COVER

An M9 armored combat earthmover is offloaded from a logistics support vessel during Exercise Foal Eagle, an annual combined-joint exercise in South Korea. Exercises such as Foal Eagle provide opportunities for soldiers to practice wartime operations with personnel from other U.S. Services and other countries. Articles beginning on pages 34 and 38 propose development of joint and combined support systems to sustain all warfighters.

This medium is approved for the official dissemination of material designed to keep individuals within the Army knowledgeable of current and emerging developments within their areas of expertise for the purpose of enhancing their professional development.
