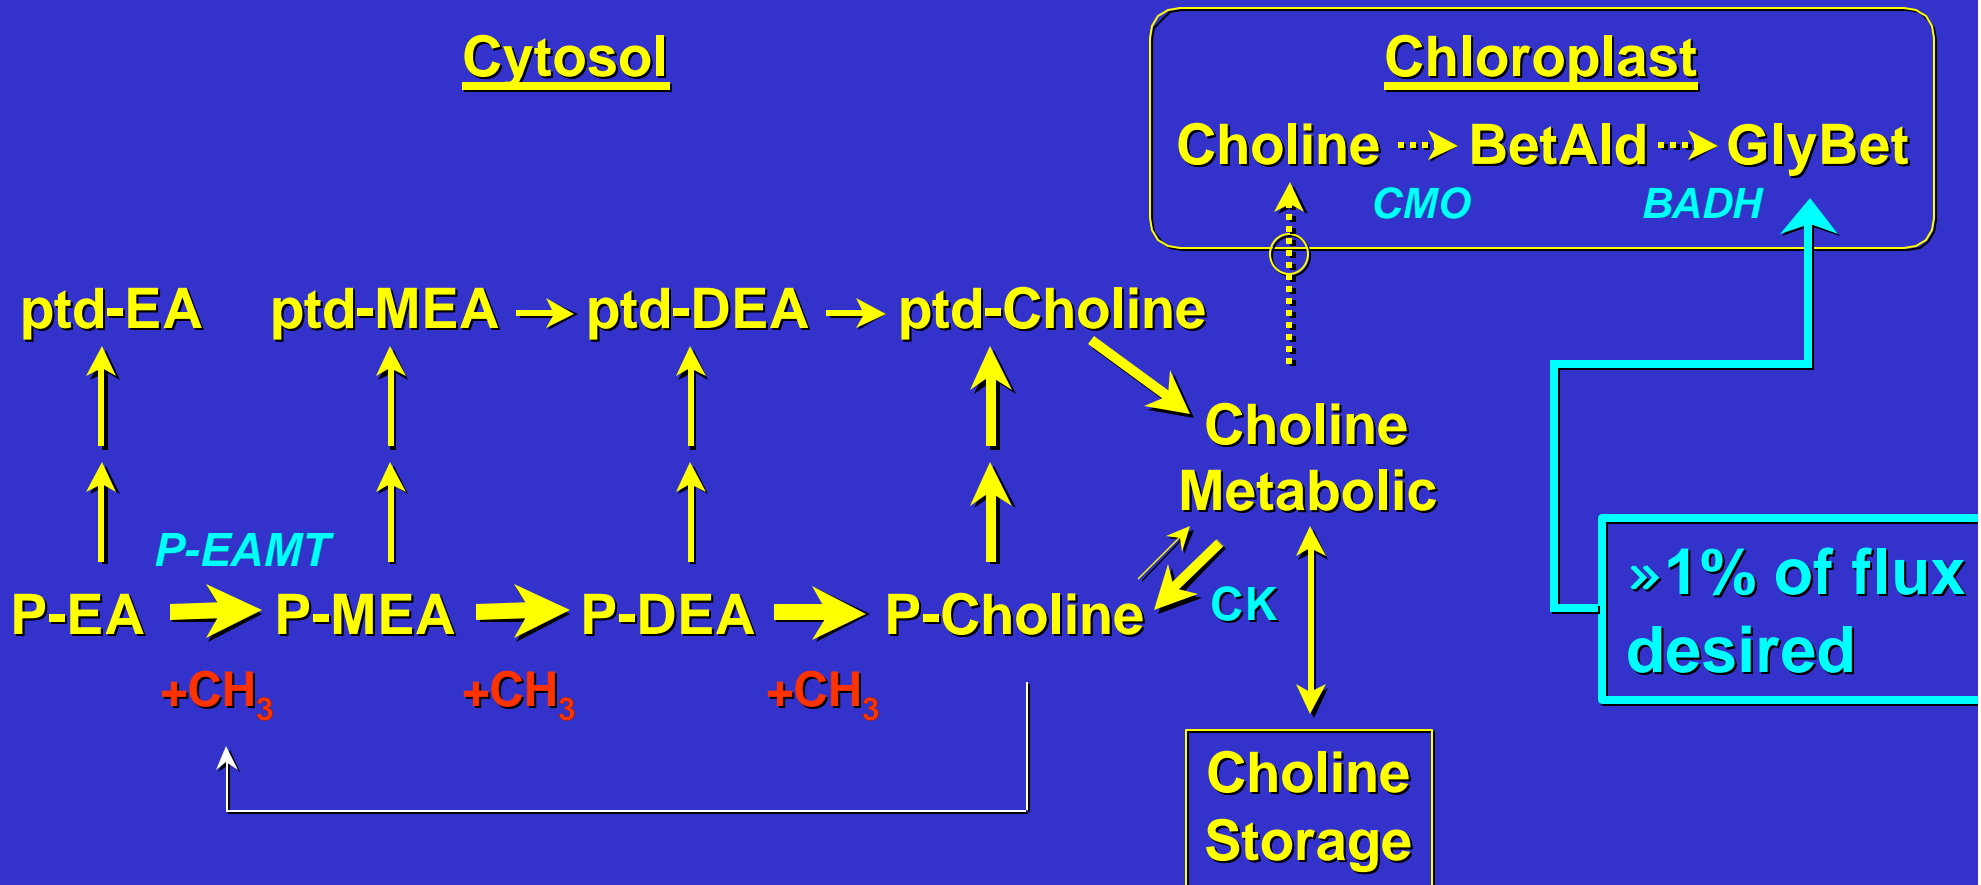

Chloroplast

Engineering glycine betaine synthesis Wild -type tobacco

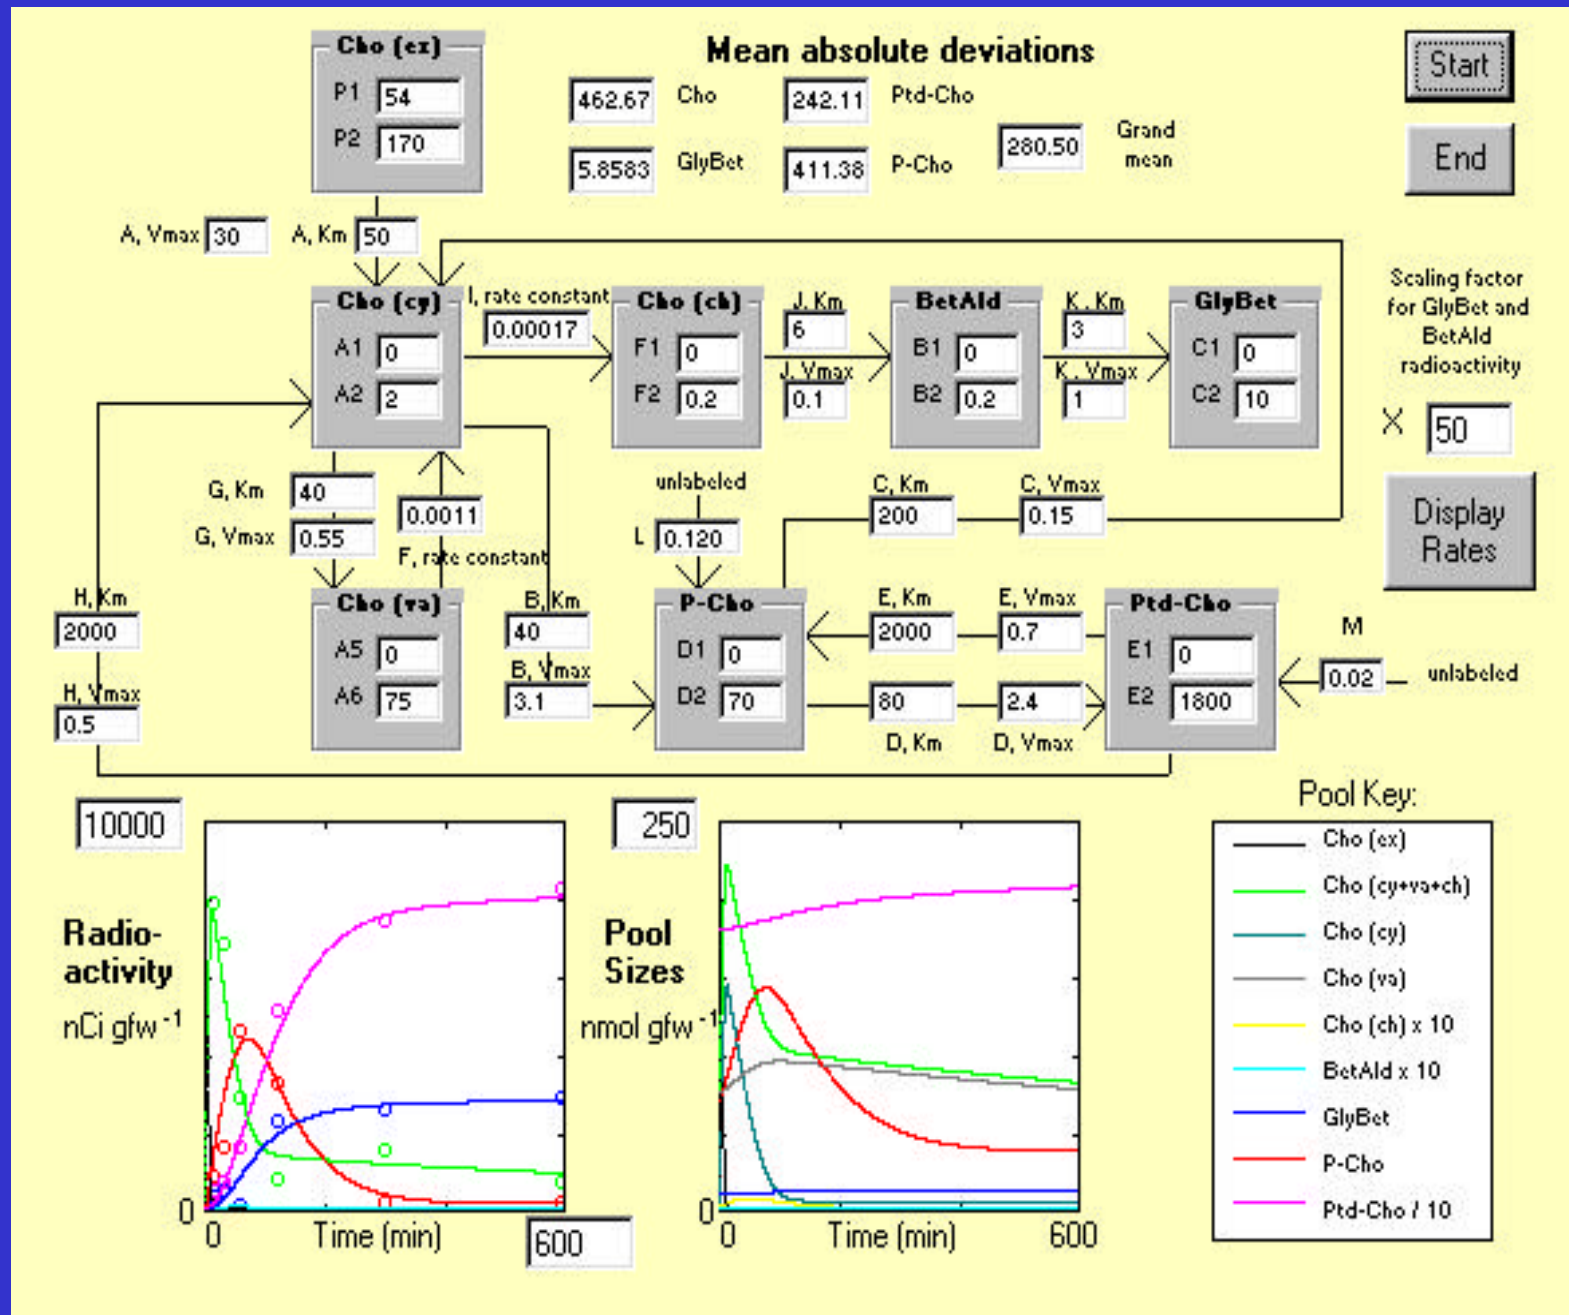

Engineering glycine betaine synthesis Transgenic tobacco

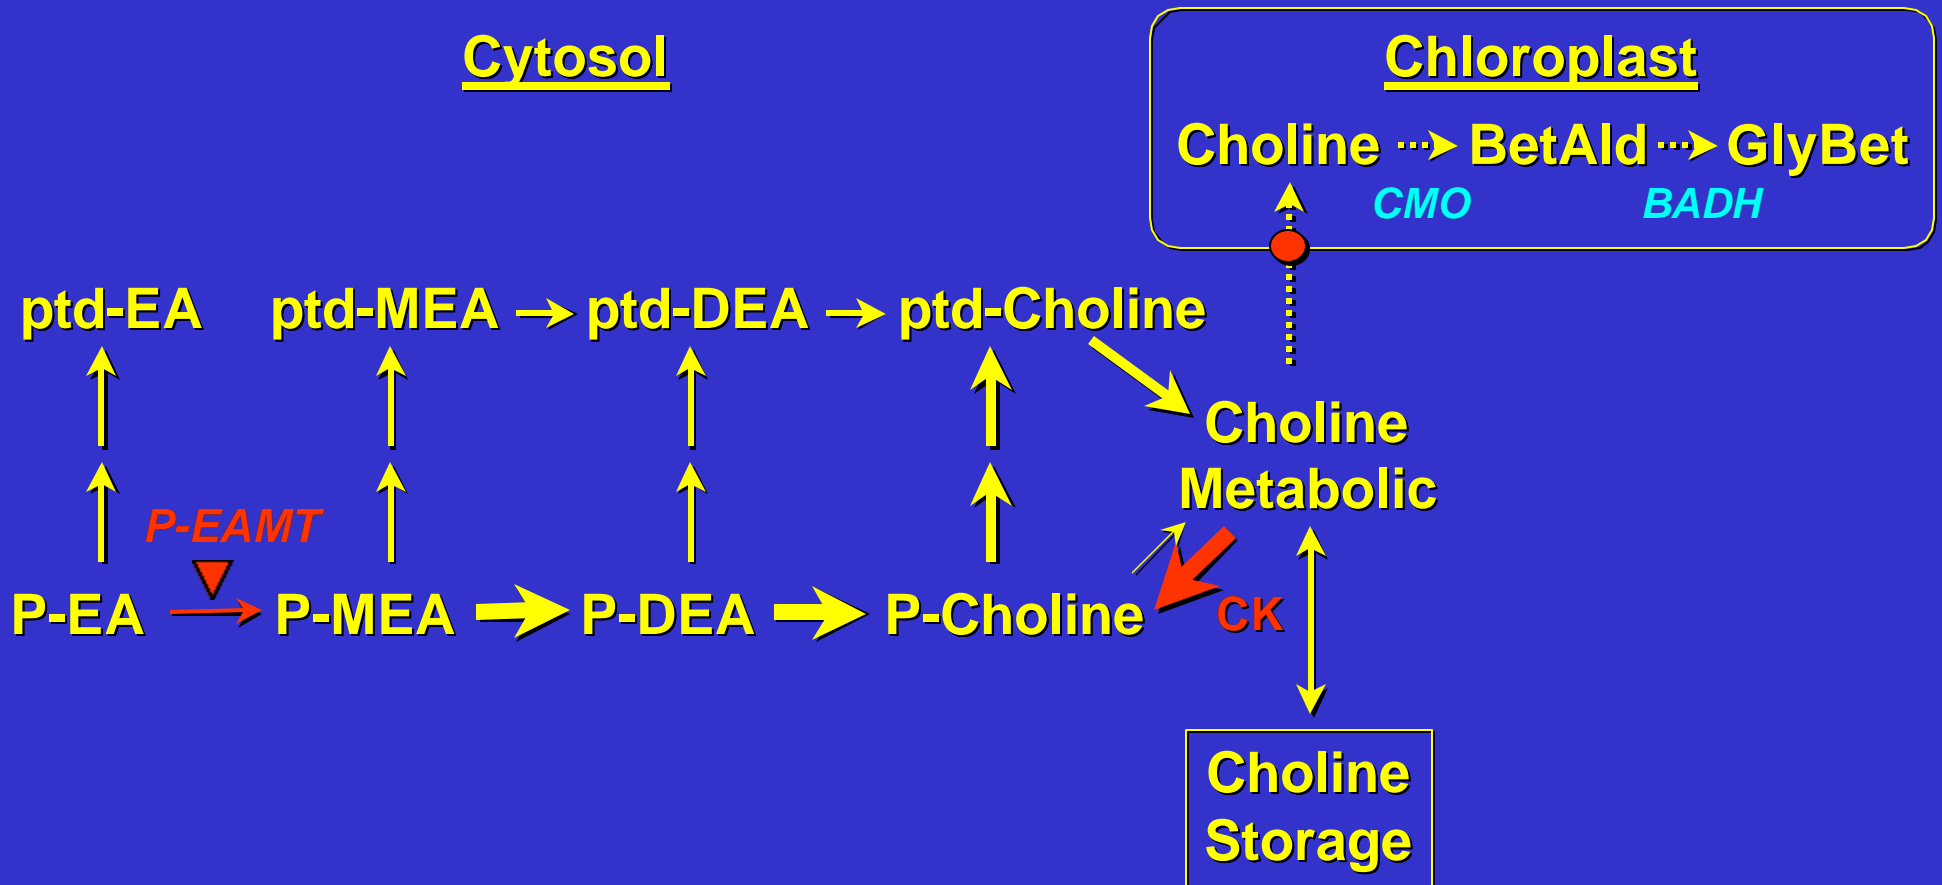

Metabolic Models & Engineering

- **David Rhodes modeling website**
 - <http://www.hort.purdue.edu/CFPESP/models/models.htm>
- **First lay out model network of reactions**
- **Isotope tracer (radiolabel, MS, NMR) and pool size measurements**
- **Fit model predictions to data by varying model parameters (fluxes, pool sizes)**

Engineering glycine betaine synthesis Transgenic tobacco

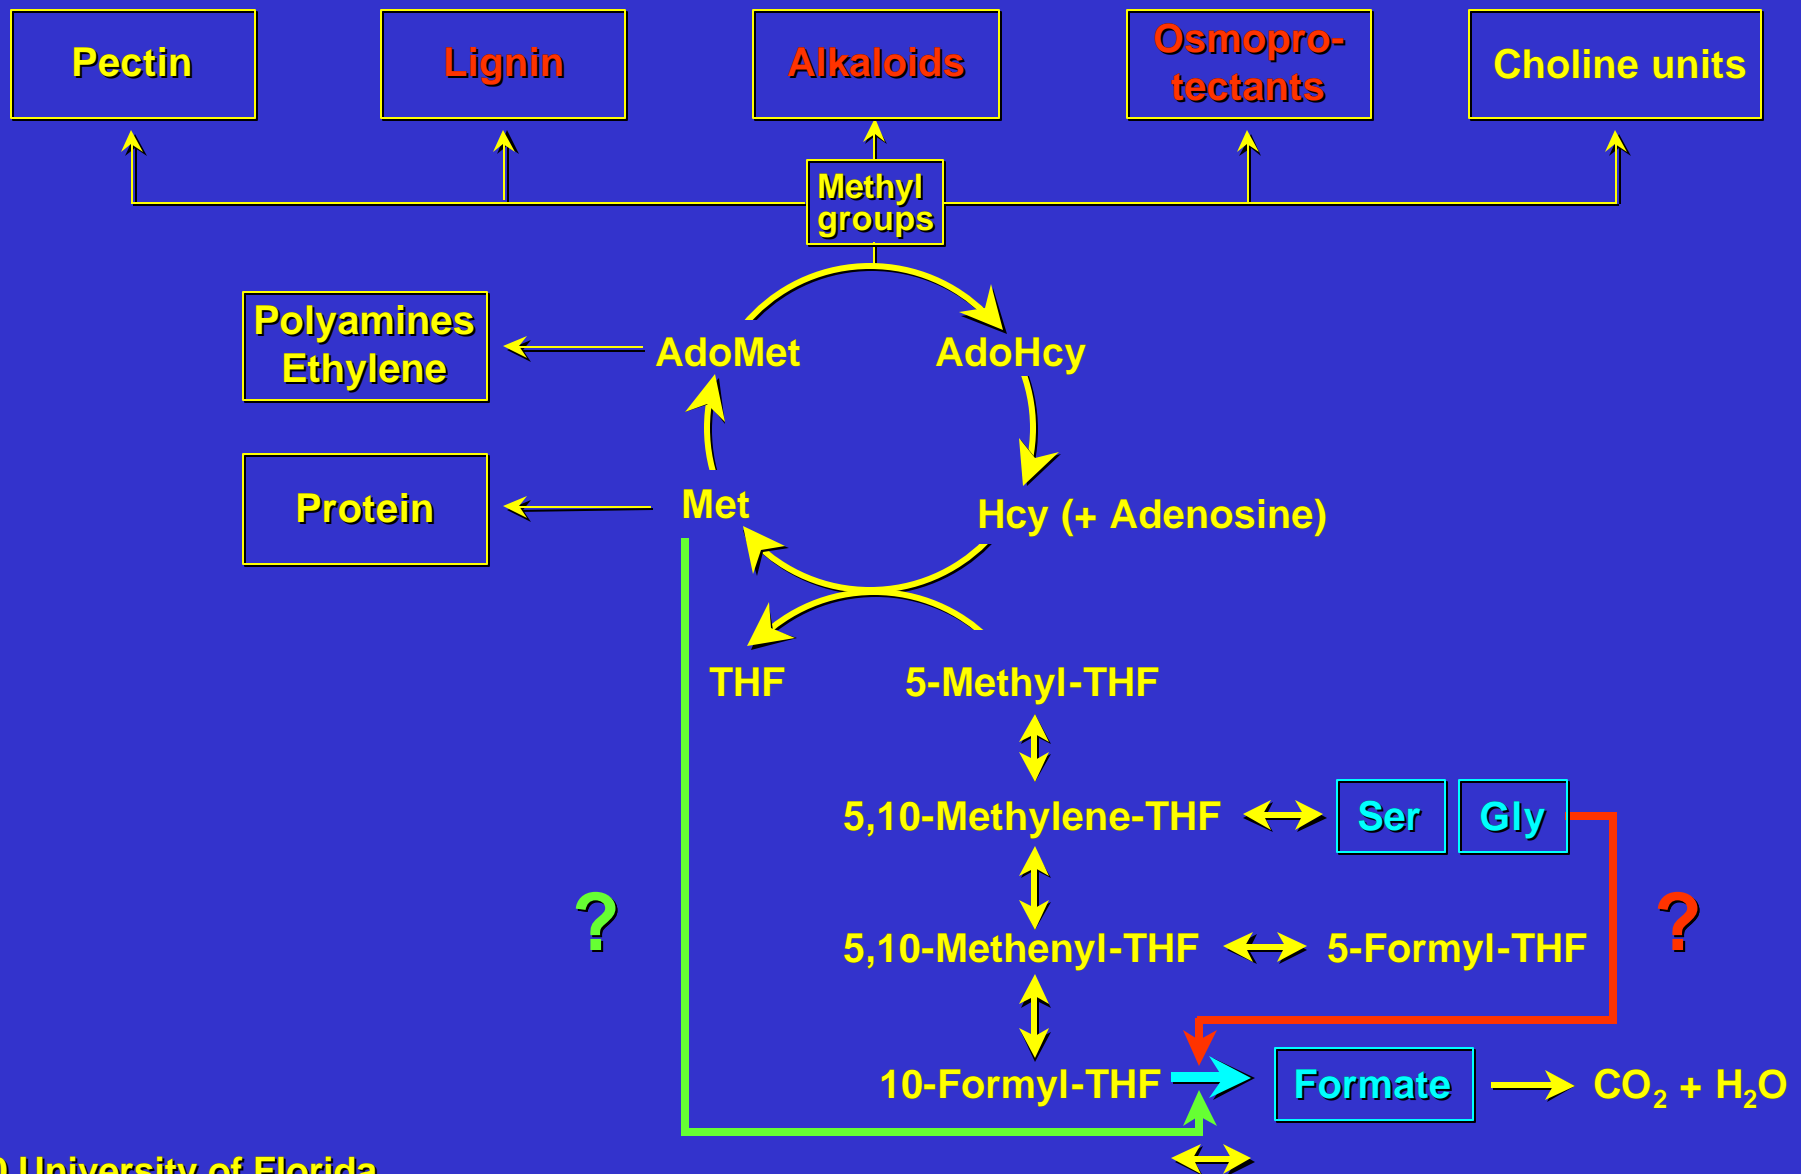

Genomics & pathway discovery - PurU

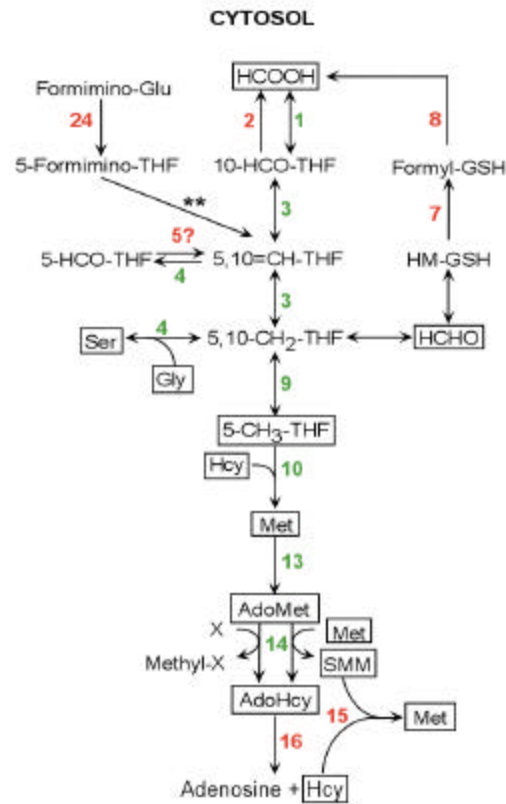

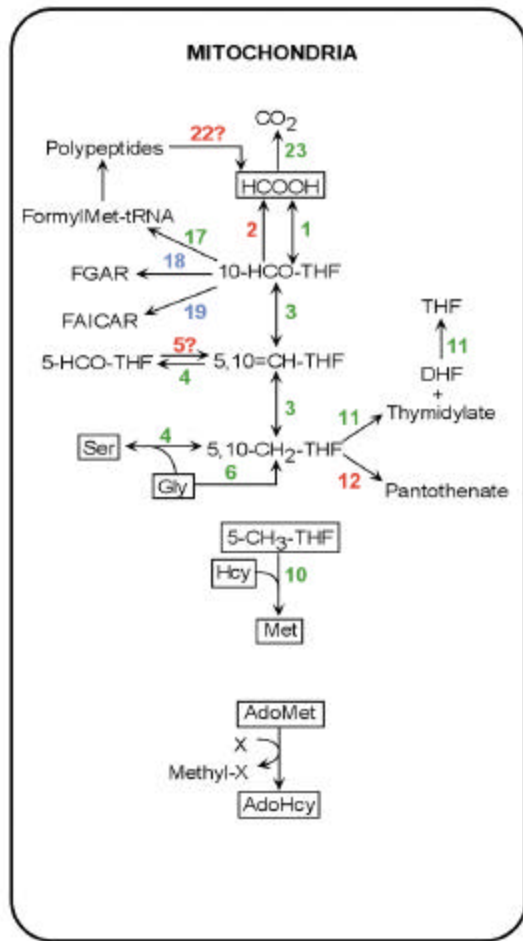

- *E. coli* PurU = 10-Formyl-THF hydrolase

- Present in bacteria, not yeast or mammals
- Plants have ³ 2 PurU homolog genes & ESTs
- PurU homologs encode 10-formyl-THF hydrolase
- Plant enzymes appear mitochondrial (as is FDH)

An unexpected source of formate

Outputs - Publications

- *J Biol Chem* - MTHFR cloning & characterization
- *TIPS* - Invited C₁ metab & engineering review (genomics)
- *J Biol Chem* - MS approach to S-methylMet cycle*
- *Plant Physiol* - Modeling of choline metabolism*
- *Plant Physiol* - Engineering/modeling GlyBet synthesis*
- *Metab Engin* - Engineering/modeling GlyBet synthesis*
- *Plant Cell* - Invited metabolic modeling review
- *Annu Rev Plant Physiol Plant Mol Biol* - Invited C₁ review

* MS or modeling supported by C₁ grant

Outputs - Workshops, Websites

- **Zia Symposium III - January 2000, NMSU**
Hands-on computer sessions, 60 participants
- **ASPP Annual Meeting - July 2000, San Diego**
Minisymposium on models in metabolic research & eng
Hands-on computer sessions, 60 participants
- **David Rhodes metabolic modeling website**
<http://www.hort.purdue.edu/CFPESP/models/models.htm>
- **C₁ Project website (data, materials, protocols)**
<http://www.hos.ufl.edu/meteng/1Cpage1.html>

Funding Agencies

PI	Agency	Award dates
Hanson	NSF-IBN	Feb 99 - Jan 02
Bohnert	NSF-IBN	Feb 99 - Jan 02
Gage	NSF-BES	Feb 99 - Jan 02
Rhodes	DOE-BES	Sep 99 - Aug 02
Shachar-Hill	NIST	May 00 - Apr 03
