

## Just the Facts...

## Visual Information Division

Good design does not come in a software package. It is gained through years of training and experience, and our creative team, here at USACHPPM, provides it through a variety of customized multimedia products.

We are committed to continuous improvement of the quality products we create for our clients and to the corporate image of USACHPPM.

### Services

- Illustrations (Scientific, Mechanical and Technical)
- Multimedia
- Publication Design
- Displays and Signs
- Photography and Videos
- Graphics for Web Page Design
- 3-Dimensional Illustrations and Plotting of Geographic Information System Maps
- Scanning
- Self-Help Briefing/Presentation Support
- Color Reproduction
- Printing Preparation of Electronic Files

### Displays

We combine text, illustrations, photography, and graphics to create unique, attention grabbing displays and signs. Specialized signage and vehicle graphics are available in magnetic, weatherproof, and reflective materials.

### Photography

Our photographer is able to provide still photography products in 35 millimeter, medium, and digital format and video products in VHS, S-VHS, and digital format.

Photographic services include:

- Photographs and/or videos of location site surveys and equipment damage documentation; medical, aerial, architectural, and portrait photography; laboratory procedures; public relations events; close-up (macro) work; and copy work.
- Duplication of videos, compact discs, DVDs, and slides.
- Processing and printing photographic film.
- Creating display size prints (up to four by eight feet).

### Presentations

We produce briefings/presentations in compact disc, 35 millimeter, slide, and electronic format. Using our high-end software, we can generate exciting computer graphics, manipulate photos, and use multimedia techniques to enhance or design your presentations from initial concept through final product.

### Special Services

We can customize our services to your program's specific needs. Let us know if you have an interest in new technology or other enhanced services; defining your needs can help us plan for the future.
